Here's some examples of Billy Smith's "education," though:

Billy "I can't read" Smith fucks up again when he claims in <gsJRg.2244$o71.124@newsread3.news.pas.earthlink.net>:
"By the way, weren't you required to retest per a letter from FCC enforcement bureau? Shall we post the record for all to see again? They
don't make people retest unless you have been accused or proven to have
committed rules violations."
Billy can't read the ARRL website which states:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. The FCC has the authority, pursuant to §97.519(d)(2) of the rules to readminister any examination element previously administered by a volunteer examiner.

Billy "Dumbass who can't put together a sentence" Smith shows off those English skills, quite ironically in <VfQHf.14581$rH5.8121@newsread2.news.atl.earthlink.net>:
"That's interesting there idiot. I bet you really did flunk high school math and probably elementary too. Oh thats right, wasn't that when was in
Floriduh. Spelled Florida but the DUH is for your Dumb Ass."

"wasn't that when was in Floriduh" - Billy makes good fuck up!

Billy "shoots" himself in his palsied club foot once again in Message-ID <Q0bJf.19641$vU2.7735@newsread3.news.atl.earthlink.net>:
"Roger, shots himself in the foot"

Billy the "Rhodes" scholar fucks up again and even demonstrates he is an imbecile in <8uqwg.8275$vO.7632@newsread4.news.pas.earthlink.net>:
"Right you are, wannabe Rhode's Scholar!"

Billy the illiterate retard Smith screws up again, and his illiteracy is exposed. "It serves him right."
in<hauKf.1410$S25.940@newsread1.news.atl.earthlink.net>:

"Deserves him right."

Billy "retard" Smith confesses to his generally accepted retarded
status in <LwpLf.2321$F56.2317@newsread3.news.atl.earthlink.net>:
"I'm a general retard. bwhahaha"

Billy "spelling champ of the general retards" Smith admits his bad
hygiene but is still in denial about his English skills in
<QxpLf.2322$F56.1169@newsread3.news.atl.earthlink.net>
"Sure I can spell and smell."

"Billy" the NOtwordSmith fucks up again with this incompete sentence
in
<qgyNf.5576$S25.341@newsread1.news.atl.earthlink.net>:
"So when you got divorced boy, did your finally figure out that your
more"

Billy "cumgargler" Smith managed to awaken from his drunken stupor to
slobber
in <fbIOf.442$sL2.25@newsread2.news.atl.earthlink.net>:
"Isn't that you mom weighed"

Mr."Education" Billy Smith steps on his own dick again when he talks
about others' "educations" (or educatiion" as he spells it) in
<w7IOf.436$sL2.167@newsread2.news.atl.earthlink.net>:
"Uh, huh. Right LOSER. Still smoking that dope again? By the way how
is your
so called educatiion actually doing for you? Those online classes."

Billy Smith shows off his Pulitzer Prize writing skills in
<B9IOf.439$sL2.255@newsread2.news.atl.earthlink.net>:
"You're whole life has been exhaled before."

Billy "illiterate retard" Smith spikes the "HUH?" factor in this
slobbering in
<MGqUf.16833$S25.8455@newsread1.news.atl.earthlink.net>:
"Come on, do it just have you some spiked Kool Aid."

"Didn't" your special-Ed teacher teach you how to spell, Billy?
in <OCqUf.16826$S25.10695@newsread1.news.atl.earthlink.net>:
"...didnt Marie teach you to play nice"

"Rhodes scholar" Billy Lardass Davies Smith blunders and blows his
cover again in <Et%0g.6340$sq5.1769@newsread2.news.atl.earthlink.net>:
"Rhode's scholar Scheissman blows his cover again."

Billy "dumbass" Smith steps on his own tiny dick when he tries to
criticize others' typos,but he doesn't "perform" well as usual with
his blatant "stupidity" in
<oCk1g.5958$Es3.3907@newsread3.news.atl.earthlink.net>:
"Noteed!!!!!!!!!!!!! Bwhahahahahahah. You're a brilliant one
Scheissman.
You even peform stupid acts on your blatant stupidty"

Billy "dropout Lardass" Smith steps on his own dick when he tries to comment on others' spelling abilities, but he "can't" do any better in Message-ID: <mQr3g.8970$sq5.4914@newsread2.news.atl.earthlink.net>:
"Woger cant spell very well anyway."

Billy "dropout pizza BOY" Smith fucks up his sentence again when he blathered in <WdZfg.629$lp.259@newsread3.news.pas.earthlink.net>:
"How about those retest letter you received for jamming."

Billy "illiterate " Smith claims to have been in the Library, but he can't even spell "I've" correctly, maybe Billy should check out the English tutoring books there in WpFgg.
1310$lf4.1288@newsread1.news.pas.earthlink.net>:
"Ive been to quite a few libraries on Sunday and a lot of them are open."

Billy Smith "the" ill-educated moron fucks up again in <4zxLg.15720$Qf.5115@newsread2.news.pas.earthlink.net>:
"Roger is about to finally have th final episode where..."

Billy Smith stumbles on his club foot in his fat mouth when he tries to claim "hillbillies" are somehow inferior(he squeaks from "experience"?) in <7CdRg.11366$v
%4.8492@newsread1.news.pas.earthlink.net>:
"Is that another fine quality of the Hillbilly state? You know, that third world one where you live full of miscegenation, inbreeding, and the like. Speaking from experrience again?"

Billy the spelling bee champ Smith fucks up again while trying to make fun of others' typos and pegs the irony meter in <my5Sg.
1536$Y24.130@newsread4.news.pas.earthlink.net>:
"Would that by "that" Woger? How abou that Todd rather than "Taod"?"

2983. ok what now?

Sorry, but I'm having trouble translating that sentence. - It looks like
english, but....?

As a practical matter, I usually can identify marine broadcasts because
they are talking about fish, weather, water conditions, navigation,
etc., whereas HAMs seem to be primarily interested in what kind of rig
they have, what they would like to have, and how their signal is coming
through. And sometimes about how bad their wives are treating them.

In response to the above, I installed an independent, outside ground "pole", drove it 5 feet into the ground, and connected it to the ground terminal on my DX-160. - It does seem to provide an improvement over my original ground (wich was connected to the house wiring ground). - A lot of the strange noises are gone or reduced. - Thanks for the suggestion.

I'm in one of the suburbs of Houston, and I suspect we don't have very good conditions. However, I'm getting lots of signals on the 30 - 40 meter bands.

This Sony was one of the ones I was considering. It was the right price, and I assumed the right brand, but wanted to check with someone who knew what they were doing. Those books look pretty interesting too, Joe.

Ill probably wait a few weeks, and let Uncle Sam buy me the radio.

If I encounter anything that hasnt already been discussed on this group, Ill pop in.

Thanks again for your help.

Dear "Telamon,"

This phenomenon (message not "taking") has happened to me previously
but only two or three times in the last several years. I have seen
some others complain of the same thing from time to time. I do not use
a news reader program; I just go to <http://groups.google.com/groups?
hl=en&lr=&ie=UTF-8&oe=UTF-8&group=rec.radio.shortwave> and generally
have no problem.

Do you think it has anything to do with sunspots? ;-)

Best,

Joe

P.S. Thanks for trying to help me. Your posts are always of interest.
What radio would you recommend as a first receiver for this person?

Dear "Telamon,"

Please ignore the last sentence - the question to you about a first receiver - in my previous reply to you - I got my messages mixed up. Senility ... ?

If most hams had to learn anything about computer languages they would not be online now. Lucky for them there are no code tests for the internet.

No one owns the internet.It's all up in the air.Something that is amazing to me is the propensity of so many people on the internet who don't know how to spell and or do not try to even halfway use proper English language.Sometimes I will make a typo.Although webtv does have a spell checker, (I guess it is still there anyway) I don't need to use it. Charlotte Thompson Iserbyt is right.

NASA has approved depends undergarments that they wear while on the trip up and comming back down. You don't want to let go of the controls to take a dump when your riding atop two solid rocket boosters & a tank of LOX and H going into orbit or on the way down hoping none of those dammed tiles came loose.

Obviously she had some smarts in her period of insanity to wear the depends while driving non-stop from TX to FL. I'm just wondering if she was on speed and/or valium?

Oh...here is the link on The Smoking Gun with a copy of her Rap Sheet:

80/40/10 meter dipole up a whopping 12 feet, depending
on how the rope has stretched. Aimed (the broadside)
approximately 50/230 degrees.
Some sort of balun center feed (that I don't think is any
better than the direct connect I had a few years ago).
RG 8/U.
TS-440SAT xcvr that I've owned for 20 years.

> tweaks. rg58 lead i think is letting in some rfi. want to go up to

I doubt that the type of coax would make a big
difference in leaking rfi. More important are the
terminations, IMHO.

BTW, nothing but static on 9840 right now.

Karl Self a ï¿½crit :
> Unplugging the reel antenna did the trick!
>

Ah ! Yes ! If you use the Sangean reel antenna with a MONO jack, then it disable the internal ferrite core antenna used on LW and MW !!!

I did try LW with an external longwire antenna (around 10 m), but the results are very poor... Perhaps for these wave length we need a much longer antenna ?

** CANADA. Harold Sellers of the Ontario DX Association advises me that CFRX 6070 has been off the air for several months due to a transmitter fault and a damaged antenna. It will be springtime, at least, before they are back on. They are having trouble fixing the transmitter and need to replace the antenna feedline, and possibly the antenna itself (Saul Chernos, Ont., Feb 4, amfmtvdx at qth.net via DXLD)

Sonys are the only decent SW radio - ignore this guy. You will be sorry, if you purchase the S350 - severe tuning-backlash, single-conversion superhet with bunches of images and birdies, no memories, filters that do nothing but muffle the audio, very cheap plastic case and switches, plastic speaker grill, smelly handle, and no SSB or sync/det. Get the Sony 7600GR, for a few bucks more.

She only told the cops she wanted to talk to the other woman. Anything else and she couldn't have gotten bail.

RELEASE: 07-23

STATEMENT REGARDING THE STATUS OF LISA NOWAK

The following is a statement from Michael Coats, director of NASA's Johnson Space Center in Houston, regarding the status of astronaut Lisa Nowak.

"We are deeply saddened by this tragic event. The charges against Lisa
Nowak are serious ones that must be decided by the judicial system. She is officially on 30-day leave and has been removed from flight status and all mission-related activities. We will continue to monitor developments in the case."

And one or two knives and a 3,000 pound car. Who knows how she
specifically intended to kill her rival. She made the statement to
the police so the intent was clearly there.

That's enough to charge her and likely get a conviction.

Unfortunately the people she is responsible for are the ones who willl
lose the most from her decision to threaten the life of someone else.
Her children have to live with mommy's choices.

Someone over there at www.lucianne.com said NASA let John Glen go
into Space again as a payoff for his protection for the klintoons.
Look in your public libraries for Popular Mechanics (or it might be
Popular Science,I have the magazine around here somewhere) magazine from
a few years ago.On the cover of the magazine (and the article inside the
magazine) it says, NASA! YOU ARE BROKEN!
A lady who retired from NASA,that is what she said.
Hey,I didn't write that article in that magazine.

G'day,

Last week I visited a major electrical department store that was staging a closing-down sale.

I admit I was searching for a bargain, but I had left it too late since all the good stuff I wanted was sold out - TVs, computers, 5.1 Surround Sound systems etc.

Fortunately I did manage to find a nice china cabinet that was on sale at half price. I knew my wife was keen to get a new piece of furniture, and after sending her some pictures of it from my mobile phone camera, we decided to buy it. So the trip to the store proved to be a good move.

I also came across a radio set that I had never seen before. It too was on sale at half price and I very nearly bought it. The only thing that stopped me was the fact that it appeared to not tune across the whole AM frequency spectrum, which in Australia ranges from 522 Khz to 1602 Khz for the commercial broadcast stations, and 1611 Khz to 1710 Khz for the mostly narrowcast stations. Being an avid narrowcaster, I needed it to tune as high as 1710 so that I could listen to the few narrowcast stations that operate in the Extended AM band.

The unit was a Sangean WR-2 which was designed for table-top usage in the home. It is a robust device, that includes PLL tuning, memory present, external AMand FM antenna connections. What was most novel about the unit was it's inclusion of RDS - Radio Data System - for stations in the FM band. I had never heard of RDS before, and was fascinated to learn about this intriguing option which provides analogue (and Digital) radio signals with a complementary data stream which will display text information about the station your listening to on a digital display dial for radios.

I hesitated to buy the Sangean, but finding it has lead me to investigate a whole new area of possibilities in radio. A little research on the internet and at various electrical goods stores around town has revealed that RDS is not widely implemented by commercial radio operators in Australia. Very few stores that I visited had devices capable of decoding RDS information. I guess it's a bit of a catch-22 situation - the big Australian commercial FM stations hardly use RDS and therefore why should Hi-Fi and car audio shops stock units that receive RDS signals?

Then I asked myself, is there an AM-Band equivalent for RDS? The answer I found is YES, but it has a very limited deployment, being only used as far as I know by the BBC. This AM system is simply called the AM Signalling System or AMSS for short, and it is capable of providing a similar type and

quantity of data streams as RDS does for FM. You can click the links for more techncial information on these topics, but I understand that AMSS is designed for Analogue AM radio, although AM digital radio, such as is available in Europe on the Digital Radio Mondiale (DRM) system, appears to have AMSS and RDS functions as standard.

It is sad to me that these data systems for FM and even AM radio have not been given the attention they should in Australia. I mention this because I believe these systems add value to radio broadcasting that makes radio listening much more user friendly for people operating in a TV saturated age. But much needs to change in our regulatory environment before such options become viable for church radio stations to implement. Narrowcast radio stations in Australia are not likely to get permissions to migrate to a digital platform for some time after the Commercial and Community stations make their transition.

The Philistine

It's been said that the airwaves are getting quieter and quieter (ham bands). True. The ranks of the licenses amateur radio operator have been decreasing in recent years. Think about this, think critically. People used to learn code and the written tests and pass them in good numbers "back in the day". The tests were harder, too. In times past, with the code exam, you hade to have "solid copy". no omissions. no errors. Nowadays, for the written exam, you can get for your study materials the question pool. Study the actual questions you'll see on the test! The old timers didn't have that privilege. What has changed is the culture. Entities such as the ARRL see themselves dying, so they must bring people into the amateur ranks somehow, so the push is on to make it easy. There are several reasons for the drop in interest in ham radio. In it's heyday radio was king; mysterious technology, cutting edge. Electronics were expensive; a valve (tube) could cost a youngster a week of delivering newspapers back-in-the-day, whereas today a valve (transistor) costs pennies. This has also become an "instant gratification" culture. I recall discussions going on giving that as the reason Heathkit stopped making kits (Heathkit survived, but they make educational systems). Someday, even the written exam may be dropped. What sort of people will be coming into the hobby, when a person no longer has to work hard, no longer must put forth some effort? 10-9, good buddy

>would be useful.

I tried to find a VOR transmission on the evening when I first read your
thread on the subject. I found 9840, but the signal was too crummy to ID,
so I never posted a followup. Just tonight, I got a listenable signal
at 8:11 PM Seattle time (04:11 UTC, Feb. 8) but it faded out in about
15 minutes.

Strange, a couple of months ago, 15595 kHz (as I remember) was
booming in.

Did they cut back transmissions or is it just propagation?

Accuracy: NOS
Monitoring: Internal monitoring plus status indicator
at control point
Owner: LEBANON-SPRINGFIELD AIRPORT BOARD
Operator: LEBANON-SPRINGFIELD AIRPORT BOARD
Common system usage: yes
For public use: yes

Non Directional Beacons. These are transmitters that in practically all cases only transmit an ID in morse code, consisting of 1, 2 or 3 characters. Since the signal is transmitted in slow morse code, it doesn't require too much time to learn to decipher these IDs.
These beacons are intended for (both civil and military) air and maritime navigation. By tuning into two different beacons by means of antennas with directional sensitivity it is possible to determine ones exact position. The exact locations of the beacons are known and thanks to their ID (and the format of this ID) they can be easily identified. Each NDB has its own format. One may transmit 1 ID, followed by a 3-seconds' gap (pause), another ID and 3-seconds' gap, etc; another one can transmit 2 IDs, followed by a 17-seconds' tone and then repeat the whole procedure; some may also transmit 1 ID, followed by a 3-seconds' gap and an 8-seconds' tone, etc.

Since these signals are mainly intended for airplanes and ships at not too great distances, they don't need much transmitting power, which makes them especially attractive for DX-ers, because in spite of their reduced power, very often distances of over 2,000 or even more kilometers can be bridged. They concentrate mainly on low frequencies (I suppose because of the reliability of reception on these frequencies) below the Medium Wave band, although there are also NDBs in the actual Medium Wave band. For use in Europe the range between approx. 250 and 520 kHz is used, but there are also beacons on lower frequencies (the Long Wave band is not being used for broadcasting in the Americas).

I'm in Sydney and all of the Sydney commercial radio stations broadcast
RDS, from my location, I can receive the following RDS enabled frequencies:

088.3 - WSFM
095.3 - VEGA 953
096.1 - THE EDGE
096.5 - WAVE FM
096.9 - NOVA 969
099.1 - WSFM
101.7 - WSFM
104.1 - 2DAY FM
104.5 - STAR1045
104.9 - TRIPLE M
106.5 - MIX106.5

Additionally, with WSFM's three frequencies, they make use of the
alternate frequency (AF) feature of RDS, my car radio will automatically
choose the best received frequency. WSFM also broadcast with the traffic
programme (TP) tag. Some of the stations also broadcast artist/track
name, weather information, news, time, etc.

Triple J used to broadcast RDS but have since stopped.

I've seen various cars with RDS enabled systems, such as the Ford Focus,
my friend's Peugeot, the VW Golf, etc. My car's aftermarket Sony tuner
also has RDS capabilities.

No problem. I think your problem has to do with article numbers. Your
news reader determines what articles to display based on what you have
already read, which is marked as such. When the news server gets reset
the numbering can change and some new articles from you and other people
may not be displayed. You can reset the news group or un-suscribe and
then re-subscribe to reset the news group in your news reader. You will
have to re-mark all old articles read again that are still on your news
server.

I think a good first new receiver would be an Eton E1.

Can anyone educate me as to what is required, equipment wise, to listen to the AFRTS broadcasts on 5446.5? I *think* I'm getting something on my DX-302, but can't tune it so it comes in any better than the "Donald Duck" voice no matter whether I select USB or LSB, and no matter where I tune the BFO pitch knob . . .

I was a big fan of my old DE1103 before I sold it and I would put that
$50 radio up against the S350 with absolute confidence, on a side-by-
side test my Degen was even more sensitive than my Sony SW55. Mind you
I still reckon the OP would be wise to follow the good advice on this
thread and consider the 7600.

3052. The Legendary Norman Corwin on DVD

Hello Fellow OTR fans:

It's so hard to find anything on DVD about OTR. In fact, you might say it is impossible. In my quest to search for more material on the subject I recently discovered a DVD movie called "The Poet Laureate of Radio,
An Interview with Norman Corwin". I found this interview to be very informative. It's fun to listen to this man whose time spent during this period is the stuff of legends. Even Hollywood movie critic Leonard Maltin reviewed the DVD and gave it high praise. Check it out when
you get a chance. I've provided the link below.

Don't feel too alone; RDS is not widely deployed in the USA either. I'd say maybe 10% of American FM stations use it, and well under 1% of receivers. It does make DXing a LOT easier, as here we have a scheme to map a specific transmitter directly to a code transmitted in the RDS stream. (though one major broadcaster has stopped observing that mapping)

AMSS is totally unheardof here. American stations have used a similar modulation scheme in the past for closed-circuit signaling, for example to remotely shut down consumers' water heaters during peak load periods. I haven't heard anything about such use in a LONG time. I would suppose AMSS would be mutually incompatible with AM stereo, not that that would be a big problem with AM stereo pretty much obsolete.

> designed for Analogue AM radio, although AM digital radio, such as is
> available in Europe on the Digital Radio Mondiale (DRM) system, appears to
> have AMSS and RDS functions as standard.

I'm sure Europe's Eureka 147 system (used on VHF/UHF) also has data functions. In both cases it's not technically RDS but serves a similar purpose.

Here in the States, we have (unfortunately) a digital radio system called "IBOC", alternately "HD Radio". It contains provisions for "Program Associated Data" which is the digital equivalent of AMSS/RDS. A limited amount of data is available for MW IBOC stations - so far all I've seen is display of the station name. (call letters)

Ironically, while only maybe 1% of analog receivers sold in the US can receive the RDS transmissions of analog stations, in my experience 100% of the new IBOC receivers can!

Yes, the S350 is total crap, but the Degen 1103, can be had for $65,
including shipping - the Degen 1103 is basically, the same radio, as
the over-priced E5/G5.

From: Guerite&#65533; <aim@their.heads>
Message-ID: <12smsa3hb688663@corp.supernews.com>
Source record: 105110

Carbon Dioxide Emissions from the Consumption and Flaring of Fossil Fuels (Million Metric Tons of Carbon Dioxide) - 2004

China's emission of 4,788 Million Metric Tons of CO2 produces a GNP of $2,264 Billion
U.S.A.'s emission of 5,912 Million Metric Tons of CO2 produces a GNP of $12,970 Billion

U.S.A. produces 4.64 times more GNP per metric ton of CO2 produced than China.

Who should cut back Greenhouse gases?
A Democratic country which is a relatively efficient user of fossil fuel?
Or an inefficient Communist country which will soon exceed the CO2 emissions of any country?

China is one of the world's biggest emitters of carbon dioxide, the principal greenhouse gas blamed for global warming, which is released into the atmosphere through the burning of coal, oil and other fossil fuels.

About 70 percent of China's energy comes from burning coal [the most CO2-intensive fuel], and there are plans to dramatically increase production as the energy demands of the nation's fast-modernising population of 1.3 billion people continue to soar.

China built 117 government-approved coal-fired power plants in 2005 -- a rate of roughly one every three days, according to official figures.

However, China's government reiterated Tuesday its position that the responsibility for climate change rested with developed countries.

"You need to point out that climate changes are the result of the long-term emissions of the developed countries," foreign ministry spokeswoman Jiang Yu said.

http://www.breitbart.com/news/2007/02/06/070206112532.809bfjtz.html

[Communist China] is expected to surpass the US as the world's largest emitter of greenhouse gases in the next decade.

"The Chinese government is taking climate change extremely seriously," he said. "President Hu Jintao has said that climate change is not just an environmental issue but also a development issue."

But he warned that for China, as a rapidly developing nation, to completely transform its energy structure and use clean energy "would need a lot of money". [China has the largest foreign reserves in the world exceeding USD1

trillion.]

http://news.bbc.co.uk/2/hi/asia-pacific/6334749.stm

The International Energy Agency (IEA), which advises industrialised countries, predicted that global carbon dioxide emissions would increase by 55 per cent between now and 2030, unless "urgent" action was taken by governments and consumers.

China will account for 39 per cent of the increase in carbon dioxide, as its emissions more than double in the period to 2030. This is largely because it is reliant on getting its electrical power from "dirty" coal-fired power stations, rather than relatively clean gas-fuelled plants. It will overtake the US as the world's biggest emitter before 2010, the IEA said, a decade earlier than other forecasts have suggested.

China's dominant role in rising greenhouse gas emissions is one of the trickiest issues for global environmental policy. As a developing country, China is exempt from the provisions of the Kyoto protocol that oblige countries such as the UK to reduce their emissions. This is one major reason cited by the US for not ratifying the Kyoto treaty and remaining outside global policy efforts to reduce the level of greenhouse gases entering the atmosphere.

The IEA said that developing countries would account for three-quarters of the increase in global carbon dioxide emissions between now and 2030, passing the OECD group of 26 industrialised countries by around 2012. The overall share of developing countries in world emissions is predicted to rise from 39 per cent at present to 52 per cent by 2030, with other Asian countries, notably India, also contributing heavily to the increase.

The IEA said: "This increase [from developing countries] is faster than that of their share in energy demand, because their incremental energy use is more carbon-intensive than that of the OECD and transitional economies. In general, they use more coal and less gas."

http://news.independent.co.uk/world/asia/article1962439.ece

Meanwhile, the Communists put weather data under new and heavier regulations

Both - although China has additional *large* problems with air
pollution that we in the US do not have as a result of many years of
regulation - so their situation is much more dire than ours, and they
have additional reasons to clean up their act. Also, we in the US are
doing much more as time goes on to further reduce our emissions of all
kinds.

China needs to get with the program and start caring about its own
people and the effects that climate change will have on them. At this
late date, it is purely mercenary to place blame - if China keeps on
pumping it out, they are no less at fault for not being able to get
the problems under control.

OTOH, China is clueless and disingenuous about too many things; I
think more of this will come out as their Olympics events draw closer.

3064. Antenna Questions

Newsgroup: rec.radio.shortwave
Date: 2007-02-08 20:29:00 UTC
From: Larry Dighera <LDighera@att.net>
Message-ID: <p31ns2189h75bj3s67m7i0nsa4l72t4t7n@4ax.com>
Source record: 105113

I'm considering purchasing the equipment below for SWLing and aviation-band listening in conjunction with an R. L. Drake R-8B receiver with VHF converter. If anyone has firsthand experience with these items, or recommends alternate equipment, I would appreciate hearing your comments and advice.

HF Antenna:
http://www.universal-radio.com/catalog/sw_ant/3377.html
The Alpha Delta DX-ULTRA is specifically designed for high performance, full spectrum short wave coverage plus medium wave (AM). The "Ultra" covers 500 kHz to 30 MHz. Absolutely remarkable low-noise, high-gain results are achieved as a result of the tapered wing design and ISO-RES inductors and parallel wire elements. The Delta-C Center insulator with built-in SEP Arc-Plug static protectors, provides protection for sensitive receiver components. This antenna must be center fed with a PL-259 type plug. The recommended center elevation is approximately 20 feet. The overall length is approximately 80 feet (25 meters). Mounting poles are not supplied. The Ultra is fully assembled - no cutting or soldering required. We recommend this antenna for receive only.

VHF Antenna:
http://www.universal-radio.com/catalog/scanants/1205.html
The Hustler DCX is a discone base antenna that provides good omni-directional coverage from 40 to 999 MHz. This 55 inch high (1.4 m) omnidirectional antenna easily mounts to any mast (not supplied) with supplied hardware. The disc elements are 20 inches. Weight is 2.5 lbs. Has SO-239 to accept PL-259 plug.

Ground Block:
http://www.universal-radio.com/catalog/protect/4310.html
The Caltronics 46-7094 Ground Block accommodates two coaxial lines. F female input and F female output. Includes two mounting screws. 0-1000 MHz.

Lightening arrestor and static discharger for VHF antenna:
http://www.universal-radio.com/catalog/protect/1502.html
Present day receivers utilize solid-state components and have very sensitive "front ends". These radios are much more susceptible to lightning and static problems than their tube-type predecessors. Fortunately, protection technology has improved. Unlike the old "air-gap" lightning arrestors, the Transi-Trap LT utilizes a hermetically sealed gas filled cylinder which has very reliable and predictable switching characteristics.

In operation, the application of sufficient voltage across the element causes an arc to form between the sealed electrodes changing its impedance from greater than 10,000 megohms to a few milliohms in less than 100 nano-seconds! Unlike other suppressors, the Transi-Trap directs the discharged current to an isolated ground terminal versus the coaxial ground system. The Transi-Trap model LT has a replaceable plug. Protect your equipment. The LT is for receive and transmit up to 200 watts and under 30 MHz.

3065. Anna Nicole Smith - Dead

First make sure your radio is not drifting badly. (Usually not a concern
after it has been running for a few minutes)

Use the main tuning to go slightly below or above 5446.5. (Try both above
and below with the main tuning.)
Turn the BFO control on (Select LSB or USB)
Turn the BFO control into the signal (slow and steady does it)

Main tuning low /LSB
Main tuning high/LSB
Main tuning low/ USB
Main tuning high USB

I don't know how wide your bandwidth is in the sideband modes, but it may be
too wide to effectively suppress the other sideband, consequently you may
not get good sounding audio no matter what you do.

Running 3 DX-ULTRA'S here. 2 way out back- one east to west, other north
to south. super antennas. quiet, build strong and heavy. super DX
antennas.
both have been up 8 winters in PA. the third one i set up as an inverted
"V"
off the roof of the house. top of the V off a 10 ft. tripod and a 5 ft.
mast.
down to 2 15 ft gas pipes @ about 45 degree. using navel lanyard and
pulley's.
the inverted V picks up a bit of hash from the house, but still does a
good job.
i suggest mounting as in the picture on the Universal web site. one
note, these
are manly antennas. heavy wire. when you unroll it from the bag, be
ready to
do a lot of wire pulling and straightening. i did all three in the yard,
between
2 heavy poles. after you roll and assemble, let them hang and stretch a
day
or 2. you may want to read the report in "Passport". if i remember, the

DX-
Ultra got 5 stars. it's a bit of work, because the wire is solid, but
well
worth the effort. this last week, here in Western PA, we have had -20
wind
chills, the 3 were were covered with ice- and they are still up there
and working.
well worth the money.

GOOD DX!
Father Michael.

The Mongol Empire was founded by Genghis Khan in the first decade of the 1200s. Under the reign of his grandson Kublai Khan, the Empire was the greatest contiguous land empire in history, stretching from the Pacific Ocean to Eastern Europe. In China the period of rule of the Mongol Empire is known as the Yuan Dynasty.

All of which is just an excuse to introduce an animated timeline and map of the Middle East that shows the different powers that have controlled the area since 1400 BC. Uou can watch the animation here: Middle Eastern History map - http://www.zopcuk.eu/en/game.asp?cid=198

The different powers illustrated on the map are listed below. If you switch out Mongol Empire for China and Persian Empire for Iran etc., the list seems eerily contemporary: Iraq, Iran, Saudi Arabia, Israel, China, Turkey, Europe.

The list of powers is presented with dates as given in the animation linked above

BC

1405 Kingdom of Egypt

1340 Hittite Empire

1050 Kingdom of Israel

721 Assyrian Empire

600 Babylonian Empire

550 Persian Empire

336 Macedonian and Greek Empire

AD

117 Roman Empire

564 Byzantine Empire

610 Sassanid Empire

750 The Caliphate

1100 The Seljuk Empire

1140 The Crusader Kingdoms

1187 Saladin's Empire

1279 Mongol Empire

1700 Ottoman Empire

1912 European Colonialism

1920 Nation states and borders are established

1948 State of Israel is founded

1979 Era of independence

The DX302 is quite capable of receiving ssb. It may be that you are
listening to
some harmonic of a local FM or TV station. These signals can often
find their
way through the IF if they are strong enough. Do you have an FM or TV
transmitter
near you? Does the signal disappear when you back off the rf gain a
little?

WHO WILL WANT TO SEE THIS FILM?

The growing number of people interested in China and Chinese movies, Asian Americans, biography nuts, people who hate Mel Gibson, anti-war people, leftists, feminists, Hillary Clinton and especially those who want to see a great, entertaining film.

DON'T WORRY, IT WILL BE CONTROVERSIAL
Feigon interviewed people who lived through the Cultural Revolution-successful women and men who are now professors at major universities in the West-who say that Mao and especially the Cultural Revolution were the best things in their lives. They credit the Cultural Revolution for making them feminists and allowing them to have an education. Under Mao the economy grew fast, laying the foundation for China's recent success. Even the Dalai Lama speaks fondly of Mao. And what about the anti-Maoist beliefs that have sullied the reputation of the man once referred to as "the sun in the sky?" They are part of a vast radical conspiracy, the result of propaganda churned out by the same people who turned the tanks on the Tiananmen demonstrators.

"For educational institutions only."

I had a sloper version of this antenna about 15 years ago for
listening purposes. Excellent reception, and built like a tank.

It's pretty visible -- not exactly a stealthy antenna, but works
awfully well.

F-Y-I : The "Middle East" is more that the
Palestine Territories and the Nation of Israel.
MIDDLE EAST => http://en.wikipedia.org/wiki/Middle_East
MAP => http://en.wikipedia.org/wiki/Image:Middle_east.jpg
PALESTINE => http://en.wikipedia.org/wiki/Palestinian_Territories
ISRAEL => http://en.wikipedia.org/wiki/Israel

What most people think is the "Middle East" is more properly
called 'The Levant" and is only the more central part of the
LEVANT => http://en.wikipedia.org/wiki/Levant
greater area that is the Region know as the "Middle East".
AREA => http://en.wikipedia.org/wiki/Image:The_Levant_3.png
MAP => http://en.wikipedia.org/wiki/Image:Modern_Levant.PNG
This is most likely due to the Western View of the so called
"Holy Land" as 'being' "The Middle East".
HOLY LAND => http://en.wikipedia.org/wiki/
Names_of_the_Levant#Holy_Land

History of the Middle East
http://en.wikipedia.org/wiki/History_of_the_Middle_East

Timeline of Middle Eastern History
http://en.wikipedia.org/wiki/Timeline_of_Middle_Eastern_History

looks like i am stuck in the middle {east} again... ~ RHF

I like it also. Using its analog tuning is more fun than punching buttons or turning the tiny, clicking tuning dial on the DX-398 (AKA Sangean ATS-909), which I think is more highly rated. Although the linear dial on the DX-160 is not considered appropriate for serious DXing, I find that it helps me quickly get a sense of where I am in the frequency spectrum.

I was pleased with the care in packing and shipping taken by the Ebay dealer, and as far as I can tell, everything works. Tuning might help, but I don't sense any obvious deficiencies.

I am not knocking Anna Nicole Smith.If I collasped,who would care? I d..n sure wouldn't show up in the news stuff.My little doggy,she might care.I always keep a big bag of dog food in a plastic container on the hall floor by the bathroom door and I have an automatic water bowl thingy hooked up to the cold water pipe in my bathroom.At least she would have food and water for a long,long time.she would be rounding up her little rubber squeaky doggy toys and dropping them down by my cold dead body,wanting me to chunk them around my living room so she can jump up and run and catch them.
Here Blueberry doggy,CATCH!

You truly don't get it, do you. Anyone who wants it has already bid his max, and simply doesn't want to spend more than that for it. If anything, he is laughing his ass off if you do out-bid him, as he has aready bid all that it is worth. Glad you get a rush -- you made his day.

Pete,

I got the following bounce message from your ISP (or your mail check
software, more likely)..

Hi. This is the qmail-send program at yahoo.com.
I'm afraid I wasn't able to deliver your message to the following addresses.
This is a permanent error; I've given up. Sorry it didn't work out.

:
204.127.134.23 does not like recipient.
Remote host said: 551 not our customer
Giving up on 204.127.134.23.

Soo.... here's the message, please get back to me at this address or my
other one..

Pete,

I have the same radio and it has an annoying crackle/hiss (when the crackle
becomes constant). This is on all bands. Sometimes it decides to work, and
when it does it's very nice indeed. I'm pulling my hair out trying to track
down the problem. I'm thinking probably in the preselector, since if I
disconnect the preselector output, the noise stops.. on the other hand, so
does all reception (tried connecting a wire antenna through a cap to the
input point, haven't had a working signal generator till just a couple days
ago).

Any suggestions? I could probably e-mail you scans of the schematic if that
would help. I'm almost at my wit's end on this one (it was a Radio-Mart
special.. I should have known better).

Thanks for your time.

Take care, and stay well.

Brenda Ann

My next oldest sister usually comes over here on Sunday afternoon to see if I am still alive and kicking and she brings some frozen leftovers.Last Sunday she said, You get a haircut!

My hair doesn't look like George ''Gabby'' Hayes yet and I won't! get a haircut untill I am d..n good and ready.She doesn't know the ''real reason'' I am letting my hair grow long.(if she did,she would kill me) Because I want to let my hair grow long and get it lookin just like a womans hair and put on my bra on my big boobs and put on my dress and sit around in my house like that.

That means instead of taking doggy out in the front yard,I will have to take doggy out the back door and out in the back yard so doggy (doggy,she doesn't care what I do) can do ''whatever''.I am going to buy one of them vacuum lip pumps too,to get my lips all pouty lookin and extra long false eye lashes just like some of them famous movie star wimmins.A man has to live his dream,doesn't he?
cuhulin

Il Congresso si felicita coi nuovi VESPERMANGXSENDEMULOJ , quanti amano mandare le cene ; commilitoni di quanti , in Albania , han versate a ARTSENU 12 cene (120 Euro), 10 Euro mensili cada pancia , per la rivoluzione globale democratica delle Nazioni Unte vunciune (impropriamente dette ONU) nelle mani dei Khaveri'm Raffaele Fortino , Danilo Quinto , Benedetto Della Vedova , e Giorgio Paga No' .

- c/o ERA ORA , Esperanto Radika Asocio (pronuncia Asozi'o)
d' ORO ERA ORA - ARTSENU -PRTT - Ccp 60397007
Via di Torre Argentina 76 I 00186 ROMA . ERA ORA !

-- Saltiamo una cena al mese , e versiamo ogni anno il corrispettivo in granassa alle NAZIONI UNITE usando - qual esattoria - ARTSENU , presso Era Ora . Primo scopo : arrivare al prossimo Congresso col
corrispettivo di 12 cene da almeno 120 attivisti

(VESPERMANGXSENDEMULOJ) ,
onde consentir agli IMPANNELLATI di consegnare a
Kofi Anan ONAN che tutti inGHANA & successori il corrispettivo ;
cosi' non potra'n piu' inGHANAre l' Umanita' !
In vista della rottamazione , e del riciclaggio , sia del
CONIGLIO d' INSicurezza ; sia dell ' Assemblea dei Generali ,
rispettivamente nel MondoGoverno , e nel MondoSenato . No
representation without taxation . E viceserva , no taxation without
representation .
Invece dei di pelo matici di NOMina Ra'gia, gli Stati avranno alle
NU MondoSenatori : uno / a eletta / o , e una / o sorteggiata / to ,
a caso ,
nel modo piu' CASUALE POSSIBILE fra i Cittadini / e , ogni 6
milioni di Cittadini / e , o frazione .

La maggioranza dei Mondo Senatori (sostituto dell' AG -Assemblea
dei GENERALI) eleggera' il MondoGoverno (sostituto del CONIGLIO
d ' inSicurezza - CdS) . Globalizzare la libera inform azzzione ,
e democratiche votazioni ai livelli Globale , continentale ,
nazionale , regionale , provinciale , comunale , rionale) avverra'
sotto il controllo dei KaskiBle' , e / o di Polizia Transnazionale
(INTERISTA) da essi delegata . Gli Stati sanza democratiche
informazione e elezioni resteranno sanza rappresentanza alle NU .

Circa 2400 MondoSenatori , per circa 7 Miliardi di Terrestri .
Ogni Cittadino del Globo e' esortato a mandare a ARTSENU una cena
il mese . Chi un Cent di Euro il mese , o di meno ; chi 100 Euro ,
o piu' , x cena .

In media 1 EURO il mese cadapancia , 12 EURO l'anno , circa Sei
Miliardi di Euro il mese .

Le NU non avranno piu' la scusa : " Siamo sanza soldi , qualche
Governo Paga No' '' , onde praticare l' inane onanismo anziche' IL
NOBILE ONUNISMO UNUNISMO .

Come aggio, PRTT - ERA - ARTSENU si tratterra' lo zerovirgola
cinque pecciento : circa Un Milione Di EURO / di' quando Sei Miliardi
di Terrestri verseranno una cena in media d' un EURO il mese . Meno
lo
0,5 % di detto , pari allo zero virgolazero venticinque pecciento ,
0,025 % , che andra' quale royalty all' ideatore di ARTSENU , lo
Tzionista Franco JAL , Joseph Arturo Levi di GRATO SOGLIO di Sotto
MILAN NO - GERUSALEMME , il quale incassera' circa cinquemila EURO
al giorno quel BENEDETTO giorno .

Il PRTT ricevera' e amministrera' con ERA ORA , con LA ROSA NEL
PUGNO , con l' ASSOCIAZIONE LUCA COSCIONI , con PAOLO BRECCIA e con
la Suocera Sua Maritsi' Levi Dal Monte MeHar , e con gli altri
CAPONI di TORRE D' ARGENTO & D' ORO , circa un EUROMILIONE al
giorno .
Scopo reale dell' iniziativa : arricchire lo Tzionista Franco
JAL MOLCA .

Come l' Esperanto , anche ARTSENU e' congiura Tzionistica . In Ivri'th (lingua Ebra'ica) ARTSENU significa TERRA NOSTRA . Col piu' cordiale Shalo'm Ciaolo'm Miaolo'm , Baulo'm . Salumi e caci .

Tra i primi firmatarj : Marco Biotti ; Prof. Cesare Romano di Jew York ; Maria Teresa Dal Monte MeHar (di Cagliari - IMOLCA - Vienna - Gratosoglio Di SOTTO - Gerusalemme Di Sotto & Di Sopra) ...

Emilio Kato Speedy Kovsky , nonno di Immanuel Velikovsky .

SCHIAVISTI FARAONI GLACIALI PIU' CHE FREDDI PRODI TORJ vogliono
IPPOLITO INFELICE & MINIMO

HALTER NATIV AMARA VERITA' AMARO RIENTRO ERA FARAONICA OPPURE
FUSIONE FREDDA RIENTRO DOLCISSIMO PASSIONE CALDISSIMA

da '' HABITAT fondazione LIBERAL '' 28 2005 di Emilio Spedicato
Kato Speedykovsky . Ecco il suo editoriale :

Elimina anche scorie da fissione paleonucleare IDROGENO ?
IL FUTURO E' NELLA FUSIONE FREDDA

Notorio , quel referendum blocco' la costruzione di nuove centrali
ma non impediva sfruttar le gia' esistenti , o in costruzione .
L' I TAL YA coppo' le poche nostre centrali nucleari ; spreco'
decine di miliardi di Euro . Per sopperire alla poca corrente
prodotta qui mediante altre centrali (idroelettriche , termiche a
metano o gasolio o carbone o eoliche ...) importiamo ENEL gia dai
cari vicini specie dalla Francia , ove e' prodotta sovra tutto da
centrali nucleari .
Mai han dati significativi problemi di sicurezza .
La dipendenza dell' I TAL YA dai combustibili fossili succhia
granassa col petrolio sempre piu' a ricattarci .
E immette nell' aria gas . Favorisce l' effetto serra oltre a
tutto il resto : poveri esseri viventi , umani e non .
La produzione va a nuove fonti quali in linea di principio :

- Eoliche . Qualcuno le ritiene insufficienti perche' c' e' del
marcio . La Danimarca si da' arie d' averne a basta lei e stop .

- PALEONUCLEARE . Fissione gia' usa processi meno deficienti .
Dobbiamo importare dall' India gli specialisti fatti fuggire .

- Fusione nucleare . Stadio preliminare dopo secoli di studj .
Il plasma a temperature altissime ha comportamento cosi'
complesso e non lineare , da sfuggire a ogni tecnica di
contenimento . Fusi fisici e ingegneri due generazioni almeno .
Meglio evitare aggettivi , come su due generazioni di fisici
teorici bruciate nel vano tentativo di unificare la teoria della
gravitazione secondo Relativita' Generale di Einstein con la teoria
delle altre forze naturali ...

- Fonti basate sull' utilizzo dell' idrogeno , secondo linee discusse
in noti libri da Rifkin , consulente di Prodi per conto dell' UE ,
per le quali tuttavia esistono numerosi problemi . Fondamentale :
produrre idrogeno esige sempre tanta elettricita' .

Arriviamo cosi' alla CONFUSION come qualcuno chiama la FF
'' F . F . '' Fusione Fredda : COLD FUSION . Potrebbe diventare

presto il metodo standard per produrre energia in modi puliti non limitabili . Non ci fosse la pratica dei SUPERPREPOTENTI .

Qui parlo sulla base di corrispondenze con Robert Bass , fra i piu' straordinarj studiosi Americani . Nato nel 1931 si laureo' in FISICA come Rhodes Scholar , INTER agendo nei giovani anni con Misner e con Einstein . Scopre Rudolf Kalman , l' inventore dei cosi' detti FILTRI KALMAN , uno dei piu' importanti strumenti della Matta Mattica applicata .

Lavora presso Universita' e Centri Ricerche Americani , su temi quali la fusione calda , la meccanica celeste .
Da' la prima rigorosa dimostrazione della Legge di Titus - Brode , grazie a una nuova tecnica per lo studio del problema degli n corpi .
Da' poderosi contributi alla Fisica Quantistica . Segue attento la fusione fredda . Brass INTER agi' anche con Velikovsky , l' amico di Einstein , le cui idee su un' evoluzione radicale del sistema solare nel periodo antecedente all' anno 700 A C suscitano sempre piu' scandolo nei Mondi Scientifici .

Nel 1989 due chimici d ' una ''piccola'' universita' dello Utah , Fleischmann e Pons , annunciano un esperimento . Energia elettrica fluisce in una pila dai terminali di palladio . La pila libera calore in quantita' superiore all ' energia introdotta . Il processo di F&P e' spiegabile con l' INTER azione di due nuclei di Deuterio entro il reticolo del metallo palladio . Generano sia una particella Alpha , ovvero un nucleo di Elio isotopo 4 , sia energia pari a 23 , 8 Mev .

Fusione fredda e' chiamato il processo , in quanto realizza , a temperatura ambiente , il fenomeno considerato esclusivo di ambienti a temperature altissime , come l' interno delle stelle ; e i piccoli volumi di plasma generati in esperimenti di fusione calda .

Il processo utilizza il Deuterio .
L' acqua oceanica ne contiene una parte su 6 mila , quindi un volume totale di 100 mila km cubici .

Acqua pesante sufficiente a ricoprire per circa 300 metri tutta l' I TAL YA . Il materiale di partenza e' disponibile sanza limiti dunque .

Prodotto finale , un gas inerte . Energia pulita e quasi gratis .

Confermata . Estendibile a grande scala . E' la piu' grande scoperta tecnologica dell' Umanita' dopo il fuoco , sottolinea il famoso astrofisico Rees . Dopo l' annuncio di Fleischmann e Pons , di certo fatto in modo prematuro attraverso una conferenza stampa , si ebbero i seguenti sviluppi :

-- Varj gruppi cercarono di ripetere l' esperimento ma incapaci
non ritrovano i risultati dei due chimici .

-- Peebles , noto Fisico di Princeton , scrisse un articolo
per ''dimostrare '' l' impossibilita' della reazione di fusione
dei due nuclei di deuterio all' interno del palladio .

-- Pons & Fleischmann persero il posto di lavoro alla Universita'
dello Utah . TIME li defini' " Cranks of the century '' :
le Vanne Marchi del Secolo .
E come vogliono i superprepotenti padroni di TIME etc
(il CFR , essi sono le vere Vanne Marchi dei MILLENNJ)
ogni significativo finanziamento alla linea di ricerca legata al
loro esperimento venne bloccato .

Tuttavia 15 anni dopo la frettolosa decisione di chiamare fasullo
il lavoro di P&F , il Department of Energy degli Stati Uniti ,
DOE , su INTER 20 di Spencer Abraham , segretario all' Energia ,
fe' essenzial marcia indietro , salvo chiamare la zuppa
'' pan bagnato '' : non piu' FF FUSIONE FREDDA , bensi'
'' CONDENSED MATTER NUCLEAR SCIENCE '' .

Ora riprende il flusso di qualche dollaro frigido in quei reattori
nucleari che , per essere bottiglie di liquore (la prima aveva
contenuto BOURBON) , agl ' incauti P&F avevano fruttato pure il
titolo di cicchettoni ; eppertanto si parlo' di delirio da etilismo .

Doccia fredda acqua leggera . Quella Universita' dello UTAH si fa
piccola piccola per non farsi piu' guardare . Il dietro front del
DOE e' legato a varj fatti fra li quali :

-Almeno TREMILA LAVORI ormai (per parlar soltanto di quelli
teorici) dimostrano : contariamente a Peebles e alla sua teoria
sugli astemj , il processo della fusione fredda e' compatibile con
le leggi della fisica quantistica .
I finanziamenti spesso bloccano gli esperimenti ma
meno spesso bloccano i lavori teorici , che si contentano e
appagano
di scienza e creativita' scientifica .
Fra i lavori teorici piu' importanti dobbiamo citare quelli
di varj studiosi I TAL YAni .
Fra i MASSIMI , il grande Fisico di MILAN NO Giuliano
Preparata , morto alcuni anni fa prematuramente .

Errore sovrano di Peebles : considero' soltanto localmente la
equazione di Schroedinger , e cosi' trascuro' i globali effetti
speciali dovuti alla periodicita' del reticolo .
In altri termini , ei ignoro' il fondamentale teorema di Bloch
della Fisica dello stato solido .

- Esistono centinaja di lavori sperimentali svolti in laboratorj di
tutto il Mondo , specie in Giappone . A varj livelli , alcuni quasi
artigianali . Specie uno compiuto a Frascati (ahi il vino ! i
fiaschi !) alla ENEA a cura di Francesco Celani . Il processo P&F e'

stato ripetuto e variato in diverse
configurazioni di materiali , e voltaggi applicati .

Cio' ha confermato : il BOURBON nelle giuste dosi e' buono ; e ,
come il problema dell' etilismo , il processo P&F e' e' complesso .
Ottimo , dipende da tutta una serie di condizioni che vanno
attentamente studiate e classificate .

-Oltre alla produzione di energia , e ' stata verificata , in certe
condizioni , la trasmutazione di sostanze piu ' complesse del
deuterio . Per esempio del torio radioattivo : in altre sostanze
quali rame e magnesio dalla composizione isotopica diversa da quella
naturale , e quindi prima non presenti in loco . Cio' suggerisce : la
fusione fredda puo' esser pure la strada migliore per eliminare le
scorie radioattive , grave problema della fissione nucleare ancora
spacciato per irrisolvibile .

A sto punto riaffiorano problemi ancora spacciati per non superabili
come l ' eliminazione della mafia e delle sue scorie . Bloccare la
ricerca magari sulla fusione fredda e' roba da altissime
temperature , oltre i TRENTANOVE GRADI °C .

FARAONI E IMPERATORI ROMANI E CINESI E MAYA E COLLEGHI , davanti alle
scoperte proposte da inventori , la cui realizzazione avrebbe creati
problemi sociali come l' inutilita' degli schiavi , generarono una
nota REAZIONE . Noto e' dai geroglifici e dai testi classici : molti
inventori caddero , vittime di incidenti ferroviarj ,
automobilistici , aerei .

Una fonte pulita e praticamente illimitata di energia e ' nell '
INTER esse della UMANITA' . Contro il diavolo , i milanisti , i
satanisti , le sette le settone e le settucole di petrolieri emiri
sceicchi fachiri e crumiri . A parte la limitata disponibilita' di
fossili combustibili ; e il problema insuperato dello smaltimento
dei politicanti fossili e delle lor scorie ; le generazioni fresche
gia' giudicano criminoso l' abuso fatto di metano petrolio carbone
e affini . Risorse preziose , andrebbono usate per fini piu' nobili
come produrre proteine , plastica , tessuti e farmaci .
Sinora invece han dato ben poco oltre a vaselina e naftalina .

I rincari astronomici (e per qualcuno gastronomici) del petrolio
non sono per nulla giustificati dai costi estrazione e produzione .
Poco li giustificano i contingenti e spesso all' uopo predisposti
tragici misfatti in Vicino Oriente come in Russia e in Venezuela ,
in Nigeria e in Indonesia .
CARPE DIEM , la cricca del petrolio e' in fregola :
'' ajutttooo arriva la F. F. fusione fredda eppertanto
massimizzar debbonsi li cresti sul petrolio finche' dura la
cuccagna '' .

Il DOE cambia rotta , anche piccoli Paesi vanno a realizzare la F.
F. ; meglio fare buon giuoco a cattivo viso . The hand you

can ' t bite kiss it . If you can' t fight them join them .

L' augurio nostro: presto la F. F. diventi realta' . E ' nell ' INTER
esse della Umanita ' e contro la DISUMANITA ' . Qualche assaggino :

--Nelle case i riscaldamenti saranno tutti elettrici .
Tagli ai massimi fattori d' inquinamento .

-- Mezzi di trasporto tutti elettrici: pazzi stradali sostituiti
da SKY CAR e velivoli e veicoli e natanti anche individuali
e gestiti da computer via satelliti .
Mezzi guidati dai robot , mentre i '' piloti ''
studiano i cruciverba .

-- FERROVIE A LEVI TAZIONE MAGNETICA . MAGLEV .
IN GALLERIE A VUOTO possono arrivare anche a 6 mila KM / ora .
Aeroplano riservato ai matti ''sportivi '' .

--Le strade esistenti , buona meta' della cementificazione GLOBAL ,
saran restituite a campi e foreste; o usate come base di strutture
per la coltivazione idroponica delle piante.
-- Acqua dolce per tutti sia per costi abbattuti di dissalazione
con tecniche tradizionali, sia grazie a costruzione di enormi
chiatte , in grado di trasportare ICEBERG ovunque .

------- LAST BUT NOT LEAST . Gli esperimenti di fusione fredda
hanno alcune caratteristiche . Fan pensare agli esperimenti degli
alchimisti (cui dedico' gran parte del suo tempo l' immenso
Newton) . Forsecche'qualcuno gia' noto' il fenomeno in tempi
antichi ?

THE ABOVE IS WRONG!
Even a top PLO official admitted it is not true.
Way back on March 31, 1977, the Dutch newspaper Trouw published an interview with Palestine Liberation Organization executive committee member Zahir Muhsein. Here's what he said:

"The Palestinian people does not exist. The creation of a Palestinian state is only a means for continuing our struggle against the state of Israel for our Arab unity. In reality today there is no difference between Jordanians, Palestinians, Syrians and Lebanese. Only for political and tactical reasons do we speak today about the existence of a Palestinian people, since Arab national interests demand that we posit the existence of a distinct "Palestinian people" to oppose Zionism."

"For tactical reasons, Jordan, which is a sovereign state with defined borders, cannot raise claims to Haifa and Jaffa, while as a Palestinian, I can undoubtedly demand Haifa, Jaffa, Beer-Sheva and Jerusalem. However, the moment we reclaim our right to all of Palestine, we will not wait even a minute to unite Palestine and Jordan."

And then look here...

http://www.israel.net/timetospeak/2.htm

"From the end of the Jewish state in antiquity to the beginning of British rule, the area now designated by the name Palestine was not a country and had no frontiers, only administrative boundaries . . . ."

-- Professor Bernard Lewis

Princeton University

"Palestine has
never existed . . . as an autonomous entity. There is no language known as Palestinian. There is no distinct Palestinian culture. There has never been a land known as Palestine governed by Palestinians. Palestinians are Arabs, indistinguishable from Jordanians (another

recent invention), Syrians, Lebanese, Iraqis, etc.

"Keep in mind that the Arabs control 99.9 percent of the Middle East lands. Israel represents one-tenth of one percent of the land mass. But that's too much for the Arabs. They want it all. And that is ultimately what the fighting in Israel is about today . . . No matter how many land concessions the Israelis make, it will never be enough."

-- Joseph Farah, Arab-American journalist

More jewish propaganda. Palestine ALWAYS existed:

"Palestine became a predominately Arab and Islamic country by the end
of the seventh century. Almost immediately thereafter its boundaries
and its characteristics - including its name in Arabic, Filastin -
became known to the entire Islamic world, as much for its fertility
and beauty as for its religious significance...In 1516, Palestine
became a province of the Ottoman Empire, but this made it no less
fertile, no less Arab or Islamic...Sixty percent of the population was
in agriculture; the balance was divided between townspeople and a
relatively small nomadic group. All these people believed themselves
to belong in a land called Palestine, despite their feelings that they
were also members of a large Arab nation...Despite the steady arrival
in Palestine of Jewish colonists after 1882, it is important to
realize that not until the few weeks immediately preceding the
establishment of Israel in the spring of 1948 was there ever anything

other than a huge Arab majority. For example, the Jewish population in 1931 was 174,606 against a total of 1,033,314." Edward Said, "The Question of Palestine."

"[The Ottoman Land Code of 1858] required the registration in the name of individual owners of agricultural land, most of which had never previously been registered and which had formerly been treated according to traditional forms of land tenure, in the hill areas of Palestine generally masha'a, or communal usufruct. The new law meant that for the first time a peasant could be deprived not of title to his land, which he had rarely held before, but rather of the right to live on it, cultivate it and pass it on to his heirs, which had formerly been inalienable...Under the provisions of the 1858 law, communal rights of tenure were often ignored...Instead, members of the upper classes, adept at manipulating or circumventing the legal process, registered large areas of land as theirs...The fellahin [peasants] naturally considered the land to be theirs, and often discovered that they had ceased to be the legal owners only when the land was sold to Jewish settlers by an absentee landlord...Not only was the land being purchased; its Arab cultivators were being dispossessed and replaced by foreigners who had overt political objectives in Palestine." Rashid Khalidi, "Blaming The Victims," ed. Said and Hitchens

http://www.cactus48.com/earlyhistory.html

So fuck off with the lies zionazi.

Just a quick comment about your VHF/UHF antenna. I have been using a discone type antenna for several years and find it to be fine for general VHF/UHF monitoring. It will work over a vast frequency range. If you are needing long range capability on some specific frequencies this may not be your best choice. The discone seems to perform well for monitoring signals coming in at a high angle, such as aircraft. Just monitoring local activity it is fine. If you are trying to hear mobiles at 50 miles away you may need another type of antenna. Good luck with all your monitoring. 73 de Randy, WB5KCM

Thanks! that was an interesting and nostalgic read.
Times have definitely changed. It is a personal
choice as to whether one views the changes as "good"
or "bad", but those of us who lived during the 50s
and 60s will certainly relate to the author's thoughts.
Back then, there was still a sort of "reverence" for
the world as being large and often a mysterious place.
With advances in technology and communications, the
world has become a smaller place, and I doubt that,
for the current generation, hearing a radio broadcast
such as the author's first experience would have the
same context that it did for us. We were really at
the tail end of the radio era, with TV rapidly replacing
radio as the primary means of news and entertainment
for much of the US (and probably British) population.

Whenever I watch an old movie from, say, the 30s or 40s,
there seems to be a sense of wonder about "distant" lands,
that is no longer evident today. People can pretty much
travel most anywhere in a relatively short time, and
that changes the context of experiences such as hearing
a broadcast from South Africa. It seems that the various
broadcasters have web sites today. Back in the early 60s,
when we would send for a QSL card from a station, there
would be a period of even weeks before getting the response,
wiht us waiting and checking the mail every day for the
card to arrive. That context is gone when you can open
a browser and simply type in the URL for the station's
web site or send them an email instantaneously.

So, my thought on this is that I am glad to have lived
in that period, and wouldn't give it up. What has changed
is the context in which hearing distant broadcasts was
experienced. Realizing that my experiences in that period
of the late 50s and early 60s also was being experienced
by a much older generation who was seeing the world as
they knew it, changing, I must also realize that this is
a cycle that just goes with the passing of time. From

that perspective, I can remember the things that caught my attention in my younger days, while allowing those experiencing their younger days today, to do so without my pining for the "old days" in the context of today being somehow lacking by comparison.

Tony

I was considering using a small mast on the roof of the highest part
of the house as a center support for the inverted 'V'. I suppose that
will somewhat defeat the low noise characteristics of the antenna due
to its close proximity to noise sources in the house. Thanks for that
information.

>one note, these are manly antennas. heavy wire.

What sort of wire is it, copper-clad steel, solid copper, gage?

I wonder what the performance difference would be between the inverted
'V' and the 'Sloper?' In light of your comment below, the end-fed
sloper might be a better choice easthetically.

That's good to know. I suppose the antenna element insulation is
black not gray. I wonder if there's any way to change that. I
suppose a latex-based paint would work to change the color to
something less obtrusive until it pealed off. Any thoughts.

Thank you for sharing your first hand experience with Alpha-Delta
products. Much appreciated.

That is interesting news. As a pilot, I do intend to monitor air
communications. However, from the information you have provided, it
would seem that distant, low-level aircraft may not provide a good
signal with a discone. Have you a recommendation for another type of
omni-directional VHF antenna for 108-174 MHz?

I don't know whether there would be a performance difference that you
could hear, but the sloper is basically one half of the dipole you've
ordered, and fed from the end. It would be more dependant on having a
good ground to work against. The dipole doesn't need a ground
connection.

It's heavy wire with black insulation, plus there are spacers between
the dipole elements, plus there are coils that have a white round form
wrapped with wire. I suppose you could spray paint it all sky blue, I
dunno.

Still, it's all the different elements that make it work well at
different frequencies, versus the single resonant frequency of a
simple dipole of only one length.

Well, I -was- replying to *YOUR* comment, no matter what the "topic of
the thread"; By your definition, I guess we are then -both- off topic...
...which would also make you an "idiot". ;-)

P.S.

Sniping is not necessarily worthless. This is an *auction*, high bidder
wins, and if sniping gets your high bid in -before- the other guy can
get his high bid in...well, the sniping wasn't worthless then, now was it???

I haven't seen anything since those old Amcom Inc devices (I have three of them - they're great also for cleaning up microphone output of outdoor noise, to bring out (say) birds, and suppress traffic.)

If you have certain kinds of noise, the Timewave 599zx is okay; a nice AGC, brickwall filters (perfect for SSB where an interfering SSB station is offset in the direction of the sideband), but general nonlinear noise reduction it's inferior to clearspeech. Timewave for linear filtering, Amcom for nonlinear, I guess is the breakdown.

Heil Sound had a really wretched implementation of clearspeech after Amcom left, but some people claim to like it. I think there was some huge engineering error in it though, feedback, very little audio, and so forth. It sits in my junk box.

>

You can build one. A commercial one might only connect one side (I don't know which one).

I personnaly use a home made long wire linked to radio via a home-made balun. The balun is connected to the radio with a stereo jack, with tip and ring connected together, so it activates the external antenna for SW (works well, better than Sony AN-LP1 active antenna sometime), MW (competes with internal ferrite bar, which is directionnal), and LW (but for that range of frequencies, the results are poor and the ferrite much better).

I found that this jack settings works better than the Dave Moisan's advice (connecting together sleeve and ring did not improve reception).

Hope this helps,

Charly

> now was it???

Yes it is worthless. If you have already bid the amount you have
determined an item is worth to you, then no sniper is going to get it
unless he bids more than what you were willing to pay in the first place.
Period. Why is that so incredibly hard to understand for so many people?

If you just take the time to determine what you are willing to spend and make that bid, you get to make it days in advance without watching the clock or giving out your private information to a sniping service [who you would still have to tell what the maximum is that you are willing to bid -- just as you could have bid on ebay days before!]

On the other hand, if you are patting yourself on the back on how smart you were sniping in a last minute bid that DOES win an item -- just remember before patting yourself TOO hard -- nobody in the vast number of people who looked at that item for the past N days thought it was worth as much as you were stupid enough to pay at the last minute...

You aren't the one getting the bargain -- you are the one catching bidding fever and winding up paying to much!

And don't forget too, if there is any bid shilling going on [heaven forbid], it isn't going to faze the guy whose first bid was what he was willing to pay -- either he gets it at his price or he doesn't. But shilling sure does trap a sniper.

Snipe away -- particularly on anything I'm selling. I love seeing it. It always results in more in my pocket than I would have expected.

And after the big bag of dog food ran out, she'd be able to eat your
rather oversized corpse!

By the way, when you do die, who gets the Herculean task of cleaning
out that museum you've collected over the decades? I think that might
actually get you in papers, as sort of a "hometown Fred Sanford" or
"Addams Family house." I really hope the Antiques roadshow crew shows
up for that.

Again, QUITE judgmental of you. Why are they 'stupid' and why might it be "too much"? It may be too much for you but not necessarily for them. They may have a strong nostalgic attachment from their childhood, it may have been something actually owned by their dear, departed mother and they want it at any price, any one of a hundred reasons why *THEY* want it and *YOU* think it's too much.

> Snipe away -- particularly on anything I'm selling. I love seeing it.

Amen! I agree 100%; FWIW I am 99% a seller (who -loves- auction fever), rarely buy and when I do, I don't snipe. Just place the max bid I'm willing to pay. Sniping is just a tool that some people think may, on occasion, be valuable to -them-. Who are you to judge them?

You still don't get it. If you place a higher value on it than I do,
fine, you still don't need to 'snipe' it to get it. Just bid what YOU
want to pay.

The 'stupid' part is thinking you are getting one over on somebody by
sniping.

Remember -- the topic is 'sniping'.

Get it yet? Can I type any slower for you?

REPLY: How you can use the term Nazi in reference to Israel or those that support Israel is beyond me. Israel is the only multi-party, free elections democracy in the middle east. The term Nazi would better fit the Arab dictatorships in the middle east that surround Israel.
A few of us here are zionazi?? Then I guess that we can refer to you as an Islamofascist. I am sure that you won't mind, as that term fits you much better then zionazi fits us. And like most Islamofascists, you suffer from being totally brainwashed, and from having little true knowledge of the history of the middle east from prehistory to modern times.
Telling me to "F*** Off??? Like most people of totalitarian bent, for left or far right, or religious extremism, you have to resort to name calling and mud slinging and filthy language as soon as you feel that your beliefs might be exposed as the lies that they are.
You're argument is is danger as soon as you lose your cool.
There is a preliminary historical fact that must be

established at the onset of any discussion concerning Palestine. There has never been a civilization or a nation referred to as "Palestine" and the very notion of a "Palestinian Arab nation" having ancient attachments to the Holy Land going back to time immemorial is one of the biggest hoaxes ever perpetrated upon the world! There is not, nor has there ever been, a distinct "Palestinian" culture or language. Further, there has never been a Palestinian state governed BY Arab Palestinians in history, nor was there ever a serious Arab-Palestinian national movement until 1964... three years BEFORE the Arabs of "Palestine" lost the "West Bank" and Gaza as a result of losing the 1967 Six-Day War (which the Arabs started). In short, the so-called "Palestinians" are a manufactured people. . . a people with no history and no authenticity. . . whose sole purpose for existence is to destroy the Jewish State!

Before the 1967 war, the Palestine Liberation Organization's (PLO) primary goal was to destroy Israel. Post-1967, their goal became two-tracked: Either (1) destroy Israel outright (the same pre-1967 goal) or (2) the creation of an Arab-Palestinian state to be used as a launching pad from which to destroy Israel. Different strategies - same ultimate goal... a state not along side Israel, but IN PLACE OF Israel. It's really that simple!

Israel became a nation in 1312B.C.E., two thousand years before the rise of Islam! Seven hundred and twenty-six years later in 586 B.C. these first ancient Jews in the Land of Israel [Judea] were overrun and its First Jewish Temple (on Jerusalem's Old City Temple Mount) was destroyed by Nebuchadnezzar, king of ancient Babylon. Many of the Jews were killed or expelled; however many were allowed to remain. These Jews along with their progeny and other Jews who would resettle over the next 500 years, rebuilt the Nation of Israel and also a Second Temple upon the Temple Mount. Thus the claim that some people try to make, that the Jews suddenly appeared fifty years ago right after the Holocaust and drove out the Arabs is preposterous!

Then in 70 A.D. (nearly 2000 years ago), it was the Roman Empire's turn to march through ancient Israel and destroy the SECOND Jewish Temple, slaughtering or driving out much of its Jewish population. Many Jews left on their own because conditions for life were made unbearable in many respects... yet thousands upon thousands stayed and rebelled on for centuries in order to once again rebuild a Jewish Nation in this Holy Land.

Over the next 2,000 years various Peoples, Religions and Empires marched through Jerusalem, Israel's ancient capital. None bothered, nor were they in the least bit inclined, to build a Nation of their own. The region was successively ruled by the Greeks, Maccabeans, Romans, Byzantines, Arabs, Egyptians, Crusaders, Mamelukes and finally the Ottoman Turks who indifferently governed the backward, neglected territory from the 16th century until the British drove them out during World War I (1914-18). It must be noted that in 636 A.D., when the Arabs marauders came to the land and uprooted even more of its Jews, they did not form any Arab nation there... and certainly not a "Palestinian" nation. They were simply "Arabs" who, as did others

before them, moved into a geo-political area called "Palestine!" And remember this one fact... it was not the Jews who "usurped" (a favorite word from the Arab propagandists) the land from the Arabs. If anything, it was the Arabs in 636A.D. who overran and stole it from the Jews!
In Conclusion: No nation, other than the ancient nation of Israel and later again in 1948 with the rebirth of the Nation of Israel, has ever ruled as a sovereign national entity on this land. A mighty Jewish empire extended over this entire area before the Arabs and their Islam were even born! The Jewish People have one of the most legitimate Birth Certificates of any nations in the world. Every time there is a dig in Israel, it does nothing but support the fact that Israelis have had a presence there for 3,000 years. They have been there for a long time. The coins, the cities, the pottery, the culture--there are other people, groups that are there, but there is no mistaking the fact that Israelis have been present in that land for 3,000 years. It predates any claims that other peoples in the regions may have. The ancient Philistines are extinct. Many other ancient peoples are extinct. They do not have the unbroken line to this date that the Israelis have. And if you want to talk religion, fine. G-d GAVE the Land of Israel to the Jewish People. And G-d does nothing by accident!

"PALESTINE?"
The term "Palestine" came from the name that the conquering Roman Empire gave the ancient Land of Israel in an attempt to obliterate and de-legitimize the Jewish presence in the Holy Land. The name "Palestine" was invented in the year 135 AD. Before that, it was known as Judea, which was the southern kingdom of ancient Israel. The Roman Procurator in charge of the Judean-Israel territories was so angry at the Jews for revolting that he called for his historians and asked them who were the worst enemies of the Jews in their past history. The scribes said, 'the Philistines." So, the Procurator declared that Land of Israel would from then on be called "Philistia" [further bastardized into "Palaistina"] to dishonor the Jews and obliterate their history. Hence the name "Palestine."
One more thing. Very often one hears the revisionists and propagandists finding ancient historical links between the "Philistines" and the Arab "Palestinians." There is no truth to this claim! The Philistines were one of a number of Sea Peoples who reached the eastern Mediterranean region approximately 1250-1100B.C. They were actually an amalgamation of various ethnic groups, primarily of Aegean and south-east European origin [Greece, Crete and Western Turkey] ... but surely not of Arabian origin! These Philistines were not Arab... and neither was Goliath! The Arabs of "Palestine" are just that... Arabs! And these Arabs of "Palestine" have about as much historical roots to the ancient Philistines as Yasser Arafat had to the Eskimos! If anything, the name "Palestine" was associated with Jews. In the years leading up to the rebirth of Israel in 1948, those who spoke of "Palestinians" were nearly always referring to the region's Jewish residents. In fact, Arab leaders rejected the notion of a unique

"Palestinian Arab" identity, insisting that Palestine was merely a
part of "Greater Syria".
Also, no I am not Israeli, or even Jewish. My parents would say
that I am an Anglican, although I converted to traditional Catholicism
twenty-five years ago. So I have no stake in either side. I am just a
life-long student of history. Particularly ancient history.
So smackt.... have a nice day! I am not the type that tells
people I disagree with to F*** Off. I will leave that to you and your
type of people. We know what kind of person you are by your language.

3150. Bush to cut funding for NPR and PBS

Rory,

Head on down to your local Radio Shack with your 1103. They should
have various "adapt-a-plugs" available for you to plug in to see which
one is the right size. Hopefully this is still something RS
does...everytime I go there I discover something new that they have
discontinued.

> higher speeds (when there is a contest, it's fast but repetitive).

There is a contest in progress (until 0600 UTC) in North America on all shortwave Morse ham frequencies. Probably from now to 0600 all the activity will be on the 1.8, 3.5, and 7MHz bands.

Morse speeds are generally between 25 and 35 WPM. Operators are to exchange their name and state/province. As you say, the same information is frequently repeated (especially callsigns) so even if you can't normally copy anywhere near 25wpm you stand a fair chance of being able to figure out what's being sent.

(I was participating - made just over 400 contacts - until the thunderstorm lit up...)

Pretty much all car radios from recent years are RDS compatible. It's
uncommon on home receivers though. LW reception is now also fairly
common on car stereos.

Yep, I've noticed this as well. I hope the new receiver is still in the works. If they didn't think they were going to be able to deliver, my guess is they'd get the info about the KWZ-30/2 off their website. In any case, I'm keeping my fingers crossed.

You mean your type of people are superior, the superior ones who
murder children throwing rocks and call them terrorists, the ones who
steal other peoples' land and then call it their own, the superior
ones who invaded Lebanon, leveled the country with air strikes and
then dumped cluster bombs during the last three days of their terror,
under the guise of trying to get two of their soldiers back who
happened to be captured in Lebanon? Like I said, fuck off zionazi,
spew your lies in the jewish newsgroups with like minded fellow
zionazis. Israel is the fascist state of the 21st century.

If you use HRD.

N3ZI has converted PrimeTime Shortwaves data base to the ILG format.
This is experimental.
Please download from my web site here: Click here
http://hrd.ham-radio.ch/index.html
Please do not copy the file and post to other web sites.
You can however post the link to my site wherever you want, then users
can come there and get the lastest copy of the file.

Are we talking about actual 'cuts' here or merely not raising the amount of any increase that may have been requested?

As some of you may know, the Liberal/Democrat/Communist's like to portray certain things as cuts when actually they are increases.

Source record: 105182

Hi all-- what are you supposed to do with the braided shielding material when terminating an rg58 coax cable (off my antenna balun) into a pl-259 plug? I ended up stripping it all off the dielectric and then soldered the lead to the pl259 by dripping in some solder to the male plug. it seems to work ok but i'm wondering if the braided shielding material should be making contact with the pl259 plug for better noise dissipation or something. thanks.

Yes, the braid needs to make contact with the plug. For best results use a
UG-175 reducer insert.

F-Y-I : The "Middle East" is more that the
Palestine Territories and the Nation of Israel.
MIDDLE EAST => http://en.wikipedia.org/wiki/Middle_East
MAP => http://en.wikipedia.org/wiki/Image:Middle_east.jpg
PALESTINE => http://en.wikipedia.org/wiki/Palestinian_Territories
ISRAEL => http://en.wikipedia.org/wiki/Israel

What most people think is the "Middle East" is more properly
called 'The Levant" and is only the more central part of the
LEVANT => http://en.wikipedia.org/wiki/Levant
greater area that is the Region know as the "Middle East".
AREA => http://en.wikipedia.org/wiki/Image:The_Levant_3.png
MAP => http://en.wikipedia.org/wiki/Image:Modern_Levant.PNG
This is most likely due to the Western View of the so called
"Holy Land" as 'being' "The Middle East".
HOLY LAND => http://en.wikipedia.org/wiki/
Names_of_the_Levant#Holy_Land

History of the Middle East
http://en.wikipedia.org/wiki/History_of_the_Middle_East

Timeline of Middle Eastern History
http://en.wikipedia.org/wiki/Timeline_of_Middle_Eastern_History

looks like i am stuck in the middle {east} again... ~ RHF

Wavetrapper is exactly right! PBS and NPR are just mouthpieces for
the Democrat Party. Why Republicans and independents should have to
finance them with their hard-earned tax money is beyond me.

I think it's the other way around. Generally, Republicans are better educated
than the Liberal/Democrat/Communist dropout class of folks.

But, you wouldn't know that because you're retarded!

Boggling.

Yes, we saw the Chinese Communists jumping for joy and producing propaganda videos for your Islam-0-fascist enjoyment.

THE Chinese state-run propaganda machine is cashing in on the terror attacks in New York and Washington, producing books, films and video games glorifying the strikes as a humbling blow against an arrogant nation.

Video discs filled with lurid images along with dramatic opera music and even the theme from Jaws have flooded the nation's markets in the wake of the attacks.

Disc after disc bear the imprimatur of the Communist Party-controlled media. The most popular DVDs have been produced by the Xinhua information agency, Beijing Television and China Central Television.

Communist Party officials say President Jiang Zemin has obsessively watched and re-watched pictures of the aircraft crashing into the World Trade Centre. In the immediate aftermath of the attacks, workers at Beijing Television worked round-the-clock to produce a documentary they called Attack America.

Scenes from Hollywood films have been spliced between shots of the events of September 11, including footage from the 1998 remake of Godzilla, in which a monster destroys New York buildings.

As rescue workers pick through the rubble of the twin towers, the commentator proclaims that the city had reaped the consequences of decades of American bullying of weaker nations.

He said: "This is the America the whole world has wanted to see. Blood debts have been repaid in blood. America has bombed other countries and used its hegemony to deny the natural rights of others without paying the price. Who until now has dared to avenge the hurts inflicted by unaccountable Americans."

Officials at Beijing Television defended the video as an educational film that will meet market demand. A producer said: "There's this need for more information on world terrorism in the market, so we've got to meet it."

At the country's most respected bookstore, Xinhua Book Shop on Beijing's busiest shopping street, Wanfujing, crowds jockeyed around a table to buy discs. According to staff, thousands of copies of the video have been sold in the past month.

The shop assistant said: "Before people were interested in the movies but this is more compelling. What happened in New York could have happened in a movie but this is real life. It's better."

The many shops that stock pirated DVDs compiled in China and Hong Kong report that their most popular products are similar productions that use video graphics to show the United States suffering other damaging attacks on its tallest buildings and military installations.

On the unofficial films the commentary is even more callous: "Look at the panic in their faces as they wipe off the dust and crawl out of their strong buildings - now just a heap of rubble. We will never fear these people again, they have been shown to be soft-bellied paper tigers."

Elsewhere music shops are selling out of a bootleg version of the summer's top pop hit. The amended song implies that America deserves to suffer for its disregard for the point of view of countries weaker than itself.

The refrain says: "We guys are all Americans, our government is used to bullying people. We guys always have our hands on too much, this time our own people got hurt."

> shortwave.

How small is "small"? 30 years ago, people would've considered something the size and weight of a KA2100 relatively small, while nowadays this is one of the few large shortwave portables around. A larger size can have distinct advantages when it comes to speaker audio, tone control and general versatility, or so I found.

> Maybe something $150 or less. Ive seen plenty of sites
> that have radios at this price and cheaper, with some brands I know,
> like Sony, and some Ive never heard of.
>
> I looked on jr.com, which seemed to have a good selection, but I dont
> know enough about the technology or the brands to know what I want /
> need.

The remaining players on the North American market are:

* Sony (with a strongly reduced set of models)
* Etï¿½n/Lextronix/Grundig (with a mixed bag of models)
* Kaito (mostly Degen rebrands, but they also carry the Redsun RP2100 now)
* Sangean

Several Chinese models can also be imported directly.

Basically all the sets that will be interesting employ dual conversion on shortwave, with dual balanced first mixers, a high 1st IF of usually 55.845 MHz and a 2nd IF of either 455 or 450 kHz. (Whether ICF-SW7600GR, E5, DE/KA1103, KA2100, ATS-909, YB400PE or PT-80, they all belong into this group.) An antenna input should be present in all cases.
2nd IF filters are usually 6-element types (occasionally 4-element for "wide" positions), so selectivity is generally good. A 6 kHz (real) type will generally give a good compromise between selectivity and audio quality, but occasionally something wider provides better tone quality on stronger undisturbed stations, or something yet more narrow may be needed.
Image rejection (for +900/910 kHz) will vary from moderate (~40 dB) to virtually bulletproof (~60 dB).

If SSB reception is possible (which is needed for ham and utility work), its quality will vary from "modest" (YB400PE, PT-80) to "good" (ICF-SW7600GR).
Synchronous detection can be useful to get rid of adjacent-channel interference and occasionally fading distortion, but it's not always an improvement.
Sensitivity may vary, depending on whether RF amplification was chosen more conservatively (to avoid overloading in strong-signal regions) or more aggressively to work better in regions with lower signal levels.
Individual quirks like susceptibility to AMBCB overload, FM bleedthrough or internal interference are occasionally present.
External antennas, while they may improve reception quite a bit, should be used carefully to avoid frontend overloading; I would recommend tunable antennas like magnetic loops.

Secondary features should also be considered:
Some of the sets mentioned are quite hot on AMBCB (MW), too, some are excellent FM performers and several of them are both.
You can usually achieve good audio quality by using headphones, but speaker audio ranges between thin and honky (7600GR) and full-bodied and beefy (KA2100). Some good 2.0 active speakers may be a worthwile investment if the built-in speaker doesn't cut it.
A tone switch to cut back the highs even further is present on most portables, but occasionally a highs increase can be useful, in which case it's nice if you have conventional bass/treble tone controls.

> Like I said, I would be interested in listening to international
> stations, Italy would be nice. I live in Rhode Island, on the East
> Coast, if that helps with reception.

Europe to US east coast should generally not be that much of a problem.
You'd need to check the frequencies for the RAI International service.

I'm not sure that I'll get one either. I have to see what the price
is. Would also be nice to see a review or two.

That sounds about right. Not cheap but not crazy expensive, either. I
have the feeling that some of the options they're going to offer on
the next one, like the band scope, could bring the price up quite a
bit.

THE IMPACT OF THE SINO-IRANIAN STRATEGIC PARTNERSHIP

Testimony before the U.S.-China Economic & Security Review Commission

Hearing on "China's Proliferation to North Korea and Iran, and Its Role in Addressing the Nuclear and Missile Situations in Both Nations"

Ilan Berman Vice President for Policy American Foreign Policy Council
September 14, 2006

Chairman Wortzel, distinguished members of the Commission:

It is a privilege to appear before you today. Thank you for inviting me to discuss the strategic partnership between the People's Republic of China and the Islamic Republic of Iran.

It is a topic of utmost importance. Today, Iran's nuclear ambitions have emerged as a cardinal challenge for the United States and its allies. Over the past four years, the Islamic Republic's concerted quest for a nuclear capability has catalyzed a widening international crisis.

Tehran's intransigence in this stand-off has been made possible in part by its strategic partnership with Beijing. Since the start of international negotiations with Iran over its nuclear program some three years ago, China has worked actively to dilute the effectiveness of any global response. It has done so initially through its vociferous opposition to Iran's referral to the United Nations Security Council, and more recently by its resistance to the imposition of multilateral sanctions against Tehran.

THE LOGIC BEHIND SINO-IRANIAN COOPERATION

China's obstructionism on the Iranian nuclear issue has been driven by two primary considerations. The first is energy. China's runaway economic growth has brought with it a voracious appetite for energy. In 2003, the PRC surpassed Japan to become the world's second largest consumer of oil and petroleum products. Since then, China's oil consumption has continued to grow at an unprecedented rate; oil demand is now projected to reach 7.4 million barrels daily this year-a half-a-million barrel per day increase over 2005 levels. By 2020, according to some estimates, Beijing's energy deficit could top eight million barrels per day.

All of this has made Tehran an indispensable energy partner for the PRC. Home to approximately 10 percent of proven world oil reserves and the world's second largest reserves of natural gas, Iran is a bona fide energy superpower. Beijing's engagement with-and investment in-the Islamic Republic has reflected this reality. In 2004, the two countries came to terms on two massive accords, estimated to be worth some $100 billion over the next

twenty-five years, granting Chinese firms extensive rights to develop Iranian oil and natural gas reserves. A flurry of additional deals has followed, and today Tehran and Beijing boast an energy partnership valued at some $120 billion or more.

The results have been dramatic; Iran has become China's single largest oil supplier, and as long ago as 2002 already accounted for more than 15 percent of the PRC's annual oil imports. This degree of economic dependence, moreover, is poised to deepen considerably as energy projects now underway between the two countries begin to come online over the next several years.

The benefits of this partnership are hardly one-sided, however. Iranian officials remember well the experience of the late 1990s, when low world oil prices and international isolation brought their country's economy to the brink of collapse. As a result, the Islamic Republic has embarked upon an ambitious effort in recent years to diplomatically and economically engage foreign nations, more often than not through its chief export commodity: oil. The burgeoning partnership between Tehran and Beijing is a testament to its successes on that front.

While energy represents the primary driver of contemporary cooperation, mutual opposition to America's primacy in world affairs serves as an important secondary force. In the post-Cold War era, officials in Beijing have expressed their commitment to a multi-polar world in which American influence is diluted, and have pursued partnerships with nations antagonistic to the United States as part of this effort. As numerous observers have noted, China today has embraced a "balancing" strategy designed to frustrate U.S. policy through robust international diplomacy. While it is doing so most directly in Asia [and Africa], the Chinese government has increasingly sought Middle Eastern partners for this venture as well. Cooperation with Iran, the emerging geopolitical center of gravity in the post-Saddam Hussein Middle East, has consequently emerged as a major point of political focus.

These sentiments have been echoed in Tehran. Ever since the Islamic Revolution of 1979, the regime in Tehran has viewed the United States as its principal enemy. For just as long, Iran's ayatollahs have sought external partners for their anti-American regional and international policies. This focus, moreover, has deepened dramatically since the start of the War on Terror. The U.S.-led campaign against the Taliban in Afghanistan in 2001, and the subsequent removal of Saddam Hussein's regime in Iraq two years later, may have eliminated Iran's chief ideological and military adversaries. But it also raised fears among Iran's ayatollahs of a dangerous encirclement-and of the possibility of a similar U.S.-driven transformation in their country. Iran has responded by seeking to strengthen its international partnerships, with China emerging as a major area of Iranian attention. As one conservative Iranian paper put it following then-president Mohammad Khatami's landmark visit to the PRC in the year 2000, "the strengthening of the Tehran-Beijing axis is of great importance" in the context of "confronting the unipolar world being considered by America."

These trends have found their expression in an increasingly robust proliferation partnership, and in the integration of Iran into Chinese-dominated security structures.

FROM CHINA, WITH ARMS

Beginning in the early 1990s, the Chinese government launched a series of steps to alleviate mounting international concerns about its proliferation practices. In 1992, it acceded to the Nuclear Nonproliferation Treaty (NPT). Two years later, in a joint statement with the United States, the Chinese government pledged to abide by the Missile Technology Control Regime. Then, in 1996, it signed the Comprehensive Test Ban Treaty (CTBT) and independently announced a moratorium on nuclear testing. The following year, it officially joined the Zangger Committee (NPT Exporters Committee). Most recently, in 2004, China became a member of the Nuclear Suppliers Group (NSG). In tandem with these measures, the PRC has repeatedly issued "white papers" and communiqu&#65533;s pledging greater unilateral restrictions on the sale of missile and WMD-related technologies abroad. But as a practical matter, China's record of proliferation to Iran is poor-and getting worse.

Conventional arms sales
Over the past decade-and-a-half, the Islamic Republic of Iran has been engaged in a sustained, multi-spectrum modernization of its military, and China has played a big part in these plans. For the period between 1993 and 1996, Chinese arms sales to Iran stood at approximately $400 million. Between 1997 and 2000, that number had risen to $600 million. (Numbers for 2000 through 2006, though preliminary, appear to be more modest.) The goods provided by the PRC have included anti-ship cruise missiles, surface-to-air missiles, combat aircraft, and fast-attack patrol vessels, as well as advanced technology designed to expand the versatility of Iran's burgeoning cruise missile arsenal. These supplies have contributed significantly to what has become the central element of Iran's military rearmament-a revitalization of its naval forces. As a direct result, U.S. intelligence agencies now estimate that Iran has the ability to shut off the flow of oil from the Persian Gulf for brief periods of time, even with a Western military presence in the region.

Ballistic missiles
Despite its commitment to abide by the guidelines of the Missile Technology Control Regime, China remains an active missile partner of the Islamic Republic. The U.S. intelligence community believes that Chinese entities continue to provide substantial assistance to the Islamic Republic's ballistic missile program, and have assisted the Iranian regime in erecting an indigenous production capability for its strategic arsenal. In particular, American officials have expressed concerns that Chinese firms have aided in the development-and subsequently the enhancement-of the centerpiece of Iran's ballistic missile arsenal, the 2,000-kilometer range Shahab-3.

China has also provided Iran with sophisticated cruise missile technology. Beginning during the Iran-Iraq War (1980-88), large quantities of Chinese-origin "Silkworm," C-801 "Eagle Strike," and C-802 cruise missiles

found their way to the Islamic Republic. Iran, in turn, has wasted no time in transferring this technology to its terrorist proxies. A recent example took place in July, during the month-long war between Israel and Hezbollah in Lebanon, when an Israeli warship, the INS Hanit, was hit and disabled by an Iranian variant of the C-802 "Silkworm"-a missile that Israeli officials previously did not know the Shi'ite militia possessed.

Chemical weapons
Iran's efforts to acquire chemical weapons (CW), like its ballistic missile program, began during the Iran-Iraq War, when the Iranian leadership launched a national effort to develop a response to Iraqi chemical weapons attacks on Iranian troops. During the mid-1990s, this effort received a substantial boost from foreign suppliers, including China, who provided the Iranian regime with critical precursor chemicals and key weapons know-how. The results have been dramatic; since the mid-1990s, the U.S. government has termed Iran's CW program to be the "most active" in the developing world-encompassing nerve, blister, choking and blood agents, as well as "a stockpile of at least several hundred metric tons of weaponized and bulk agent." And, despite its status as an original signatory of the 1993 Chemical Weapons Convention, Chinese firms still appear to be actively engaged in the transfer of "dual-use CW-related production equipment and technology" that could assist in this effort.

Nuclear assistance
China's most active WMD assistance to Iran, however, has been in the nuclear sphere. Preliminary nuclear contacts between the PRC and the Islamic Republic began in the mid- to late-1980s. The two countries are known to have signed nuclear accords in 1989, and again in 1991, paving the way for what would become a vibrant and multifaceted atomic partnership. By 1996, in a manifestation of the strength of this collaboration, the Pentagon had officially designated China as a "principal supplier of nuclear technology to Iran."

A decade on, this aspect of the Sino-Iranian strategic partnership is still going strong, despite the threat of U.S. sanctions. China has reportedly been a major focus of Iranian procurement activities, with Iranian front companies successfully acquiring nuclear-related materials from the PRC in recent years. Iranian opposition elements have also charged that Chinese experts are employed at multiple nuclear facilities inside Iran, including the Saghand uranium mine and a uranium centrifuge facility outside Isfahan. Beijing's most important support, however is moral; through its resistance to U.S. and European efforts to hold Iran accountable, Beijing has bought Tehran valuable time to forge ahead with its nuclear program.

SHANGHAI CALLING

Iran is likewise expanding its links with the premier security bloc in the "post-Soviet space," the China-dominated Shanghai Cooperation Organization (SCO).

Established in June of 2001, the SCO is an expansion of the "Shanghai Five," a regional grouping begun in 1996 with the purpose of strengthening the

common security of its member states: Russia, China, Kazakhstan, Kyrgyzstan and Tajikistan. By contrast, both the membership and the mission of the SCO are substantially broader. Ostensibly, the purpose of the new bloc, which now also encompasses Uzbekistan as a full member and Mongolia, Pakistan, India and Iran as observers, is to expand regional economic, cultural and counterterrorism cooperation. Iran's involvement, however, increasingly underscores the bloc's unstated purpose: the diminution of American influence in the "post-Soviet space." As Iranian observers have made clear, "[t]he national interests of Iran and China are in clear contradiction to the presence of the American military forces in [C]entral Asia, and the support of China for Iran's membership. should be seen within that framework."

Indeed, Beijing appears to be receptive to Iranian efforts to expand its role in this grouping. Iran's radical president, Mahmoud Ahmadinejad, was a guest of honor at the SCO's most recent summit in June 2006, delivering a public address that called upon the group to play a greater role against "the threats of domineering powers"-a thinly-veiled reference to the United States. Beijing has also sent positive signals to Iran regarding its quest for full blown membership in the six-country bloc (though so far stopping short of directly lobbying for the Islamic Republic's full inclusion in the forum).

Such a union, however, would have major benefits for both sides. Iran, facing a looming confrontation with the United States over its nuclear program, is eager to obtain a measure of collective security. China, meanwhile, has a vested interest in securing its most important energy partner against external threats. And while Iran's immediate membership is not likely as a result of both institutional and political constraints, the potential of such an expanded bloc, if and when it does materialize, will be immense. As David Wall of Cambridge University has explained, an SCO incorporating Iran "would essentially be an OPEC with bombs": an energy-rich geopolitical alliance stretching from the Taiwan Strait to the Strait of Hormuz.

TROUBLE AHEAD

With the expiration of the United Nations-imposed August 31st deadline to cease uranium enrichment, the international crisis over Iran's nuclear program has entered a new and dangerous phase. World attention is now focused on available punitive measures against the Islamic Republic, sanctions chief among them.

China has a decisive vote in this process. By virtue of its permanent seat on the UN Security Council, China has the ability to stymie the UN's implementation of multilateral measures against Iran. And, despite repeated U.S. entreaties, Chinese officials have done just that, steadfastly refusing to back sanctions against Iran on the grounds that they would be "counterproductive."

Beijing's resistance is logical. Sanctions against Iran threaten to undermine an increasingly important element of the PRC's economic construct.

China requires steady supplies of oil in order to maintain its current economic momentum, and can ill afford a supply interruption-particularly from an energy source as important as Iran. By way of comparison, the impact for China of Iran going "offline" as a result of sanctions would be roughly equivalent to the effect a sudden cessation of oil supplies from Saudi Arabia would have on the U.S. economy. It has likewise not been lost on Chinese officials that a likely result of sanctions could be an escalation to military action against Iran, and the possible loss of a major Chinese ally to U.S.-supported regime change.

Iran is well aware of China's calculus. As one Iranian analyst recently put it: "The dimensions of the historical, religious, economic and commercial cooperation between Iran and China are numerous, and it seems that China has always considered very seriously the dilemma of choosing either Iran or the United States, and it is hoped that in the end, it is going to choose that option which will safeguard the long term interests of China."

None of this is to say that Chinese officials are not cognizant of the dangers of Iran's atomic drive. In recent months, China has joined with the other permanent members of the UN Security Council in pressuring Iran to abandon its uranium enrichment activities. But, in keeping with its internal economic imperatives, the PRC has insisted on "diplomacy" as the sole means of resolving the Iranian nuclear impasse.

China's stance has far-reaching implications. So far, the Bush administration has focused on international diplomacy as the primary means by which to curb Iran's nuclear ambitions. However, it is becoming increasingly clear that China's political and economic priorities militate strongly against a constructive role for Beijing in the peaceful resolution of this crisis.

Soviet monument to make way for Reagan: report

Opponents of Poland's former communist regime reportedly want to pay a posthumous homage to US President Ronald Reagan by erecting his statue in the place of a Soviet-era monument.

In an open letter to the mayor of the southwestern city of Katowice, the former anti-regime activists said that the staunchly anti-communist Reagan had been a "symbol of liberty," the Polish news agency PAP reported.

As a result, they said, he deserved to become the centrepiece of the city's Freedom Square, replacing a monument to the Soviet troops who drove out the occupying Nazis in 1945.

They also said that they wanted the site to be rebaptised "Ronald Reagan Freedom Square."

City hall spokesman Waldemar Bojarun said that Katowice's councillors would consider the issue.

Bojarun said that he had "enormous respect" for Reagan.

However, he said, the proposal could cost an estimated 500,000 zlotys (128,000 euros, 168,000 dollars) and the city had "other pressing needs."

There are already separate plans to erect a statue in memory of Reagan in the centre of the Polish capital, Warsaw, which would be paid-for from private funds.

Reagan, who dubbed the Soviet Union an "evil empire," is widely credited by Poles with having driven communism to the wall.

The conservative Republican made fighting communism the cornerstone of his 1980-1988 presidency, and backed Poland's Solidarity trade union after it went underground when the regime declared martial law in 1981.

Reagan died in June 2004 at the age of 93.

Dear "Helmsman,"

Sorry - I didn't realize that I'd have to send you links for all four
of the files I uploaded. Here are the rest:

http://www.mediafire.com/?ex2qzm1z4n5

http://www.mediafire.com/?6wmztkzmydn

and

http://www.mediafire.com/?0hkn2mwyeo2

I hope this does it.

Best,

Joe

Dear Stephan,

You are correct in your assessment of the Sony ICF-SW7600GR's speaker audio, at least in regards to music reproduction:

> ... speaker audio ranges between thin and honky (7600GR) ...

but I should like to comment that, with regard to voice, the '7600GR's audio is quite clear and easy to understand. Especially when trying to identify a station, I have found its audio to be fine. (Of course others may disagree with me.) In any case, I think the fact that the radio has a true line output jack (in addition to an earphone output jack) is a major "plus" not offered on most other portable radios. This line output jack allows easy and direct connection to amplified speakers or to the auxiliary input on your audio system. When playing the radio through your audio system (via a cord easily obtainable at Radio Shack, Best Buy, Circuit City, etc., for about $10.00), the sound quality is limited only by the quality of your system.

Best,

Joe

>
>

There's an adaptor you need for RG58 cable that screws inside the 259 to
make the shield connect to the shell of the 259.

You don't solder anything by "dripping" solder into a joint. Put the
iron or gun ON the end of the pin, and and then touch the solder to the
little cut out area. When it melts, it will flow into the joint and look
nice and shiny.

Ask someone who is in your local scanner group to show you.

Thanks for trying, at the end of the download of file 1 and 2 I get a
message box telling me there is something wrong with the files.

My wife found the zip drive with them on it. Thanks again.

Just got the Computer Up-and-Running again with
a little help form the Dell Tech Reps in India.

It has been Rain All Day and now at 3 AM we are getting
Thunder-and-Lightning - So it is time to Turn everything
"Off" and un-plug a few things an Hit-the-Sack.

No rain here for a while, just snow. Currently 19 degrees.

Great for DX'ing, but otherwise lousy. Guess I'll sorta miss it come springtime.

Even if using the reducer, I still solder the braid through the four
holes in the plug. High heat with a big iron, short time.

Maybe, for listening purposes, it isn't needed, but I've always done
the four holes.

The reducer is a UG-175 or UG-176, depending on the thickness of your
cable.

3268. Re: RDS-FM versus AM-SS - Data steam systems for radio

Newsgroup: rec.radio.shortwave
Date: 2007-02-11 14:22:07 UTC
From: Stephan Grossklass <sgrokla-nospam04q2@yahoo.de>
Message-ID: <eqn8qg$l02$00$1@news.t-online.com>
Source record: 105317
Cross-posted to: aus.radio.broadcast,rec.radio.shortwave

RDS is, in fact, anything but brand new. The first devices that could receive it came out 20 years ago (in 1987 - in terms of FM tuners, the Grundig T9000 comes to mind), with first field tests having been carried out starting in 1983 or so. By 1993 even the Japanese offered some RDS equipped tuners, and that was about the time when it became pretty much standard in car radios here.
In terms of shortwave portables, I can think of two models with RDS decoding on FM - the Grundig Satellit 700 (1991-1997) and the Sangean ATS-909 (1996-). One used to be able to buy aftermarket RDS decoding units some time in the late '90s, but these have long been discontinued and are now highly sought after.
Here in Germany, it would probably be fairly difficult to find an FM station broadcasting without RDS, even our local noncommercial station is transmitted with a station ID now. That it caught on here while the US system RBDS still isn't very common probably has a lot to do with a much more powerful and more centralized public broadcasting system at the time (there weren't even any private radio stations until the mid-'80s here). I know too little about the situation in Australia to comment on that.

BTW, in the '90s a yet more fancy FM data broadcasting system was developed (the SWIFT Eureka 1197 project), but apparently that never got very far, although a matching Sony SRF-DR2000 receiver occasionally makes an appearance on the 'bay.

While I'm reading this AMSS paper, I'm reminded of the time signal information modulated onto some strong Frech LW broadcasting station. That never really caught on, plain CW does allow much simpler receivers and DCF77 seems to do plenty well enough here.

I forgot:

> Secondary features should also be considered:

Having a tuning knob also belongs into this category. If you only listen to a small number of stations with known frequencies, then a set with up/down key tuning will be sufficient provided it has direct frequency entry or at least a sufficient number of presets. However, if you're the bandscanning type, something with a tuning knob will be significantly to infinitely more comfortable to operate. The worst example of a key-tuned set that I have is the old Sony ICF-SW30 - on SW it tunes in 1 kHz steps only, at a fairly leisurely pace and with muting each time at that (which contributes an annoying clicking), there is no direct frequency entry and you have a total of 5 presets for all the SW bands. This can only be called frustrating, particularly since reception performance is good for an entry-level set. I grew up with an ICF-SW7600G, which is OK, but still doesn't make the best bandscanning rig (except for ham bands).

I tin the adaptor, the hole area of the 259, and only solder two holes. It's overkill for most uses. And if I have one, a huge iron. Mine died a while back, and I haven't found one cheap enough to buy yet.

But it's really no more than communications quality. I've seen measurements of the frequency response, and that drops like a rock below about 800 Hz, which is very high for something with a 3" speaker - even a telephone channel nominally goes down to 300 Hz. (And given that the IF filter in the set is fairly tight and some audio lowpass filtering is present, a remaining bandwidth of 800 Hz to maybe 2 or 2.5 kHz is hardly something to get excited about.) I've been inside my SW7600G, and there's pretty much no space to work with behind the speaker driver, meaning the available speaker volume is fairly close to zero. Yet the older SW7600 sounds better in spite of being very similar mechanically, and the old ICF-7600A beats them all (here you can actually see the speaker driver from the back). The 7600G sounds too bass-light to me even over headphones, but that probably is related to some undersized coupling capacitors that were "forgotten" in the signal path. (Those thankfully were eliminated in the 7600GR.) What can be done with only a slightly larger (4") speaker in a larger cabinet (plus some bass boost, I guess) was demonstrated by a recently obtained Panasonic RF-3700 here - it's no DXer at all, but in terms of speaker sound approaches the Redsun with its 5" driver. I'll try experimenting with some damping on this set.

In any case, the SW7600GR is one set where the line-out can be quite useful indeed.

Squeeze Iran

A sea change is beginning to occur in Iraq: for the first time since the insurgency took off, the terrorists are starting to run.

This is occurring not because the United States has successfully promoted political dialogue among Iraq's torn communities, although a successful dialogue is certainly to be desired.

It is occurring not because the United States has given in to the recommendations of the Baker-Hamilton commission and others, who have suggested a policy of unilateral capitulation to the terror-masters pulling the strings of the insurgency in Damascus and Tehran.

Nor is it occurring because we have suddenly become better at winning "hearts and minds" in Iraq, although such an effort, as described by Lt. Gen. David Petraeus, would appear to be sound counter-insurgent policy.

The terrorists are on the run for one reason only: they fear the United States.

"In Tehran, they are now referring to the United States as mar-rouye domesh vastadeh - the Cobra standing on his tail," says Shahriar Ahy, an Iranian-born political analyst who helped build the post-war broadcasting network in Iraq.

The sea-change began on January 10, when President George W. Bush announced that the United States would no longer tolerate Iranian and Syrian intelligence officers using Iraq as a playground for their murderous games.

When he announced the troop surge in Iraq, Bush also put Iran and Syria on notice. "Iran is providing material support for attacks on American troops," he said. "We will disrupt the attacks on our forces. We'll interrupt the flow of support from Iran and Syria. And we will seek out and destroy the networks providing advanced weaponry and training to our enemies in Iraq."

Those weren't idle words. That very night, U.S. forces raided an Iranian intelligence headquarters in the Kurdish town of Irbil, capturing six Iranians. The Iranian government screamed that they were diplomats, but apparently only one had any sort of diplomatic credentials. My sources tell me this was Hassan Abbassi, a well-known strategist who is close to president Mahmoud Ahmadinejad.

The other five turned out to be Revolutionary Guards officers. My sources identified three of them by name, and told me they were providing a treasure trove of intelligence to their U.S. interrogators (who appear to be

receiving help from an intelligence expert from the opposition Mujahedin-e Khalq).

"They are key people in the Sepah Quds," the overseas terrorist arm of the Revolutionary Guards, a former Iranian intelligence officer told me.

Iranian exiles and Kurdish sources identified another captive as Brig. Gen. Mohammad Djafari Sahraroudi, a Kurdish affairs expert who is wanted by Interpol for his involvement in the 1989 murder in Vienna of Iranian Kurdish dissident Abdulrahman Qassemlou.

Also among those detained was Mohammad Jaafari, an aid to National Security advisor Ali Larijani, the sources said.

The raid in Irbil was in fact the second U.S. backed raid that captured senior Iranian revolutionary guards officials recently. Shortly before Christmas, coalition forces raided the headquarters of Shiite political leader Abdul Aziz al-Hakim, just three weeks after he was in the Oval Office meeting with President Bush.

During that raid, they captured documents which American Enterprise Institute scholar Michael Ledeen called "a wiring diagram" of Iran's terror networks in Iraq.

Iran is believed to be operating a number of intelligence offices in Iraq similar to the one in Irbil, to plan terrorist attacks against U.S. forces and supply money and equipment to insurgents.

"The mullah infiltration of Iraq is far more extensive than the U.S. has thought," said Iranian exile Sardar Haddad. "They have infiltrated every single ministry, especially the defense and interior ministries, not just with one or two people, but massively."

Referring to the Irbil incident, "It's not five Iranian agents, but 5,000," he added.
The U.S. is also investigating Iran's alleged involvement in the kidnapping and murder of five U.S. soldiers near Karbala on January 20, and reportedly has detained two high-ranking Iraqi generals suspected of collaborating with the attackers.

I am told that those interrogations have turned up astonishing information, including documents sent by the Iranian regime to Prime Minister Nouri Al-Malaki, offering to "welcome" an extended visit to Iran by Shiite Muslim cleric Moqtada al-Sadr and top members of his Jaish-al Mahdi militia.

According to one source, the generals revealed the names of nearly a dozen top Iraqi politicians who were on the payroll of the Iranian government, including a Shiite member of parliament convicted and sentenced to death in Kuwait for his involvement in the 1983 bombings of the U.S. and French embassies in Kuwait city.

Jamal Jafaar Mohammed is said to have fled to Iran in recent days, fearing U.S. forces would arrest him and send him to Kuwait. He was elected to parliament in 2005 as a member of Prime Minister al-Malaki's Dawa party.

Yesterday, U.S. forces arrested deputy health minister Hakim Zamili, accused of helping Shiite militiamen to infiltrate his ministry. He was also accused of funelling money to Shiite death squads loyal to Moqtada al-Sadr.

The U.S. Cobra is finally standing on its tail. This strategy is clearly working.
In Tehran, shortly after the January 10 speech by President Bush, Supreme Leader Ayatollah Ali Khamenei set up two commissions, terrified that the policies of President Ahmadinejad were taking his regime to defeat.

A domestic policy review board is examining Ahmadinejad's dismal handling of the economy, which has led to increased unemployment and runaway inflation.

A national security and intelligence review board led by Khamenei's son Mojtaba and his chief of staff, Akbar Hejazi, is looking at Iran's nuclear face-off with the international community and its aggressive posture in Iraq.

According to Iranian exiles who have been following these events closely, a rift has developed between Ahmadinejad and senior Revolutionary Guards "professionals," who believe the President's overheated rhetoric and behavior is endangering the survival of the regime.

"It's not that these professionals want to make peace with America and sing Kumbaya with the opposition," said Shahriar Ahy. "Rather, they feel that Ahmadinejad has brought in undisciplined amateurs who are riding roughshod" over their agencies and "destroying all the work" the professionals have accomplished over the past twenty years.

Tehran's reaction to the more forceful U.S. policy in Iraq gives the lie to the U.S. politicians and analysts who have been arguing that the United States must talk to Tehran.

In fact, it shows they were completely wrong.

Council on Foreign Relations Iran "expert" Ray Takeyh, Washington Post reporter Robin Wright, and pro-regime lobbyist Housang Amirahmadi have been saying for years that pressure on the regime in Tehran will be counterproductive, because it will unite the people behind the regime.

"They have even argued against using coercive diplomacy," says Iran analyst Hassan Daioleslam.

But Daioleslam and others believe recent events have shown just the contrary. When the U.S. squeezes the Tehran regime, they retreat.

"Coercive measures work against Iran. They worked in 1988 at the end of the war with Iraq, and they worked again in 1996 when Europe and the United States took a hard stance against Iran. The hard-liners only got strong when the West was soft with them," he says.

A strong faction has emerged in Congress arguing for the United States to "go soft" toward Iran once again. Among the best known advocates of this policy are Sen. Joe Biden, Sen. John Kerry, Sen. Hillary Clinton, and Sen. Chuck Hagel.

But Daioleslam says the "pro-Iranians are wrong because they base their policy on two false assumptions: first, that the people of Iran support the regime. Second, that the factions are united. Both assumptions are just plain wrong as any reader who opens an Iranian newspaper can see immediately."

The Tehran regime understands the stakes in Iraq very well.

Former foreign minister Ali Akbar Velayati, now a top advisor to the Supreme Leader, told the Iranian Student News Agency in August 2004: "What is happening in Iraq today will affect the whole region. If the Iraqi people resist and finally force the invaders to leave Iraq, that could become a model for the entire world because the Moslems will see that they could defeat the aggressors."

Conversely, he argued, an American victory in Iraq could be fatal to the Islamic regime in Tehran.

As the insurgency deepened last year, Iranian Majles member Mojtaba Nia noted, "Every car exploded in Iraq will delay a month the American plot against us."

Now we need to squeeze harder. It's time for the U.S. Cobra to strike at the heart of the Iranian terror networks in Iraq, and shut down their supply lines once and for all.

I started using Ebay when Ebay was new and most people never heard of it. I've been using Merlin Snipe software for years. It allows multiple auctions, as many as you want. It lines them up in a list with item number, item description, current price, my bid price (if any; you can just monitor an auction if you want), high bidder (if any), auction ending time, and time left. Merlin also synchs your computer clock to ebay time to the second. In the early days I hung over my computer to manually snipe, but you can't do that unless you work at a computer, which I don't anymore. I learned early that if you want to get the best price, you had better put your bid in at the end of the auction. People who disparage sniping don't realize what's going on. Example: A Transoceanic A600 on ebay is currently at $37.00 (not really, just rhetorically). Three days seven hours to go. I want this radio so I click on the auction number, and because I have "auction grabber" enabled the auction is automatically placed on Merlin's list. There are other people vying for this radio, too. Two of them use Ebay's proxy bidder, which Ebay uses to boost its profits by causing auctions to automatically run up higher. One guy (newbie) thinks that he will go up to 68 dollars, and another (doofus) thinks $72.50 is his limit. He really doesn't want to pay that much, but he doesn't know very well how this works. He doesn't think that the auction will go up nearly that much. As soon as doofus places his $72.50 bid into Ebay, the auction suddenly shoots up to 69 bucks from 37. What happened? Ebay's proxy engine working for both newbie and doofus automatically and quickly bid against each other, and since doofus is bidding more that newbie, and newbie's max is 68, and the auction rises in $1.00 increments, the price for the radio is suddenly $69.00. Newbie is done and leaves this auction. Doofus is high bidder now, and is unhappy and wondering what happened to the price. Time goes by and another bidder bids up one increment and now the radio is $71.00 with doofus still the high bidder. From 69 to 70, then Ebay's proxy engine on behalf of doofus goes up another increment to $71.00. Later is see this auction and the current results, and I calculate that this radio has a leatherette cover that is in dirty but good shape, will dye nicely and the few bad spots will easily repair with liquid vinyl patch. The latch is all there, the chart/log book has it's dial, antennas all there as well as tubes, thumbscrews, and suction cups. It even has a manual. The radio is inoperative but that's fine since I will do an electronic restoration on it.

Restoration will not be too difficult and restored it will be worth over $200.00. Shipping is a reasonable $24.00. I do not know what others have bid, but I set my snipe at $86.00. My snipe program is set to snipe at 8 seconds. That is about as close as you can get to consistently snipe. The backbone of the Internet is routers, which are computers that route "packets" of data. There are time lags in each router. And between routers, bandwidth (read: speed of transmission) has nothing to do with each other and vary greatly. Who knows how many routers there are or what the bandwidth is between each? Now there is another person (qtcat) that wants this radio bad. She bids $75.00 and now the radio is up to $73.50; doofus's $71.50 plus the bid increment of 1 dollar. If I was to get into a bidding war with qtcat the radio can shoot up to well over $100.00. But at 8 seconds Merlin Snipe puts in a bid, the bid arrives at 4.35 seconds later, the radio is now suddenly up to 76 dollars, qtcat can do nothing about it, and I win the auction for 76 bucks. <whew> That's the way it works

If everyone bid the most they were willing to pay the FIRST (and only)
time they bid, you'd be right. But a large % of ebayers don't
understand proxy bidding and don't bid their max.

So you're wrong.

There are other reasons why sniping is the best strategy, but since
you can't get past the obvious one, I won't tax your brain with the
rest.

3287. Gobal Warming's Globalist Backers

Newsgroup: rec.radio.shortwave
Date: 2007-02-11 20:46:47 UTC
From: Guerite&#65533; <aim@their.heads>
Message-ID: <12sv04jbpas430a@corp.supernews.com>
Source record: 105336

Gobal Warming's Globalist Backers

The other shoe has dropped concerning global warming. Fasten your seat belts: an "international authortity" to act as enforcer has been demanded. Concurrent with the release of the International Panel on Climate Control's "report" (actually a twenty-page "summary for policy makers" with the report itself to be released eventually, maybe in April, maybe in May), we have a demand for an international authority to be set up to police compliance, voiced by none other than Jacques Chirac and seconded by no less than 45 countries. As yet no goals or specific regulations have been designated. But rest assured that "experts" will be consulted to spare us from the menace of carbon dioxide.

International authorities of this type, with full police powers and answerable to no one, are a venerable daydream of the UN bureaucracy and, not coincidentally, of the left at large. Kofi Annan's calls for taxation power and an independent army for the UN are other examples. Another, more subtle episode involved the UN's late-90s attempt to emplace international media rules derived from the censorship practices of third-world dictatorships. More recently we have heard rumblings concerning international gun control. What all these have had in common was their transparent goal of enabling the UN to horn in on the policies of independent states, and the fact that they went absolutely nowhere.

This style of internationalism - establishing a "global government" to act as a schoolmarm for recalcitrant nation-states -- has long been an ideal of the left, derived in large part from the supposed solidarity of the international proletariat [todays Neo-Communists], whose "class interests" were held to pull them together more than national and cultural differences pushed them apart. It's one of those left-wing [Neo-Liberal,"Progressive",Socialist,Neo-Commie] ideas that fail to stand the test of reality. At the outbreak of WW I, every last European socialist party voted to support its country's war effort, something that nearly drove Lenin - then in exile in neutral Switzerland - out of his mind. The same division endured, despite decades of efforts by assorted Cominterns and Cominforms. But a form of internationalism survives as a kind of nucleus for a new, transnational revolutionary class. [Neo-Communism]

At the dawn of the 50s, with all things Soviet beginning to look more than a little shabby, left-wingers transferred their allegiance to the UN, which (they hoped) would form the basis of a truly humane and progressive global government. This attitude was personified by Gary Davis, a misfit who carried out a sit-in at the UN's Turtle Bay construction site, demanding to be given a passport as a "world citizen". Despite every conceivable discouragement, this idea remains fixed in many minds as something of an

ultimate goal for an enlightened international system.

It's also proven a recurring nightmare to the more unrestrained American paleocons, who repeatedly found evidence of UN encroachment in places where, to put it kindly, little was discernable to calmer eyes. The last panic afflicting this group was the entertaining "black helicopter" scare of the mid-90s, in which talk radio and the infant Internet blazed with tales of hordes of UN troops about to descend on the United States to enforce some sort of undescribed but horrible UN despotism. (If the standard run of UN blue helmet is any indication, they'd have probably have needed help getting off the choppers.) You'd almost think that these proposals were deliberately put forward to send the troglodytes raging.

But in fact, they're serious, though not in the sense offered. If UN efforts had anything to actually do with global warming, they would not consistently overlook China and India. Attempting to address a problem as vast as climatic change without accounting for the world's two most populous countries - both engaged in breakneck efforts at industrial modernization - is well beyond simply asinine. Particularly since China stands in a class by itself as far as pollution goes, messing up rivers, ecosystems, and entire orbital zones with equal abandon. There are, to choose only one example, evidently several hundred abandoned, blazing coal mines in the Chinese interior that have been left to burn themselves out. What effect this has to the carbon dioxide balance can only be imagined, since nobody has dared question the Chinese about it.

As far as climate change goes, what this translates into is (as Dr. Robert Giegengack puts it) that the battle is over. Every last SUV on every American highway wouldn't account for a drop in the bucket representing Chinese and Indian plans. So in the unlikely event that global warming is the case, we will simply have to learn to live with it, as the Vikings and everybody else did at the end of the last millennium

But of course, that's not the point. Apart from providing Chirac with something to step up to after leaving the helm of le Republique Grande, the aim of all these schemes, from Annan's tax plans to the Kyoto Treaty to the climate change authority, is simply to bridle the United States. If not to bring it under complete UN suzerainty, then to exercise some form of bureaucratic restraint over what the UN hierarchy has long viewed as an out-of-control colossus. The UN effectively controls many derelict third-world states (and even the occasional European example, such as Kosovo). Why not the U.S.?

The simple answer - and one we don't need to look past - is that the day the UN seriously attempts any such thing is the day it gets evicted. Nothing pulls together the irreconcilable elements of the American polity more completely than a threat to U.S. sovereignty. The 1997 vote on the Kyoto Treaty, 95-0, makes that clear. Many of those who voted against the protocol (including Kerry, Boxer, and Schumer) share global warming fears and even the internationalist impulse. But not to the extent of placing themselves under UN oversight. The transnational dream comes in many varied and dissimilar forms, depending on who's doing the dreaming.

So we can probably leave any sort of global warming authority out of our future calculations. Excepting one possible case: we've previously pointed out here that environmentalism displays all the aspects of a pseudo-religion. And religions - as we've seen in recent years with the Jihadis - represent the sole existing example of a working transnational structure. A militant global environmentalist creed might very well be capable of pushing such a program through. It wouldn't necessarily establish a warming authority as much as it would become one, in and of itself. A very spooky possibility, if only because there are plenty of people in the U.S. who would welcome such a thing. So it might be worth keeping one eye on the situation. But no more than that. For a religion to spread in such a manner it would require a messiah. And the Greens, despite Al Gore's best efforts, don't have one of those yet.

3290. ARRL Now Only Wants No Code Hams - Holding Midnight Exams

Newsgroup: rec.radio.shortwave
Date: 2007-02-11 21:45:13 UTC
From: policy-ham <hamop_62@hotmail.com>
Message-ID: <1171230313.358958.108500@l53g2000cwa.googlegroups.com>

Found on qrz.com. The ARRL now only wants only no code hams. And as for the rest of us?

W1AW Special Event, Midnight Exam Sessions to Mark New Amateur Rules

NEWINGTON, CT, Feb 9, 2007 -- As new Amateur Radio Service rules phase in Friday, February 23, eliminating the Morse code requirement, Hiram Percy Maxim Memorial Station W1AW will mark the milestone with a weekend-long special event. In addition, a number of Central Connecticut volunteer examiners will be on hand at ARRL Headquarters -- both before and after the new rules become effective at 12:01 AM EST -- to offer Amateur Radio examinations under both the current and new rules. ARRL Regulatory Information Specialist Dan Henderson, N1ND, is helping to coordinate the celebration. He says Headquarters staff and other volunteers will keep W1AW active for the "Welcome Weekend" event.

"W1AW will be on the air all weekend for this special event to celebrate the fact that so many amateurs have gained or will earn new privileges as a result of the rule changes," he said. "The station will operate starting at 12:01 AM Eastern Time on Friday, February 23, continuing into the wee hours and resuming operation during the day. Then W1AW will be on the air on both days of the weekend, from 10 AM until 5 PM -- perhaps longer as conditions and enthusiasm dictate."

Operation will be on both SSB and CW. W1AW operators will concentrate their activities on the Technician and General class HF subbands. On SSB, the station will use its normal phone frequencies -- 1.855, 3.990, 7.290, 14.290, 18.160 and 21.390 MHz. On 10 meters, W1AW will operate SSB on or about 28.480 MHz.

Henderson says operating will be casual unless pileups develop. "The purpose is to welcome newcomers to new privileges," he said.

"First Contact" certificates will be available as part of this event. ARRL invites anyone making a first contact or first HF contact to enter the contact information on the ARRL "Welcome Weekend" Web site and receive a certificate in return. "If the first contact is with W1AW we will also be including a W1AW QSL card for the contact," Henderson added.

The ARRL anticipates a huge influx of upgrade applications once the Morse code requirement disappears. In addition, all Technician licensees will have limited HF privileges starting February 23, whether or not they've passed a Morse code test.

Amateur Radio exam sessions both before and after the zero hour will offer an opportunity for applicants either to upgrade under the outgoing licensing rules at the last possible opportunity or under the new licensing rules at the first possible opportunity.

"Dual exam sessions are scheduled at ARRL Headquarters around the effective time of the new licensing rules," says Brennan Price, N4QX, a former ARRL staff member and an ARRL VEC volunteer examiner. "At 11 PM on February 22, a session will be held for candidates wishing to upgrade under the existing rules. A few folks have expressed interest in such a session." Price says all Amateur Radio written and telegraphy elements will be offered until midnight.

"At 12:01 AM February 23, a second session will begin under the new licensing rules," he said. "Examiners will not only be evaluating previously earned Certificates of Successful Completion of Exam (CSCEs) for upgrades, but will be offering all written elements." Two teams of volunteer examiners will be on site until all applicants have been served.

On or after February 23, applicants upgrading on the basis of a valid CSCE must present the certificate for element credit, fill out an application and pay any applicable exam session fee, which most VECs charge. Only after the VE team has issued a CSCE for upgrade credit may applicants actually use their new operating privileges on the air.

Additional Welcome Weekend information will be available on the ARRL Web site in the days leading up to February 23.

3291. IBOC in DC area

Newsgroup: rec.radio.shortwave
Date: 2007-02-11 21:51:14 UTC
From: Brenda Ann <brendad@shinbiro.com>
Message-ID: <eqo2vu$qt0$1@news2.kornet.net>
Source record: 105340

I received this forwarded e-mail this morning, senders name blacked.

570 WTNT on
600 WCAO on
730 WKDL/WXTR off since call change
980 WTEM off
1450 WOL off
1500 WTWP off.

So, in the Washington, DC - Baltimore, MD area, four out of the six stations which have had IBOC are not using it as of 11 February. How does that compare to other areas?

**** *****
Elkridge, Maryland

You DO get better reception of distant stations if the distant station
is using IBOC and happens to be strong enough, eg. WJR 760 Detroit
puts the best signal into Central Ohio on IBOC, even over the locals;
assuming you can put an external antenna on the HD radio to achieve
that.

The station using IBOC isn't the one that suffers, unfortunately.
The adjacent channel ones do.

False - HD Raio/IBOC has only 60% the coverage of analog.

I was just on the Universal website and noticed that, in addition to
the GAP "Hear It" speaker, there's also a GAP inline module for sale.
I don't recall seeing the inline module before. Has anyone used it? I
wonder how it compares to the Clearspeech.

try audio http://rhhardin.home.mindspring.com/hdradio.ram WJR as received
by an R8B, then _on the same antenna_ a Sangean HD-1, then back to the R8B,
and see what you think.

Well, I'm not sure of your point, but from the title of the post, you seem to be somewhat negative...("ARRL Now Only Wants...")

I don't think that's all they want, but more of a case of that's all there is, thanks to the FCC. The ARRL is just accepting the reality of the situation.

1) ANY organization generally wants to preserve itself (Gee, I know this comes as a big surprise). If due to *FCC* action (beyond the control of the ARRL), all that there is are new, no-code hams, why shouldn't the ARRL welcome them?

2) Read point one above again. This was an *FCC action*, beyond the control of the ARRL; the ARRL can welcome the newbies or put their tail between their legs and slink off into the night...

3) You ask "What happens to the rest of us?" I am sure the ARRL would be glad to welcome us as new members and/or keep us as existing members. Why would you suspect anything different?

However, the usable coverage is generally as great as or sometimes better
than the analog signal.

During February and March, the Bowie-based Radio And Television Museum will host a display of contemporary world band radios entitled "Today's Short Wave" at the Kingstown and Martha Washington branches of the Fairfax County Public Library system. While the displays highlight current examples of commercially available shortwave receivers, there also will be some classics from yesteryear. In addition, there will be QSL cards, books, and other materials "designed to show the viewer world band radio is alive and well in the age of the internet".....

I do not believe that there is any further point in discussing the
matter of sniping. Perhaps the people who do not understand lack
experience, knowledge of the system, or just cannot get their minds
around the strategy. Let those that know what they are doing continue
to win auctions at the lowest possible price given the extant
circumstances, and let those who want to rely on Ebay's proxy system
continue to lose auctions, and pay more than they had to when they
win. If this debate continues, it may degrade into more name
calling. I'm done.

False - HD Radio/IBOC has only 60% the coverage of analog, and
requires AM-loop, and externally-mounted FM antennas, and reception of
the HD channels is still problematic.

Hello,

I am wondering what's the state of the art. There are fast and
accurate commercial ADCs
like the Linear LTC2208 (16-bit, 130 Msps) that can digitize shortwave
(not FM) signals directly.
Are there commercial software radios using such devices?

Thanks.

-Martin

You are missing the point. In most major metros, the usable signal on an AM
is between 15 and 25 mv/m. So the usable coverage is limited to people
inside this contour. HD often is usable outside this contour, so the
effective coverage of HD is as good as or better than the analog AM signal.

Our own empirical evidence based on actual usage of analog signals at
several major market AMs vs. the zone where the HD signal is usable and
clear... at KTNQ in LA, it exceeds the analog zone by quite a bit... an area
with a net usable signal gain of over 300 thousand persons in the target
audience group.

No, it is not. You are ignoring the fact that in major markets, you need
over a 15 mv/m signal on the analog side to overcome the man made noise; the
HD signal is generally robust out to beyond the 10 mv/m analog signal
contour.

Really? What kind of sample size do you have? If the sample size is
small it might not mean much.

Are the analog and HD radios using similar or the same antennas?

I assume your data pertains to daytime coverage only, that they are stationary radios, and are HD1 type.

15 to 25mV/m is a huge signal. You don't need a signal that big for good AM reception. You could be a factor of 10 smaller.

Hello all,

I don't know wether the 7600GR has the same feature than the SW100 :
when holding down the 1kHz + or - button, the radio scans up or down the
frequencies providing the sound and without muting, at a correct speed,
so it acts more or less like a tuning knob. I found this quite
compfortable sometime (more than the automatic scanning).

The NPR study, submitted to the FCC, showed that HD Radio/IBOC has only 60% the coverage of analog, and causes adjacent-channel interference.

He's using statistical smoke and mirrors. As you said, you don't need anywhere near the city contours to get a very listenable signal. For instance, most of the Portland AM's an be heard quite well over most of NW Oregon and SW Washington. But not their IBOC. But then he doesn't count anything outside the city limits as part of the audience, they don't count.

Raytheon Successfully Demonstrates Satellite Communications
Alternative

(MARLBOROUGH, Mass., Feb. 9, 2007) -- During an exercise with the I
Marine Expeditionary Force at Camp Pendleton, Calif., Raytheon Company
(NYSE: RTN) successfully demonstrated that a traditional,
transportable satellite communications terminal could be field
configured to communicate without acquiring a satellite connection.

This capability, known as Troposcatter, or TROPO, transmits radio
waves over the curvature of the Earth without using satellites. The
U.S. military currently employs these systems for tactical and
strategic communications throughout the world.

"This demonstration showed that it is possible to provide a viable
alternative to traditional satellite communications with a light-
weight, low- power and rapidly deployable solution," said Jerry
Powlen, vice president, Network Centric Systems' Integrated
Communications Systems. "Enemy threats to satellite communications are
real. We are offering a high-performance, cost- effective solution to
counter these threats."

Colonel Kirk Bruno, information technology officer for the I Marine
Expeditionary Force, said: "The ease of deployment and set up and the
improved data rates with TROPO systems drastically reduce the support
needed to carry out a mission. Increased data throughput without
relying on already stressed satellites is critical, and unlike
satellite communications, TROPO systems provide cost-free access."

Raytheon established the TROPO communications link between its Dual-
Mode, All-Band Re-locatable Tactical Terminal, or DART-T, and a
modified Joint Network Node satellite transportable terminal.

The demonstration showed that the widely fielded JNN terminal could be
adapted to include a high-bandwidth troposcatter mode, which not only
minimizes the current limitation of existing satellite bandwidth, but
also provides continuous and reliable communications in areas of the
world that do not have access to SATCOM.

It has to be mechanically sound. The wafers must be intact and
properly aligned. The contacts must still have some spring in them.
It's difficult to replace a wafer with another copy of the radio to
rob parts from. Virtually mpossible without.

IBOC is a total disaster out West. Morning drive is destroyed by
stations to the East that fire-up the IBOC at their local sunup. They
should ban IBOC until sunrise one time zone West.

Another good source is Deutsche Welle on 7240 at 06:00 UTC. That was
coming in here ok in Seattle a couple of nights ago.

When listening in the Anal-log mode.
In IBOC mode there is no interference - period!

Your anal-log radio will be going the way of the tube TV set.

3347. Czech President Questions Al Gore's Sanity

Newsgroup: rec.radio.shortwave
Date: 2007-02-12 16:57:21 UTC
From: Guerite&#65533; <aim@their.heads>
Message-ID: <12t17282uqqbm9e@corp.supernews.com>
Source record: 105246

V&#65533;clav Klaus, the second president of the Czech Republic - who currently enjoys 82% approval rate - deconstructs the IPCC climate panel of the United Nations. In an interview with "Hospod&#65533;rsk&#65533; noviny", a Czech economics daily, Klaus answered a few questions:

Q: IPCC has released its report and you say that the global warming is a false myth. How did you get this idea, Mr President?

A: It's not my idea. Global warming is a false myth and every serious person and scientist says so. It is not fair to refer to the U.N. panel. IPCC is not a scientific institution: it's a political body, a sort of non-government organization of green flavor. It's neither a forum of neutral scientists nor a balanced group of scientists. These people are politicized scientists who arrive there with a one-sided opinion and a one-sided assignment. Also, it's an undignified slapstick that people don't wait for the full report in May 2007 but instead respond, in such a serious way, to the summary for policymakers where all the "but's" are scratched, removed, and replaced by oversimplified theses.

This is clearly such an incredible failure of so many people, from journalists to politicians. If the European Commission is instantly going to buy such a trick, we have another very good reason to think that the countries themselves, not the Commission, should be deciding about similar issues.

Q: How do you explain that there is no other comparably senior statesman in Europe who would advocate this viewpoint? No one else has such strong opinions...

A: My opinions about this issue simply are strong. Other top-level politicians do not express their global warming doubts because a whip of political correctness strangles their voice.

Q: But you're not a climate scientist. Do you have a sufficient knowledge and enough information?

A: Environmentalism as a metaphysical ideology and as a worldview has absolutely nothing to do with natural sciences or with the climate. Sadly, it has nothing to do with social sciences either. Still, it is becoming fashionable and this fact scares me. The second part of the sentence should be: we also have lots of reports, studies, and books of climatologists whose conclusions are diametrally opposite.

Indeed, I never measure the thickness of ice in Antarctica. I really don't know how to do it and don't plan to learn it. However, as a scientifically oriented person, I know how to read science reports about these questions, for example about ice in Antarctica. I don't have to be a climate scientist

myself to read them. And inside the papers I have read, the conclusions we may see in the media simply don't appear. But let me promise you something: this topic troubles me which is why I started to write an article about it last Christmas. The article expanded and became a book. In a couple of months, it will be published. One chapter out of seven will organize my opinions about the climate change.

Environmentalism and green ideology is something very different from climate science. Various findings and screams of scientists are abused by this ideology.

Q: How do you explain that conservative media are skeptical while the left-wing media view the global warming as a done deal?

A: It is not quite exactly divided to the left-wingers and right-wingers. Nevertheless it's obvious that environmentalism is a new incarnation of modern leftism.

Q: If you look at all these things, even if you were right ...

A: ...I am right...

Q: Isn't there enough empirical evidence and facts we can see with our eyes that imply that Man is demolishing the planet and himself?

A: It's such a nonsense that I have probably not heard a bigger nonsense yet.

Q: Don't you believe that we're ruining our planet?

A: I will pretend that I haven't heard you. Perhaps only Mr Al Gore may be saying something along these lines: a sane person can't. I don't see any ruining of the planet, I have never seen it, and I don't think that a reasonable and serious person could say such a thing. Look: you represent the economic media so I expect a certain economical erudition from you. My book will answer these questions. For example, we know that there exists a huge correlation between the care we give to the environment on one side and the wealth and technological prowess on the other side. It's clear that the poorer the society is, the more brutally it behaves with respect to Nature, and vice versa.

It's also true that there exist social systems that are damaging Nature - by eliminating private ownership and similar things - much more than the freer societies. These tendencies become important in the long run. They unambiguously imply that today, on February 8th, 2007, Nature is protected uncomparably more than on February 8th ten years ago or fifty years ago or one hundred years ago.

That's why I ask: how can you pronounce the sentence you said? Perhaps if you're unconscious? Or did you mean it as a provocation only? And maybe I am just too naive and I allowed you to provoke me to give you all these answers, am I not? It is more likely that you actually believe what you say.

Perhaps, but I'll bet your IBOC receiver will be there to greet it
upon its arrival on the scrap heap.

3353. Scenes from the Climate Inquisition

Newsgroup: rec.radio.shortwave
Date: 2007-02-12 17:54:06 UTC
From: Guerite&#65533; <aim@their.heads>
Message-ID: <12t1acnra92m57d@corp.supernews.com>
Source record: 105352

On February 2, an AEI research project on climate change policy that we have been organizing was the target of a journalistic hit piece in Britain's largest left-wing newspaper, the Guardian. The article's allegation--that we tried to bribe scientists to criticize the work of the United Nations Intergovernmental Panel on Climate Change (IPCC)--is easy to refute. More troubling is the growing worldwide effort to silence anyone with doubts about the catastrophic warming scenario that Al Gore and other climate extremists are putting forth.

"Scientists and economists have been offered $10,000 each by a lobby group funded by one of the world's largest oil companies to undermine a major climate change report due to be published today," read the Guardian's lead. The byline was Ian Sample, the paper's science correspondent, and his story ran under the headline "Scientists Offered Cash to Dispute Climate Study."

Sample spoke to one of us for five minutes to gather a perfunctory quotation to round out his copy, but he clearly was not interested in learning the full story. He found time, however, to canvass critics for colorful denunciations of the American Enterprise Institute as "the Bush administration's intellectual Cosa Nostra," with nothing but "a suitcase full of cash."

Every claim in the story was false or grossly distorted, starting with the description of the American Enterprise Institute as a "lobby group"--AEI engages in no lobbying--funded by the world's largest oil company. The Guardian reports that "AEI has received more than $1.6 million from ExxonMobil." Yes--over the last

seven years, a sum that represents less than 1 percent of AEI's total revenue during that period.

The irony of this story line is that AEI and similar right-leaning groups are more often attacked for supposedly ignoring the scientific "consensus" and promoting only the views of a handful of "skeptics" from the disreputable fringe. Yet in this instance, when we sought the views of leading "mainstream" scientists, our project is said to be an attempt at bribery. In any event, it has never been true that we ignore mainstream science; and anyone who reads AEI publications closely can see that we are not "skeptics" about warming. It is possible to accept the general consensus about the existence of global warming while having valid questions about the extent of warming, the consequences of warming, and the appropriate responses. In particular, one can remain a policy skeptic, which is where we are today, along with nearly all economists.

The substantive backstory, in brief, is as follows. The 2001 report of the Intergovernmental Panel on Climate Change expressed the hope that scientific

progress would reduce key uncertainties in climate models, especially having to do with clouds and aerosols. As the 2001 report stated: "The accuracy of these [temperature] estimates continues to be limited by uncertainties in estimates of internal variability, natural and anthropogenic forcing, and the climate response to external forcing." The IPCC identified 12 key factors for climate modeling, and said that the level of scientific understanding was "very low" for 7 of the 12. What progress have climate models made since this assessment was written, we wondered? Even people who closely follow the scientific journals are hard-pressed to tell.

Last summer we decided to commission essays from scientists, economists, and public policy experts in the hope of launching a fresh round of discussion and perhaps holding a conference or publishing a book. Among the nine scholars we wrote to in July were Gerald North and Steve Schroeder of Texas A&M, who have done scrupulous and detailed work on some key aspects of climate modeling, and we were confident that their work would be seen as authoritative by all sides. (North chaired the recent National Academy of Sciences review of the controversial "hockey stick" temperature reconstruction.) We couched our query in the context of wanting to make sure the next IPCC report received serious scrutiny and criticism.

Our offer of an honorarium of up to $10,000 to busy scientists to review several thousand pages of material and write an original analysis in the range of 7,500 to 10,000 words is entirely in line with honoraria AEI and similar organizations pay to distinguished economists and legal scholars for commissioned work. (Our letter to North and Schroeder can be found readily on AEI's website.)

North declined our invitation on account of an already full schedule. Schroeder shared our letter with one of his Texas A&M colleagues, atmospheric scientist Andrew Dessler. Dessler posted our complete letter on his blog in late July, along with some critical but largely fair-minded comments, including: "While one might be skeptical that the AEI will give the [IPCC Fourth Assessment Report] a fair hearing, the fact that they have solicited input from

a credible and mainstream scientist like Jerry North suggests to me that I should not prejudge their effort."

Dessler's story was linked on another popular environmental blog (www.grist.org), after which someone in the environmental advocacy community (the Washington Post suggests it was Greenpeace and the Public Interest Research Group) picked up the story and tried to plant it, with a sinister spin, somewhere in the media. Several reporters looked into it--including one from a major broadcast network who spent half a day talking with us in November about the substance of our climate views--but reached the conclusion that there was no story here. In particular, AEI's recent book Strategic Options for Bush Administration Climate Policy, advocating a carbon tax and criticizing Bush administration climate policy, clearly didn't fit the "Big Oil lobby corrupts science" story line.

So instead, the story was taken overseas and peddled to the Guardian, which, like some of its British competitors, has a history of publishing environmentalist hype as news. (In December, Guardian columnist George Monbiot offered the view that "every time someone dies as a result of floods in Bangladesh, an airline executive should be dragged out of his office and drowned.") Add a Matt Drudge link and a credulous recycling of the story by NPR's "Morning Edition," and a full-scale media frenzy was on. Even Al Gore jumped on the bandwagon, calling us "unethical" in an appearance in Silicon Valley and a CNN interview.

We were deluged with calls, but--unlike the reporters who had looked at the story last fall--none of our interrogators last week evinced any interest in the substance of our views on climate change science or policy, nor did any news story that we have seen accurately report the figures we supplied regarding ExxonMobil's share of AEI's funding.

The Guardian story, it should be noted, appeared the very day the IPCC released its new summary on the science of climate change. This was a transparent attempt to discredit an anticipated AEI blast at the IPCC. But no such blast was ever in the offing. As our letter to Schroeder makes clear, our project was not expected to produce any published results until some time in 2008, long after the headlines about the IPCC report would have faded.

Meanwhile, the IPCC's release of a 21-page summary of its work a full three months before the complete 1,400-page report is due to be published is exactly the kind of maneuver that raises questions about the politicization of the IPCC process. Why the delay? In the past, official summaries of IPCC reports have sometimes overstated the consensus of scientific opinion revealed later in the fine print (though, to be fair, it is more often the media and advocacy groups that misrepresent findings or omit the IPCC's caveats and declarations of uncertainty on key points). Is the full report going to be rewritten to square more closely with the summary? The Scientific Alliance in Cambridge, England, noted that it is "an unusual step to publish the summary of a document that has not yet been finalized and released into the public domain."

One possible reason for the timing is that there appear to be some significant retreats from the 2001 IPCC report. The IPCC has actually lowered its estimate of the magnitude of human influence on warming, though we shall have to wait for the full report in May to understand how and why. Only readers with detailed knowledge of the 2001 report would notice these changes, which is why most news accounts failed to report them.

This reining-in has led some climate pessimists to express disappointment with the new summary. Environmental writer Joseph Romm, for example, complained about "the conservative edge to the final product." Which returns us to our starting point.

The rollout of the IPCC report and the Guardian story attacking us coincide with the climax of what can be aptly described as a climate inquisition intended to stifle debate about climate science and policy. Anyone who does not sign up 100 percent behind the catastrophic scenario is deemed a

"climate change denier." Distinguished climatologist Ellen Goodman spelled out the implication in her widely syndicated newspaper column last week: "Let's just say that global warming deniers are now on a par with Holocaust deniers." One environmental writer suggested last fall that there should someday be Nuremberg Trials--or at the very least a South African-style Truth and Reconciliation Commission--for climate skeptics who have blocked the planet's salvation.

Former Vice President Al Gore has proposed that the media stop covering climate skeptics, and Britain's environment minister said that, just as the media should give no platform to terrorists, so they should exclude climate change skeptics from the airwaves and the news pages. Heidi Cullen, star of the Weather Channel, made headlines with a recent call for weather-broadcasters with impure climate opinions to be "decertified" by the American Meteorological Society. Just this week politicians in Oregon and Delaware stepped up calls for the dismissal of their state's official climatologists, George Taylor and David Legates, solely on the grounds of their public dissent from climate orthodoxy. And as we were completing this article, a letter arrived from senators Bernard Sanders, Pat Leahy, Dianne Feinstein, and John Kerry expressing "very serious concerns" about our alleged "attempt to undermine science." Show-trial hearing to follow? Stay tuned.

Desperation is the chief cause for this campaign of intimidation. The Kyoto accords are failing to curtail greenhouse gas emissions in a serious way, and although it is convenient to blame Bush, anyone who follows the Kyoto evasions of the Europeans knows better. The Chinese will soon eclipse the United States as world's largest greenhouse gas emitter, depriving the gas-rationers of one of their favorite sticks for beating up Americans. The economics of steep, near-term emissions cuts are forbidding--though that's one consensus the climate crusaders ignore. Robert Samuelson nailed it in his syndicated column last week: "Don't be fooled. The dirty secret about global warming is this: We have no solution."

The relentless demonization of anyone who does not fall in behind the Gore version of the issue--manmade climate catastrophe necessitating draconian cuts in emissions--has been effective. Steve Schroeder practically admitted as much when he told the Washington Post that, although he didn't think AEI would distort his work, he feared it could be "misused" or placed alongside "off-the-wall ideas" questioning the existence of global warming. In other words, Schroeder was afraid of the company he might have to keep. For the record, AEI extended an invitation to participate in this project to only one so-called skeptic (who declined, on grounds that reviewing the next IPCC report isn't worth the effort). The other scientists and economists we contacted are from the "mainstream," and we were happy to share with them the names of other prospective participants if they asked. Over the last four years, AEI has repeatedly invited senior IPCC figures, including Susan Solomon, Robert Watson, Richard Moss, and Nebojsa Nakicenovic, to speak at AEI panels and seminars, always with an offer to pay honoraria. Full schedules prevented these four from accepting our invitation; a few more junior IPCC members have spoken at AEI.

But the climate inquisition may prompt a backlash. One straw in the wind was the bracing statement made by Mike Hulme, director of the Tyndall Centre for Climate Change Research and one of Britain's leading climate scientists. "I have found myself increasingly chastised by climate change campaigners when my public statements and lectures on climate change have not satisfied their thirst for environmental drama and exaggerated rhetoric," Hulme told the BBC in November. "It seems that it is we, the professional climate scientists, who are now the skeptics. How the wheel turns. . . . Why is it not just campaigners, but politicians and scientists, too, who are openly confusing the language of fear, terror, and disaster with the observable physical reality of climate change, actively ignoring the careful hedging which surrounds science's predictions? . . . To state that climate change will be 'catastrophic' hides a cascade of value-laden assumptions which do not emerge from empirical or theoretical science."

Then in December, Kevin Vranes of the University of Colorado, by no means a climate skeptic, commented on a widely read science blog about the mood of the most recent meeting of the American Geophysical Union, where Al Gore had made his standard climate presentation. "To sum up the state of the [climate science] world in one word, as I see it right now, it is this: tension," Vranes wrote. "What I am starting to hear is internal backlash. . . . None of this is to say that the risk of climate change is being questioned or downplayed by our community; it's not. It is to say that I think some people feel that we've created a monster by limiting the ability of people in our community to question results that say 'climate change is right here!'"

The climate inquisition is eliminating any space for sensible criticism of the climate science process or moderate deliberation about policy. Greenpeace and its friends may be celebrating their ability to gin up a phony scandal story and feed it to the left-wing press, but if people who are serious about climate change hunker down in their fortifications and stay silent, that bodes ill for the future of climate policy and science generally.

I'm not sure I understand your statement. If you really mean the
"ARRL want's only nocode hams" then you must believe all hams that
have passed the code test will no longer be welcome at the ARRL and
memberships will not be renewed. Do you really believe that?

Lets not forget the ARRL and it's aging membership really has no
choice when it comes to accepting hams that have passed all currently
required tests. The ARRL should make plans for liquidation if they
choose otherwise.

> And as
> for the rest of us?

What do the rest of you (hams that passed a morse code test) want from
the ARRL. Would they like to retake the code test as a measure of
defiance? Maybe a bordered certificate suitable for framing that
proclaims: I Passed The Code Test at (insert speed). And I Practiced
This Long (insert number of times code tapes replayed).

> new rules.

For heavens sake why offer the test under the old rules at the 11th
hour? Reads like the ARRL is encouraging a "We vs They" mentality
among the old guard. What's next...will the no code licensees have a
special marker on their QST address label?

> ARRL Regulatory Information Specialist Dan Henderson, N1ND,

He always got the best of you "Floriduh" boy.....

BILLY SMITH STEPS ON HIS OWN DICK THUSLY WITH THESE FUCK-UPS:

Billy "I can't read" Smith fucks up again when he claims in
<gsJRg.2244$o71.124@newsread3.news.pas.earthlink.net>:
"By the way, weren't you required to retest per a letter from FCC
enforcement bureau? Shall we post the record for all to see again?
They
don't make people retest unless you have been accused or proven to
have
committed rules violations."
Billy can't read the ARRL website which states:
NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC
has what it believes to be reliable evidence of possible rules
infractions and not necessarily that the recipient has violated FCC
rules. The FCC has the authority, pursuant to §97.519(d)(2) of the
rules to readminister any examination element previously administered
by a volunteer examiner.

Billy "Dumbass who can't put together a sentence" Smith shows off
those English skills, quite ironically in
<VfQHf.14581$rH5.8121@newsread2.news.atl.earthlink.net>:
"That's interesting there idiot. I bet you really did flunk high
school math and probably elementary too. Oh thats right, wasn't that
when was in
Floriduh. Spelled Florida but the DUH is for your Dumb Ass."

"wasn't that when was in Floriduh" - Billy makes good fuck up!

Billy "shoots" himself in his palsied club foot once again in
Message-ID <Q0bJf.19641$vU2.7735@newsread3.news.atl.earthlink.net>:

"Roger, shots himself in the foot"

Billy the "Rhodes" scholar fucks up again and even demonstrates he is an imbecile in <8uqwg.8275$v0.7632@newsread4.news.pas.earthlink.net>:
"Right you are, wannabe Rhode's Scholar!"

Billy the illiterate retard Smith screws up again, and his illiteracy is exposed. "It serves him right."
in<hauKf.1410$S25.940@newsread1.news.atl.earthlink.net>:
"Deserves him right."

Billy "retard" Smith confesses to his generally accepted retarded status in <LwpLf.2321$F56.2317@newsread3.news.atl.earthlink.net>:
"I'm a general retard. bwhahaha"

Billy "spelling champ of the general retards" Smith admits his bad hygiene but is still in denial about his English skills in
<QxpLf.2322$F56.1169@newsread3.news.atl.earthlink.net>
"Sure I can spell and smell."

"Billy" the NOtwordSmith fucks up again with this incompete sentence in
<qgyNf.5576$S25.341@newsread1.news.atl.earthlink.net>:
"So when you got divorced boy, did your finally figure out that your more"

Billy "cumgargler" Smith managed to awaken from his drunken stupor to slobber
in <fbIOf.442$sL2.25@newsread2.news.atl.earthlink.net>:
"Isn't that you mom weighed"

Mr."Education" Billy Smith steps on his own dick again when he talks about others' "educations" (or educatiion" as he spells it) in
<w7IOf.436$sL2.167@newsread2.news.atl.earthlink.net>:
"Uh, huh. Right LOSER. Still smoking that dope again? By the way how is your
so called educatiion actually doing for you? Those online classes."

Billy Smith shows off his Pulitzer Prize writing skills in
<B9IOf.439$sL2.255@newsread2.news.atl.earthlink.net>:
"You're whole life has been exhaled before."

Billy "illiterate retard" Smith spikes the "HUH?" factor in this slobbering in

There has been, on and off, questions here and in other fora about when Tivoli Audio will release it's long awaited HD Radio, promised by last fall.

I stumbled on this in the FAQ of the Tivoli B-Goods Store, but curiously absent from the FAQ on the TivoliAudio website:

****

7. Why hasnï¿½t Tivoli Audio manufactured an HD radio?
There are several obstacles that must be overcome before we can bring a Tivoli Audio HD radio to market.

The first is cost. Until this technology becomes less expensive, it is not possible to manufacture an HD radio that is economical for our customers. Secondly, but just as important, is sound quality. The HD broadcast fidelity varies greatly from station to station and often leaves much to be desired, despite what you may read in the press.

Once manufacturing costs come down and the sound quality is what you have become accustomed to hearing from a Tivoli Audio radio, we will manufacture a Tivoli HD radio. Until then, you can continue to enjoy high fidelity sound from any one of our fine analog radios. Our radios will not be obsolete anytime soon.

http://bgoods.tivoliaudio.com/faq.php

****

Bridge reported last month that interest in HD is low. Sales of HD radios is not what has been expected, by a long shot, despite a heavy marketing campaign. To paraphrase a couple of regulars here:

HD is a big yawn with the public.

Sales of HD radios are on par with sales of AM Stereo sets in the early 80's. I had two off the bat. They dissappeared from store shelves and catalogs shortly thereafter.

Crutchfield is releasing and HD radio converter for car radios. Interesting, this, given the general question of acceptance of converters for cars. But sales trends remain to be posted.

Bridge also reported in this same publication, that satellite radio has begun to trend, if not down, then flat, suggesting that new subscriptions are not meeting expectations. No surprise there, as subscription radio is still a tough sell.

However, at the same time both XM and Sirius are reporting first time positive cash flow. XM increased the number of channels bearing commercials at the first of the year, suggesting that the previous Bridge report of a saleable rated share for satellite radio is, in fact a reality, though an effective business model for satellite radio advertising hasn't been yet defined.

What speaks better for Satellite radio than HD, is that this past holiday season, the Ace Hardware stores, at least in this area, all had XM satellite radio channel Holly 103 (all Christmas music, all the time) plugged into the in store music systems. As did Sam's, and other retail groups. Exposure was high. And public contact was significant.

XM is now included in a number of auto brands, as is Sirius. Both are involved in heavy promotions, not only marketing their products, but putting their products in the hands of the public as premiums, contest prizes, and value added, with basic, if limited, subscription plans included. This in addition to basic advertising and marketing.

Both XM and Sirius continue to add services, content, and high profile names to their talent rosters. And prices for satellite radios have fallen to roughly the price of a decent analog table radio. And lower.

Both XM and Sirius, have improved their audio performance. While neither is going to be mistaken for High Fidelity, marked improvements in audio quality on both services have been implemented. And noticed by listeners.

My own system has presented a noticeable and listenable improvement since I subscribed two years ago.

Contrasted to HD radios, which are still expensive. And which may, depending on broadcaster, present improved audio quality or not. I've heard some dreadful audio from HD stations.

HD content is not being presented to the public in the same way satellite radio is. Contact by the public with HD radio content is limited to specific in-store demonstration. But not general in-store listening.

HD marketing, while intense and pervasive, is not putting HD radios in the hands of listeners. Exclusive content is not being promoted for HD channels. And while the 'clean digital CD audio quality' is part of virtually every HD radio announcement, Radio's own research has historically told it that audio quality is not a primary priority for the listening public, and at best, it is subjective and easily defined by the broadaster.

It's tough to sell against a history of contrary intent.

And the biggie: HD radio creates significant interference for adjacent signals. And while there is no monetizable audience for out of contour listening, the truth is, that nearly everyone who drives has begun to experience the IBOC hash from out of market on top of their

favorite signals as they drive from city to city, or, as in the case of large geographic area like Chicagoland, from one locale to another with an ADI. And this noise is creating a negative perception of HD. Which may or may not translate into altered listening habits. And which may or may not translate into altered buying intentions where HD receivers are concerned.

(I still experience difficulty hearing WLS due to IBOC from out of my area. And simply turn on XM when the noise is more than I care to tolerate.)

Anecdotally, my circle of colleagues are now opting more often for Sirius on their cable systems, or for XM receivers and monthly subscriptions. No one I know uses, nor cares about, HD radio. My experiences are not typical, and your mileage may vary.

It's still early in the IBOC/HD Radio game. And trends in broadcasting have a way of turning on a dime. But at least for now, HD is a big yawn with the public, who neither care about the big push, nor understand the nature of the content on the alternative channels.

Contrast that to the introduction of FM stereo. The effort in marketing was put into the content, not the technology. Few listeners understood stereo then. Shit, few really understand it today. But it was Content, not technology that sold the sets.

If Radio is going to be successful at selling HD radio to the public, the effort needs to start there: Content. Names. Products. Programs.

Listeners don't turn on radios for use of the circuits. They turn on their radios for the content.

Radio should take a lesson. Before Sirius and XM steal enough share to threaten its surival in a form we recognize.

We are not talking about a survey, but actual field testing.
>
> Are the analog and HD radios using similar or the same antennas?

We know where the station gets listening based on Arbitron diary returns.The
HD signal is usable up to and in some areas beyond the measured audience
based on diary returns.
>

> AM reception. You could be a factor of 10 smaller.

It can be seen over and over in major markets that nearly all listening is
in the 25 mv/m contour, with the 15 mv/m the stone wall beyond which nearly
nothing occurs. We are not talking about whether the signal can be heard,
but whether real listeners will listen and in noisy metros there is
literally no listening outside the areas where the signal is very strong as
specified.

The NPR study used unrealistic contours for the analog comparison. In AM, nearly all listening in large metros is limited to the 15 mv/m contour.... and in many cases, the bulk is in the 25 mv/m. For FMs that are not highly niched and format exclusive, about 85% of listening is in the 70 dbu contour, and nearly all the rest is in the 64 dbu/contour.

NPR used field strength measurements. I am referring to actual, measured listening in Arbitron.

>

The point is that actual listeners do not listen to signals below the
intensities I already detailed, based on the "at home" and "at work" ZIP
codes of Arbitron diaries.

In smaller markets, with lower noise levels, listeners use lesser signals,
but in the bigger metros, unless hte signal is very strong, it does not get
listening.

You realize that the 23rd, when you divide 2 by 3, you'll get 666, the devil's area code? Sounds like a bad omen to me.... :-)

Except... in this case, the data comes from a study of Arbitron diary return
by ZIP code compared to coverage contours.

Nobody in metros listens to weak adjacent channel signals next to a major
local.
>
> I hope your HD dies!

It won't. KTNQ is installing right now a brand new Nautel RX-50 with HD.

This would have brought a smile to Mr. Marconi's face.

In the 1880s and 1890s theorists believed that Hertzian waves traveled
in straight lines like light, and thus it was not possible to employ
them for over the horizon communications. They failed to understand
the influence the ionosphere has in reflecting electromagnetic energy
back then. But the young Guglielmo, in his early 20s, had proved that
radio reception was possible beyond line-of-sight when he heard his
older brother Alfonso's gunshot to signal the reception of his
transmission from the other side of a hill in their backyard. His
lifelong determination to challenge theory with empirical proof led
Marconi to lead the way in transatlantic wireless communications, and
many other patentable insights over the decades.

http://en.wikipedia.org/wiki/Backscatter

Backscatter of waves in physical space

Backscattering occurs in quite different physical situations. The
incoming waves or particles can be deflected from their original
direction by quite different mechanisms:

Rayleigh scattering of electromagnetic waves from small particles,
diffuse reflection from large particles, or Mie scattering in the
intermediate case, causing alpenglow and gegenschein, and showing
up in weather radar; inelastic collisions between electromagnetic
waves and the transmitting medium (Brillouin scattering and Raman
scattering, important in fiber optics; inelastic collisions
between accelerated ions and a sample (Rutherford backscattering)
Bragg diffraction from crystals, used in inelastic scattering
experiments (neutron backscattering, X-ray backscattering
spectroscopy);

Compton scattering, used in Backscatter X-ray imaging.

Sometimes, the scattering is more or less isotropic, i. e. the incoming particles are scattered randomly in various directions, with no particular preference for backward scattering. In theses cases, the term "backscattering" just designates the detector location chosen for some practical reasons:

In X-ray imaging, backscattering means just the opposite of transmission imaging; in optical fibers, light can only propagate forward or backward. Forward Brillouin or Raman scattering would violate momentum conservation, so inelastic scattering in optical fibers cannot be anything else but backscattering; in inelastic neutron or X-ray spectroscopy, backscattering geometry is chosen because it optimizes the energy resolution. In other cases, the scattering intensity is enhanced in backward direction. This can have different reasons:

In alpenglow, red light prevails because the blue part of the spectrum is depleted by Rayleigh scattering; in gegenschein, constructive interference might play a role (this needs verification); in multiple scattering from suspensions like milk, the enhancement of backscattering is connected with weak localization.

I notice that Jean Shepherd at 2200 GMT ("the Separation Center") on WBCQ today was recorded off Max Schmid's Mass Backwards on WBAI in some form or other. (probably from a sound file on flicklives.com)

I know this because they had a bit of an ancient (LBJ was president) newscast on WOR (Shepherd was originally on WOR and there was also a syndicated version) and when they had a WOR station ID, Mr. Schmid came on and gave a WBAI ID.

By the way, if you collect Brit radio shows, BBC 7 (www.bbc.co.uk/bbc7) has the first show of "I'm Sorry I haven't A Clue" for a week on demand beginning Feb. 12. Graeme Garden, Bill Oddie, Jo Kendall and Tim Brooke-Taylor with, of course, Humphrey Lyttleton as chairman, all well lubricated with the official BBC canteen wine, "Sans Fils" (without wires). No Samantha yet and no Mornington Crescent.

It doesn't have very good audio quality because it came from a listener's over the air recording, the original having been lost.

Censorship of Usenet.. Has it arrived ? So Sad or Ha Ha Ha ??????

We dont see posts by coffee cup any more at
aus radfo broadcast any more because bearcave
at aus.radio.broadcast
is using a terrific software package
to alter all the original titles
of cofeecups posts on google usenet
to one same heading.

being now all called

"Corrupt Thread: Political Spam"

Despite the original thread title

as follows like this

restore24-7 anti-spamming system: all testing now complete 1
restore24-7 (1 author) 1:49am
Final test of restore24-7 anti-spam system 7 restore24-7 (3
authors) 12:47am
Corrupt Thread: Political Spam 5 restore24-7 (2 authors) Feb 12
Corrupt Thread: Political Spam

This device effectivly censors usenet.

But dont worry it is in good hands

In the hands of another spammer
though god help us
all

For an example go to

http://groups.google.com/group/aus.radio.broadcast/topics

What does the Group think ?

Is it Censorship of usenet by bearcave using
this thing called "restore24-7 anti-spamming
system ? "

Should usenet be censored ????

Ot is it Great !!!

It all started when coffeecup posted
some homophobic anti gay remarks about the dangers

of hiv and bowel damage

Things I suppose we should not talk about?

Bearcave Posted

On Feb 11, 6:36 pm, "coffee...@aussieisp.com"
<coffee...@aussieisp.com> wrote on the extremist political newsgroup
-
aus.politics:

> http://www.bearcave75.blogspot.com/

> http://www.ip-adress.com/

> NNTP-Posting-Host: 58.107.242.48

> NNTP-Posting-Host: 220.239.218.102

This CoffeeCup guy from aus.politics is NOT an indiscriminate
spammer.

For some bizarre reason, he has tracked down my I.P. address and
posted it on aus.politics.

He's also resorted to the following personal attack in order to make
perverse assumptions about my politics, refusing to understand that
my
only interest is to prevent him spamming this newsgroup:

> Gays & Politics.

> Submissive/Masochistic with Domination/Sadistic psychopathy.
> Sociopaths and Gays are bed fellows. Shared commonalities.
> Bear Cave's perverse enjoyment of J. W. Howard springs from the
> same poisoned well as this. Understanding Gay's and their need
> to be dominated by a father figure, however grotesque. Punishment
> becomes enjoyment. Pain is pleasure.

In other words, it's all about him having an unchallenged opinion and
savaging anyone that takes a contrary view to an unethical attack
against John Howard.

This is the sort of unreason that you'll be met with if you attempt
to
reply to any of his spam. So please, for the benefit of the group,
don't respond in any circumstances.

CoffeeCup assumes I'm a Liberal voter because I've dared to challenge
his lack of ethics. A bit like a talk radio announcer accused of
being a socialist by one caller, then accused of being a conservative
by the next caller.

That's why you can believe me that I want no association with the extremist newsgroup aus.politics ever again. It is full of anarchists
that have been swallowed whole by the subject of politics.

aus.politics is a jungle of anarchy - not to be respected or feared.

But not to be encouraged either.

So from today onwards, please ignore threads that the restore24-7 system converts into a "Corrupted Thread: Extremist Political Spam".

> for the rest of us?

Not true what you say about the ARRL. Amateur radio is only as good as the effort you put into it. If you can't do code, you cannot communicate with a huge subset of the amateur population. That is a fact. You never will be able to so until your learn code, FCC requirement or no FCC requirement. There is some DX you will never get, some countries you may never contact, many people you will never meet.

Some no-coders sound like the gay rights lobby: They seem to be trying to make no-code the "norm". "I want you to think I am normal". "I am as just good as you, I can do HF now, I can be a real 'Ham'". (Gays can get "married"). True by regulation, but not really in practice.

In the foreseeable future you will never truly be a ham until you can QSO in code; you will only hold a piece of paper authorizing you to communicate on HF. Don't shoot the messanger. Don't bother disagreeing with me; it is the large subset of the amateur base that you have to convince and, unfortunately, that will take a while to change IF it ever does change. When people are sick of SSB QRM or we cannot QSO by voice due to conditions, we can simply move to the CW sub-bands and you are left "holding the mike".

As Walter Cronkite used to say. "That's the way it is..." February 23, 2007.

Get over it already and move on. They ARE doing code too or can't you read?

Code is still used but it is not relevant today in testing any more.
GET OVER IT. MOVE ON. No one is stopping you from USING CW. USE IT IF
YOU WANT.

I thought you perviously made the point that the Arbitron system only
considered the local audience so how is data accumulated from more
distant listening?

I'm confused by the 25 to 15 mV per meter levels you refer too. These
are huge signal levels. I thought the AM radio station contour levels
were around a few millivolts per meter.

The average table radio does not need levels this high for good
reception even in a noisy environment. Maybe a Walkman would.

Any listening to non-local-market radio stations shows up in the residual
data in each market. If KOA is listened to in Phoenix, it shows up in the
Phoenix ratings.

However, I am referring here to the local FM and groundwave AM listening,
which takes place only in the areas where there is a very strong signal.

A 50 kw station in LA that is not overly directional puts a 25 mv/m over
nearly all the market. In the areas where it doesn't, it does not show
listening. And lower powered stations get little or no listening outside the
portion of the market with the better sighal.
>
> The average table radio does not need levels this high for good

In large metros, the noise level is such that only they biggest signals get
listening in the areas where the signal is very strong.

The proof is in the fact that stations do not get listeners in the lower-intensity signal areas.

Ah yes but if you say that you just do not understand radio people. You cannot possibly have exprienced the fascination with the physics of skywave propagation or the joy of knowing how analog circuits work, antenna and transmission line science and just knowing that one has transmitted an EM wave that someone else 8K miles awys has received at the speed of light without help from a man-made infrasructure. It is waves, it is music, it is knowedge, it is dicovery, it is joy. We argue, we disagree, we flame, we sometimes hate each other, some of us are not licensed, some are CBers but we all share that common fascination that IT just cannot provide, as awesome in its own right it may be.

Hello? This is February 12, 2007. FACTUAL ERROR!!!

There's one little problem, "Stefan." Isn't ANY "Stefan Wolfe"
in the FCC CORES database. The best that can be found
are two Steven Wolfes:

Steven H. Wolfe, KC4UZW, Tech, FRN 0004408340
Steven B. Wolfe, KC9KTN, Tech, FRN 0016067183

www.qrz.com confirms that.

The only "CW sub-bands" that Techs have is a small
sliver on the bottom of two VHF ham bands. Of course,
all other classes can use those. <shrug> So?

Sounds like a republican Ferengi Culture!

So, with that logic, it would proper to stop funding schools and higher education than start marketing drugs and porno to the kids as that would make an excellent profit.

I see where this is leading? More republicans again!

Hi ...

I recently joined AGLOCO because of a friend recommended it to me. I am now promoting it to you because I like the idea and I want you to share in what I think will be an exciting new Internet concept.

Sign in : http://www.agloco.com/r/BBBV9253

AGLOCO's story is simple:

Do you realize how valuable you are? Advertisers, search providers and online retailers are paying billions to reach you while you surf. How much of that money are you making? NONE!

AGLOCO thinks you deserve a piece of the action.

AGLOCO collects money from those companies on behalf of its members. (For example, Google currently pays AOL 10 cents for every Google search by an AOL user. And Google still has enough profit to pay $1.6 billion dollars for YouTube, an 18-month old site full of content that YouTube's users did not get paid for!

AGLOCO will work to get its Members their share of this and more.

AGLOCO is building a new form of online community that they call an Economic Network. They are not only paying Members their fair share, but they're building a community that will generate the kind of fortune that YouTube made. But instead of that wealth making only a few people rich, the entire community will get its share.

What's the catch? No catch - no spyware, no pop-ups and no spam - membership and software are free and AGLOCO is 100% member owned. Privacy is a core value and AGLOCO never sells or rents member information.

So do both of us a favor: Sign up for AGLOCO right now! If you use this link to sign up, I automatically get credit for referring you and helping to build AGLOCO.

Sign in : http://www.agloco.com/r/BBBV9253

Thanks

Replying to what I have read in response to my posting,..

I too noticed when I played with the Sangean WR-2 that B105 in Brisbane uses the Station ID function of RDS, but that is about it. It seems a pity that it isn't more widely promoted and implemented, but when most car radios don't have the functionality to decode RDS, why should stations do anything more than broadcast a station ID? I just think it is a radio resource whose time has come, and it is a pity that it is not more widely used in creative ways. I would love to see the full RDS implementation working in Europe, just to open my eyes to how it can really work.

I also have a Sangean ATS606 that I bought in Singapore in the 90s. Still goes well enough. The more recent (and more expensive) models do include RDS functions, and of course they tune up to 1710 Khz on AM.

I have been searching high and low for receivers that tune to the Extended AM band, and it is very hard to find any that go all the way, and harder still to find one that will tune to 1710 Khz in 9 KHz steps. JVC tuners seem to go all the way up more often than most, and many Sony car radios have a switch that will allow tuning in 10Khz steps. Portables with HF tuning functionality normally will, and it seems the car stereos installed by the manufacturer are often quite robust systems which seem to tune to 1710 (my radio in my Toyota Echo does), while the over the counter models generally don't. For portables, you just have to go hunting at various electonic shops for a model that will tune all the way - some do some don't. Radio Brisvaani is a station I have tuned to many times (my wife is Pakistani) and for this reason, among others, I want to tune all the way up the AM dial. Being a narrowcast specialist, having convenient access to the entire AM and FM band is important.

I haven't tried tuning to radio with a set-top box - that's also interesting. But I have found a few DVD 5.1 sound amplifiers which include a nice tuner that can tune across the whole AM and FM radio spectrum.

Someone needs to tell the gov't regulator ACMA to encourage manufacturers to supply the market with devices that uses clever technological addtions (RDS) and cover the higher frequencies on the AM band. If people could tune to these Extended AM stations on their regular everyday radios, then operators with NAS licences might start using their assets to provide interesting services, and thereby enhance diversity in the marketplace. Radio Brisvaani is a shining example of what can be done with a little effort, but any Indian or Fijian who want to tune in more often than not has to go and buy a new radio from DSE! We won't talk about World Audio!

Phil,

If your in the Brisbane area tune into 94.9MHz. River has song title streaming, and weather updates. If your Sangean WR-2 has RT (RadioText) there is also latest news updates.

IT Admin is also working on some future software updates, so there is more to come very soon.

Shaun.

I would not (I say,I would NOT) become a HAM unlest I first dig out my
little yellow plastic card that has Morse Code on it and practice up
enough that I could at least pass the most basic of Morse Code words per
minute.Albeit sadly,it wouldn't be any faster than me one finger huntin
n peckin on my webtv wireless keyboard which is painfully slow.

Helping You Make Real Money On The Internet （ http://diy.hn8868.com/fa8/fast.htm ）
Marketiva is a financial services corporation specialized in providing traders with high quality online trading services. With a team of dedicated financial specialists and technical support personnel, Marketiva operates globally as a market maker and principal counterparty to retail traders. Marketiva has established itself as an industry leader by relying on its groundbreaking internet trading platform and its superior customer service.

With its flexible quantity specifications and $5 cash reward, Marketiva allows you to start trading with no money down. Due to strict lot specifications, many other over-the-counter market makers require at least $500 to start with.

Welcome to http://diy.hn8868.com/fa8/fast.htm I wanted this site to be different from other Internet money making web sites in that I want to show you how to make real money right now and with little or no work. So what I will show you are money making opportunities that you can start making money from instantly with no money invested. I have made money using these programs and if I can make money from these programs, then you definitely can too !

We were somewhere around Barstow, on the edge of the desert, when the drugs began to take hold. I remember Jim Douglas <james.douglas@genesis-software.com> saying something like:

>Did Bob finally call it quits? Was up late, early and tried to find
>the old website and had no luck?

He'd had enough of some users carping and criticising and just pulled the plug. Can't say I blame him, really.

Fwiw, a new support group is on the go here...

Beijing (AsiaNews/Agencies) - In today's globalized and economically thriving China, book censorship is applied just like in the era of Mao, contrasting the words of political leaders. This is what authors, intellectuals and experts say, pointing to a recent "unexplained" ban on eight books.

No official explanation has been given for the censorship of eight books that are personal or romanticized memoirs of the Maoist period in China, of the purges of intellectuals, of the Great Leap Forward and of the Cultural Revolution: issues that the Communist Party believes are "very delicate" and which it blocks any research about. During an in-house meeting on 11 January, General Administration of Press and Publications (Gapp) deputy director Wu Shulin merely said that these books had "overstepped the line" and threatened severe punishments for the publishers. Some publishing houses received orders not to publish or to distribute incriminating books.

One of the books is the memoirs of Yuan Ying (The Other Stories of History: My Days at the Supplement Division of the People's Daily). Yang is a veteran member of the Party and ex-director of the government paper People's Daily. He was sacked for "revealing State secrets". He heard about the ban only indirectly and asked for an explanation from the Gapp directors without getting any answers. However on 31 January he received a visit from Wu. Yuan said Wu admitted the book did not reveal any "state secret" but tackled arguments (like the Cultural Revolution, the anti-right movement, anecdotes on party and state officials) considered "very delicate matters that need careful examination". Wu said: "The central government has issued several documents in recent years to regulate with precision the administration of publications and these rules must be rigidly applied."

Liu Suli, a leading book distributor in Beijing, said he saw this as a confirmation that those responsible for censorship "are trying by all means to block debate on the ban and other social matters before the meetings of the National People's Congress and of the People's Political Consultative Conference" in March and the 17th Congress of the Communist Party slated for autumn.

The censored writers did not even receive an "informal" explanation. The censored Past Stories of Peking Opera Stars was written by Zhang Yihe, daughter of ex-Transport Minister Zhang Bojun, who was targeted in the purge of the "anti-right movement" in 1957. Zhang asked Gapp and Wu himself for the reason for the ban many times but in vain. Zhang says censorship requires "a formal notice" to the author and cannot consist merely "of the statement of an official in an anonymous warning by the monitoring body to the subject, or in a written communication to a journal or publishing house." During the Cultural Revolution, Zhang spent a decade in prison,

from 1968, just because she was the daughter of Zhang Bojun, and now many friends are warning her she risks returning to jail. She says "the warnings of my friends make me sad. I used to believe the situation in China was better than when I was arrested. But their concern shows that, in the long term, the repression of intellectuals has deformed their minds and that people are still blocked by fear."

Fu Guoyong, a renowned intellectual from Zhejiang, says that in the era of Mao, it was enough to criticize the authorities to have a book or an author banned. But now this "under the table" censorship is not legal and the decisions of "officials should be given maximum transparency".

Analysts recall that President Hu Jintao has reiterated that his aim is to create a "harmonious society", understood to be a more just society without inconsistencies. In November, the Premier Wen Jiabao, speaking to artists and writers, said freedom of expression was guaranteed by law.

Some days ago, Yan Xiaohong, administrative deputy director for press and publications, denied the effective ban on eight books but admitted "investigations" had been carried out because some "contained pornographic content, some could cause religious and ethnic minority problems and some have touched on national security and state secrets."

2007: year of the Pig = clashes, conflicts and dynastical changes

This year will be marked by clashes, conflicts and dynastical changes.
According to Chinese astrologists, 2007 is a year of the Pig marked by "fire
and water", two contrasting elements that indicate the possibility of wars
and conflicts. "There will be much disharmony that could lead to tensions
and revolts to the point of overthrowing governments".

I would first try and reason with him/her. When someone is rude to me I always say to them, "It doesn't cost anything to be polite." If I am face to face with the person I always put on my best smile when I say this. A lot of times this works. See, it's ALWAYS better to make a friend then an enemy. If this doesn't work for you then I would escalate the whole affair in a big hurry. You need to know that the FCC isn't going to help you out at all so you're going to have to dole out a little bit of homebrew justice. Get ruder than he/she and threaten with bodily harm. If this gets you nowhere or party bravo escalates the feud even further then just use a pair of wire cutters and cut those rubber nipples off of his/hers tires if you can find the bad persons' car. Hell, if you know where they live then just yank down their antenna or mess with their coax. And be sure to let them know who is behind their bad fortune. Don't explicitly admit to any wrongdoing but do some beating around the bush without leaving any doubt as to who did the damage.

I sincerely hope that this helps you and be sure to keep us here on the board informed of your situation.

Best regards,
NEO

When ratings are taken, listeners record their listening activities in diaries. They record what they actually listen to. So, if I were to have gotten a diary when I was living in St Louis, my diary would have reflected that I listened to KMOX, some KFUO-FM and a very great deal of WLS. My high school buddy listened to KMOX, KXOK, and a high percentage of WLS. In fact, WLS was something of a phenomenon in my high school in North County, having been mentioned as a musical alternative to KXOK in the school newspaper. Though not everyone who knew about it actually listened. It wasn't exactly high fidelity. Or pleasant listening.

Had we all gotten diaries, WLS would have been recorded in our listening activities. Those are hard data. They're raw data. And they are real data.

Newer technologies, such as the portable people meters would produce the same results. As long as the station was encoding.

However, these data would not have represented a ratable share. That is to say, there would not have been enough WLS listeners in St Louis compared to WLS listeners in Chicago, to produce a noticeable increase in the WLS share. Virtually all of which was generated inside the 10mv/meter contour in Chicagoland. Or, more bluntly, the St Louis numbers for WLS would have been statistically insignificant. Although diary records would have indicated they existed.

Now, ratings are NOT for broadcasters. They weren't created so broadcasters could earn bragging rights during prayer meetings at local houses of sacrament. Ratings are audience measurements taken for ADVERTISERS to permit advertisers to more efficently place advertising buys. Ratings, properly evaluated, let advertisers spend money that reaches their targets, while permitting them to NOT spend money that

they don't have to.

Rates on WLS were about twice per spot what they were on KXOK. Advertisers in St Louis would not be spending twice the money to buy advertising on WLS just to reach me and my high school buddies. They'd buy KXOK. And blow off me and my buddies because we were statistically insignificant. If we all bought Coca Cola, we'd be 6 oz bottles in a RIVER of Coca-Cola. There would be no justification for the expense.

By the same token. Advertisers in Chicago would not spend money on WLS just to reach me and my buddies in St Louis. They would, instead buy KXOK, for half the price, reach 1000 times the number of potential customers, and make money hand over fist. And again, blow off me and my buddies listening to WLS, because were statistically insignificant, and cost twice as much to reach.

So, though ratings diaries reflect out of market listening activities, when it's recorded...and significantly often it's not, but that's another story...they simply don't enter those figures into the statistics, unless they are significanatly large compared to the in-market numbers. And advertisers don't buy them anyway. Because it's not cost effective to do so.

From my own personal experience, though, I did buy my Akai 4000-D from Playback, in Chicago, based on spots I heard on WLS. I was living in St Louis at the time. It was a fun transaction, and everyone in the store talked about it for weeks. They passed the phone around and I talked to everyone in the store. Got to know them all by name. And truthfully, I made a good number of purchases from Playback after I left St Louis and began my broadcast odyssey around the country. But that doesn't mean that Playback was going to start targeting St Louis for electronic sales. St Louis had Lafayette, Allied and Team. Playback wasn't even on the radar. And Lafayette didn't go out of business because I bought my gear from Playback.

I was ONE guy making a group of purchases over the course of 5 years, out of hundreds of thousands of sales every year across the entire Playback franchise.

And though I was well known within one store, I was absolutely irrelevant to the Playback bottom line.

And the bottom line is all that matters when the scores are added up in business.

So, while raw data may reflect out of market listening....No one cares. No one. Not the stations, who see no increase in either cume or TSL as a result. Not the advertisers who see zero bottom line impact from out of market advertising response.

So those numbers are ignored. They are recorded. And they are seen in raw data. But they are statistically insignificant. And produce no benefit for either advertisers or broadcasters.

So, they are ingnored. When business is conducted, they don't exist.

Having observed issues and changes in recent years, I think the question that has to be asked at some point is whether or not the ARRL should continue to attempt to influence rules, laws, etc. The money that they have to be spending on legal efforts, lobbying, etc has got to be significant. I think any objective observer would conclude that their ability to influence legislation, FCC rules, etc in recent years has been pretty dismal. Earlier in their history, the ARRL had the ability to do this. Times change. In today's world, the Imperial FCC chooses to do what it wants to do, selectively uses public comments that support their pre-determined outcomes, fails to enforce its own rules and is happy ignore factual data or public sentiment in the process. Resources may be better spent in providing new and different services to members rather than flush it down the commode under the banner of "fighting city hall."

I'm sorry, but I fail to see your point. "CW" can be used just
about
everywhere on amateur bands from 160m on up to sub-THz.

My remark was on "CW" ONLY. Where's your beef?

Wonderfully expressed. Radio stations are really not interested in out of
market listening, as it is so low as to be insigfnificant.

(See my clarification later)

> don't have to.

Ratings were developed at broadcaster insistence to have a way to quantify
listening so their commercial time could be priced. Despite what most people
think, ratings are not much of a programming tool. They are mostly a sales
tool. For programming decisions, stations do proprietary research, which is
seldom seen by the public.
>

This is the real issue.

An example that has nothing to do with DX and next adjacents involves the LA
stations that rank in the top 10 in the separate riverside / San Bernardino
market. Despite getting big ratings, they get virtually no sales. An
advertiser will buy a Riverside FM for 1/10th the cost of an LA FM, and can
tailor their copy or spot for that market.

At best, stations in LA can say, "we give you some extra bonus listening" to sweeten the deal.

WGN shows up in a dozen rated markets. In a few of the smaller ones, it is very highly rated. They are able to get on some buys that are regional in nature because of this consistent over-delivery, but most agency buys are market specific so the benefit is not in proportion to the delivery.

And skywave listening has not generated much in sales (except those C.C. Crane spots) for decades. It is not quantifiable and thus, unsalable.

This is why AM stations (and even FMS in fringe areas) are ot concerned with adjacent channel interference since the listening in the deep fringe areas is not useful to radio-the business even if it may delight some listeners.
>
> So, though ratings diaries reflect out of market listening activities,
> when it's recorded...and significantly often it's not, but that's another

You would be surprised how many out of market stations get some diary mentions... and we can see them in the electronic Arbitron data... but it represents a tiny bit of listening divided among many stations.

> they simply don't enter those figures into the statistics, unless they are
> significanatly large compared to the in-market numbers. And advertisers
> don't buy them anyway. Because it's not cost effective to do so.

And, when advertisers buy local spot radio, they buy by the market, not by regions or multiple markets. So the buyer ignores anything that is not in the market, staiton-wise.
>

And that is the truth from both the station and advertiser perspective!

Interesting, that when I listen to WLW AM every night, Scott Sloan always boasts that WLW covers 38 states, and he routinely gets calls from all over the East Coast - same with the Truckers' Network. You can bet, that not everyone is listening via XM channel 173 ! You just, keep repeating the same IBOC shill crap, because you know that HD Radio/IBOC will kill fringe listening.

Subject: Re: ARRL Now Only Wants No Code Hams - Holding Midnight Exams

>Having observed issues and changes in recent years, I think the
>question that has to be asked at some point is whether or not the ARRL
>should continue to attempt to influence rules, laws, etc.

Why not? The ARRL is a private incorporated entity. As
a legal entity in the USA they have every right to make
themselves heard to our government.

>The money
>that they have to be spending on legal efforts, lobbying, etc has got
>to be significant.

"Significant" is a subjective word, isn't quantifiable.

Their IRS Returns show the amount they've spent on services
from a professional lobbying group and a law firm. One of
the law firm's partners is Chris Imlay, a member of the
ARRL's high inner circle. ARRL's recent IRS Returns
show a multi-million dollar PROFIT for their "non-profit"
organization.

>I think any objective observer would conclude that
>their ability to influence legislation, FCC rules, etc in recent years
>has been pretty dismal.

The ARRL hasn't gotten carte blanche on what IT wanted,
true. But, it was never a god of radio and really did
NOT know what was "best" for US amateur radio...but it
seemed to know "what was best" for the Leagues' inner
commanders and their core membership.

>Earlier in their history, the ARRL had the ability to do this.

So, they've convinced you they did? :-)

Back in the 1920s and 1930s the League had trumped their
organization competitors in the USA. At that time there
was little in the way of citizens communicating quickly
to DC and getting replies back. ARRL provided the
opinion-courier services, a nice letter-head and all the
appearance of "being important." It certainly didn't hurt
that H.P.Maxim had personal resources to make trips to DC
to do his lobbying efforts.

ARRL was able to (profitably enough) publish a monthly magazine (purportedly a 'membership' periodical) of special interest to radio amateurs. The IMAGE of "being all for amateur radio" took hold in the limited ham public eye. It stuck, rightly or wrongly. There were no real competitors in amateur radio publications before or just after WW2.

>Times change.

No kidding? :-)

The appearance of RIVAL publications soon after end of WW2 (CQ, 73) plus the 1960's "question authority" mood began to erode the League's carefully-manicured IMAGE. ARRL increased its efforts to present the authoritative "mission" of them knowing what was best for amateur radio...consistently that being "work DX on HF with CW." VHF and above was a dark, mysterious region to the League and they generally avoided that new area or just didn't bother much with such things...it wasn't "ham radio" as they knew it.

Once the Internet got going and the US government joined up, the common folk COULD talk to DC at the speed of light without any intermediaries to selectively sort/ sanction their words. No more did US radio amateurs have to go through their "district directors" to talk to Washington. The capitol began to "listen" more and more to citizens through the Internet.

The Internet didn't do it all. Before the 1991 public entrance of the www, there was already the movement to toss the code test with the creation of the no-code-test Technician class. That became LAW despite the efforts of the ARRL (which supposedly "knew what was best for ham radio") to stop it. Even before that, well before, the FCC was cognizant of morse code's diminishing use in the whole, wide world of radio communications.

Around 2000, the IARU was for a total rewrite of ITU-R Radio Regulation S25. With that would be removal of the necessity for administrations to test for morse code for any amateur radio license privileges below 30 MHz. ARRL was opposed to that. They remained opposed until WRC-03 was scheduled for Geneva, then they took a "neutral" stance in public just before the conference beginning. The ARRL inner circle was against dropping the code test for US amateur applicants but took on a better-PR appearance of "no comment." The S25 rewrite took place and was voted in. [ARRL can't vote on such ITU things, only "advise"]

Many countries dropped the code test for amateur licenses
after WRC-03. The FCC was obliged to stay with the
State Department - NTIA - FCC triumvirate representing
the US adminstration. A new Petition for removing the
code test didn't appear at the FCC until 2005. The
ARRL was against it and wanted THEIR version, which HAD
to include some code testing (the ARRL "knows what is
best for ham radio"...and it was what THEY wanted).

>In today's world, the Imperial FCC
>chooses to do what it wants to do, selectively uses public comments
>that support their pre-determined outcomes, fails to enforce its own
>rules and is happy ignore factual data or public sentiment in the
>process.

Sourness Alert! Sour grapes time! It is rather obvious
that YOU favor continued code testing and think you
are in some "majority" in regards to that.

The FCC isn't "imperial." It is (now) an independent
agency of the Administration of the United States,
created in 1934. [I was then two years old and you did
not exist] With all the radio services it must, by law,
regulate now, it does not "favor" amateur radio. What
the FCC did do was simply go the course as with all other
Petitions, allowing time for Comments (even extending that
time twice), then considered ALL those Comments for full
year before deciding. Specific things they considered are
well described in the body of FCC 06-178.

If there is ANY organization in the USA that is "imperial"
then it is that of the ARRL. They ignored world opinion,
toadied to their core membership (olde-tyme morsemen), and
simply ignored the majority. They didn't worry. Their
publications were giving them a multi-million dollar a
year PROFIT for their "non-profit" activities. They
believed in their own propaganda and loved the life of
"leadership." They still didn't try to entice the HUGE
Technician class licensee group...until AFTER 06-178 was
announced. AFTER. They aren't fools and know that a
sustained League existance requires NEW membership. If
existing license are EXPIRING at a rate of 78 a day
but NEW licensees represent only 32 a day, they don't
have to be mathematicians to realize numbers are shrinking.
Newcomers have - by far - come into US amateur radio
through the no-code-test Technician class.

>Resources may be better spent in providing new and different
>services to members rather than flush it down the commode under the
>banner of "fighting city hall."

Do you consider Access BPL to be "city hall" doings that
the League should NOT fight? Sorry, but BPL is a clear

and present danger to anyone using HF for any purpose. The ARRL needs to keep the pressure on Washington to fight BPL. After all, with lots of BPL QRM, it is hard to "work DX on HF with CW." The League only lives for HF bands.

What "services" would you suggest the ARRL be doing? Give you fancy bordered certificates (suitable for framing) for your state-of-the-art morse code ability? Provide free franking privileges for your QSL cards? Give you a spare radio in case your ready-built fails and it needs factory repair? Have a representative come and hold your hand when you contest?

The League provides a number of services already and has been doing so for years for its membership. Don't begrudge those. Just try to remember a small group of New Englanders are NOT gods of radio, just a minority membership group in the amateur radio hobby, and are a profit-making publisher of amateur radio special-interest material.

Try to remember that the US government does pretty well at governing ALL its citizens, political parties aside. An "Imperial" dictatorship can be an apt descriptor of a bunch of old men who consider themselves Elite in radio because they could emulate the professionals of 70 years ago. So, you've lost a government decision. TS happens.

>

When I was in Decatur, WLS, WGN, WBBM and WMAQ boomed into town with rated shares. Significantly rated shares. WLS was our direct competition, formatically speaking. And they gave us a serious run for our money.

Back to the example of Playback......Playback did not buy WLS to get into Decatur, they bought us. The spots on WLS often ran different specials than local Playback spots. Chicago specific. Even though they were a strong station in Decatur, Bloomington, and Rockford, they did not run spots mentioning anything outside of Chicago. And location tags were market specific. Playback bought by the market. They bought locally and advertised in a market specific way, despite the fact that one station would have covered the entire state, the cost of such a strategy would have been huge. Buying a Decature schedule on WLS would have been lunacy. With incentives, you could buy a week's worth of drive time spots with us, for about the cost of three drive times spots on WLS.

What really drove the point home, is the way Playback tracked their advertising in-store. WLS was nearly always at the bottom of the list of where customers heard about Playback. And we were at the top of the list where customers learned of the weekly specials.

So, even though WLS had significant listenership in Decatur, response to their advertising was poor compared to locally placed buys.

I do understand how the business works. You and I agree how the business end of the business gets the job done. How it is. And I know what kind of titanic inertia needs to be overcome to get the business to change direction. And what we're talking about, in these discussions, is the business end of Radio. And eventually, when we get back to the subject, how the business end of Radio looks at IBOC, and listener response to the digital hash that's obscuring listenership options for those who choose content not presented locally.

What the business end of Radio is not looking at, and this is where you and I disagree, is how this new technology affects the listener end of Radio. And while, statistically, there is no benefit for advertisers and broadcasters for those of us who listen to non city grade signals

within their sales contours, the fact remains that listeners DO exist outside of these contours that are negatively affected by the digital noise.

These are the listeners you need to worry about long term. Because, though they don't produce any bottom line enhancement for advertisers right now, and no ratings/revenue benefit for radio stations right now, they ARE radio listeners. And as you drive them to alternative media, you do two things. One is you reduce the overall universe of Radio listeners. That 100 share no longer represents the same proportion of the population. And with declining listener usage comes declining revenue potential.

The second thing that happens is you create support for those alternative media that eventually attract advertisers and bleed off revenue share from Radio. Further diminishing revenue potential. With increased listenership, and increased budgets come increased promotional support. Which, if well done can further erode listenership. It's not a linear process, but it can lead to a wholesale explosion in the traditional radio business model.

Radio listenership is declining. Not by significant numbers. Not now, anyway. But, David, even you have presented figures that show a decline in listenership for radio. At the same time, revenues are taking a hit. A significant hit. Mostly on AM, where IBOC has the biggest negative impact. Now, this is due, in part to the age of the audience, you're correct on that. But it's also due to the increase in desireable content available from alternative media. Many times the same content on AM radio is available on the Web. Or XM and Sirius. Or a podcast. And more listeners every day are discovering these alternative media. Even among the upper end demographics who still believe in the magic of radio.

Now, you may not believe that Bridge is a credible source. But in the Pump and Dump world of Innovator and Early Adoptor promotion of The New, Bridge need not be dead on accurate. They only need to be convincing in order to create questions. Is Radio in decline? Is Satellite viable? Is HD a dud? Should I pull my money out of Radio and invest in Satellite? Should I waste my money on an HD receiver?

The truth, that is to say, accurate science, and the facts are only part of the picture. Like advertising and promotion itself, sometimes trends are laid in smoke and mirrors. But real money follows them. Real results arise from them. And it only takes a little luck and a keen eye for an opportunity for someone to promote a revolution out of whole cloth, that becomes as real and as scientifically verifiable as the ratings/revenue decline at WGN.

One of the things that's happening on the listener side of Radio, is the rise of frustration and disgust on the part of faithful, passionate listeners who can no longer hear their favorite radio stations because of IBOC hash. Yes, the digital sidebands for WGN do not impact other Chicago stations. But what about stations in those dozens of out of

Chicago markets where WGN shows up? Local listeners being interfered with by out of town IBOC from first and second adjacents. I still have trouble with WLS because of an out of market IBOC sideband. The problem is not what IBOC does between stations in the market where those stations originate. The problem is what happens in those markets where the offending stations do NOT originate. Those are real listeners, too.

And they're NOT buying HD radios.

I'm not statistically significant. So, no one listens. Who cares.

Say what you will about DxAce, but he's one of the faithful who's finding it more difficult to hear his own favorite stations because of IBOC hash from Chicago, across the lake. . And eventually he'll find alternatives. And there are more like him. Many more. Not statistically significant in any given market. But taken together.....not difficult to serve. And once served, loyal.

It's easy to dismiss us because we're in the minority. But look at your diaries. There are one or two of us in every neighborhood. Neighborhoods in communities, towns, villages, cities and counties nationwide, who are finding that it's a lot easier to listen to alternative media than it is to put up with the interference.

Individually, we're easy to insult, and ignore. But taken as an aggregate on a nationwide scale, we're a market to be served. Representing revenue to be exploited. And there are enough of us to support alternative media in a way that can get attention. Small attention, true. But representing a loss of Radio revenue and a visible support for alternatives that may be viable candidates to take a non insignificant bite out of radio.

And then there are those listeners in markets like Decatur, where WGN, WBBM and WMAQ beam in from Chicago with their IBOC hash and impact stations from Mt Zion. And Maroa. And Pana. As well as Decatur, and Champaign. And Springfield. They'll find alternatives, too. And many of them have.

Listeners that are too few to be served in a given market, can be served nationwide. Satellite Radio exploits this. And Satellite Radio, dismissed only months ago as a failed business model, is now turning positive cash flow. And attracting advertising revenue. That's lost share for radio. And especially stations coverting at 200% and above, a small share in listenership can impact the bottom line in a big way. US99 in Chicago lost less than a third of it's share to KXKK, and was nearly driven out of the format by lost revenue.

Yes, we're small in number. And right now, we're not hurting Radio by listening elsewhere. But that's today. And all it takes is good marketing and promotion, and someone with the right vision, and we can be ratable revenue share in every market. And that IS a threat.

The business end of Radio sees IBOC as a tool. And those who find it's implementation as offensive as ignorable. If not ignorant.

But the listener end of Radio sees IBOC as an obstacle. Something that will not be tolerated. And the business end of Radio sees that as a non issue.

It may be.

But history has a way of underscoring the stunning impact of listener migration to alternative media.

FM failed. Twice.

And, today......?

Never underestimate the power of the consumer.

What the business end of radio doesn't see, is that you need us more than we need you.

No beef. Just stating that back in the 60's novices and techs had 2
meter CW priviledges that were altered at a later date.

The FCC band usage has changed many times in the past 50 years. This
recent change is not unusual or anything new.

The FCC does as Congress dictates. Remember COngress holds the purse
strings for the FCC as well as the power to remove and appoint
commisioners. The FCC is an extension of Congress.

There's one little problem, "Stefan." Isn't ANY "Stefan Wolfe"
in the FCC CORES database. The best that can be found
are two Steven Wolfes:

Steven H. Wolfe, KC4UZW, Tech, FRN 0004408340
Steven B. Wolfe, KC9KTN, Tech, FRN 0016067183

Curses. Foiled again :-)

> digital hash that's obscuring listenership options for those who choose
> content not presented locally.

The issue is that most of this affects AM, not FM. AM is probably done for
in the relatively near term.

First, the listener base under about 40 or so uses it seldom.

Then, the only attractive programming is news/talk and its mutations. Most
of this listening is now moving over the 55 year old border, above which
there are virtually no agency buys.

In response, the industry has started moving htis format to FM, with quite a
bit of large market activity in this direction. As the owners find that the
35-54 audience increases with the same programming, this trend may
acclerate.

Then, there is the issue that there are very few competitive AM signals in
the rated markets... in some there are none, in others one or two. In very
few, like chicago and New York, there may be a half-dozen, but those are
exceptions. The rest of the stations are not competitively viable, digital,
analog or SSB.
>

The real issue is that this listening, looking even at the Arbitron county
by county data nationally, is very small.
>
> These are the listeners you need to worry about long term. Because,

> That 100 share no longer represents the same proportion of the population.
> And with declining listener usage comes declining revenue potential.

Now that about 80% of listening in most metros is FM, what happens to the AMs is almost irrelevant, especially when we look at the age of the listeners.
>
> The second thing that happens is you create support for those

> traditional radio business model.

It is no coincidence that 30% of all radio billing is in the top 10 markets. As far as agency advertisers are concerned, it is about reaching as high a percentage of the country with a minimum number of markets... many buys are Top 10 or Top 20 markets only.
>
> Radio listenership is declining. Not by significant numbers. Not now,

Actually, radio was up last year, and in the last 46 years, has only had two down years and one flat one. 2007 is starting much better than 2006, so there will be growth, although it will be barely more than the inflation rate.

> Mostly on AM, where IBOC has the biggest negative impact. Now, this is

The 55+ demos are of no interest to radio because they can not sustain the advertiser-financed model of US radio.

HD was always planned as a long-term propostion. Satellite is already in trouble, as witnessed by the horrible declines in the stock prices of XM and Sirius. The growth has nearly stagnated, and the churn rate is increasing.

The real threats to radio are things like gaming consoles and future
technologys like WiMax.
>

> decline at WGN.

WGN has gone from $39 million in billings to $52 million in 2005, a huge
increase. The ratings are, fairly significantly, down, but the station
continues to take 10% of the market revenues.
>

Sorry James;

Congress does hold the purse strings as well as the abililty to enact
laws which the FCC has to enforce. The President appoints commissioners
and the Senate confirms the appointment. The President can request the
resignation of any official in government but can only fire a few.

There seems to be some conflicts on this point. Reports I've read,
and some you've quoted, indicate radio listenership is down. Last year,
you yourself made this point twice.

>

Locally, no. But on a national scale...that's a lot of discretionary
income to be leaving on the table.

>> Now, you may not believe that Bridge is a credible source. But in the

> technologys like WiMax.

Indeed. However, don't count satellite out. Both Sirius and XM are in
positive cash flow. With subscription rates, while slower than last
year, still growing. Stock price matters to the business end.
Listenership does not require stockholder certificates. And it's
listenership which will drive growth.

>> The truth, that is to say, accurate science, and the facts are only part

In 2005, yes. 2006, and we will see in 2007, revenues are down. To
the degree that Tribune's performance has been limited specifically by
WGN. You made this point, yourself.

>>
>> Say what you will about DxAce, but he's one of the faithful who's

So I've read. I also know that FM failed. Twice. When the business
end drove FM it failed. AM stations believed themselves unassailable as
a result.

We both know what happened when listeners began to find FM an
attractive alternative.

>
>> And attracting advertising revenue.
>
> XM sold less advertising last year than the #5 single station in New York.

Absolutely true. In fact, XM sold less advertising last year than
some small market stations I've worked.

And KXKK sold less advertising in the entire time they were on the
air, than US99 sold in a single quarter.

It took US99 more than 3 years to recover from the damage to their bottom line reflected by the shift in revenue share to KXKK.

The actual amount of advertising sold in XM is not as important as the fact that they sold advertising. And as long as they sustain positive cash flow, they can continue to promote and lure share. Whether they will succeed in this is yet to be deterimined. But as long as they're viable, they may still achieve their goal.

It's not the raw volume of the advertising sold that matters. In the end, it's the share taken from high overhead operations that must hit large numbers to survive.

Going back to WGN, if an alternative took only a 20% of listener share, impact to the revenue share would have been dramatic. With WGN's overhead, loss of revenue share translates to budget cuts. On a station that's struggling to hold on to position, budget cuts can be suicide. Changes, big changes, would have followed.

Had KXKK not exited the format, US99, faced with revenue loss against high overhead, would have been driven from the format. Believe me when I tell you, such things were discussed.

The business side of Radio sees only numbers and abstracts. They do not see the listener side of Radio. Business can afford to ignore listeners who do not fit their model. And they can do quite well that way. Until listeners find and support alternatives. Then their discretionary income goes elsewhere. And Business finds themselves wondering what to do to make up for lost revenue.

>
>> But the listener end of Radio sees IBOC as an obstacle. Something that
>> will not be tolerated. And the business end of Radio sees that as a non
>> issue.
>>
> Having spent the last 37 years doing frequent Arbitron diary reviews, I
> think you overestimate the interest in signals that are not local.

No, David, I don't think I do. Because, like you, I've seen the raw data in the diaries. And while the numbers are statistically zero, they are real numbers. Numbers which add up to significant aggregations across the national landscape. If those numbers can be served by alternative media, and there is money to be made in doing so, that money will expand as those alternative media attempt to widen the niche to access that mainstream revenue pool.

That's how it's done. Start narrow and deep. Superserve the core. And then widen. Kesuke Miyagi: "No can defense."

Again, FM failed twice.

And the third time, AM didn't see what was coming until they had been overtaken.

Now is not the time to rely on historic numbers, trends and reinforcement of the success of what has always been. Now is time to look up from the numbers and see what may drive listeners away. And how to keep them from making alternative media successful.

Now is the time for the Business end to take a look at the Listener end, and ask--not tell...not decide...ASK--how they may be served.

I was referring to billings. I guess I snipped so much, my response was out
of context.

But the issue here is advertisers, who do not buy against 55+ on radio, and
have not for a looooooong time.

At current levels, the listening to satellite is about a 0.5 share of total
listening. To be significant as an ad medium, they will have to increase
dramatically.

While the entities have limited cash flow, they can not meet debt service
and the depreciation of the satellites for some time to come. And the new
subscription rates, as one investment analyist commented, indicate the early
adopter market is saturated while the "value seekers" have shown no
interest. That, if true, is what is called "hitting a brick wall."

> You made this point, yourself.

It's profits that are down, not billings. That is one expensive station, and
their expenses have grown. It's gross billings are still impressive (the
entire Chicago market was off in 2006, by the way, so we need to index the
results).
>

Which was roughly 27 years after FM began on 40 MHz.

I personally believe other technologies will overcome them before they are
profitable

The net income for the last reported quarter, Q3 of 2006, the loss for 3
months was $89 million. That includes the interest on $1.5 billion in debt.
>
> Had KXKK not exited the format, US99, faced with revenue loss against

I hav been in direct format battles, and it is costly. In LA, we prevailed
with KLVE against a direct, almost identical challenger for several years.
They finally went away, and KLVE is #1 in LA, 12+ and 25-54. That is just a
risk and cost of doing business.

>

> up for lost revenue.

The real issue is that commercial radio can not serve, for examples, 12-17
and 55+ as there is no ad revenue in rated markets for this sort of staiton,
with a couple of somewhat sad exceptions like WDUV in Tampa: #1 ratings, #14
billings.

>
>
> No, David, I don't think I do. Because, like you, I've seen the raw data
> in the diaries. And while the numbers are statistically zero,

No, they are not zero. Every station that gets a diary mention appears in
Maximiser... there are over 300 stations in the Chicago data. A whole bunch
are below 0.05 share points, so show as zero due to rounding... but there
are many with 0.1, 0.2 and even 0.3 that don't "make the book." But they
have real numbers... all show the cume numbers, too.

>they are real numbers. Numbers which add up to significant aggregations
>across the national landscape. If those numbers can be served by
>alternative media, and there is money to be made in doing so, that money
>will expand as those alternative media attempt to widen the niche to access
>that mainstream revenue pool.

I looked at Chicago and the not-home to the market signals don't add up to
one share, after you eliminate stations that are not home but are in an
adjacent county and have some signal over a limited part of the MSA or where
two markets touch each other; most of the non-home stations with real shares
in the Chicago book are Milwaukee metro stations

> Now is the time for the Business end to take a look at the Listener end,
> and ask--not tell...not decide...ASK--how they may be served.

I spend nearly 100% of my time with listeners (I am with a hundred of them
this evening in Miami) and, like always, we have to go for broad appeal
formats and demos that are salable.

The FCC has released its latest operating budget listing over
its web page. Anyone who cares to can go check it out.

The ARRL never reveals its budget plans to the public,
despite all its Believers' claims that it is handled in a
"democratic fashion" AS IF it were an arm of the guvmint.
The best one can hope for is someone else getting copies

of its IRS Returns and publicizes those. Otherwise we
"common folk" would never know its a multi-million dollar
"non-profit" organization.

Technicians had and have CW privileges on VHF and UHF whether or not they passed the code. While there are small slivers of 2m and 6m that are exclusively CW, it can be used anywhere above 30mHz by all licensees of Technician or higher. Technicians have ALL privileges above 30mHz.

What a load of hooey. Real radio people are very interested in how
their signals get out. The media is about more than just making
money; it is an extension of the nervous system.

The fact is that radios stations in metropolitan areas (there are about 300 surveyed by Arbitron) are pretty much interested only in the coverage of the local market.

Of course it is different if you are in Jamestown in the Dakotas where there is no market definition and the trading areas are very large. But such rural areas account for only a small percentage of the population of the US. Just the first two metros, LA and NY, account for 10% of the population of the US... the top 10 markets are over 20% of the total.

The reason is simple: that is where the sales come from.

Absolutely. My point, however, is that non viable demos on the
local level become viable when gathered across larger areas in aggregate
numbers. Blues is not a viable format locally. Nationally, however,
it's a format that could serve those orphaned local listeners not served
by local media through a single network distribution. This would be a
perfect application of FM HD channels. As it is on satellite. I'

And while advertisers haven't targeted 55+ in decades, they were
buying local media. A single national networked distribution may be
viable for that demographic. Advertisers have long known that the
largest discretionary percentage of income belongs to the upper end demos.

It's hard to believe that someone couldn't monetize that demo.

That it's not being done now is a given. That it's not going to be
done is less obvious, in light of the expansion of alternative media.

Again, don't be so quick to dismiss. Just because it's not fitting
the current business model does not mean someone can't find a way to
make it work. No one could find a way to make FM work, either.

Until they did.

All of which is not going to get an argument from me. Except to say
that positive cash flow, regardless of how meager, is still positive
cash flow. And therein lies survivability.

If there is a brick wall and it's been hit, the business model will
have to change. In which case there's nothing off the table.

> results).

Actually, what I've read suggest that revenues are down. And
profits are off considerably. Gross billings may be impressive, but if
the bottom line is off, that's not going to feed the dividend.

But the fact that 2006 market revenues are down bears scrutiny. A
more significant tale may be coming to be told.

>>> Very little, and the new subscriber rates have declined enormously...

>
> Which was roughly 27 years after FM began on 40 MHz.

Also true. But WHEN success came is less relevant than HOW it
came. And when it came, it came with a vengeance while AM radio sat

arrogantly by, denying FM's viability as a primary medium.

And the success of FM came when awareness and accessibility became commonplace, with an emphasis on content. Prior, promotion of FM was based on technical performance that was of limited value to content oriented listeners.

Realistically, you may have some time, but there will be a revolution coming. And it will come from alternative outlets, if radio doesn't pay a good deal of attention quite early on.

As we've discussed, by the time AM stereo came along, AM was already no longer a music medium. And again, the listeners didn't care anyway. Stereo broadcasting is a ubiquitous but widely misunderstood concept. If I had a blow job for every time someone told me that bigger speakers make a radio sound 'more stereo,' I'd never be able to walk again.

Quadraphonic and Dolby FM were great ideas, too, but there was limited content emphasis in the marketing. Technobabble that was of no use to the bulk of listeners.

HD is being promoted largely the same way. And on FM only. Virtually no station is promoting the use of HD on AM. The hash is loud and proud. But there's no one explaining why it's there. Or how to take advantage of it among the stations using IBOC.

And again, all of this discussion may be meaningless, and HD could rise to be a dominant form of broadcasting. At this stage of the game, though, it's not looking that way. Especially on AM. And especially in light of the rise of alternatives for the same content.

There is absolutely no viable science to suggest you're wrong. But you've made my point for me. Other technologies, alternative media are spreading. And they are gaining share. Trivial now. But they will expand. And then, the numbers will not be trivial.

And that's when radio becomes one of many, instead of the ONE, with many wannabe's.

>
> The net income for the last reported quarter, Q3 of 2006, the loss for 3

> risk and cost of doing business.

Yes, it is. But that's the point. It's something to be prepared
for, and something that's to be dealt with. But a head to head format
battle is not what we're talking about, here. And the difference is
singular. A format battle is two entities taking each on with the same
business model. The rise of alternative media is a battle between not
only different media, demographics and formatics, but different business
models entirely.

That's something to be watched for, as well. Something that Radio,
by keeping it's head in tried and true research techniques and business
priorities, cannot do. You can't see coming what your figures deny. And
your figures are only as good as your vision.

>> The business side of Radio sees only numbers and abstracts. They do not

On this we have agreed. But the rise of alternatives serving these
demos raises questions about commercial radio's immunity from eroding
share to these alternatives. If they can serve the non profitable
fringes of commercial radio's marketplace, they can also serve the
mainstream.

And that's where the threat comes from.

>>> Having spent the last 37 years doing frequent Arbitron diary reviews, I

> adjacent county and have some signal over a limited part of the MSA or where
> two markets touch each other; most of the non-home stations with real shares
> in the Chicago book are Milwaukee metro stations

But you're looking at this through the filter of the current radio business end numbers. Yes, it's only one share, or less. But what is that one share across the entire radio listening universe? That's quite a number. And if that number can be served, by anyone who deems them a viable market, and money can be made, then those numbers become lost to Radio. Granted, not a big loss. But a VISIBLE loss. And from there, expansion of the niche can lead to a direct assault on the mainstream.

Jim Collins in "Good to Great" said that the hallmark of potentially bad research, meaningless research, is that it gives you want you expect.

Radio has been doing what it's been doing based on research for decades. But research that feeds the general traditions of radio. Research that tends to underscore that what's right with Radio is Right, what could be new isn't worth the effort worrying about.

Collins went on to say that the hallmark of good research is that it gives you what you DON"T expect. Something to learn from. A new perspective. A new perception. The ability to see vulnerabilities where previously none were visible.

And Collins said that the hallmark of GREAT research is that it gave you something you don't like. Forcing you to face realities that you'd hoped were not there, or flaws in your business that you'd been protecting.

Apply this to businesses we know and do business with, today. Microsoft comes to mind. Aggressively pursuing the status quo while intentionally blind to flaws in their product and flaws in their perception of their customers. Yes, they still have the lion's share. And yes, they probably don't have to worry too much about that. But the truth is that their share at MS is shrinking. And apathy for new product is growing. While alternatives make inroads. Serving small numbers of disenfranchised users, who seem to be growing in number.

Same with Radio. Looking at things the same old way. Recognizing none of their new vulnerabilities based on research that tells them, more or less, what they already know. Instead of looking for what they

don't know. Or better yet, what they don't like.
>
>> Now is the time for the Business end to take a look at the Listener end,
>> and ask--not tell...not decide...ASK--how they may be served.

> this evening in Miami)

It's one of the things I respect about you, David.

> and, like always, we have to go for broad appeal
> formats and demos that are salable.

And that's one of the things about which I've come to disagree
with you. The real issue is are you asking the questions that reinforce
this conclusion? Or are you asking questions that may point to another
conclusion.

There WAS a website (webmaster is a ham) that DID
post ARRL IRS returns. I footnoted that in one of my
Comments to the FCC. Have to look it up on the CD
holding those documents but anyone can access it if
it is still up and running.

> 1) Is that bad? Is it any different than the NRA or any other hobby

The National Recovery Act is still going on?!? :-)

> 2) What alternative to the ARRL do you suggest?

"Alternative?" You want an instant alternative?

The ARRL was incorporated in 1914. That's 83 years
ago. The league was able to squash its competition
in the ancient days by good PR work. I admire them
for their chutzpah in that.

From my observation the ARRL just got to believing
its own "sins of omissions of the truth" that it lost
sight of its original aims (other than being a local
telegraph service hacker)...then got the inner circle
of its staff to think they were all there through some
odd "divine right." It is only a fraternal order and a
publisher.

Ain't no equivalent national organization in the USA
now that could compete on equal terms with them.
However, that is NO reason (logically) for them to
think they are Top Dog just because they don't have

the competition. Its Believers do, but then they have drifted off the mainstream into an emotional attachment to fraternalistic orders.

Message-ID: <ora5t2dcel2eorjg7uo5jsa6p6te2nfpu6@4ax.com>
Source record: 105592

I just got a new (as in "not refurbished") E1XM, but three of the six "soft buttons" don't seem to work some of the time. (Not only don't they do anything, they don't even make the beep the other ones do.) The buttons that aren't working are the second, third, and fourth buttons from the left below the display (i.e. the AGC, RW, and PBT buttons in AM/SW mode, and the Favorites A and B and Display Channel Name buttons in XM mode. I tried unplugging the radio and doing a microprocessor reset, but those didn't work...then I tried saving a channel as a favorite in XM mode by pressing "Store", and when it asked for "A" or "B", the buttons started working again.

Has anybody else had similar symptoms with their E1/E1XM - and if so, is there a permanent fix (short of "send it back for repair")?

Call To Arms, means, you will inspect your weaponry and prepare to do battle. Duty Stations, means, all men and women must assume their duty stations, weapons at the ready. Fire When Ready, means, man or woman your weapons, sight the target, finger the trigger, and fire when ready. Cease Fire Procola, means, continue fireing until the enemy targets are dispatched, and there is no sight of an enemy anywhere on the horizon. Procolas means, after ending all possiblities of any lingering survivors staying alive. It means to wipe them out, and leave no survivors.

This means, it is time to kill all Lesbianists, and all other enemies in my universe, the many groups of naughty kids in my universe, rascaleers and others, and we will continue this fight, untill they are all dead, and in my Epcot Centers, or untill they have surrendered. Rascaleers are evil people who wish only to harm others.

Updated: 18-01-07 Rev.a.00.a 02:50 PST

Religious Practices

This is a little confusing, but hold on, and I'll try to explain it. There are many parts to my religion. We call them, parts, but we can also call them, practices, some of them, but not all of them.

We have the fundamental 'root' practice, which is sexaling. From the root practice, comes all other practices.

There are side practices, and there are derived practices. There are also, accompanying practices. There are many other types of practices, but I don't remember the names for them all, right now, as I'm still

amnesiatic, and will be for a long time.

Fistiker Practice

Bringing about orgasming in another person is a fistiker practice. A fistiker practice is a side practice, but it is also something a little different from a side practice, depending on how you bring the orgasming about, and depending on how many people are involved, and depending on who is the primary person, the person whom we are working on, and who are the helping people, the people who are joined together, to help the primary person to orgasm. There are a number of other dependencies as well.

What Is A Dependency?

A dependency is some thing that is needed that will help to define something else.

As in the case of an accident victim, we have a crutch to define one level of severity of an accident victim's situation. But we might also have a wheel chair to define another level of severity for the same, or other, accident victim. These objects help to determine how badly or miserably a person is injured.

A crutch can help define a level of severity in the injury. A wheel chair can help also to define a higher level of severity. These are both dependencies. They help us to define something, and they are used to help us to define an accident victim's level of severe injuries.

When Sexaling

You can use your lips, for example, or your tounge to twiddle the toes of a woman, and the woman begins to orgasm. That twiddleing of your tounge on her toes to help her to erotem, and to experience erotistical orgasming, can be any number of things, depending on the involvement and complexities of dependencies.

Rubbing the vaginal face, the vaginal wall, or rubbing to either side of the vaginal crevice, the labial folds or felates, can help a woman to erotem and erotistically orgasm, and depending on the involvement and complexities of dependencies, the dependencies can be any number of things, if we try to define the sexaling activity more fully and completely.

We'll skip this for now, as it is a little too difficult to remember, right now. Just remember, the primary practice is sexaling, and that sexaling is like the roots of a tree. All other religious practices grow out of the 'roots' of the tree, sexaling, and can be defined in many different ways, such as a helping practice, a side practice, a subsidiary practice, a canceling out practice, an accompanying practice, and there are many many other terms for what kind of practice some thing is, depending on what dependencies are involved.

Labia And Felate

What is the difference between a felate and a labia?

A felate is the skin tissue of the outer surface, and some of the tissue of the tips and edges of the labia. It does not include the inner side of the labia, but only the outer side, and the surrounding edges, as far as I can remember.

A verb, or action word, as I call it, is 'felate' as in 'Felate that woman's or girls' left felate'. That means to suckle on the left felate of the woman or girl.

Felate is a verb, but it is also a 'nominal' word, or naming word for objectifying an object.

Do we say 'Labialize that woman's felate!' To labialize something is to make something into a labia. We wouldn't, unless we were a doctor, say that about a felate. But we might say it if we were doctors, and we had a woman who met with a bear, and the bare clawed at her genitals, and the sharp claws ripped her labial skin up, then we might say in a surgeon's room 'Labialize that woman's ripped up labia.' That would mean to stitch it up, and make it nice and neat, and clean and well stitched up, and then useful to her, again, and it would involve a lot of surgery, as many nerves would need to be connected, as they had been ripped apart, and the wiring was all dislocated. But in the end, we would be able to fix her labia, and her genitals, if they were also hurt, and then we could dismiss the patient from the hospital, after the labia healed, and after she recovered from her trauma of having her labia shredded by an impolite, rude, mean, uncaring, and hungry bear.

Genitals, Titties, The Labia, And The Many Sexaling Organs

The labia is not the genitals, but some people do consider them as a part of the genitals. The genitals are inside the woman's vagina, in my way of thinking. The vaginal wall is not part of the genitals. The vaginal orifice is part of the genitals of a woman. This seems odd, doesn't it. Well, that is how it works, in my brain, and I designed women, as well as men. If you notice, in my writings, I've talked about the draft table, and the throttle. These are major parts of a woman's genitals. They are inside the vagina, and you can reach them through the vaginal orifice. Before you get inside of the vaginal orifice, there are a few things outside, such as a pee tube, and an ejaculate tube, and the clitoris, as well as the labia. These are not part of the genitals, but are working parts of her sexaling organs. A woman's or girls' sexaling organs are not equal to her genitals. Genitals are for baby making, and for other purposes. Titties are not part of the genitals, but they are part of the womans' sexaling organs. This will require a long discussion to clear up, so I will save it for another day.

Bears In The Woods

That's the way it happens some times, when women or girls go out into the woods, and sexal with their female friends. They can get hurt by

bears, if they are not accompanied by men, who are tough, and strong, and who stay alert, to guard and watch out for dangerous animals, such as bears, wolves, cayotes, bobcats, puma, and even racoons. Racoons do attack humans, if they smell some thing that will taste good to the racoon. If a person has a skin tear, and is bleeding, even a tiny bit, the racoon will smell it, and come running, and then find the person, and so will panthers, and all kinds of animals will come, and it's just like a bunch of sharks and fishes of different kinds, and Moray Eels, they like the smell of blood, and they come and investigate, when they smell it.

Women and girls have periods, and it is not every twenty eight days, as I've explained about before, and blood runs down, out of their vagina, and they generally do not know it, as it is only a tiny drop of blood, or less, most of the time, and the blood is often wiped from the skin surface, when the woman or girl is on the potty, or toilet, and the woman or girl will not even see the tiny drop of blood that comes out of the vagina and drips down the labia, on the inside, and then falls or dribbles down to the felates, and then falls off the felates, while she is on the toilet into the toilet, or while she is out doors, and walking about, onto the earth, if the woman is walking on a park walkway, or bicycle path. If she is wearing underwear, it will not fall onto the earth, but it will dry up on the panties, or underwear, and the smell of the dried blood will attract wild animals if she is out doors, walking or jogging in a wooded or regional or rural area, where there are lots of, or even just a few, animals.

Pumas can smell the blood, from miles away, and so can tiny oselots, and bears, and many animals can. They can smell blood, because they know they need meat to survive. That is built into their brains, that are located throughout their bodies, and not only in the skull, and animals are very sensitive to the smell of blood, as well as to the smell of urine, and to the smell of poop. Some animals, such as racoons, will come up from behind a woman, and grasp at her panties, as the racoon may smell the odors of fecal matter, from her butthole. Men may be raked by the claws of raccoons from behind, as they smell the odors of fecal matter, and try to find out more about it, as the racoons know that there is something delicious hiding behind those odors from the buttholes of women, girls, men, and boys.

Expecate

When women and girls go out hiking, it is best to wash out the vagina, first, and then use a fermented oil, as a douching agent. The oil will help to slow the flow of the blood down the inner walls of the vagina, and it may help to trap the blood, and make it difficult for it to leak out, unless the amount of the flow of blood, is very large. In that case, it is best to stay home, and not go out, when a large amount of blood is expecated from the vagina. Expecated means to expell outwardsly. Expectate can also be used, as it is generally the same word, that is, and it also has generally the same meaning, but

perhaps it has a few more uses, maybe, but it is from a variant language of the English language, and is basically the same word.

You should expecate your fluids in your vagina, from your vagina, before you go out hiking. If you know when your period is, and there are ways to tell when you have a period, or when you know when you are about to have a period, than if you normally have a large amount of blood flow from your vagina, as that has been your experience, it is probably best to go and sunbath at the beach, far away from wild animals and their habitats, or by the pool side. Racoons sometimes come out of the woods, to the shores of beaches, and trumbel along, listening and watching, and sniffing the air, when they smell dried blood, or wet or moiste blood, inside of the swim suit lining in the groinal area.

How Do You Tell When Your Period Is?

To learn when your period is, you need to look into the toilet bowl that you pee into, and then see if there is any red droplets. You can place a piece of toilet paper onto the surface of the water, and it might help to show the redish color mixing with the urine.

Another way is to take a piece of toilet tissue paper, and wipe your felates, in the morning, or during the day, or at night. Night is a good time, but during the day, it is just as good. Some women like night time because they feel the day is finished, and they are now going to make a final check. Well, it doesn't always happen the way we want things to happen. You might start leaking blood fluids, at two or three or four or five, a.m., or at six, or seven, or eight, or while you are in the shower, or in the bath tub, bathing, before you plan to go out for the day.

It may take you several years for you to find out when your period begins, and when it ends, by checking for blood flow. When you have determined the number of days between one period and the next, and you are absolutely certain of it, and you have confirmed it, many times, and you have checked to see if there might be something you didn't notice, at other times, when you checked, eventually, you'll learn when your blood flow begins, and how long it lasts, and when the next blood flow begins. Once you know, then you can time your excursions to the woods, or to the beach, with your friends, both women and men.

Bears, Wild Animals, And People

Men are needed to help scare bears away, if they come to close, and pepper spray is a good way to get them to leave the area. Bears do not like the small of pepper spray, and you need a cannister of pepper spray that will fire fifty to eighty to one hundred and eighty five feet or more, to scare away a bear, safely.

Loud noises surprise bears, but hungry bears get angry and feel challenged by you, and may come at you at a fast pace, and not stop, once they are angered. If you are a good shot with a rifle, and you

see a bear, from a few hundred feet away, and it is moving slowly, towards you, following you, you can shoot it with a good fifty calibur weapon, from that distance, and it will go down, in an instant, if you hit it square in the noggin, about one inch or less above the nose.

You need to be a good shot, and several people should aim, and fire at the same time, to kill the bear, to be sure some one hits it, and then puts it down, and kills it.

Do not think that because you have one rifle, or two handguns, and a rifle, that you are safe. If you do not know how to shoot, and if you are an inexperienced marks woman, or marks man, than your chances of hitting the bear are near zero, for all three of you, at three hundred feed.

You need years of practice to become a good marksmen, and you can start with the lower calbur weapons, to get a feel for weapons that fire projectiles, and that make loud noises.

There is no such thing as a friendly bear, and people think, 'Oh, look! Isn't she cute, that bear.' If they think that way, they might as well have left their last will and testament behind, and signed all their assets over to another person.

Bears are animals that need to eat just as humans do, and just as all animals do. If you are so foolish to think that bears are cute, you are a lame brained idiot. Bears are dangerous animals. And so are all wild animals. If you think a racoon is a cute animal, you get the lame brained award for the year award, and trophy to sit on your desk at home to remind you of how stupid you are.

Brad Pitt, And Angelina Joline

Only idiots would think that wild animals, that eat people, are cute. They need remedial training, as they do not understand that their lives are in danger, every time they walk out the door of their home. Even in the cities, there are nasty people, who smile, and pretend they are your friends, and these same people, such as Hillary Clinton, Brad Pitt, Cheryl Davis, a friend of Brad's, but that's his current girl friend, Angelina Jo-line. She is not a Lesbianist, and Brad pretends to be her friend. He likes to watch her get eaten by bears, my abominant kids, when the Lesbianists feed humans, one at a time, to the bears, or to the crocodile abominant children of mine.

Abominant Elephant Kids

I have carniovorus, human being abominant elephant kids, and they are rude, mean, nasty, and really terrible. They scare people, and then they pick them up with their trunk, and place them on their head, and then they tell them not to move, or they will stample on them, or tromp downwards, and crunch them, painfully, from the foot, to the shin, to the thigh, to the pelvis, to the waiste, to the lower tummy, to the mid section, to the chest, and then the neck, and then the

head, finally killing them. They will take a person, pull the person up and lift him or her up into the air with his or her trunk, and then pull the person into his or her mouth, and then crumple up the person, and then spit the person out, and the person is all broken up, and chewed up, with all the bones, broken, in the legs, and in the arms, and in the waiste, pelvis, torso, neck and shoulders, and head.

The Lesbianists use lots of these elephants. They are pretty to look at, but they are mean, and nasty. When strangers see them, they think, 'Oh, what a pretty elephant.' They don't know that the elephant is my abominant kid, and can speak English, as many people recently found out near Africa, in Sri Lanka, and then also in New Guinea.

They were very surprised at the talking elephant. But they didn't know that the Lesbianists had let the Elephant, my abominant kid, lose from the cages that they kept him sealed up in. There were one or two, or maybe eight of them, in Sri Lanka, and eight or nine in New Guinea. Lots of people got eaten up, and killed. The elephants are still lose in New Guinea, but in Sri Lanka, they herded them into the pens, and brought them to New Delhi, to then begin a rampage in New Delhi.

Well, the Lesbianists are doing this, daily, because they feel they have lost this battle, and that they are just wasting time, doing nothing, as they can not get to me. So they want to have a lot of fun. Now they are releasing lots of my abominant kids, in many places, and in New Delhi, Bombay, Sri Lanka, and New Guinea, many people have been hurt and killed by these idiot kids, these abominant elephant kids of mine. The Lesbianists have thousands of animals they want to release, out into the public, in England, in Switzerland, Georgia, South Carolina, Paris, and many other places.

The Lesbianists think they are going to have a lot of laughs watching the abomniant kids of mine, tear people up, and rip them to shreds. They also think that the animals, who are not abominant kids, but are just bizarre animals, that catch people in very large, nets, that have threads as thick as ropes, and that are very sticky, are going to do a lot of wierd and crazy things, no one here on this planet, other than them, have seen. They think they are going to get a lot of laughs when they see the mayhem and havoc, the disruption to society, and frustration on the faces of people who get caught in the nets, and then turned into living mummies sealed up in a type of pulpyish paper so the person can slowly disolve, but stay alive, for up to a year or more. Maybe as long as ten to thirty years, in some cases, and I'm not kidding.

You may think I'm kidding, but I'm not. This began a few days ago, and the Lesbianists are intent on continuing this, for the next few years. Isn't that surprising. I never expected that. They are very strange people, aren't they. They are real sicko's aren't they.

I think you should all go and meet my kids, with a day pass, and ask them about it. Other wise, you might find your self in a very large

spider's web.

Labiating A Labia

To labiate is to suckle the labia, and to take one or the other of the labia into the mouth, and tickle it with the tounge, or twist it gently with the lips.

'Labiate that woman's left labia!' 'Felate that womans left felate!' The difference is, labiating is to suckle the entire left labia, inside or under the edge of it, on the inner side, and the edge of it, and the outside of it.

Felateing the felate, is to suckle the edge of the labia, the upper exposed edge. It does not include the labia, in its entirety. Only the upper, protruding skywards, or in which ever direction it is pointing, that portion of it that is extending outwards. If you lift it up between your finger tips, you'll pull up on the entire structure revealing the underside, or the unexposed underside of the labia. There is also the outer side of the labia.

The Felate is the top tip edge of the labia, generally speaking, and it is itself an isolated system, and not part of the labia. It's connected to the labia, but it serves a different function. It droops downwards, to seal out the possiblity of any thing entering the vagina from below, in an upwards moving manner. Bugs can not fly up into the vagina, as the felates prevent them from flying up into it. Without the felates, the vagina would be unprotected. The labia would not protect the vagina, as the labia is merely the skin tissue mass that the felates are attached to, and in an instance of removing a felate from a cadaver, or dead body of a woman, or girl, once the felate is removed, the labia have no closure over the vagina, in most women and girls.

There are exceptions, as we've had many animals in our heritage line. There are many differences when we line up ten women, and inspect their vagina, their felates, and labia, their bumbey pack, as children are encouraged to call the lower hanging sexual organ of the vaginal cape, as it is also called by doctors.

On this planet, the bumbey pack may not be called a vaginal cape, with the inferior texts with unadvanced, primitive, witch doctor level sexual sciences that do not help any one along, such we find with the myth that women and girls have a period every twenty eight days.

That is total nonsense, as I've explained about it, before. The truth is, every few days, to every eight to fifteen days, to even eighteen days, or evern thirty two or fifty five days, depending on where the woman has grown up and where her ancestors have grown up, the number of days between one period and another period can be very dissimilar, from one woman to another woman. Some women have a period every two or three days, or even every day. There is no reason an ovary can not fall, every day, several times a day.

An ovary is so small, no one can see it, without special optical technologies, such as pass through see through technologies, and other optics, and other videoing technologies. A microscope is an out moded, ancient, and novel device, fit for only museum use on display shelfs. It's like an old car of the twenties, or there abouts, or even earlier, of course, depending on how sophisticated it gets. Micron microscopes, the so called, 'electron' microscopes, are a misnomer to begin with, as an 'electron' is not a fictious concept, but no one knows what an electron is, generally speaking except for the Lesbinists.

An electron is a small bit of electrically heated plasma, that you can heat, with the right technologies. It can fit on the tip of a pencil or pen. This is a big joke to the Lesbianists, as are also their jokes about protons, and neutrons, and nuclei, or the so called combined nucleus, as in 'nuclear' family. Nuclear family, is not a 'tight' organization of two persons, and their children.

A nuclear family is a family that has been nuclearized, that is, exposed to radiological salts kiddies, and their radiative or radiological energies. That's another one of the Lesbianists' jokes on all of the scientists who the Lesbianists could get to swallow it.

What Causes A So-Called "Nuclear' Explosion Or Detonation?

A vast number of children are making babies at a very high rate of speed, and the energies that they give off, as they make babies, and then peel off from the area where they made their babies, one after another, as they rocket away, is what causes a nuclear blast. The tummy mommies and tummy daddies are making babies at such a frantic pace, they make millions and billions, and trillions, and more, before you can even send a signal to your eye lid to blink, from your brain part that sends the signal out. The signal will travel just a very short distance across a crupture, not even half way, more like, one or two feet in distance, if we are to look at the size of a crupture as the same size as our current universe. It travels about not even one foot, not even one inch, and not even one millimeter, and not even one millionth of a millimeter, and far smaller than that still, before the parents are already through making babies, and they have retired, and passed on, and several kabillion generations of families, and multiply that by a very large number, and you'll get how many generations of families lived and died, and passed on their DNA to their sons and daughters.

It's a hail storm of erupting magnitude when the tummy mommies and tummy daddies begin making babies, and making their families larger.

It all happens so rapidly, with more than that number of successive generations of families, in less time than the energy pulse will travel down an optic nerve, across a crupture, that very minute or very tiny distance, as I stated above.

That kind of frenetic baby making activity, makes for a lot of heat, as well as, it generates a lot of stresses, and a lot of energies go flying off in all directions, as the sexaling couples experience many nice orgasms and eroticisims, together.

Temperatures, their body temperatures, collectively, and the incredibly vast number of movements, which also generate temperatures, by the animals, the tummy mommies, tummy daddies, tummy babies, the relatives, and the many generations of families, go skyrocketing, and the magnitude of numbers, and the intensity of all the activities the animals are busy with, as they make tummy babies, simultaneously, or nearly simultaneously, is of phenomenal proportions.

If we slow them down, to our pace, and then compare them to our pace of life, they would be just like us, and things would move slowly for them, and not much would change, for many kazillions plus years, and then many, many more years.

However, they are moving so much faster than we are, and the length of time they live, to them, it is a long time, four or five, or eight or nine hundred years, in our time, maybe, in some cases, depending on the type of radiological salts kiddies making babies.

On their scale or pace of life, they live that long. But on our scale, the length of time they live, is so tiny, we can not measure it, unless we have a very high level of advanced mathmatics that can account for such a small time period, or span of life.

Anyway, the frenetic adventures of the colony of radiological animals, when they start to make babies, after they are woken up, and prompted to make babies, with a detonating surge of heat energies, light wave energies, pressures energies, trampolining energies, which get them started, with the right combination, of heat, light, atmospheric temperatures, atmospheric pressures, food sources avaiability, drinking water avaiablity, trampolining energies, and a number of other types of energies, that awaken them, and then get them turned on, and sexaly active, they will suddenly erupt into a frenetic, mass of baby making furor, to us, any way, and with that, we have our so called, 'nuclear' detonation.

Cleansing Your Self With Your 'Built-In' And 'Attached', Cleansing And Washing, Clearifying And Erasing Energies Producing Genitals And Sexaling Systems, Eroteming And Orgasming Nervous Systems, And Baby Making Related Purifying Energies Generation Stations Aparati, Or Apparatuses, And Armatures

You women and girls, your vagina is your Holy instrument for assisting you to cleanse your self, and wash away the dirt and grime of daily living, the insults to you from strangers, the verbal abuse you experience in your arguments and conversations with friends and family, neighbors, relatives, work associates, and community acquaintances.

Your Holy body is a weapon to fight back against all the negativities you experience in your life, as you orgasm and erotem, showering off purifying energies, and lots of other beautiful other things and dings, as you vibrate your entire body concordially, in harmonic rythym, cadence, and rapture, with my Holy Body.

Your breasts, your butty butt, your butty butt hole, your vaginal hole, your groin, your throes, your vaginal cleavage or labial folds as they are called here by these nitwittish doctors on this planet, who do not know any thing about the human body, your chest, your back, your legs, your arms, your hands and fingers, your ankles, feet, and toes, your ears, lips, mouth, tounge, cheek, your rectal cavity, your tummy button, your stomach, throat, your brains, and you have many more than just one in your body, but many millions and more of them in your body, and that is not an overstatement, and every part of your body, inside and out, your many nervous systems and all your organs, they are all set to orgasm and erotem, and generate purifying energies with the help of the power company, as I've explained about them, before.

Ticklement Tuning Forks

You have ticklements, tuners, or pitch fork tuning forks, that chime, in every cubic millimeter to every cubic inch, and in even tinier places, you have tinier ticklements, or tuning forks, and in larger areas, you have larger ticklements, or tuning forks, and they are all set to vibrate in various patterns of sexual thrilling eroticisms, and orgasming ecstacies, as you pump up the levels of sexalating energies you have available to you, in you, and showering off from you, and those patterns and focal points change, slightly, minutely, as every micro second goes by, as we change our location in our universe, and our relative location or position to every thing else in our universe changes, from night to day, and from day to night, ongoingly, non-stopingly, never repeating the same set of tuning focal patterns. Focal patterns are frequencies.

Focal Patterns

These frequencies, or harmonic consistencies, are harmonic displays or the 'in rythm' with GOD, consistencies that allow you to be united with GOD, me, my devine and holy body, and my devine and holy mind, and being or GOD SELF and GOD BEING, every moment.

Men and boys have the same ticklements, or tuning forks, and they are located in every organ of their bodies, just as they are in women's bodies and in girls' bodies, and they allow all of you children of mine to stay in frequency with me, as you sexalate, erotem, and orgasm, practicing my religion, and as you live your daily lives.

These many ticklements and tuning forks are all connected to your brains and to your nervous systems, and each living being in your body, has them as well, and every living being has them as well.

All my children, animals, living beings, and human beings, are all connected to me, through these tuning forks, and also, through the holy bodies all my children have inside of them, and also through a myriad of other mechanisms that I have functioning in your bodies, in your astral 'energy' bodies, and the many millions of energies bodies each of you have in you. My animals children and living beings childrens have fewer connectivities and fewer energies bodies, as they do not need as many as my human being daughters and sons. This is because you, my human being children, need to be more connected to me, as you are the only ones who can actively practice my religion, with your own self determination, and desire to practice, to become closer to me, GOD, purer, and holyer.

I'm connected to all of you, day and night, three hundred sixty five days a year, in countless many fold untold numbers of ways and manners, and with countless many fold untold numbers of mechanisms. All of my children are likewise connected to me, in similar ways and manners, and with similar mechanisms.

As you women, girls, men, and boys sexually rapture, erotem, orgasm, and reach sexual peaks, and then sustain them, you grow holyer, as you become purer, brillianter, and closer in GODLYNESS to ME, GOD.

Obviously, then, the primary means for you to grow pure and holy is to sexalate, and as you continue, over the days, and weeks, then months, years, decades, hundreds of years, thousands of years, millions of years, and more, you slowly grow more pure and holy.

Sexaling is my primary and most fundamental religious practice and your primary religious practice for you to become cleansing machines, washing machines, purifying and sanitizing machines, so that you can clearify and erase your karmic markups, and purify your lives, and the lives of those around you, with your selfless actions of grace and serenity, sexaling and showering purifying energies in all directions for the sake of your self, and for the sake of others.

You women and girls need men and boys to assist you to become the powerful cleansing and purifying machines that you are capable of becoming.

Men and boys used to be somewhat nearly as useful as purifying and cleansing machines, as women and girls, but men and boys have different jobs, and different priorities, and there fore, the burden of work to purify my universe, and to clearify the karmic markups of all my children rests on the shoulders of all women and girls, with men and boys assisting women and girls.

You men and boys need women and girls to lead you, and to help you to become more proficient, powerful, and more capable cleansing, washing, purifying, and sanitizing machines.

Assistive Religious Practices

The practice of praying Nam Myeo Ho Ren Ge Kyeo is an assistive practice that allows you to become in touch with my GOD SELF, equally as well, but the time it takes, is much longer, as very little purifying energies are produced, merely by using your brain, muscles, ligaments, sinews, bones, mouths, tounges, and jaws, as energies sources.

There are many other assistive practices, from meditation, to breathing techniques, to yogic techniques, to ballet like techniques, to dance techniques, to body movements of various kinds, to help you to increase and or also store up your energies, and then for you to release them, for you to then become more firmly and closely connected to ME so that you can eventually begin to gain a higher appreciation of ME, GOD.

My many religions teach many ways to do this, and before my many religions were corrupted by the Lesbianists, they worked to varying degrees of success.

Therefore, sexaling is the primary fundamental religious practice, and all other practices in my religions that I've taught over time, spanning all of my previous teachings from the begining of our time together, since I, my GOD SELF, created you as my children, are assistive practices, of one kind or another.

Sexaling, eroteming, orgasming, phlumetting are important practices, and as you orgasm, you are purifying your self, and others by pushing out and spraying your self with purifying energies as your holy and sacred energies shoot out to cover you and emmerse you in full body coverage, from head to toe, showering and shattering energies every where around you. They then build up and cover over all others who are around you, as well, with your purifying erototistic and orgasotistic purifying energies, clearifying yours and their karmic markups.

Astral traveling is another type of practice, but we'll define it, another time. Experiencing hyper trance states of mind and being, and a nearness to GODLYNESS are also a practice, and we'll define it, when I can remember every thing I need to remember about it.

Participating in my religious ceremonies is an assistive religious practice you can enjoy, as you become purer and holyer, and after you recognize that I am your Mother and Father, and your CREATOR, and that you exist because of me, as I made you from pieces and parts of me, your CREATOR.

After you realize this, you can enjoy participation in ceremonies with me, as training priestesses and priests, and you can make your way up the purity ladder, the more you participate with me, GOD, in my religious prayer hand signaling ceremonies.

Praying Nam Myeo Ho Ren Ge Kyeo to my Holy Body, or to the Gurkian Mandala, as I've explained about, is an assistive practice that will bring results.

It will not bring results as well and as effectively and as quickly, as sexaling, which is the most holy and virtuous practice, along with eroteming, orgasming, phlumetting, astral traveling, peaking, and so on.

I've spoken about peaking, before, and women and girls can peak, and experience wonderful feelings.

In any case, do not confuse assistive practices, with the fundamental and primary practice of sexaling. We'll get back to all those other things, to define them, betterly, another time, after my brain heals, a little bit more, and after I erase more karmic markups that keep my brain karma from improving, fast enough for me.

How To Make Prayer Statements

Remember to include a prayer statement, such as 'I pray to the holy ephemeral body of the Creator, John Francis Ayres, for the [insert private prayer statement]', such as, '... for the serenity of mind, and the gratefulness of heart, for all those around me, who have helped me to become the person I am, and can become.' or, '... for the peace of mind, and serenity of heart, for the love of all men and boys, and the cooperation of all women and girls.' These prayers said by a woman or girl. Men can pray, similarly, '... for the grace and deviness of the women and girls who surround me, I am greatful to them, and I pray for their continued good health, and prosperity'.

You can also say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]', but only when I am in the middle of a religious hand signaling prayer ceremony, i.e., while I am doing a prayer ceremony, and saying my prayers with religious holy hand prayer signals that my special kids who are religious kids, can pick up and then act on, in concert with other groups of kids of mine, who also are religious kids, most of them, I think, and who work together with my primary groups of religious kids.

I have lots of kids, and some are normal kids, who go about their jobs, as expected, for earnings, just as most people we know. But I also have lots of other groups of children, who are more, religiously oriented, to varying degrees, and who are very religious as their work is all for the sake of my religious self, my GOD SELF. My religous kids catch my hand signing, and then they pass the messages along to others of my groups of children, and with all of the different groups of children I have doing 'good' works for me, as well as groups of children who do 'religious' works for me, as well as groups of children doing normal work for me, but for the sake of my religion, nevertheless.

They all coordinate themselves, somehow, I have yet to figure out how they do it, but between them all, they get the jobs done, that I ask them to do, while I am religiously - and the prayer statements I am signing are very holy - hand prayer signaling, i.e., hand signing.

So, unless you know for a fact, by seeing me on a tv, such as during a live broadcast, once I get my religious conveyance set up, and built by my children, after all the conditions are met, for securing this world from the grasps of the Lesbianists, and after killing all the Lesbianists, and / or after making the remaining Lesbianists surrender, and then after all other conditions are met, as I don't know all the conditions, I've set, as my memories are still foggy, as I'm amnesiatic, as well as mentally retarded, but in any case, if you see me on tv, on a live broadcast, doing my hand signing, you'll know I'm in the middle of one of my prayers, and then you can say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]', and you can omit the 'ephemeral' if you like, as it will work better if you omit the word 'ephemeral' as while I'm praying, I'm my normal, GOD, self, though I may not look to you, on the surface, to be any different, over the video links, or even in person. It never the less works better if you use my recommended methods of making prayer statements, this way, for you to maximize your private prayer statements.

All of my groups of kids have lots of friends, and they do lots of work for me, and I do not remember how many groups of them there are, and how many children I"ve got, as yet, but in time, I'll be able to give you a better idea of how they work together to get the work done, that I ask them to do for me, with my religious hand prayer signals, or hand signals, as in hand signing, or signing.

My kids use signing for all their work assignments, so I use hand signing that they can catch, pick up and read, and it is all pretty much very religious in nature, and it is very solemn, as I am GOD, and when I'm signing, they know I'm GOD, and do not doubt it.

When I am not signing, they might now and then, doubt that I am GOD, but never the less, I am GOD, and my signing proves it to them - when I am saying my religous hand prayer statements, by hand signing - with out any room for doubts in their minds.

In other words, I'm a typical person, just a little mentally retarded, brain smattered, or brain damaged, after my many youthful and other brain bashings I recieved, the wiring is a little scrambled up, upstairs, and after many poisonings by the Lesbianists - from makeing coffee from kerosene, diesel fuel, gasoline, and motor oil contaminated coffee beans and then from drinking that coffee, without knowing it was contaminated with petrol fluids, as often happens to people - and with ill health karma that has me on disability, and I've been through a lot, life after life, and sometimes, my children may have had a thought or two, 'I wonder, if he is going to make it, like he said he would?'

Well, to dispel all doubts, I sign, and when I'm signing, I remind them of my old self, back in the old days, when I used to sign, religiously, and they know how serious a guy I was, so they do not harbor any doubts, so long as I am hand signing.

What To Say, When You See Me Using My Dick Or Other Parts Of My Body To Purify Others, And So Forth

You can say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]', also while you see me praying, Nam Myeo Ho Ren Ge Kyeo, or also while you see me in a ceremony, using my dick and scrotum, or other parts of my Holy Body to purify others, during the middle of a prayer ceremony, and I need not be hand signing, or praying Nam Myeo Ho Ren Ge Kyeo, as I am in the middle of prayers and activities ceremony, which is just as good as a religious hand prayer signaling ceresony, any day.

My dick and scrotum package is very Holy, and it has a very useful function, and that is, it purifying others. My lips do, too, and my butt hole, does as well. They all purify others very effectively and efficiently during my religious ceremonies.

My entire body, during a religious ceremony, butt hole, mouthal hole, lips, tounge, cheeks, legs, knees, feet, toes, butt, chest, back, arms, elbows, hands, fingers, head, neck, throat, ears, nose, and so forth, is entirely the body of GOD, as I am GOD, and therefore, while I am useing my body, during my religious ceremonies, and for my religious ceremonies, and you see me on tv doing so, then after you have verified that I am in the middle of a prayer ceremony, you can say your private prayer, in the manner as I've explained, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]'.

I only use my dick and scrotum package for prayer ceremonies, except when I need to pee, so if you see that I am using it, during a prayer ceremony, or if you see me using any other part of my Holy Body, during a live broadcast prayer ceremony, then you'll know right away, that I am in the middle of a prayer ceremony and it is okay to use the statement, 'I pray to the holy body of the Creator, John Francis Ayres, for the [insert private prayer statement]'.

The same is true, pretty much, for any priestess or priest, who practices with me, in my religious holy body prayer circle, their bodies become very Pure, Holy, and Devine, but only after many life periods, that is, after many, many aeons, as they do not attain the same level of purity for a while, the same level of purity as I am at by my good old self, or the same level of pureness that is of ME, GOD, since I'm GOD, and they are not.

That means, it takes priestesses and priests longer to become pure, holy, and devine. I happen to be pure, holy, and devine, but that's because I'm GOD, and it is only during my religious ceremonies that you can understand that as you make your prayer statements, and sexal, etc.

After a long, long while, priestesses and priests will also become pure, holy, and devine, as their holy bodies, energies bodies that are pure, holy, and devine, but on a lower scale than are MY energies

bodies, since I'm GOD, and I'm in charge of keeping things tied together, here in my universe.

After many aeons plus years of practice in my holy body praryer circle, the priestesses and priests become pure, holy, and devine, and then their bodies, their normal bodies, become very purifying, just as mine is, now, when I am in a prayer ceremony. I am in a prayer ceremony, daily, a few times, to a number of times, a day.

I've gone eighteen hours straight, once, and no sooner than I go to sleep, and then wakup, right away, I begin again, and I've gone many days, straight, praying, continuously, non-stop.

This is nothing, though, and is all preparatory, as in the future, when I get my health back, as I haven't been too healthy, for quite some time, I will be praying around the clock, some days, and for many days at a time, taking a break only to eat, drink, poop, pee, and clean up.

When priestesses and priests join with me, we will go for years without stopping, and with the priestesses, and with the priests, the both of them there, present, doing the prayer ceremony on my behalf, they can represent me, while I take a nap, go and shower, get some food, nourish myself, drink some fluids, read a book or news paper, or watch the news, or a movie, game show, video, or play a video game, and so forth. I won't be taking long breaks, and that is very funny sounding, but anyway, it happens that priestesses and priests will lose their attention, and then get lost, somehow, and then go and watch tv in their bed room, or whatever, and then we have to go and look for them, and they will get a few markoffs, and with enough markoffs, they will be asked to leave the religious conveyance, and they will be put on a type of vrobatiton, or under survielance, to see if they are good or not. My kids do all my survielance work, and they keep track of every one, so 'you'd better be good, you'd better be nice, you'd better look smart I'm telling you why, Santa Clause is coming, to town'.

Who Was Kris Kringle?

Did you know that Kris Kringle got its start from me? What a coincidence. I don't think he was wearing anything, though, or rather, I don't think I was wearing any thing, but you never know, as tolerances have changed over the long aeons of time, as they pass.

When priests and priestesses become that pure, holy, and devine, as pure, holy, and devine as I am, after their many aeons of religious practice in my holy body prayer circle - pure and devine on the exact same level as I am at - then they can represent me, as Mr. mini-GOD, and Mrs. mini-GOD.

You can not represent me as Kris Kringle, and whoever my wife was, back then. I think I had a lot of guys on that team, and a lot of women and girls, too, since sexaling was a part of that religion, too.

You can learn more about it, if you're interested, by getting a day pass, and checking in with my kids, and then, signing up and joining our country, and then by becomeing a citizen, as I've spoken about, before.

You can include any good prayer, that comes to mind, that you feel is needed by you, to improve your life, and to level up your life.

You are the only ones who can pray, and practice, you women, girls, men, and boys, and there fore you are connected to me in many more ways than other living beings, the animals, and the amoebes, cells, and other living beings.

There fore, you are, both genders, the ones who will clean up the mess you have made, and you will continue to keep my universe clean, as you sexal with your genitals, and with your bodies, and with all your gizmos, igniters, trigger mechanisms, love bumps, love patches, tuning forks or ticklements, and so forth, as you are sexaling beings, who I, GOD, created, and you will sexalate, erotem, orgasm, phlumett, astral travel, peak, hyper tranceate, and so forth, just as I intended you to, from now till forever.

You will become virtuous and worthyable beings, worthyable tummy mommies, and worthyable tummy daddies, with your practice of my religion, who will bring into my universe, my many children who will join with you, and assist you and me, in cleaning up our universe, and the mess you have all made of it.

Is that understood? The answer had better be, "YES SIR!".

Lesbianists' Torment Campaign Under Way

Lesbianists are clearly releaseing wierd, ghastly, horrible, and dangerous preditorial animals, giant insects, giant spiders, giant lizards, snakes, and reptiles, ghastly, preditorial sea animals and sea mammals, winged, preditorial and horrific, aggressive scavenger and killer buzzard like creatures and other winged and destructive animals, and other horrible creatures, as well as my abominant kids to kill, maime, torture, and cause major disruptions and suffering to people, around the globe, in many locations.

Apparently, the whole world is now affected, or will be affected, by this dischordance and disharmonic display of defeated lunacy.

The peace has been shattered by the Lesbianists. It was not good before, the situation in the world, with the balooneying governments of the world, doing what they wanted to do, and torturing, and canabalizing people, and feeding people to my abominant cave bears kids, and to my crocodile people kids, and mistreating people, like Bill Gates, Steve Hawkins, Steve Irwin, many women, young girls, and men.

The war in Iraq, the phoney Saddam Hussein Trials, and all the bogus manipulation of the press and media, and the suppression of what is actually the case, with our being used and abused, poisoned, and maltreated by the Lesbianists, was a rotten situation. That was normal, or normality for us. Our karma is very poor, and we have the karma to suffer this abuse, and these torments, daily, unknowingly, in most if not nearly all cases.

But, it is becomeing really bad and there is need for serious concern, and action, to correct this situation. It has gotten out of hand, completely, and there is no stopping the Lesbianists in their wanton, and coldly miserable wish and lust for chaos and disturbances to others.

Now, more clearly than ever, as the Lesbianists rampage, the Lesbianists are causing major disruptions, suffering, anguish, and there is just an awful discordance of shock, dismay, and misery, that is growing, every moment. This is as real as the sunlight shining from the sun on a hot day in summer.

I don't have a clue what people are doing, and what is happening to them, as they are captured, tortured, and caused miserable sufferings, in many places. There must be horrible agony for many people, at this moment, and as each moment passes.

Our reality as it was has suddenly been shattered and torn up, and replaced with the lunacidal, Lesbianistic, mayhem and chaos.

Reuters reports a Lesbianists' joke for the Lesbianists, sarcastically and ironicly stateing, "New Perils Push Doomsday Clock Closer to Midnight" "(Reuters) Scientists have advanced the clock 2 minutes closer to midnight."

http://us.rd.yahoo.com/my/today/new_perils_push_doomsday_clock_closer_to_midnight;_ylt=AmUXlewr5ev2kNK_SfOHDFAL1vAI/*http://news.yahoo.com/s/nm/20070117/us_nm/doomsday_clock_dc_4

This is their private joke, to make this scenario more laugable than before for them. They could not care less, as they are manipulating every thing, and that statement is completely meaningless to them, as they are in control of every thing, in their conspiritorial lunacy to rule human beings, and to trash every one.

We'll see what the coming days, weeks, months, and years bring, and maybe there will be hope for change, when people begin to take action, to correct this situation, globally, united in spirit, permanently.

These are the most evil of evil people and abominant kids, in our immediate vicinity in our universe. We must begin our cleanup campaign here, as it begins where I am, and will continue from here on out, till we have rid my universe of all of these horrible people, and all others like them, and have made them surrender, or have sent them on to my Epcot Center.

I will establish my relgion in my universe, and begin my ministry, and they are not going to stop me, as my religion will bring positive change for all of us, forever.

I must establish myself outside the bounds of this Lesbianistic society, so your efforts and concern for our future, and your selfless giving of donations to my ministry, to allow me to set up my ministry, outside the bounds of this Lesbianistic society, non-dependent on Welfare, Supplemental Security Income or SSI, Medicaid, and non-reliant on the supported and financed Housing and Urban Developement or HUD subsidized apartment that I live in.

Once I receive in the mail, the 'Gift' donations to set up my ministry outside the bounds of this society, I believe things will gradually begin to positively change for us all, and the shift to positivity will begin, and a new universe for us all, will become for the first time, ever, a potential reality with the sincere religious practice by all of my followers, all of you, who are practicing my religion, diligently, and daily, or as much as your health and your time permits.

There in, with your efforts to practice, will bloom your flowers of dignity and hope, justice and freedom, willingness for sharing, cooperating, and participating with others in our new age of enlightenment, the Gurkian Age, and your new found respect for self and others.

It Is Now Time To Kill All Government Workers, Public Workers, Preachers, Islamic Clerics, Christian Bible Teachers, Bible Thumpers, And All Other Persons Who Support The Lesbianists And Their Lesbianistic Societies Around The World - 'Fivers' To Kill Lesbianists And All The Lesbianists' Supporters - Coma Patients - All Persons Who You Kill Will Transel To My Epcot Center - Japanese And List Keeping - Surrendering And Pledging To Serve All People In My Universe - What Does This Mean? Updated: 21-01-07 Rev.d.01.a 19:56 PST

It is now time to kill all police of every police department in every country in the world. It is now time to kill all jail and prison workers in every country in the world. It is now time to kill all zoo keepers who work in zoos and other related places around the world. It is also time to kill all pet store personel, and pet store owners. We do not need people housing and feeding potentially dangerous animals. You are further ordered to kill all pets in all pet stores, and elsewhere, even in private homes. You may then eat them, after you have cleaned out their guts and removed tummy foods and rectal feces, etc., that are decaying matter, that is harmful to your health, and after you have prepared them for eating by cooking, grilling, fire

place cooking, barbecuing, smoke house fermenting, or by other safe and sanitary, healthful cooking methods.

It is also time to kill every fire department official or worker, no matter what capacity the person works in, as a fire truck driver, as an ambulance driver, as an assistant driver, as an attendant or support crew person, as a maintenance man of the fire or the police departement, it is now time to kill them all.

Further, it is time to kill all public bus drivers, who work on any metropolitan or local area or state or interstate, or national bus company. It is time to kill all ships' captains and their crew members. It is time to kill all railroad rail line workers. It is time to kill all subway drivers and subway line workers, no matter what their job is.

Further, it is now time to kill all military personel, SWAT team personel, all government personel, and all civilian, or trained military, national guard, state or federal militia, toy soldiers, the people who dress up in old time war regalia, and outfits pretending they are old time, earlier period, confederate soldiers, or old time earlier period, union soldiers, who act out old time North the 'Union' vs. South the 'Confederates' and who participate in city and town parades, across the United States.

It is now time to kill all retired military personel who support the deranged, crazed, insepient, and corrupted Lesbianistic societies we live in, around the world. It is also now time to kill all persons who in any way support the governments of the world, including but not limited to, all school, university, kindergarden, missionary, day care center workers, nursery school teachers, teachers aids or teachers assistants, United Nations workers, United Nations teachers, substitute teachers, catholic school teachers, Irish protestant school teachers, parochial school teachers, all religious denominations around the world school teachers and their school support workers, government funded school teachers, tuition assistance by the government school teachers, all personel who work for the United Nations, all civil service agents, all DEA agents, all FBI agents, all FDA agents, all EPA agents, and workers, BLM agents who are Lesbianists as well as those BLM agents' who are Lesbianists as well as those friends of theirs, who support the Lesbianists.

It is also time to kill all other federal, state, or local, or globally tasked organizations, such as the CIA workers, INTERPOL workers, the several groups of workers within the Canadian Mounties, NIC a spy department of the U.S. Navy, the Korean C.I.A., the United States Presidential Police agents the Secret Service Agents, National Park Rangers, State Park Rangers, Forestry Service workers, Pentagon workers, National Library Of Congress workers, and all others who work in any capacity supporting any government organization, those listed above, and all others, as well as all persons who support the Lesbianists in any way at all.

It is now time to kill all judges, bailiffs, Supreme Court Justices, and the employees who work in their organizations, and all other judges, legal clerks, para legal workers, court stenographers, justices of the peace, lawyers, attorneys, state attornys, prosecuting attornys, defense attornys. It is time to kill all officials of all government organizations, and all the people who work for them and or even only support them, such as restaraunt workers who feed them lunch, coffee shop workers and owners who feed them coffee and food, bars and restaraunt personel and owners of bars and restaraunts who support and feed any and all persons connected to the governments of the world and who work for them in any capacity at all.

It is also time to kill all the money lenders who loan money to the Lesbianists, the mortgage company owners who provide the Lesbianists with house purchasing loans, and all the supermarket workers and supermarket owners, who supply food to the Lesbianists, as well as all of the druggists, the pharmacy workers, who supply medicines to the Lesbianists. It is time to kill all the taxi cab drivers who give rides to the Lesbianists, and to every person who supports the Lesbianists in any way, at all, unless those people surrender to my kids.

It is also now time to kill all civilian or civil servant or state civil servant worker who supports in any way, any Lesbianistic organization, such as the police departments, federal agencies, fire departments, libraries, schools, and so forth. It is also now time to kill all persons who maintain or provide services to any of the above listed organizations, and to all of the similar organizations in every country in the world.

This is my order to all of you, and you are all ordered, by me, GOd/ GOD, to kill all of them, unless they surrender. People also call me, 'Allah'. I'm the same person. Just do as I tell you.

You are to take my fuels' bombs with chlorine plastics' explosives formulas, and all other explosives formulas I've explained about on my bulletin board and the fuels' bombs explosives formulas including but not limited to radiological 'fracturable' rocks that provide so-called 'nuclear' explosions, all of my bombs' formulas, and all other bombs' formulas derived in part or in whole from what we have learned as I've explained on my bulletin board and to take them, and make the bombs and explosives, and to then use them, and then destroy and kill all of the Lesbianists, and all of the Lesbianists military bases, buildings, and kill every last one of them, all of them, leaving no one alive.

'Fivers' To Kill Lesbianists And All The Lesbianists' Supporters

You are to then make certain they are all dead. If they are not dead, you are to kill them with a 'fiver'. A 'fiver' is a bullet with five lines drawn or scored with a knife or sharp instrument into the tip of the bullet, to form a 'five' line pattern, so that the bullet will fracture into 'five' parts.

You are to take three 'fivers' and shoot each person who has not stopped breathing, and who is not dead yet, and shoot the three fivers into the head of the person, to make certain the person dies.

Three 'fiver's will destroy enough brain material, to kill any person if the bullet is large enough, and the handgun, rifle, or weapon is powerful enough.

The handgun bullet size must be at least larger than a .22 calibur, and at a minimum, 7 millimeters. You may use .38 calibur, 9 millimeter, 10 millimeter, .45 calibur, or any other, large sized bullet to make certain they are dead. Buckshot, 8 guage to 10 guage, or any comparable rifle load or handgun load, or home made weapon load, will work equally as well, with three shots into the skull. A machete or similar instrument should then be used to chop the head off of the person at the neck line. If you have a machete or hatchet, or axe, and if you prefer to chop off the head of the person, then by all means, you are to do so. The point here is to kill the person one hundred (100) percent, and not leave the person in a coma.

Coma Patients

A person in a coma is perfectly alive, and can hear every word you are saying, but can not respond. People in a coma after severe accidents, such as near fatal traffic accidents, where their limbs were broken into pieces, or war victims, who are on life support in Veterans' Hospitals, can be in agonizing pain, and no pain medications are given to the patient as the patient has no way of communicating with the doctors, nurses, or staff members to complain about the pain, in many or in most cases, if not nearly all cases. Some patients can write or scribble out a note about the severe pains, or make gestures with their hands, pointing at painful spots they are able to point to, and then making squeezing motions, to indicate as best as they can, that there is something wrong in the area. Some people may catch the meaning of the gestures, but others do not, and may just wonder what is going on with the patient and they may wonder what the patient means by the hand gestures. Others, doctors and nurses, and staff members will merely find it amusing that the patient is making the gestures. Some doctors and nurses, and possibly staff members, will figure out the patient is in pain, and then steps can be taken to alleviate the pain, but it is an ordeal for the patient, and it may take months, or in some cases, years, before staff, cleaning persons, food servers, orderlies or assistants, nurses, or doctors figure out what the hand gestures mean.

The coma patient, after healing from the injuries, may still have residual pains, such as residual spinal pains, or neck pains, or ligament pains where ligaments were twisted, or ruptured, or severed, partially or wholly, and the ligaments didn't grow back properly, or didn't grow back fully, or much, or perhaps, in some cases, not at all, which does happen a lot, and each time the patient is moved in her or his bed, the person experiences extreme pain as no medications for pain are given to the coma patient, unless the patient has been

successful in communicating that there is pain felt by her or him, in her or his body.

Leaving coma patients on life support systems is the cruelest thing you can do to a person in a coma as there is no such thing as being 'brain dead'.

It is a cruel and abominable Lesbianists' joke on humanity, and on all persons, that the Lesbianists have perpetrated with their teaching doctors and nurses that coma patients are brain dead, and do not feel, hear, taste, or sense, anything at all, and it is just another one of the Lesbianists' ways to hurt and torture people, and cruelly and ruthlessly abuse human beings, in this case, in most of these cases, by proxy. There are doctors who are Lesbianists, and I have one who is one, that I am aware of, and he knows exactly what causes my health problems, but he sits there, non-responsive, and with a vacant stare on his face as if he doesn't hear, see, or know of any thing that is going on, something like the three monkeys with hands clasped over their, ears, eyes, and mouth, who represent 'hear no evil, see no evil, speak no evil' and then 'therefore, every thing is alright'.

All persons with brains, whether in a coma, or other sleep like state or condition, is perfectly brain alive as the brains and nervous systems, auditory, taste, touch and sense nerve systems, never die, until the patient stops breathing, and passes on.

All nurses and doctors are to remove all life support systems from all persons in a coma, immediately and confirm the persons have died. That will allow them to transel into my Epcot Center, and then be born again, as a tummy baby to a tummy mommy and to tummy daddies.

All persons in a coma, whether in a hospital, or in a nursing home, or at a private home or apartment, or in a group home, or group care center, are to be told the truth of this, and are to be told that you just leared it, and are to be told that I am GOD, and that I have an Epcot Center staff waiting for them to come in, to be treated for their traumatic condition, of not being able to do any thing about their condition to end it, as it is a miserable situation for these people who are in a coma, or in any trance like state or condition that resembles a coma, or a sleeping person, who can not wake up. The person is perfectly brain active, and there are no measuring devices to prove it available to hospital staff or to doctors, as none are made, and the technologies to detect a person's brain activeness and aliveness are kept secret after they are bought up, and then after the records of them are destroyed, and the information on them are kept secret and locked away, in vaults, and in storage facilities, hidden from view so that no one can get the information, and build a device to detect a person's brain alertness status.

After they are told the truth, and that you just became aware of it, you are to tell them to not be afraid, and that all measures to relieve them from their present condition, and all measures to assist

them to transel to my Epcot Center, where they can recieve personal care, and then helped to recover from the trauma of the coma, or coma like state of not being able to wake up, speak, and talk to people. They are then to be injected with a powerful sleep sedaditive, or induced to swallow several strong sleeping pills, as they may become afraid, and then, you are to help them to pass on, and to transel over to my Epcot Center.

In some cases, if you pull on the large toe of a person, or on the thumb, the person may have control to pull in the opposite direction. That is an indication that they are awake, and fully aware of what is going on around them. Please check patients to see that they have soundly fallen asleep, and snoring or breathing quietly, in relaxed manner, may be the only sign that the person is asleep.

Any sign of movement, mentally driven by the patient, no matter how slight, is nearly most always, nearly one hundred percent of the time, a sign that the person is completely brain alive, and that the person is completely aware of what is going on around her or him and can hear every thing. Even passing or expelling gas or farting, can be 'mentally' driven, and a sign the person is awake, and alert, and brain alive. Opening one's mouth is almost always, one hundred percent of the time, mentally driven.

Persons's in a coma, who have Eplilepsy, or other similar brain or neuro muscular disorder, and other conditions where patients experience spasming, whether the condition is diagnosed or not, these patients who spasm, may make some spamodic movement, now and then, and that is only a sign that the person is haveing a neuro muscular muscle spasm. Knee jerks or other similar movements, are not always muscle spasms and can be labored, mentally driven actions. These actions show the patient has control to that extent over her or his muscles, body, skeletal system, and other body systems related to the movement.

In any case, after the patient has fallen asleep, you are then to kill the person, and let the person transel to my Epcot Center, so that the person can recover in my Epcot Center, and then be born as a tummy baby, to a tummy mommy, and to tummy daddies.

All Persons Who You Kill Will Transel To My Epcot Center

Once you are certain all of the police, fire, teachers, and all others who support the Lesbianists' societies around the world are dead, they will transel to my Epcot Center.

It is now the time to bring an end to the lives of these people who support the crazed, insepient, bogus Lesbianists, and to destroy them all, leaving no survivors. Kill all of their family and relatives, and leave no one alive. Kill them all.

My Epcot Center will not be in any way, inconveinced by your brave and heroic actions. All doctors must be killed, all nurses must be killed. All medical techinicians must be killed. All library workers must be

killed. All school teachers must be killed. All art museum and gallery museum workers must be killed. All workers for all of these institutions must be killed. All of them, in every country of the world, unless they surrender and plead for mercy, and then are allowed in to my kids' place, for swearing in and for joining as civilians, my country.

Further, it is time to kill all media corporations personel, such as news casters, news men, news women, anchor persons, cameral men and women, talk show hosts, administrative persons, Hollywood's movie actors and actoresses, all radio broadcasters, and all personel of all radio companies. It is time to kill all news paper company owners, and publishers, editors, and all workers of these companies, unless they surrender to my children and plead for mercy.

It is time for all of you to kill all of them, and make sure not one of them is left living, including and most importantly, all politicians, who must all be killed, without any further delay. It is time to kill them all.

It is now time to kill Oprah Winfrey, Geraldo Rivera, Sarah Jessica Parker, Judge Judy, Jerry Springer, Liz Taylor, Michael Jackson, Clint Eastwood, Cher Bonno, Morgan Freeman, Steven Spielberg, Al Gore and his family, Hillary Clinton and her family, all of them, Jeb Bush and his family, all of them, Nancy Reagan and her family, all of them, former president of the United States President George Bush, Sr. and his family, all of them, including all persons related to him in any way, and all persons who work for him, in any way, and all persons who work for any of his associates, in any way, unless they surrender to my kids, and then plead for mercy.

We are not going to allow the Lesbianists to continue their illegal, inhumane, and horriblesome practices and activities on my planet, and in my universe, a moment longer. They must all die, now.

Is that understood?

I hope the answer is, "YES SIR! Mr. John Francis Ayres, GOd", as a 'negative' reply to my question is not acceptable.

Japanese And List Keeping

I haven't confirmed it, but from what I know, so far, the Japanese are very good at keeping lists, and they know about all the foreign people in Japan, and they keep lists of names of all of them, and they keep lists of names on all of the Korean people, and the Singaporean people, the Chinese people, the Ainu people, and the cast outs or 'burakumin' a group of meat cutters and fish sellers who some how got on a list of people who were felt to be 'unclean'. The 'burakumin' was a group of people who no one in Japan wished to talk about. The Japanese also, apparently, had lists on groups of people, who they didn't know much about, but they knew they were always doing things with each other. Those groups of people were the Lesbianists, so the

Japanese knew all along, who I was talking about and were nearly one hundred percent certain those groups were the Lesbianists living in Japan.

They read what I wrote, and the notes of mine were passed to many people on an e-mail mailing list, and when they heard that Steve Irwin had been killed, they felt they had heard enough and they told all their friends about my notes, and then the Japanese killed all the Lesbianists in Japan on that list they kept.

It's something I heard, and I haven't confirmed it, but I think the Japanese are fully capable of handling that, as they were fully prepared to deal with each one of the Lesbianists, and they knew who they were, and once the Japanese united, and decided to take action. The Japanese escorted all the Lesbianists to a meeting place, to which the Lesbianists were not happy to go to, but had no choice but to agree to follow the Japanese citizens who escorted them there, with the military or Japanese Self Defense Force, the Coast Guard, and National Police, and all other police agencies in Japan, plus the national organization of fire department workers, backing and supporting all the Japanese citizens.

As to what they did with the bodies of the Lesbianists, I'll leave that to them to explain to you, as it was quite brilliant and they had many very good ideas for dealing with the bodies of the deceased Lesbianists, who are apparently now in my Epcot Center.

The Japanese country side is now peaceful and quite, and things the winds are blowing, peacefully, and gracefully over the Japanese country side, cities and towns, across the ponds, marshes, lillies and lotus flowers swamp lands, bogs, bays, estuaries, lakes, streams, rice paddies, fields, mountains, and islands, from what I can understand and gather about the situation in Japan.

Surrendering And Pledging To Serve All People In My Universe

If the Lesbianists and their supporters surrender to my children, and then promise to devote their lives for the sake of others, serving man kind, and all human beings, and all people on this planet, and in my universe, for the rest of their lives, they will be allowed to surrender to my children, and my children will then arrest them and put them in a prison cell. If they are not willing to serve others, despite the fact that they say they will serve others and devote their lives for the sake of others, serving all people in my universe, then my children will ignore them, and my children will not arrest them because my children know they are lying. They must promise to do all they can that is humanely possible, for the sake of others, and devote themselves to the prosperity of others, for eternity. If they are not willing to do that, then please, just send them on to my Epcot Center, and we'll straighten them out, for there. My staff at the Epcot Center has training programs to straighten them out and make them nicer people, so that next time they are born as tummy babies, they will

behave and be nice to others, doing nice things for other people, after they are retrained, a little. The retraining program takes a while, but the results are very good to excellent.

If my kids decide that the person who is surrendering, is telling the truth, my kids will use the special teletransportation technology, something like what we see in Star Trek on tv, with Captain Kirk saying, 'Beam me up, Scotty!', as many of us have seen on daytime tv, or in the movie theater, and my kids have very good teletranportation technology or 'beam me up, Scotty' technology, and the person, once he or she pledges honestly to serve others, will instantly dissappear.

Do not be surprised if when the person surrenders and promises to 'serve others', promising to devote her or his life for the sake of others, the person suddenly dissappears, and instantly, the person is no where to be seen. The person was 'beamed' into a prison cell that my kids have constructed, using other technologies, and we have many prison cells waiting for the Lesbianists and for the Lesbianists' supporters, and for other bad kids in my universe, as well.

For each person you kill, my kids will keep earning points scores on your efforts to send them to my Epcot Center, and you will be paid, when you have finished your job, and then finally, go in to visit my kids. My kids will pay you in the monetary currency that is used in the underground cities my kids have built, for protecting people from these horrible Lesbianists and for protecting people from the abominant kids of mine, and the ghastly and naughty animals and very large bugs and spider like creatures, that the Lesbianists use to help them torture people with, to make the Lesbianists laugh, and to amuse themselves, as I've explained a little about, already. The more Lesbianists and Lesbianists' supporters you send to my Epcot Center, the more earning points you will score, and the more money you will earn, and you will be paid that money, when you go to visit my kids after you have finished your work, killing the Lesbiansts and the Lesbianists' supporters.

If the Lesbianists and the Lesbianists' supporters do not disappear after they surrender, and after they promise to serve others, and pledge to devote their lives for the sake of others, the Lesbianists and the Lesbianists' supporters are lying, and you can then kill them, and send them on to my Epcot Center.

My children will escort the deceased Lesbianists and Lesbianists supporters, once you kill them, into one or an other of my Epcot Centers, and will make sure that the Lesbianists and the Lesbianists' supporters get in for a meeting with one or another of my managers, or with one of the staff members who work with my managers to arrange retraining programs for rehabilitating the Lesbianists and the Lesbianists' supporters.

The Lesbianists and Lesbianists' supporters will not qualify as tummy babies, until they are finished their retraining and rehabilitating

programs. After they finish, they will be out, again, to join the rest of you, once again, but this time, as nice, kind, courteous, and polite people.

What Does This Mean?

It means, I want all the Lesbianists dead, but if they will surrender, and if they promise to serve all human kind, all people, and work and strive to enrich the lives of all others, dedicating their lives to others, then, you do not have to kill them, and you do not have to send them to my Epcot Center. If they are honest when they surrender, and when they promise to serve all people, devoting their lives to all people of the world, then my kids will 'beam' them in, using the teletransportation technologies that my children use. If they are lying, then my children will not beam them in, and they will be stuck where they are. If they are stuck where they are, after they surrender to my kids, and after they promise to dedicate their lives to the welfare of all others in the world, and to all others in my universe, then they were lying, and you may then kill them, and send them on their way to my Epcot Center, for retraining, and for rehabilitation.

It also means to kill any person who works for the Lesbianists, if he or she is supporting the Lesbianists to try to stop you from killing the Lesbianists. Also, it means that you should kill any person who tries to interfere with you, while you are trying to kill the Lesbianists.That's what it means.

Captain Off The Bridge.

And Children

Fermenting Oils - Fracuses Kiddies - Slugs, Snails, And Other Bottom Feeders - Feeding Everybody In Our Bodies - Putting An End To The Global Menace Of The Lesbianists - Changing Our Societies, And Our Universe, Forever Updated: 22-01-07 Rev.x.00.a 07:45 PST

Mix raw sugar, ocean salt, sessame seeds, dried fermented berries you have taken from a mix of berries fermenting as a flural hydrate liqour, or as a plain fermenting liqour, and make sure you dry them out in the oven, before useing them.

Mix the items together in a container, and mix in a drop or two of apple juice, pear juice, papaya juice, kiwi juice, banana juice, cherry juice, cranberry juice, strawberry juice, peach juice, nectarine juice, or plumb juice, and let the moisture settle into the mixture to allow it to become only partially and only very slightly moiste, and not wet or liquidy.

Allow the mixture to sit in a warm or cool place for a week or two, to eight to fifteen weeks, or even a few years, and it will grow molds in it, and with the longer the duration up to a point of sitting and

molding, the more useful it will become.

It might develop a pungent, unpleasant odor, like a dead animal smells, which may mean that a fungus that is not very suited for you to use as a starter mold for starting a fermented oil batch has developed in the container, and in that case, you can throw the whole mix out, or use it for fermenting beans or something. Cheeses can be made with these kinds of growing funguses and molds, if you are the daring type, who likes to experiment with new and different tastes from variously fermented mixtures.

You can add some ocean salt, and make a soury vinegar, and then try to rescue it with the combination of the soury vinegar, ocean salt, and a little raw sugar, and some honey.

It may be that some bacteria is in the mix, and it needs to be eaten up, before you can use it safely for a healthy mold mix for starting a nice cheese molds and funguses mixture.

Ocean salt can be added in slightly large amounts with raw sugar. Once the odors have stabilized, and once they have developed a more pleasanty odor of a fermenting mixture, with a slight alchohol ferment odor that will indicate that it is alright to use, and that it will not be harmful to you.

In some cases, the bacteria in the base mix, may be a result of hairs or particles of skin from the body of a dead rat or mouse, that some how found his or her way into the sessame seeds, or into the dried spices, or into dried berries that you used, and then died.

In that case, you might as well throw it away, unless you have a lot of patience, and do not mind waiting and working with it, for several years, for it to become something you can use.

One way to make it into something you can use is to mix in a high potency liqour brew, and let it sit for a number or years, and ferment it, and then after it smells nice and rosy smelling, after ten to fifteen years, to thirty to fifty years, you can evaporate the liquids out in a pail on an open porch that has a net covering to keep animals and animals' hairs out of it. Make sure there is good ventilation, and it should evaporate out, safely after a number of days on the porch in the sun. If there is no heat to make it hot enough to combust, and if there is good ventilation, it will not combust, and it will evaporate out, safely. Adding ocean salt and raw sugar to the mixture so as to fill it up with raw sugar and acidic ocean salts, will further help to safely evaporate out the liquids and prevent the liquids from combusting, accidentally.

Once the liquids have evaporated out, safely, you can use the materials that remain in the pail or container, to start a fermented oils brew mixture, or to start a cheese molds and funguses mixture, if you wish to make a nice cheese molds and funguses mixture.

The particles of skin or hair from the dead rat or mouse, or pidgeon, or other animal, will have been eaten up by all the ferment fracuses kiddies, and will no longer pose a threat to your health.

Fracuses Kiddies

Ferment fracuses kiddies are just plain old ferment kiddies who like to devour large bits of human or animal tissues, mites, or cockroaches, or their body parts, and then poop them out, and pee them out into the liqour brew.

You'll always have some of these kiddies in your brew mixes, and they are useful to you, as they eat up the things that you do not want in your tummy. Also, there are other kiddies, such as snails, and other bottom feeders, that find their way in, in the skins and pulp material as tiny animals, or the eggs of animals, and they hatch, and they develop, and they grow big, and they then bottom feed, and they eat any dead rats, and dead rat parts from rats that might have fallen into the brew. These are useful pets, that you want in your rum and liqour brews, as they will keep the liqour brew healthy to drink, and they will keep you from getting ill.

Slugs, Snails, And Other Bottom Feeders

In the old days of bucanneering, as I may have mentioned, before, this was a crucial part of keeping the sailors alive, on their long voyages, and if crew members fell ill due to an unhealthy brew, with a dead rat in the mix, making it sour, and making it unhealthy to drink, then if there are not enough snails, slugs, and bottom feeders in the barrel or rum to eat the dead rat parts, the sailors will get ill, and when they get back to port, they will hang the rummery owner, and give the business over to the son, or to a third party, often times, one of their fellow crew members, who is liked by all the people, locally, and on the ship.

This is the case, still today, with many rummeries owned and handed down in the same family, from such instances as that.

Bottom feeders, slugs, snails, and many types of bottom feeding earth worms, and other types of healthy bottom feeding worms, that cohabitate well with the slugs, and snails, and other animals that are too tiny for you to see in the rum brew mixture, without a powerful microscope like, optical videoing technology, are essential to your brews mixtures, and they may increase in numbers as they make babies like every animal and living being does, and so now and then, you need to reach into your brew container, with your hand, or with a fine mesh small aquarium use fish net, and scoop them out, and flush them down the toilet, or let them loose in a local pond, lake, mountain stream, or water springs fresh water well, where they will help to keep the water clean, ahd healthy.

Once you have the materials to make your fermented oils mixture, you can add them to your container of food oils, and begin to ferment them, or use them to make a nice cheese mixture, to ferment and then

to make solid as it matures with age. You can also use the materials to make a fermented bean mixture, or fermented barley, or fermented rice, or fermented millet, or fermented wheat mixture.

You can also use them to make a fermented brew mixture, as there will be many healthy molds and funguses kiddies in and among the dried out materials. Your health will improve, and by adding different spices, nuts, berries, root particles, ground up kiln dried pine cones that were green to begin with, and then fermented for a few months to a few years, in a brew mixture, then dried out, and ground up into a saw dust powder consistency, you can then have lots of crystals cages salts kiddies of various kinds help you to make a nice regroverative brew, to help you to regroverate your amoebes.

Feeding Everybody In Our Bodies

You know, we need to eat foods to stay alive. We also need to feed all the living animals in our body, to help them to stay alive, so that they can help our health remain normal, from day to day. We also need to feed the amoebes all the foods and juices, salts kiddies, and the poopy liquids and pee liquids, and other liquids with other types of tinier salts kiddies in them, as well as other types of food kiddies, we haven't learned about, yet, but with all of them inside your tummy, you'll be able to feed every one who needs feeding, and then you'll be successful with your amoebe 'auto regroverate mode, on!' formula, so long as you have degunked your body of all the petro chemical oils, kerosene, diesel fuels, and other chemicals, the Lesbianists have been feeding you, from birth, in your diets, if you live in a society, where you are fed baby formula mixtures from Gerbers or Heinze, or any of the other baby foods manufacturers.

Putting An End To The Global Menace Of The Lesbianists

We need to put an end to this practice by the Lesbianists of poisoning us with their petro chemical industry oils and tars salts kiddies, which they use to rot our teeth out, and cause tooth decay, and which they use to cause ulcers in people's tummies, and which they use to cause lots of unpleasant illnesses, and diseases in human beings, and in farm animals. These petro chemical salt kiddies, and formaldehyic salts kiddies, all harm our amobes living beings children, and all the other animals that live inside of us. One day, we will have a lot of people practicing my religion, sexaling, and making prayer statements so as to help us to erase the karmic markups we have, that keep us living under the tyranny of these Lesbianists, and in their societies, suffereing the daily poisonings that cut our lives short. When we have erased enough of our karmic markups with my religion's religious practice of sexaling to purify our selfs and others around us, and to clearify and erase our karmic markups, we will eventually be able to say good bye to the Lesbianists, and their practices of poisoning us, and causing us major headaches, or problems in our lives.

Changing Our Societies, And Our Universe, Forever

At that time, we will be able to say hello to a whole new way of life, and that will be the beginning of our new, thrilling, and excitingly challenging, one world, unified, planetary, global culture, and it will be the begining of our new, thrilling, and excitingly challenging, one universe, universal culture for all of the people in our universe, who we have been living in our universe together with, since we first came out, and began living here in my universe, a very long time ago. We have to start somewhere, and so here we are, now, begining to prepare the foundation for our long and prosperous journey ahead of us, as we clean up our universe, together with each other, and clearify and erase all of our karmic markups, and all of the karmic markups of all my children, and of all living beings who live with us, together with us, in my and our universe. We need to take responsibility for this clean up campaign of ours, as we are the only ones, besides my many worker, unionized children, who can use our brains, and use our sexaling organs, to produce purifying energies of all types, to help us clearify and erase all of our karmic markups, and all karmic markups, and karmic things and dings, of all of my animal children, and of all of my living beings children, and of all of my human children.

My kids have built underground cities, to help us to get started, in learning about the new ways of living together, and of sexaling together, for practicing my religion together with each other, so that we will be able to prepare ourselves, for our new global, unified society, and for our new, universal, united, civilization. We have a long ways to go, but we are starting now, with your efforts to correct this situation by eraseing the karmic markups and karmic things and dings, that have us living in this truly awful situation on this planet, in our universe, that we are now, curently living in. One day, when all the Lesbianists are either dead, or have surrendered to my kids, we will be able to gradually educate ourselves, and change our understanding about women and girls, and about men and boys, to understand the truth about women and girls, and about men and boys, and then we will begin our new and exciting journey into our future, together, with my religion at the basis of our new, unified society, universal culture, and universal civilization.

Donations To GOd - Monastic Mode - Who Works For Me, Anyway? - Obeying Orders - Every Politician In The World To Be Executed - Every Hollywood Actor And Actoress To Be Executed - Jump Ship, Explained - Fair Warning - Particle Remis Technology And Particle Dismiss Technology - Dismend Technology And Remend Technology - Mentalcosis / Mentaltosis And Comatosis - Michael Jackson - Retractions Updated: 26-01-07 Rev.b.02.a 06:45 PST

Donations To GOd

Why can't anyone donate any thing to me? I am GOd. So, how come no one can send me a penny in the mail, or a box of cookies, or a pair of socks, or something? I don't think I'm asking for too much, but I'm just curious about why no one can send me anything in the mail?

I don't get any phone calls. No one sends me any e-mail. No one tries to visit me. I have a religion, and I'm asking people to practice it. Now, how come no one can contact me?

I once said that I am in a monastic mode, and it is a cloistered monastic mode. That means, no one can be contacted out side of my monastery by any one inside the monastery, and no one can contact any one inside the monastery, by any one outside the monastery.

If there is no legitimate monastery business then no person will be allowed to contact me, or for that matter, any one else inside my monastery, who is leading a monastic life, with me.

Well, there is only me, right now, but maybe in the future, some one will be in my cloistered monastic discipline with me, helping me with my religious duties of doing my religious ceremonies, as I've mentioned about, before.

Monastic Mode

What does my 'monastic mode' mean? It means that I am here as GOD. You know, there is only me. I of course never sent any one, such as the Lesbianists claim. Why would I? I don't need any one to do the things I need to do. That's sheer idiocy to think I would have a son or daughter, and send them to do my business. That's absurd. You've been snookered into believeing all those hogwash tales, and now you don't know who I am, and you don't have the karma to believe in me, as a result of your following and believeing all those hogwash tales. My kids are everywhere, and they are doing their jobs.

Who Works For Me, Anyway?

Now, as I've been saying, I'm going to have you do your jobs, and that is to use your genitals, and to use your body, and to use your brains, and then participate in my religion, using your genitals and your body and your brain, and sexalate with each other, and purify your karma? Does that sound like a joke to you? If it does, you are very mistaken because it is not a joke in any way, and I am absolutely serious when I say that you are going to use your 'equipment' and I almost want to call it, your 'field' equipment, because you are armed with it, day and night, and you are going to use that equipment, to clearify and erase your karmic markups, and to purify my universe. Is that okay with you? I hope it sure the hell is, as a "NO SIR!" at this point, would be an unsatisfactory reply. Do you understand me? I hope so. You are going to jump ship, as I order you to, or be thrown over board, if you have a problem with that. I hope you understand.

Well, as far as I can figure it, no one realizes that I am GOD, so no one can donate money to me. If some one realizes that I am GOD, than

for the first time, that person will be allowed to donate money to me. That person will be allowed to visit me, or call me on the phone, or donate money or food to me, or practice my religious ceremonies with me, if that person believes, and understands, and realizes, that I am GOD.

Right now, there is no one who realizes or understands that I am GOD. No one of course believes I am GOD. Never the less, I am GOD, and I am sitting here, waiting for donations, to help my ministry get started.

So, that is the reason that no one can get through to me, or donate money to me, or send me a postcard with some kind of message of cheer and support in it.

There doesn't seem to be any body who believes that I am GOD. Well, that isn't surprising. People do not have the karma to believe that I exist, is one way of looking at it. They have ignored my existence, and have not had any real thoughts about me that would link them to me, in my monastic mode.

What does that mean? It means, that no one remembers me, as the guy who created all of you.

It also means, that I am in a religious mode, and no one understands that, or believes that I am in a religious mode.

That is peculiar, since I am giving you a religion, one of my oldest, for you to practice, that will assist you in purifying your life, and that will assist you in eraseing and clearifying your karmic markups.

That's very peculiar, but it is not that peculiar, as you do not have the karma to realize and understand that I am GOD.

In any case, there will be no donations, no telegrams, and no phone calls or letters to me, so long as you do not realize, understand, and then of course, believe that I am GOD.

Well, any way, so it goes.

Obeying Orders

Now, I want all these people, killed. Hillary Clinton. Bill Clinton. Chelsea Clinton. Ted Kennedy. Al Gore. Tipper Gore. Harriet Gore. Cheryl Gore. Dave Gore. Bill Gore, and all people who call them selfs, Gore and pretend to be related to Al Gore, or to Tipper Gore. Mr. Al Gore has lots of friends, who are also Lesbianists, and I want them all killed. Oliver North. Monica Lewinsky. Eve Arden. Elizabeth Arden. Michael Jackson. George Bush Sr. and all other George Bushes. Do you understand what I mean? It means, that they are all Lesbianists and they are all going to die, and we are going to blow up Washington D.C., and destroy Capital Hill, and level that area, and make it sink beneath the waves of the Atlantic Ocean. That's how big a bomb I want you to make, with my fracturable rocks, to then blow that area out of the water, and make it sink below the waves of the Atlantic Ocean.

You'll probably need more than one bomb.

Did you know that Washington, D.C. is lying on a fault line, deep down, and it is on an ocean shelf, that has the ocean under it, lapping at the earth, very far down. That means, that it is on a fault line, and it is on a shelf, that is hanging over the ocean's waters.

Now, if you hit Baltimore, and Maryland, and Northern Virginia, and Washington DC with a large enough bomb to blow Baltimore out of the ground, and level it, and with another bomb large enough to blow Washington DC out of the ground and level it, at the same time, and a few more bombs, large enough to blow Maryland, Virginia, and that whole metro area out of the earth, at the same time, you will sink the nation's capital, that is, Washington DC, below the ground, as it will break off the ledge that it sits on, and it will sink into the ocean, as the ledge crumbles below it. There will be water, from the Atlantic ocean, all the way out to West Virginia.

Now. I have every right to say that, and demand this, as it is a matter of self defense, as I know these motherfuckers are eating people, cannibalizing my kids, for their amusement, thrills, and fun, and they will continue to do that UNLESS THEY ARE STOPPPED! Do you understand that?

I hope so. I am going to see the whole of Washington DC and the area leveled, with Baltimore, and Northern Virginia, and Maryland, as well, and we are going to sink that area into the ocean, and make it disappear below the surface of the waters of the Atlantic. Now, that should be clear, shouldn't it.

This is not a joke. We will have to send a lot of my children to my Epcot Center, in the blasts that will occur, and in the after math of the blasts, but that is unavoidable.

We will have many people, drowning in the waters that come in from the ocean, and that stretch out to the hills of West Virginia, with only slight outcrops of land, hills, here and there, with a few people lying on top of them, blinded and in awful pain, but they will not live long, as they will not be able to survive for long, and they will pass on, die, and then they will transel to my Epcot Center, where they can get medical relief, medical treatment, therapy counseling, and rehabilitative therapies.

Now, that is what we will do to Washington DC and vicinity, so every one, please prepare for it, and get your pain medication in order, so you can take an over dose of pain pills, when your area is blown and shredded to bits, with one or more of my fracturable rocks bombs, as I've explained about.

Every Politician In The World To Be Executed

Next, I want every politician in the world, canceled out. I want their passports for living on our planet, canceled. That means, I want you

to kill each and every one of them. Not only do I want you to kill them, all, but I want you to kill every single one of their associates, around the world. They are all Lesbianists, except for a few of them. If you happen to kill one of the non Lesbianists policitians by mistake, that is okay. They have the option of surrendering to my children, available to them, and once they surrender, they will not be killed, by accident.

Every Hollywood Actor And Actoress To Be Executed

After that, I want every Hollywood actor or actoress killed, and that includes all the actors and actoresses, around the world, and they must surrender to my kids, if they wish to not get killed. There are a lot of them, who are not Lesbianists, so those I've mentioned, who I've let you know are not Lesbianists, you can forget about them, and leave them alone.

There are more than a couple of billion Lesbianists living under the earth's surface, in underground cities. I did not realize there were so many. We need to kill them all, so we will, in time, unless they surrender.

Is that clear, every body? I hope the answer is, "Yes, Sir!" as you had better not answer any other way, or you will get yourself on my shit list. Is that understood? Good. I am the boss of my universe, so if you do not like it, than jump overboard, now, sailor. Have you got that clear? Good.

Jump Ship, Explained

What does 'jump overboard' mean? It means you are going to have severe problems with me, if you do not obey orders, and that there will be difficulty and jail time, ahead of you, if you continue to ignore my commands to you. It means there is going to be trouble, if you do not obey me. My kids are in charge of handling all the details on that, and it is not a joke.

Fair Warning

We are not going to let these Lesbianists run their show, one more minute. We are going to put an end to them, and their activities, here on this planet, and every where else in my universe, and this is fair warning of that.

Particle Remis Technology And Particle Dismiss Technology

As I said, once before, there is a technology called particle remis technology. There is also a technology called particle dismiss. They are the technologies that you can use to feed 2.3 billion Lesbianists down under the surface of this planet, and on every other planet that they are on.

Dismend Technology And Remend Technology

It is easy to dismiss molecules, and to dismiss, or dismend all the beings who need to be dismended, and sent to my Epcot Centers. It is also easy to remend them, and then get them back into the foods that I need them to be a part of.

My kids keep track of every one who needs to be dismended, and then remended. That is a lot of work, keeping track of every one, but that allows us to dismend the living beings, and animals, that I can let off from duty, and from further service, and then send to my Epcot Centers for them to live in. I can then recall them to duty, and remend them, and then have them serve in an apple or an orange, or banana, or a brick. Do you think that is a joke? It is not a joke, and there is no joking allowed, on my shift. Do you got that? I hope so, because if you do not, you will have to learn how to swim a long ways, as it is going to be a long way from shore, after I ask you to jump over board, and I have sailors who practice, all the time, just to show the passengers how it is done, just in case. I will have you jump from ship, if you do not get along with me, and if you disagree with what I am doing, pretty soon, as we are departing, now, or just about now. That means, we are not going to play around, much longer, and we are going to set sail. That means, there are going to be a lot of people practicing my religion, pretty soon, as they will learn about it, and they will begin practicing it.

Mentalcosis / Mentaltosis And Comatosis

Mentaltosis is the state of a vegetable, like a stalk of cellery, or a plumb, or an orange. Comatosis is the state of complete awareness of self and others. Comatosis is not brain dead, i.e., more or less, mentaltosis, with no real significant brain activities occuring, other than the ones that keep you alive, and vegetative, and you do not need assistance to remain and function in a state of mentaltosis, and the Lesbianists know it. You are severely brainally handicapped, and when you come out of it, eventually, after you have your karma fully completed for being mentaltosically ill, and after it is then time to get on to something else, you will be very brainally handicapped, and you'll be an extremely retarded person, with little to nearly no brain awareness going on about self and others, but able to walk, barely, and later, after many many lifetimes as a mentally retarded individual, you'll begin to be able to mumble a little, or babble a little, for umpteen lifetimes, as you begin to get your higher brain functions, back, which takes a very long time to work out, and many many lifetimes to work out, karmically.

Comatosis is like a hit on the head, and when you wake up, your faculties are not all working, and you may not be able to speak, or move, or talk to your friends, but mentally, you are all there.

Mentaltosis is like a train ran over your brain, and every other nervous system in your body, nearly, and you are completely unable to think, or do any thing else, and you are reduced to a mere pumping heart patient, with not much else going for you, except you are breathing, and technically, you are alive. You can sit there for a

million years, or a million or so life times, before you begin to come out of it, and then reveal your disorder of severe mental disorganization, mental disfunction, and mental retardation. There is a big difference between a bonk on the head, and a train running over it, and the rest of your body. Coma patients are fully aware of what is going on around them, and they may not be able to speak, but they are there, and they can twitch a finger, now and then, or flex a toe, or raise their tummy up a tiny bit, to pass gas, usually, and relieve the bloating sensation they are experiencing in their tummy, and in their intestines, or colon. They may be able to grasp your hand, and fully hold on to it, and not let go, for hours, if they have the strength for it. This horrible torture the Lesbianists are perpetrating on comatosic patients, needs to end, now. Person responsible for continuance of hospital policies, despite our informing them of the truth regarding this, are to be shot and killed, and sent to my Epcot Center, if they interfere with the removal of the life support and life support assitive devices, that are plugged into the comatosic patients mouth, or nose, or other orifice of their body, or any part of their body. If some one refuses to cooperate, you are to throw them out of their hospital unit, and give them a good whack on the head. Come back in a few days, and then disconnnect their life support assisitive pumps, and tubes, and so forth, and shoot them in the brain with three 'fivers', as I've explained about, and then send them on their way to my Epcot Center. That is an order. Now do it.

I want you to pull the plugs on all the GI's and civilians who are on a breathing assistance machine, and life support assistance equipment, and I want you to send them all to my Epcot Center, where they can get treatment, and therapy, and then get themselves ready for being born, again, as a fine and a healthy, tummy baby to a tummy mommy, and to tummy daddies. You had better comply, if you know what is good for you, as my kids are now keeping track of your records on this account, and you are not going to do very well, if you do not follow orders. Is that clear. I will not have any insubordination of duty on my watch, and that means, you had better learn to follow orders, or you will be asked to jump over board, and then go for a very long swim to shore.

Michael Jackson

Michael Jackson is the biggest joke in the world. He is a white boy, and he pretends to be related to Janet Jackson, a black woman, partially, and they pretend to be related, and he is as white as an elbow macaroni, or a white goose. He is not a black person, though he does have some black ancestry, but he is a primarily white person, and he pretends to have bleached his skin color, which is a crock of shit. Now, I want you to kill that mother fucker, as well as Sylvestor Stallon, and Arnold Schwarznegar, Clint Eastwood, Morgan Freeman, Kirk Douglas, Matt Damon, Robert De Niro, Anthony Hopkins, Gary Busey, and their Lesbianists' buddies.

Retractions

Mr. Jerry Springer is not a Lesbianist. I was mistaken about him, as he was already killed by them, in a previous lifetime, as he developed a desire to bad mouth them, and they didn't like him, and they kicked him out of their group, and they killed him, with their murderous torture routines. Penelope Cruz is not a Lesbianist, but she was, but they killed her, and tortured her, and she is off the list. Angelica Huston is not a Lesbianist. She was, but they killed her, after torturing her. She is a popular and prominent person, and if she hasn't been abducted yet, by the Lesbianists who will feed her to my abominant kids, like they did to Steve Irwin, and Jeff Corwin, then they will be gettting around to it, not too long from now, as they like to feed her to the abominant kids of mine, just as they do Bill Gates, and lots of other, former Lesbianists. None of the Baldwin brothers are Lesbianists, either, as they were already kicked out, and killed by them, and then grievously tortured by them. They continue to be main attractions for feeding to my abominant kids. Jack Nicholson is not a Lesbianist, now, either, but he was. Ben Affleck is not a Lesbianist, as he was also kicked out of their organization, after they tortured and killed him. Charley Sheen is not one, either, but he was. Martin Sheen is not a Lesbianist, but he works for them, and he was one, before they kicked him out, after they tortured him, and killed him, in a previous lifetime. Michael Douglas is no longer a Lesbianist, either, as they killed him, after their brutal torturing of him. He is up for being abducted, and for being fed to the abominant kids of mine, as he is a prominent person, and Kirk Douglas enjoys watching him get eaten up, and Kirk Douglas will laugh his guts out, as he watches Michael Douglas get tortured by the Lesbianists, which Kirk Douglas is a confirmed member of. Cher Bonno is not a Lesbianist, as I was mistaken in memory, though she was a leader for a while with Oliver North, she was killed by them, after being tortured, because she was getting "soft". Sunny Bonno was a Lesbianist, as well, but he was also killed after being tortured, officially kicking him out of the members league of Lesbianists. Sunny Bonno was captured, and abducted, and a body double was placed on a coroner's table, and Cher Bonno knew that the body double who was dead, who looked like Sunny Bonno, was not Sunny Bonno. The Lesbianists subsequently fed Sunny Bonno, after they captured him off the ski slopes, to my abominant kids. Elizabeth Taylor was thrown out of the corp of Lesbianists, after they heinously tortured her, and murdered her, and the Lesbianists have her slated, scheduled, after they find a way to abduct her, for feeding her to my abominant kids. Dennis Miller is not a Lesbianist. Though he was one, after torturing him, and sushi-izing him, please see my notes on that, the Lesbianist's sushi-izing of Dennis Miller eventually killed him.

It's hard to keep track of some people, as to whether or not they are currently Lesbianists. Others, are not so hard to keep track of, and I want all of those mentioned, killed, immediately.

On Praying, Fucking, Sucking And So Forth

You are rewarded for praying Nam Myeo Ho Ren Ge Kyeo. You are also rewarded for fucking, sucking, tounging, licking, fingering, dicking or massaging your dick against a woman's bun bun, or inside of her butt hole, where there are lots of sensitivities buttons that get her clicking and eroteming and orgasming, or against her titties to get her eroteming and orgasming, and so on, and for palming or massaging a pelvital button, or the love and joy stick, the dick, or a love button or love patch, igniter switch, or whatever nerve sending touch sensitive love joy button there is embedded into your body, in the pelvis, groin, vagina, and in the musculatures of the groin, pelvis, and vagina, with the palm of your hand, and so on. You also get rewarded for throating a woman with your dick, as there are lots of love buttons in her mouth, and throat, lips, and so forth. Men also have love buttons in their lips, throats, tounges, mouths, butthole, and on their body, and those buttons also get clicking, and turning on and off, and sending sensitivities messages or signals, nerve pulses, up the eroteming nerval system and up the orgasming nerval system. You get rewarded for dicking men and boys in the throats, and in the buttholes, and their bodies, just as you get rewarded for dicking women. There is no discrimination in this area, and every one is

equally rewarded for their meritorious acts of dicking others, women, girls, men, and boys.

Why are you rewarded for praying Nam Myo Ho Ren Ge Kyeo, and for dicking, fucking, and sucking, bumbeying, or moving your vaginal bumbey package against a woman's sexaling body parts to erotemize your self, and the woman, and for breasting your titties, i.e, rubbing your titties against or flopping them against and massaging them against a woman's butty butt or against her other sexaling body parts to get you and your friend sexually erogenized i.e., sexually stimulated, erotemized, and orgasming, and for other sexaling activities that help you and your friend and friends to produce purifying sexaling energies?

You are rewarded for your praying and for your fucking, sucking, dicking, and so forth, for helping to get every thing and every body going at the right pace in synch with every thing and every body else, for every body in my universe who is working for me, to keep them moving in harmony, perfectly meshed and in synch and in a timed persuasive mosture, with each other, so as to keep my universe standing up, strong, wholesome, robust, healthy, well, and fine. You are rewarded for praying as well as for sexaling, as you help move my children along as they do their work, as you pray and as you sexal and spray out energies from eroteming, from erotistically orgasming, and from sexually orgasmically convulsing, i.e., phlumetting, while you shatter out and spray out purifying energies in all directions, that will clearify and erase your karmic markups, and the karmic markups of others, all around you, for millions and more of miles, way out beyond where you are activiating and religialing, i.e., sexaling.

Your dicking, sucking, licking, titty massaging others, and so forth, will get wonderful and wholesome, GODLY, purifying energies shooting out of your bodies, and the energies shoot out at rates of speed that also help my universe to keep synchronized, and to move along at the right pace for it to be able to stand up and remain stable and solid, durile, strong, wholesome, pure, and a nice place to live in.

Every one who works for me, has a rate of speed they work at, a life pace, or life spin.

We all have a pace of life. In some cities, it is fast and hustling. In some places, it is slow and whimsical. My kids work according to a rate of speed that is metered, and they keeps every one moving as best as they can, according to this metered pace.

The metered synchronized pace that my children work at the rate of is one thirty seventh and one fifth, approximately, on the metronome.

If you help to push my kids along at that rate of speed, or a rate of speed that is close to it, as you pray at a metered synchronized pace and rate of speed, and as you fuck, suck, and so forth at a metered synchronized pace and rate of speed, then you are rewarded with angel

dusts, or purifying energies faerie dusts that my kids daub on your head, and throw buckets loads of over your head and body and that they wash your insides out with and that they wash your body, inside and outside, with as they shower them all over you on the outside of your body, and all around in your body on the inside of you, which then help to clean you up and clearify your karmic markups, cleanse your karma, and purify your life, making you a shining, radiant, pure and holy being, though you may not notice at first, as we are too filthy, karmically speaking, to notice the changes, as our karma is too thick and mucky to allow us to feel the changes that are taking place in our karma and life.

I have a gradient scale for how close you keep people moving, and at what rate of speed you help to push them along, and as you help to push my kids along, so that they can do their work, you are rewarded, in accordance with my gradient scale, with more angel dusts or purifying energies for better preformance, and with less angel dusts for poorer or less effective performance.

You have to do some thing that will help my kids move along at a metered pace, so that they can get their work done. Praying Nam Myeo Ho Ren Ge Kyeo sets off a time frame synch. A time frame synch is the metered click, click, click, of the metronome. This time frame synch or metered pace, that you achieve while praying, Nam Myeo Ho Ren Ge Kyeo, will help keep every one moving, at the right pace, if you pray it in a rythym and at a rate of speed that will synch up with a metronome at one thirty seventh and one fifth, approximately.

Your efforts to help keep my kids working and moving at a consistent rate of speed, will get rewarded, thus for praying, Nam Myeo Ho Ren Ge Kyeo, you are rewarded, with purifying energies, that my kids dump on you.

Your efforts for fucking, sucking, licking, tounging, titty whipping or banging your titty nipple against the vagina of a woman or girl, dicking, fingering, palming, and so forth, all get rewarded, if you try to keep every thing in synch with the metered pace of the metronome at one thirty seventh and one fifth, approximately.

The gradient scale also applies, of course, as you are fucking and sucking, etc., so the better the job you do of keeping your pace at one thirty seventh and one fifth, approximately, the higher your rewards will be. Your rewards are the same, more or less, for both praying and for fucking and sucking, and my kids sprinkle and dump angel dusts, purifying energies, on you as a reward. You also get markups that are meritorious, and you are rewarded with a better and happier life.

Further, when you are orgasming, and eroteming, or pushing out energies as you orgasm, and erotem, you will be pushing out energies that shoot out at consistent rates of speed. These rates of speeds of these energies are in concordance with our pace of life, they all

perfectly mesh with the paces of life that my kids keep. The energies as they pass out, and push along through time and space, at synched up and consistent rates of speeds, all help to keep my kids moving along as they do their work and tasks, and they all help to keep our universe, standing up, strong, healthy, wholesome, well, and fine.

Chaos breaks the legs off the foundation to our universe, and our universe begins to creak and moan, as it begins to crumble, slide, twist, and tumble downwardsly.

Making chaotic noises, and chaotic movements, detracts from the harmonics of our universe. Your breaking glasses, and breaking skulls, and legs, and arms, are also chaotic events producing, in most cases, and they will detract from the perfect synch up of our universe, as leg bones and arm bones, skulls, fingers and toes, begin to splinter, as you apply pressures to them, you get negative markups for your actions. A record is kept of every chaotic action you take, or make, and if you make enough chaos, in your lifetime, and in your following lifetimes, then you will suffer from your poor records of performance for keeping my universe standing up, wholesome, healthy, happy, and well.

Every scream you cause to be vocated or vocalized, is recorded, and the intensity of the scream, and yell, and crying out in pain, plus a lot of other factors involved, are all recorded by my kids, and you get negative marks for that kind of performance.

The love making oooohs, and aaaahhhs you cause to be vocated, are harmonic appeals of soothing restfullness to the spirit, and to the mind, are also graded, and you are graded on how well you can cause others to produce them, and your scores are kept, and if you are a lousy performer, with more negatives than positives, you'll end up with a lousy life, as a result, as you are rewarded in accordance for your positive performance, as well as for your negative performance.

Helping to keep all of my children working in harmony, and doing their jobs and tasks, at a metered pace, will be rewarded, not only with angel dusts, but also with a better life with more positive fortune, as you recieve positive points or merit points for your collaborating with my children, and working to support them, and more fun as your life becomes graced with more positive merits and as your rewards begin to pile up, and more good things begin to go on in your life.

If you sit on the side of your chair and have a pair of drum sticks, or are using a bongo drum, or calypso drum, with the long tube belly, or stack, a long barrel tubed drum, or if you sit at your drum set, or set up your electronic drum pads, and begin pounding away, in a syncopated manner, for your pleasure, just drumming away, with no notion in mind as to any thing other than achieving a nice rythym for you and your friends to listen to, if you happen to be with friends, your merit points will be near zero, and your efforts will not rate on my gradient scale, as your actions will not be in accordance with my

program for a better universe for all people, and for my kids to live and work in.

If, however, you have the attitude, "I wish to support John's kids, and syncopate myself while I'm drumming, so as to be supportive of John's kids, to help John's kids work in a syncopated manner, doing all I can to support John's kids", then, your merit points as you drum, will go sky high, through the roof, and you'll get meritorious benefits for your efforts, or merit points, and good marks, for your efforts. It's like helping kindly old women, who are frail and in need of a helping hand and support, cross the street. If you act in a kindly and charitable manner to help support those around you, you get meritorious points for your efforts. These efforts of your's, however kindly, regrettably, though they are kindly efforts, are not the kinds of efforts that we need, my kids and me, need to keep my universe standing up, and moveing strongly. For efforts that support my kids work environment, and that lend a hand to them to help them to get their work done, your meritorious efforts marks will go through the roof, and you'll be blessed with angel dusts, i.e., purifying energies that help to clean up your karma, and erase and clearify your karmic markups, or marks that record your bad and cruel, or negative actions towards others, and towards your self. You can kill your self, and cause grief to others, as a result of your departure, to my Epcot Center, and that rates negative marks and negative points markings or markups for you.

When you try to do any thing, that will help to syncopate my children, and to make my children's working environement more syncopated, and rythmical, with your concentrated mind, and determination to make that a reality, in other words, a prayerful attitude in mind, hoping to make John's children's working environments syncopated, and rythmical, and in rythym with every one elses', i.e., all of my other kids' syncopated working environements, then with that attitude of hopefulness, or a prayerful attitude, than, you are rewarded for your efforts, and determination, and as you drum away, or pound and beat on your calypso drum, or on your metal Bahamian or Tinian, or Haitian, or Jamaican, drums, or on your dresser drawers, if your mom does not mind, as you pound away, keeping your mind set on your determination to keep all of my kids working in unison with each other, and helping them to keep in syncopated harmony, all in perfect flux, and perfectly meshed in timing, with every one else, as they work for me, then your rewards and positive points markups, will be very high, and you'll be rewarded by my children, with angel dusts that they daub on your forehead, and dump all over you, from their barrels they carry full of angel dusts, or purifying energies to clearify your markups from your karmic markup piles, kept inside of your body, kept in storage in the molecules.

Your markups are inside the molecules inside your body, but they are also out side of your body, in every molecule, nearly, going way out to the very farthest edges of my universe.

We will eventually get to all of them, and purify or clearify and erase all of your karmic markups, the notations and records that my kids keep on you, and on your activities, and eventually, we'll get them all, and your life will then be full of grace and happiness. It will be a long time before we get to all of them, as you and I and every one in my universe, have been here, and enormous length of time.

As you drum, or skip, or dance, or do areobics, in syncopation, with the attitude that you want to keep all of John's kids in step, and in synch, and in unison and harmonicly meshed and in perfect flux with each other, or perfectly meshing with each other, and every one else who works for me, whether you drum, skip, dance, or do areobics, it does not matter, if your mind is set and determined to help my kids, with your efforts, you will be rewarded for your efforts, no matter whether you skip, jump rope, dance, or areobically excercise.

As you sexalate, if you keep in your mind that you wish to keep all of John's kids in syncopated harmony, perfectly in flux, and in unison, just as when you are drumming, or skipping rope, or dancing, or playing basketball, or playing tennis, or badminton, or any sport, with your movements all timed, and in perfect syncopation, when you sexal with the right attitude to keep John's kids in synch, perfectly meshed in perfect accordance and flux, with each other, and with every one else, you will be rewarded grandurally, that is, grandly, or in a grand or very great manner.

Excercising And Activiating To Music Timed To One Thirty Seventh On The Metronome

Music timed to one thirty seventh on the metronome, and one fifth, or as close to one thirty seventh on the metronome that you can get, is okay, and it will help you to dance, play tennis, play sports, do areobic excercises, and other types of activities, at that pace that we need to keep to help keep my kids working smoothly, and you'll be graded on your performance, and on your attitude while you are dancing, or excercising, and the more intently you concentrate and use your mental energies and mental control to stay in synch, and in step, the better will your scores be, and the higher your marks, and the greater your rewards of purifying angel dusts and purifying energies that my working and unionized kids will pour and spread all about you, inside and out, and all over you.

Sexaling itself is a religious act. Yes. That's true. But, if you sexalate with this powerful prayerful attitude, or hope in mind, with your determined mind, and your concentrated mind, as you sexalate, and help others to sexalate, and help others to erotem, orgasm, phlumett, and shatter off wonderful energies from orgasming, eroteming, and phlumetting, your positive points and merit marks, and many other types of scores my kids keep on your efforts and behavior, all of them will go higher than any one can see, way out beyond the furthest galaxy that you can possibly see from your bedroom window, with your telescope. They'll go out to the futhest edges of my current univerese, and even beyond the barrier walls, holding up our universe,

that my kids put in, to keep our universe standing up, stable, strong, and durile or durable and with tensile integrity.

Any action for helping my kids do their work, syncopated, and in unison, and in harmony, will be rewarded, with angel dusts, and with positive marks and score points in your records that we keep on you and every one else in my universe.

Your sexaling actions get rewarded, far more than any other activityating, as your sexaling actions are the most needed actions, to keep my universe, pure, durile, holy, sacred, free from negativities, healthy, wholesome, stable, and constantly in a state of improvementing.

Most people go around destroying things, and causing chaos. We, my kids and I, need people who are going to help improve the wonderfulness of our, my, yours, my kids, and all of my other kids, wether they work for me, or not, meaning, all of my guppies, who are like you, my relatively normal kids, as well as all of my abnormal kids, the abominants kids I've got, that go around thinking it is funny to eat people, and to pull them into their mouths, and crush them in miserable pain and agony, like my elephants abominants kids do to relatively normal human beings kids of mine.

Fisting And Punching People With Your Clenched Hands And Crasping Or Clasped Knuckles

You all have been bad kids, all of my guppies, all of you who do not work for me and go around thinking, 'Oh, gee. Aren't I special.' My guppies are these minded people, who are arrogant, who talk back to their mama's and to their papa's, and to their relatives, and brothers and sisters, and to their friends in school, and to their teachers. Later in life, they become worse, and they talk back with their actions of being mean to each other. As my guppies grow older, and become older people, they start fisting others, and that means, punching people, hitting them with their clenched fists and hard knuckles, and hurting them when they pound on their face, or on their stomach, or on their body some where, and break bones, and tear muscles, and stretch ligaments with their pounding each other.

Phlooching Out And Fisting The Vaginal Cavity, Rectal Cavity, And Mouthal Cavity

Fisting is a word used by some people to mean, to insert your hand into the vagina of a woman, and gay people, homosexually driven people, fist each other in the butt hole, if either men or women, or in the vagina, if women.

Some people find it interesting to fist each other in the mouth, by sticking their fist inside the mouth of a person, pretending it is a dick or a dildoe.

You need to phlooch out the neck muscles, and billow them up, or poof them up and out, and that will help them to gently relax, and then become expandable or stretchable, as when they relax, they will easily stretcth out, and there will be some give, or freedom of expandingness. The neck muscles then become easy to stretch and push on from the inside with out hurting the person. It then is easy to insert your fist into the throat, to massage the inside of the throat, and to use your hand, or fist, to tickle the igniters, and triggers that set off love buttons and bells, and whistles, that help women and men to erotem, orgasm, and phlumett.

Fisting by inserting your fist into the vagina of a woman, when it is relaxed, and after you've massaged if for many hours, and after it begins to billow out, or poof out, and then open wide, and then you can see inside of it, and from the entrance of the vagina, there is a clear gaping cavity, you can then insert your clenched fist hand into, to massage the inside of the vaginal cavity. Doing this is very nice, and is very exciting to do, to help women and girls to erotem, orgasm, and phlumett. You can phlooch out the butt hole, by massaging it, for several hours, and it will begin to poof out, and expand, and you'll see a nanny gate face on it, and that means, it will begin to look a little bit like a vulva, or the vagina of a woman or girl when at rest, or exposed between a woman's or girl's legs as she is sitting or relaxed with no panties on or with no or few clothes on and nothing covering her hips, pelvis, lower pelvis, pelvital ridge, crotch and groin, butt and butthole and lower back, there by exposing her butt and vagina. If you compare a vagina with a phlooched out butthole, you will see they resemble each other, slightly. There is no vaginal cleavage of course, around the butthole, but there is a slight resemblence between a phlooched out butt hole, and a vagina, or vulva, none the less.

The Vagina And Vulva Compared To The 'Nanny Gated' Butthole

What is the difference between a vagina and a vulva? They are more or less the same, but the vagina includes lots of parts, inside as well as out side. The vulva is outside, basically, only, as far as I understand and remember these things, now.

When you massage a butthole, long enough, it will begin to look like a vulva, or vaginal face. That's called the nanny gate, or on the male, the male butthole vagina, as I've spoken about it, before. On the woman, it is the female butthole vagina, a double 'immitation vagina' for the real one, as I've mentioned. Men's and women's buttholes are the same, and they both look like 'immitation vaginas' as I've also mentioned, after you phlooch out the butt hole of either the female or of the male.

Once you phlooch out the butthole of a man or of a woman, it will poof out, and expand, and the butthole entrance and cavity will become relaxed, and easy to insert your clenched fist into, to then push up your fist into the butthole cavity, and massage it, once the person has cleaned out the butt hole cavity and once it is clear and free

from debris matter, or food matter, and rotting food particles, and fleshy foods, or hamburger meat and so on. Phlooching out the vaginal caivity takes a little longer, but with patience, you can phlooch it out, and then fist, in this manner. If you phlooch out the butt hole, and rectal cavity, you can fist your male friends, and your female friends, and every one, once they have cleaned out their poop hole, and made it free from rotting debris, will enjoy mutual, and reciprocal, fisting.

Fisting in this way, for sexaling, is alright. Fisting in the other way, for beating people up, is not nice, and you are given poor marks for your actions of nautyness, meaness, and cruelty towards others.

Over the long course of time, you all have been naughty at one time or another. I have many ways to fix you, and to retrain you, and to rehabilitate you, but you always go bad, and sour, again, as that is your main drive, or driving internal force in your lives.

The Importance Of Kindlyness And Teamwork

Why have all of my guppie kids all gone south, or in other words, gone down the road towards unkindlyness? Because, as I've explained, you forgot what the Love Of GOD is. My religion will help people to understand what the Love Of GOD is, and that will help keep them on the correct path of kindly actions towards others, and it will help them to understand and remember that teamwork to help my working, unionized kids to keep our universe healthy, strong, durile, standing up, stable, a safe and happy place to live, and a wonderful place to live, is very important.

Anyway, doing things that support my kids working efforts, will be rewarded, and doing things that detract from the harmony and syncopation of the metered pace of my kids who are working, and that slows them down, and that causes dischordance, will not be favorably rewarded, and you'll become a female schmuck, or a male schmuck over the length of time, as you live on in my universe. A schmuck is an unlikeable person.

Sexaling is the most important thing there is for us to do, other than feeding ourselves correctly to keep us healthy, and excercising, and leading a balanced, well regulated life, listening to your mama and to your papa.

My religion is based on sexaling, as sexaling is the most holy and pure activity we can participate in, or do by ourselves.

All the bullshit propaganda of the Lesbianists, that Jesus said this, and that Buddha said this, and that God will save you if you do this, and so forth, is pure balooney, bullshit, and made up nonsense.

I will not do any thing for any body, unless you help me and my children to make this universe, a more kindly, and a more wonderful and prosperous universe for all of us. If you do, I will have my kids,

bless you with angle dusts as they daub them on your forehead, and then pour barrels of angel dusts over you, as they dump barrels full over your head and body, for your extra good work, sexaling, in syncopation, with my kids working rythyms, and in rythym with their syncopations, flux, and their phenomenal elegance.

Phenomenal Elegance

What is phenomenal elegance? It is their keeping harmony with each other as they work and keep every thing in order, in my universe for me, GOD.

You can not escape from this reality of your good actions and your bad actions being recorded, as my kids keep records on every one, and we make certain every one is rewarded for their good actions, and we make certain that every one recieves as close to what they deserve, to help balance things out, in accordance with their markups, for their bad actions. If they are bad, they will not meet nice people, and they will meet naughty people, and not so nice things may begin to happen between them. If they are good, and if they try to help my kids, as I've explained about, they will get rewarded, and they will slowly begin to break away from keeping company with bad people, and they will gradually ascend to higher rankings or status, and then they will begin to lead a better life, and they will begin to escape from meeting with bad people, and the good kids' lives will become blessed by my kids, as my kids begin to sprinkle angel dusts on the good kids, and daub the heads of the good kids with purifying energies, and then dump purifying energies all over the bodies of the good kids who listen to their mama's and papa's, and sexal with them, and as they sexal with their mama's and papa's, and sisters and brothers, relatives, neighbors, and others, the good kids help my kids keep this universe running smoothly, in harmony, in flux, perfectly meshed, and in perfect syncopation.

Mama's, papa's, sisters, brothers, relatives, neighbors, and others, all get their heads blessed with angel dusts, purifying energies, for their good actions along with the good kids, you, I hope, of course, too.

Plurlbalescent / Plurablescent Nature Of Negative Punishments And Positive Rewards

This is very important for every body to understand. I have my working, unionized kids reward the good people, and I have my working, unionized kids keep records on every action of every one of you, and I have my kids make sure the bad kids, meet with what they deserve, or some thing close to it, which may not be too nice, most of the time, and I have my kids make sure that the good kids, all meet with what they deserve, or something close to it, and that is usually always something nice. It may sometimes not be something conspicuously nice, but it is nice, usually, or positive in nature, always. The bad kids will get rewarded by something that is negative in nature, always,

usually, or plurlbalescent. What does plurlbalescent mean? It means, it might not be noticably negative, but it is still negative, in nature, in essence. This is a topic we can discuss, another time, or you can ask my kids for more information on it, when you go in and visit them, with your mama's and papa's, sisters and brothers, relatives, school teachers, principal, costodians, janitors, school workers, and others.

We have had too much chaos of late, and for quite some time, and it is now time to slow it, and bring it to a halt. We are going to produce positive harmonic concordances that will assist my kids as they work, and that will help them to stay working in harmony with each other, with your fucking, sucking, eroteming, orgasming, your shooting out of purifying energies as you orgasm, and erotem, and with the increase of the oooohs, and aaaahs, you help to produce, with your practice of my religion.

We have to bring an end to the moronic violence of the Lesbianists. If that requires a lot of my children, making lots of babies, and lots of energies, and percussive forces, when you set off a fracturable rock bomb, then that is what it will take, as you blow Washington DC and the Baltimore metro area off its ocean ledge, and into the Atlantic, with that fracturable rock bomb, if it is big enough.

Yes, there will be lots of painful, ouches, and screams, and so forth, but it is trite, compared to the violence these idiots have been perpetrating, over the long span of time that they have been in my universe.

We have been here for a very long time. It is nearly impossible to figure out how long, other than with mathmatical computations. Our brains will burn out, if we try to figure it out in our heads.

It does not matter how long we have been here. It does matter what we do while we are here. You are not going any where else, and you are all staying in my universe, so you will all drop your pants, and your dresses, remove your shoes, socks, clothes, underwares, panty hosees, and panties, disrobe, and begin helping others to make lots of ooohs, and aaaahs, and lots of eroteming and orgasming energies. That will be the begining of your getting into line with the rest of us, here in my universe, my kids who work for me.

As you eroto with each other, you'll get graded on your performance, and you'll get paid by my kids, once you join our country, as I've explained about, before.

Timed Persuasive Mosture

What is a timed persuasive mosture? It is just keeping every body in synch with each other, persuasively and accurately moving along, orderly, in an ordered fashion or manner, and with every body in rythm and syncopated with each other.

Mosture is a type of motus, or motion or fluidity of movement. The timed fluidity or fluidness of my kids working along in synch with each other, is critical to having every thing in my universe, standing up and sturdy, with every thing holding together, as it should be.

Otherwise, if my kids and their work get out of synch, things can come crashing down, and things can come falling apart, and we do not want that.

This is a big universe, and we have a lot of people in it, my kids, and you wouldn't believe how many kids I have. Anyway, they all have to stay in syncopated, fluid motion, with their paces of life perfectly meshing with each other's paces of life, to accomplish their jobs and tasks, in an orderly, and in a fluid movement, harmoniously, and without delays.

The persuasiveness is accomplished with the help of your sexaling, and by your keeping pace, and synching your sexaling activities, and the movements involved in your sexaling activities, and by your spraying out your energies, as you erotem, orgasm, and phlumett.

The persuasiveness is also accomplished by your keeping pace in unison with others while you are praying the syncopated phrase, Nam Myeo Ho Ren Ge Kyeo.

Every thing is timed, and so as you activiate, or carry out these activities of sexaling, eroteming, orgasming, phlumetting, as well as the movements involved in sexaling, and as you pray, your synching of your movements and sounds in time and in pace with the syncopated and metered metronome click, click, click, at the timed pace of one thirty seventh and one fifth, on the metronome, approximately, helps to persuasively move, or persuasively drive and push, every body about, and along, as they do their work for me, in their many syncopated paces of life, or life spins.

I have many children working at different life spins, as I've mentioned before, and each group of them has a different pace of life, or time spin. Your activiating, as explained, helps drive them along, each at their own pace of life, or time spin, perfectly meshed with every other child of mine, also in his or her, and at his or her own particular time rate of speed, time spin, life spin, or, pace of life.

Every one and every thing must move along in perfect flux, or perfectly meshed with every body, and with every thing that is going on in my universe.

You are rewarded for your helping to move my kids along, in perfect flux perfectly meshing with every one and with every thing that is going on in my universe, with your efforts at sexaling, and with your praying, as explained, earlier.

In our new society, which we will create, you will score earning points, and every thing you do, as you sexal, and so forth, and as you pray, is scored, and a record of your capabilities, or excellence, or

lack of excellence, is kept. You are paid according to your work performance, as you sexal, activiate, pray, erotem, orgasm, and phlumett. Also, you are graded on how well you get along with others, and on how well you try to harmonize and then sexalate with others. You score earning points, accordingly, and you get paid, according to how well you perform.

Keeping Every Thing And Everybody In Harmony And In Synch

Explaining how this works, how praying, fucking, sucking, dicking and hugging, etc., helps keep every thing in synch and in harmony and how your efforts are rewarded, is a tiny bit more complicated than my simple explanation, but that is it in a peanut shell.

Now. For those Lesbianists hiding among you who do not wish to surrender, you Lesbianists will find we are not going to be acting kindly towards you.

All of you Lesbianists, where ever you are in Washington DC, or hiding underground, or in Paris, or in Rome, Peking, and so forth, you will be dealt with harshly, as we need to put a stop to your activities, and a "maybe" is not acceptable in this case.

We are not going to allow you to continue your chaotic, nonsensical, violent activities one moment longer, and we will blow you up flying high up into the sky, and off the ocean ledge down below you, in Washington DC, as we sink your Washington DC area into the ocean, along with all of Northern Virginia, and the ocean coastal area of Maryland and Baltimore, along with large parts of the states of Virginia and Maryland, out to West Virginia, as that area settles down into and below the waves of the Atlantic Ocean, after we bomb it with one or more of my fracturable rocks weapons for mass removal of Lesbianists from the face of the earth and from their hiding places under the surface of the earth.

The Lesbianists in the Washington metro area and hiding under it, had all better surrender to my kids, or they will all get their pants and clothes blown off and shredded from their bodies, if they do not, as they are given a free ride out and up into the upper atmospheres of our planet, and then, beyond. All other Lesbianists had better surrender, too, or they risk getting a free ride out, as well.

Deep Sea Ocean Trench Off The East Coast Of The United States

There is a trench that extends south wards from Washington DC, some times reaching 25 miles out in some places, and in other places, it reaches out to eight hundred miles from the shore. In the north, it reaches out in some places, 85 miles out to one hundred and twenty five miles out, to three hundred and fifty five miles out, to eight hundred miles out in some places, in the south.

It is fifteen miles deep when you go out forty five miles off the coast from Washington DC and from the Chesapeak Bay. The ledge bottom

is found about three and one half miles down, and the mouth of the opening continues for ten miles, approximately, downwardsly, on the western side of the trench.

The It has a gaping mouth, and it opens up and lets ocean water inland, under the continent, eighty five miles down below Washinton DC, three to six to eight miles wide, from top to bottom, from the underside of the top of the mouth, the bottom of the ledge, to the bottom of the mouth.

>From under the nation's capital, to the south, it travels to over eight hundred and eighty five miles. To the north, it travels three hundred and thirty five miles, to six hundred and fifty miles, to about nine hundred and fifty nine miles, inland under the continent, depending on where you wish to locate the edge of it under the continent, northwardsly.

It travels to the west, inland, three hundred and thirty five miles, to just over eight hundred miles, depending on where you find the edge of it. It travels inland further westardsly, the further you travel north. It is slightly over one thousand and eight hundred miles from north to south, in total, as you'll discover, once you explode enough, and after you explode large enough fracturable rock bombs, over Northern Virginia, Maryland, Washington DC, Baltimore, covering the metro area vicinity.

The U.S. Navy, and the U.S. Coastguard know about the trench, or parts of it. They are not allowed to discuss it with anyone. No one is allowed out there, to research it as it is off limits to just about every one. Some navy personel of high rank, and coast guard personel of high rank, are allowed out to take soundings, every now and then, with their Lesbianists' staff members, and Lesbianists' personel in the Navy, and in the Coast Guard.

The Soviets, at least, Boris Yeltzin, Vladmir Putin, Mikhael Gorbachev, and Zelda Gorbachev, know about it, and so do all the other Lesbianists. They can confirm it, if they wish to play ball with me, and if they wish to save their asses, after they decide to surrender to my children.

The Shelfs Systems And Trenches Systems

The shelf estends to under Lexington Kentucky, at about ten miles below it. It is five miles up under Chatanooga Kentucky. It is five miles below Washington D.C., in some areas. It is three miles below Baltimore Maryland, in some parts of the city. It is eight miles up below Pittsburg, Pennsylvania. It is fifty five miles up below, or under, West Chesterfield, New York. It comes up to eighteen to thirty miles below McLean Virgina. It is eighty eight miles below Norfolk, and the mouth, downwardsly, is five to ten to fifteen miles wide open, in a downwardsly direction.

It some areas, it can be found below Ohio, and under Indiana. It crosses under the West of Kentucky, and into the south of Illinoise, five to ten, to thirty miles. It is a variegated trench system.

It extends to Tennissee, parts of North Carolina, Mississippi, Alabama, Georgia, South Carolina, and to under parts of Northern and Western Florida, and is open out and into the Gulf of Mexico.

The whole area of Eastern U.S.A., is sitting on an open shelf, trench system, and there is water passing below it, and out into the gulf, in several areas, over to eighty five miles west of Corpus Cristi, Glen Garden, population eight hundred and fifty, which south of Galveston, and north of Corpus Cristi, between the two cities. There is a mouth eigty five miles south of Tampa Bay, Florida, in the Gulf of Mexico. There are several openings or mouths to the underground fault line system, and deep sea ocean trench system, and shelfs systems, and water is passing from the Atlantic to the Gulf of Mexico.

There is also a trench system in the north, under Niagra, that extends southwards, several hundred miles, and it has many branches to it, and it extends into this system of shelfs, trenches, and under continental water flows.

Side Bender Currents

What is a side bender? It is a current comeing out of the mouth of an opening, from under a continental shelf system, that allows waters to flow out. As the water flows out of the mouth, the outlet current of water, it flows very forcefully in an outwardsly direction, and it pushes the water out with great force, generally. If a submarine is traveling in the vicinity of a side bender, the submarine may get hit broadside, and that will often turn the submarine topsy turvy, and around facing the opposite direction it was traveling in, or another direction, not the one it was traveling in, most often. The crew will get swung about inside the submarine, and they will fly through the cabin, and pounce off the floor to the ceiling, and hit the ceiling, and then hit the sides of the corridor they were walking along in, and finally end up on the floor when the submarine rights itself, with its balast, and you'll get many sprained or stretched ligaments, and broken bones, arms, wrists, fingers, legs, knees, ankles, feet, toes, necks, backs, hips, spinal injuries, and other injuries.

It can leave a crew of a submarine nearly one hundred percent, injured and in a ship's hospital, or a Navy or military hospital for recovery. Side benders are often called upwellings of currents by the Navy, but that is not generally the case as they are not upwellings, but they are side pushing currents, that come flowing out from under continental water flow openings, horizontally.

There may be some upwards lift involved, if there is a reason, such as a mouth is angled at a slight sloping angle, as it releases the flowing waters out from its tube like cavity or hole.

Crew members and military passengers of Naval submarine vessels are generally told not to talk or discuss any thing about side benders with non Navy persons, and with persons unrelated to their ship or unrelated to their ships voyage, as the governments of the world, do not want any one to find out about side benders, and they do not want people, geologists, marine geologists, undersea deep sea ocean studies researchers, or others, to research and investigate side benders. It's a big secret, these side benders, and that's what the marines, and the navy personel are sworn to keep, or face a fireing squad, on insubordination, or on some trumped up charge of spreading naval secrets, acting as a foreign spy and receiving money, or something like that.

Naval personel will generally obey orders, and not discuss side benders, or other 'secret' information, with any one, as they risk losing their job, and they might face a fireing squad, or a hanging patrol, sometimes called a marching platoon, or a hanging platoon, a group of soldiers commissioned to carry out orders to hang some one who is in the military.

If you pay a naval officer or enlisted person, or other person with Naval submarine duty, such as some marines, and others, enough money, they may be willing to share some information on side benders, and information about what they know about side benders. Some persons who have had Naval submarine duty, may genuinely not know any thing, such as crew members who are never assigned to submarines that travel near side benders, on a regular basis.

Some times family members of enlisted persons and of Naval officers, are allowed to travel on submarines, for fun and excitement, as a special reward for their papa's or mama's duty on a submarine. Some of these family members have also had some experience with side benders, such as those who have traveled on submarines along the Marianna's trench, or other trenches, not listed, neccessarily on global maps, but none the less, which are there, and that are near shelfs systems under sunken continental shelfs, or under sunken continents, but that eject streams of water, nonetheless.

Our maps and globes of the world are incorrect, the ones we buy through bookstores, or from map publishers, as nothing that would indicate sunken continents, large sunken islands, and related trenches, or other related features, are not going to be indicated on them.

The Lesbianists do not want you to find out information that could provoke you into researching, under water features, that they do not want you to know about, as your fictious understanding they have taught you, of the surface of this planet, and its history, is bogus, and any thing that would conflict with that, is certainly not going to be indicated on a map they would publish, and the map will be wiped clean of all traces of any thing that conflicts with the 'global' history of the earth, as the Lesbianists teach it, in geology courses for high school students, and below, and above.

The global geological history they teach must coincide with their fictious propaganda about Adam and Eve, and "Lucy" the ape woman, the supposed mother of all people living on this planet, and about this earth being only 9 billion years old, or thereabouts, which is a bold faced lie, and other such bullshit notions they have fed every one to swallow, and have forced them to accept, and that they force people to use as primal notions to base scientific research on.

The geology of our planet is much more complex than the Lesbianists are letting on to, and there is much to learn about planetary geology, as these planets have been around a very long time, and many things have happened, over and over again to them, and many things have happened to our 'solar systems', and star formations, and star systems, that people need to know more about, to get a realisitic understanding of our universe, its history, and its many complexities.

In time, we will learn much more about all these things, and you can attend courses that my children have set up for every one, to teach people about our universe. You need a day pass to visit, as I've explained about, before, and then you should swear in, and become a citizen of our country. We have yet to declare this planet ours, but in time, we will, once we have finished and put an end to the problems associated with the Lesbianists, all of their shenanigans, and their malarkying around. One day we will declare this planet ours, and my kids will take charge of everything, and they will appoint people to posts of duty, and to positions of responsibilities.

Making A Large Swimming Pool

People should begin moving off and out of the area, around the Nation's capital, Virginia, Maryland, Pennsylvania, West Virginia, and North Carolina. We'll have a big swimming pool there, with lots of, mostly uninhabited, tiny islets, or hill tops and mountain tops, after all of the current residents die, and pass on and transel over to my Epcot Center, after one of our compatriots, or groups of them, detonate enough of my fracturable rock bombs. People will have to watch out for hungry sharks, after they swim inland, above the sunken landscape, looking for corpses to eat, and to scavenge, as lots of Lesbianists' corpses will come floating up from underground hangouts and cities of the Lesbianists, under those parts of the U.S., and from under the Gulf of Mexico, from under the sea floors of the Atlantic, from under the Niagra trench systems, and from under other trench systems in the Eastern U.S. This is not a joke, by the way.

Stagnasis

Salts kiddies in stagnasis is when they are in the salts kiddies are in their salts crystals cages, in a hibernative state, in perfect equilibrium, to keep them alive and well, for as long as possible.

Black Powder 'String' Fuses

Take a spool of sewing thread, and use Elmer's glue to coat the string, and run the string with a thin layer of Elmer's glue coated on

it, through a bucket of black powder gun powder, which you can order in the mail, over the internet, or pick up at an antique musket or old style 'cap and ball' musket rifles and pistols retail stores.

Elmer's glue and gunpowder will combine to form a minor plastiques explosive, after the salts kiddies mix it up, eat each other up, pee and poop out lots of stuff that is highly explosive, as they get busy making babies, except when gunpowder is used in large quantities with Elmer's glue, to form a major plastiques explosive. Benzine will help this along, with diesel fuels, as well, and with chlorine, we can see some major plastiques explosives in the making, as mama's and papa's begin making lots of children, as they begin mixing it up, and as they all begin pooping and peeing out body fluids that is food for others, that will contribute to the powerfulness and explosiveness of the mixture.

After you make your string fuse, and let it dry out for a couple of weeks, then coat a rag or muslim cloth in oil, or grease, or a mixture of turpentine, gasoline, diesel fuel, and grease, with benzine, and make a paste, and use that paste to coat a thin cloth, such as a muslim cloth, and then let that set and dry for a few days, and then wrap a few sets of 'string fuses' together in a bundle, and place them inside the cloth. It will become a very powerful explosive, in itself, the more gun powder you use with it.

Test it, to see how fast it burns once it is wrapped in a cloth coated with a mixture of grease and fuels.

The thicker the grease, the slower it will burn. The thinner the grease mixture, by adding more turpentine, or benzine, or paint thinner, the more rapidly the fuse will burn.

You will have a very powerful explosives cocktail, with this mixture, so be careful.

You have to be very careful with what you combine, as you'll be bringing together very explosive elements, when you mix these fuels and liquids together with gun powder on a string.

A few string fuses, wrapped in a well soaked cloth, with a mixture of these liquids and the axel grease, will make a type of plastique explosive, that can be used as a shape charge, or a mouldable, or shapeable, explosive, that is good for blowing doors off hinges, such as at pharmacies, or banks, and for blowing locks on private homes' fences to pieces, such as can be found at the White House, at 1600 Pennsylvania Ave. Washington, D.C., at the entrances and exits gates of the White House where guards are on constant duty patroling the area for security purposes. An initial explosive, a detonated fracturable rocks bomb, small in size, may cause a concusive force to cause the guards to black out, and pass out, and then sleep for a while. Be very careful with the size of the bomb, as we do not want to level the homes and buildings surrounding the White House, or across

from it in Layfayette Park. After you put them to sleep, with your initial blast, you can test the shape charge on the nearby fences, at the White House.

Black Powder 'Cap And Ball' Pistols

Most black powder cap and ball pistols and rifles, muskets, sellers and retail outlets can be found on the internet, and some gun shops carry black powder, as well as the detonating fireing caps, for black powder rifles, and pistols.

Many of them do, and you can purchase the black powder and copper detonating, ignition caps, for useing in your cap and ball pistol, or musket, or other, more modern, hunting rifle, that allows you to use black powder, and detonating copper caps that slip on a small round fireing ignition nipple that is made out of steel, and has a hole in it, to allow the percussive explosives in the firing copper igniting cap to ignite on impact with the hammer on the weapon, when it slams down on it, and the flames from the igniting explosives mixture, glued to the inside of the firing copper cap, then ignite the black powder, that was rammed down the barrel, or packed and tamped down in a cylinder of a percusive black powder cap and ball pistol.

The caps are fairly useless, unless you wish to add them to a fuel oils, chlorine formula, and let them sit in the fuel oils mixture, and that will help develop plastique, as well.

Higher Temperatures Develop More Useful Energies For Making Babies

The copper in the cap will also allow for a higher temperature in burning, when the fuels mixture ferments after a few weeks. Magnesium in the cap as well, will also help to raise the burning temperature of the fuels mixture, and with some black powder added, and with some chlorine added, your plastiques recipe will become even more useful. These higher temperatures will help to produce energies that will be conducive to baby making among the fracturable, or rupturable, and percussive, rocks radiological salts kiddies.

You can then add a handful or more of powderized amethysts, or turquoise, that you can purchase in bulk, on Ebay, for some small bulk quantities, and also emeralds are useful, as they all have fracturable rocks kiddies embedded in them, and fast asleep, in stagnasis.

Zircon Diamonds, And Other "Radio Active" Gem Stones, Etc.

Zirconium is a mineral that they use for the fake diamonds they sell with the trade name, Zircon diamonds, or Zirconium diamonds. You can powderize them, and use them for a good amount of fracturable rocks explosives, large and fast family making, salts kiddies, for a 'nuclear' party, and a send off to the eastern coast of the United States, before it is blown off the coastal ledge it sits upon, and then sinks below the ocean waves, if you strike it hard enough, with one or more of my fracturable rocks babies making, "nuclear" salts

kiddies bombs.

You'll need a few handfuls of Zicon diamonds, powderized, to make a nice fracturable rocks, babies making bomb.

You can mix turquoise, emeralds that are mined and sold in bulk quantities on Ebay, amethyst, and the other rocks that I've mentioned, along with powderized 'sand' from the beach. Argentina, and Venezuela, Baha, and Southern California are good places to collect useful sands, full of fracturable rocks, salts kiddies, that a geiger counter will detect, if it is a sensitive enough geiger counter.

Geiger Counters And Their Usefulness

They are not too hard to build, but you will have to look in your Popular Mechanics magazines, for the details on how to build a "geiger counter". Some mining stores, and mining outfitters stores, may be a useful places to order or purchase a geiger counter, if you are on a family budget. You might find one on the cheap, on Ebay, that is still useable.

There are some kits available, if you look hard enough, to use to build your own geiger counter. A mining outfitters store, in South America, or in Central America, or in Utah, or in Nevada, may be able to help you locate a kit, to put together, if you go in there, and pretend you want to go out and look for interesting rocks, and you need some information on where to look for interesting rocks, so go to a mining outfitters store, or to a rock hounding club, or rock hounding retail store, for looking at beautiful stones that rock collectors, or rock hounds, have found, and made available at the store. Usually the store owner will have his or her suppliers, on name cards, and you can get in touch with them to get more information on where to look for interesting rocks to test with your geiger counter, since you are facinated by radioactive elements in rocks, and you are interested in finding some, for a collection you wish to start.

You might want to pick up some primer books, on minerals and rocks, gems, and gemstones, from Amazon online, or from a local book store, such as Barnes and Nobel book store, which has a few useful books on rocks, mineral rocks, gems, and gemstones, that you can find when you are out rock hounding.

Desert Outfitters in Las Vegas, a miner's outfitters store, that also provides useful tools to rock collectors, such as rock hammers, and hand held pick hammers, for chipping away at rocks, to see what is under the surface of the rock, or under the peel of it, the outer layer, as well as terrain maps, and outfitting supplies, tents, and sleeping bags, and so forth, has these types of books, and lots of maps, and maybe they can help you find useful kits to purchase, to build yourself a geiger counter. They also sell geiger counters for about three hundred and fifty dollars or so.

Sears used to sell Geiger Counters, and they still can order them for you, I think, through their catalogs. On Ebay, you can find many reasonably priced Geiger Counters. How well the geiger counters work, the ones people sell on Ebay, I can't say, so you'll have to talk with sellers, and see what they say about the geiger counters they are selling to others on Ebay, or read about them in old copies of popular mechanics, and in trade publications for the mining industry.

Novice And Amateur 'Rock Hounding' Rock Collectors Clubs

On Sahara, east of Las Vegas Boulevard, there is a rock shop, which is about two and one half, or so, blocks down from the intersection, on the north side of the street, and they have information, as well as lots of primer books, on rocks, and on geiger counters, and where you can find them. They are well connected to the local rock and gem, minerals and gems finding, or rock hounding clubs. You can meet their members, and go out with them, on excursions, as they know where to find just about anything.

There are similar clubs in every major city, and in lots of smaller cities. Mining towns of course have lots of mining outfitters stores, and they probably have geiger counters for sale, so you can use it to find some very nice, fracturable rocks, along coastlines, or in ancient dry lakes and seas, sediments filled, rock hounding areas.

Decontaminating Your Self With Ocean Salts

Acidic ocean salts in ocean water will help eat up the radiological kiddies that find their way into your bodies, and that make you feel ill. It might take several weeks for initial recovery, with you taking large amounts, several teaspoons or more, as much as you can handle, in your diet, every day, for up to three to eight years, to thirteen years, for severe contamination, and for full recovery.

Other things, such as nutmeg, and oregano, in a salty tea brew, will also help you, and marijuana in the salty tea brew, will further help you. Berries can also be of great benefit for recovery from radiological salts kiddies contamination.

My kids have a recovery kit, that will help you recover from an overdose of radiological salts kiddies, after a major birthing event, and that kit will help you fully recover. You need to join our country, and swear in, and become a citizen, to be given one of these kits to help you for your recovery. They can provide you with information, of various kinds, once you swear in. They have you swear in as full time citizens, now, except in special cases.

Ancient Dry Lakes

There are many ancient dry lakes, up north, in the colder areas, of Manitoba, and around the edges of wet lakes, you'll find areas that dried out, a long time ago, and you'll find interesting things in the sediments deposits under the surface soils of the earth, that have covered most areas, and that come in to our atmosphere, and then

deposit themselves onto the surface of our planet, as they are blown in on the solar winds. A few feet of top soil may cover the dry lake areas, around the edges of these lakes, and the soils depths may reach to twelve feet, to fifty feet, to sixty or to eighty of more feet, in some areas.

Once you hit the sediments layers, around the edges of these lakes, outwards to eight to fifteen miles, to thirty miles or further, out to up to eight hundred miles, as in the case of Lake Erie, and that lakes region, the Great Lakes, that all use to be one large salt water sea, but is now, a fresh water set of lakes, you can begin looking for the radiological bullets of the previous catastrophes in my universe, that shot out radiological salts kiddies, into the sediments rocks of mineral stones, and sand. Gravels might contain some "radioactive" fracturable rocks, and you can tell which are the useful ones, with a geiger counter.

There are still salt water lakes up in Manitoba, Lake Huron, and some others, that used to be part of Lake Erie, and all part of the Great Lakes, when they were a large, salt water sea, but which are now, no longer part of that lake region system of lakes, as fresh water now fills up the Great Lakes from under ground water systems of fresh water flows.

Hydrolific Pressures From Water Falls

Hydrolific pressures, from water falls, primarily, help to erode and carve out and build the under continent open areas of water flows, that flow under the continents, and that dump their waters by traveling underground, in culvers, and channels, and in trenches systems, and then flowing out and into the oceans, resulting in side benders currents and flows.

Underground Lakes

Hydraulisis is one type of water pressures. Hydrolific pressures are those pressures created by water beating down, steadily, as water falls from higher to lower places, creating underground holes, and large open underground cavities, and water holding vessels, aquafirs, and underground lakes in the underground rock layers. Lots of cities sit on top of such underground lakes, on the crust of the surface of the earth, or very near to them. The lakes are often ovular and rounded in shape, from top to bottom.

Many former water falls, are now low lying, and flat, and there is no water fall on the river, except for minor, cascades, such as found in the Grand Canyon Rift Valley down the Colorado River, and out into the Baha area.

Baha Mexico

Baha is a good place to go looking for interesting, "radio active", or radiological rocks, fracturable rocks with radiological salts kiddies

sleeping soundly, embedded into other rocks, after colliding with them, in a hail of radiological rocks bullets, after a planet or a galaxy, or a large nebular star system, or a cluster of them, were detonated, by some fool with a huge and powerful, home made bomb. This happened, often, in the past, and still, today, it happens, now and then.

Bits and pieces of the radiological rocks will come flying in, and then embed themselves into other rocks, as I've explained about, before. We've had so many catastrophes in my universe, that our ancient rocks, are peppered with radiological rocks that are embedded in them.

Off the coast of Baha, is a good place to go diving, looking for rocks that were washed off shore, as waters flowed down the Colorado River, trinities of aeons ago, when this planet was still a young planet, maybe about one fifth the way through its infancy, after reforming, again, after its last major impact that shattered it to pieces, for the umpteenth kazillionth, plus more, time. This shattering and reforming, has been going on too long to count, and obviously, there is a large amount of mixturing going on, with debris from other star systems, galaxies, nebulas, and so forth, floating in, and becomeing part of our planets, all around and about, on solar winds.

You'll find rocks on the inside of the Baha coast, and on the outside, as well, and along the Baha coasts. You might have to dig down thirty of fifty feet, to a few hundred feet to find them, maybe eight hundred feet, or sixteen hundred feet, or further, but you'll eventually find something useful with lots of radological bullets embedded in the rocks.

Finding Good Rocks

You can find interesting rocks, also on high hilltops, such as in the Andes, the Himilaya's, the Swiss Alps, high mountains in Austria, and in Germany, high hill tops and mountains in Iran, maybe in Afganistan, and the very high hill tops, that are generally old hills, in many countries. They will usually have, if they are very old hill tops, lots of rocks scattered about that are very old, and that have lots of fracturable 'radiological' salts kiddies, and other related kiddies in them, as well.

Sledgehammering Continents And Land Areas Where Lesbianists Live, Hiding Below

Here are a few places to place some other fracturable rocks bombs on, to make them fall in, and collapse down onto the layers of rocks, below, and then puncture the ceilings of the cavernous cities the Lesbianists have made, down below those lower rocks layers.

Topango in the South Pacific near the Marianas, the area midway between the Ryukyu Islands and Haha Jima, Chichi Jima, and Iwo Jima, where you will find a sunken continent, Wellington New Zealand,

Peking, Falklands, Urals Mountains, Chile thirty miles north of Concepcion and eighty miles east of it, near the Argentina border, and the Kamchatka pennisula, which will split and collapse in the center of it, midway down the penninsula, if you hit it hard enough. Lesbianists will come floating up, if their bodies can fit between the tons of debris that will fall in on them, as you smash the land sites that sit on top of ocean shelfs, and on open lakes below the land, some miles down from the surface, in some cases, and further down, in other cases.

It may be hard or impossible to deliver a nice bomb below the ocean above or onto the top of the sunken continent below the ocean, between the Ryukyu Islands, or Okinawa, and the islands of Japan, called, Chichi Jima, Haha Jima, and Iwo Jima. If one can be delivered there, you'll crush the continent below the surface of the ocean, and that will cave in on the cities, there are more than one there, that are below the protected shelf layer of rocks, above the cities the Lesbianists have there, below the sunken continent, to live comfortably in. The other places aren't so hard to hit. It is just a matter of local interest, and urging of the people there, to take the correct action to help us to resolve this problem, of Lesbianists living below us, all around the globe, in their honey comb, bee hive like canival of cities.

A canival of cities, is a large collection of cities that is located in such a way as to make it easy to get from one place to another. They are conveneint for them to live in as they are well placed, and spread out evenly, using the full extent of the area, as efficiently as possible. The Lesbianists have a canival of cities under the lower rock shelf layers, that are above them, and that help to keep them protected, warm, dry for the most part, but not always, and that are conveniety located each one in a bee hive like, configuration, well placed, with a well designed, layout, with central cities, and with satelite cities. It is well designed and resembles in part, Melbourne Australia, which was laid out, planned and designed as a modern city. The Lesbianists of course, think Melbourne is puny compared to their accomplishments, and of course, with the technologies they had and have available to them, from time to time, they made good use of every inch of space they have available to them, under the lower hard rock, but leaky rock layers above them.

My kids have places and locations maps of all the best places to locate your home built fracturable rock bombs, and so please pick up the information from them, after you have sworn in, as citizens of our country. Also, please see my earlier notes on the sciences that support a correct understanding of radiological particals based fracturable rocks explosives and other helpful and useful explosives you'll need to set off the fracturable, also called, rupturable rocks bombs, i.e., the so called 'nuclear' detonations.

Topsoils

Did you know that nearly 99.9999+ percent of the earth's crust, or mantle, is formed from space debris that has floated in on the solar winds? It's true. Only about 0.000001 percent of the top soil is from local vegetation, globally speaking. The rest of the top soil comes in from above, blown in on the solar winds, as debris from other planets that have been destroyed, crushed, or blown to pieces by idiots with very large bombs, that demolished whole galaxies, or multiples of galaxies, in a few milliseconds, as the instant they blew up, they were so well made, or constructed, and so powerful, they instantly blew up the whole area of galaxies the planet was located amongst.

If for instance, you fill up one third of the large tourist attraction, the meteor crater in Arizona, with one of these fuels and rocks bombs, and ignite it, you'll disentegrate all of the Milky Way, and some what more than that, in one attempt, by my estimation, if the fracturable rocks bombs were made well enough with the fuels bombs, to burn at near or close to, solar temperatures, and if there were enough materials in the fracturable rocks, to get lots of mama's and papa's making lots of babies, relatives, and others. There are lots of different types of salts kiddies in fracturable rocks, and there are other types of kiddies, the radiological kiddies, which are sometimes, but maybe are not always, grouped with the fracturable rocks kiddies. There are many types of kiddies living in radiological rocks. When we send high heats waves energies, and other types of energies into the fracturable rocks, we can get many types of kiddies to begin making babies. If we get enough of the different types of kiddies to begin making babies, we will have one fine and dandy, explosive shower of baby making events. You can get further information on this topic from my kids, and if you tell your friends to check in with my kids, and to swear in, and become citizens of my and my kids' new country, along with other people who are swearing in, and becomeing citizens of our new country, my kids will make certain that every one is protected, and no one is caught outside, when the bombs go off, as my kids will tractor you and all the other citizens in, with my kids advanced teletransportation technologies, before any one can get hurt by the bomb or bombs blowing up, locally, or in their areas. That means, my worker unionized kids are very quick on getting people into the encapsulated living environment every one is living in, below the ground, that my kids built for every one to live in, until we get this problem straightened out, and until it is safely over with. People can continue to live in the encapsulated living environment, after it is over, as we are going to start a new economic and social system, and we are getting started, down below, where my kids are keeping the encapsulated living environment, well taken care of and well managed.

Later on, we'll worry about who comes out, and when, as we have plans for every one, to begin working inside the encapsulated living environment, which is very well designed, and bomb proof, of course. Once every one gets accustomed to the new way of living, in accordance with my religious principals, and in accordance with our new working and living programs, when people have saved up enough money, they can pool their money, and acquire a lease for land up above, on the

surface, and then with more money, they can have nice places designed for them, and built for them, with your input and with your instructions. You will need to study designing homes, and layouts of homes, for large numbers of people, as you will be required to live in groups of people, as the old systems of living, one husband, one wife, and so forth, is out the window, and now we are going for group living, with many members to your groups. When you have got the maturity together to live in large groups, and to sexal with many people in large groups, then you will qualify, and then with lots of earned income, pooled together, you and the members in your group, can then move up and live on the surface, in your well designed home, which my kids will use their technologies to build for you.

This is how we are going to clean up our planet, and get started with a whole new system for living and working with each other, as GOD's children working and living together, begining here, and spreading, slowly, across and throughout my universe, as we bring others into our program, all across the universe, from end to end, from top to bottom, and from side to side, and in every nook and cranny of my universe.

All of my kids, you, who I am speaking to, will learn to live and work together, supporting my worker unionized kids, in our new global, united, and universal society, we will begin to build, on this planet, first, and then later, every where else.

I am the mother and father of all of you, and of all of my worker, unionized kids, as well, all of my kids who work for me, of course, and of all of my living beings, and of all of my animals. We are going to get this big family of ours, together, and we, the human beings, will begin to clean up our universe, by sexaling for a living, and with many other living by the points systems programs, and other projects. We will also begin to get our heads on straight with religious activitiating, in other words, by participating in religialing, in groups, or by oneself, in the encapsulated living environment, first.

As we move along, in time, we will develop our working strengths, and character, and some people will qualify, eventually, for working in my religious brigade, once they realize and understand who I am, i.e., GOD. Others, who do not give a darn about what I am doing, may do as they like, as long as they are citizens of our country, and as long as they enjoy what they are doing, and as long as they add to the welfare of all people in our society, universal wide, as we build it, larger and larger, for all of my children, no matter who they are. We will one day have all of my children, working for me, and if they do not like working for me, they still have to pay the fees for the resources they use, just as I have to, and that means, there is a charge for every thing we use, and it is detucted from our pay checks. Every one gets a pay check, if they work, and if they are disabled, they will get earnings to support them, for as long as they need to be supported, until they are regroverated, healthy, fit, mentally

prepared, and willing and able to participate. Those who do not wish to participate, will work in jail cells, and prison cells, sexaling for a living, with animals, as I've mentioned before, and at carnival and entertainment centers and districts, we will eventually set up, first on and also inside of this planet, in 'encapsulated' carnival and entertainment parks, and later on and within, other planets.

We are going to have all my children working for me, eventually, as I've spoken about before, and in time, most people will wish to work, and when they are mentally prepared to work, they will enjoy their working, most likely, as sexaling for a living, is not a unwholesome way to earn a living, and it is a pure and holy way to earn a living, and a pure and holy way to spend our time, as part of our new working ethics environement. For more information on this, please see my worker, unionized kids, who handle the information hot lines, in our, and your, and their, as well, encapsulated, living environement, which they have built, maintain, and manage, for all of you, and which they are continuing to build and expand on, for the rest of you, who have not checked in with them, yet.

My worker, unionized kids have their own places to live, inside of the molecules that are used in building your living environment, and in your bodies, and in the molecules outside your living environement, as well. They live in all of the molecules, all over my universe, and they work in them, as well. They have their own universes, that they live in, which are all contained with in the molecules in my universe. It is a little more complicated than that, and so see them for more information on it, if you are interested in learning more.

Disintegrating The Milky Way

The Milky Way is made up of not one galaxy, but of several thousand, of different sizes. We don't have the technologies to see too clearly to distinguish the different galaxies that are within the borders of the Milky Way, nebular star system and nebular star cluster system, another way of saying that the Milky Way is a collection of many nebular star systems. Nebular star systems can be considered similar to galaxies, but maybe not always, as there are exceptions to every thing in most cases, any way.

We are of course part of the Milky Way, I suppose you could say that, but we are far out on the outer fringes of it, and we are not any where near the center of it, and we have our own galaxy we are a part of, and it is not part of the Milky Way, so technically, we are not part of the Milky Way, although we might like to think we are, since it is an expansive set of star systems, and star clusters, nebular systems, and other types of solar bodies systems, and it covers over us, and beyond us, sort of over layering us.

Be that as it may, we do not want to blow up or disintegrate the Milky Way, as we are in a way, part of it, or at least, we are encovered by it. Encover means to be covered over by something and encased within

it, or to be encircled or surrounded by it.

Retraction

Tom Selleck is not a Lesbianist but he was a Lesbianist, until the Lesbianists killed him, after expelling him from their group, and after torturing him with their many heinous torture methods.

Captain Off The Bridge.

Lay Order Of People

I have no lay order of worshippers, who participate with me, in any thing, or in any way. Why? Because, that's like me, the captain of the ship, coming into a town of persons who I don't know, and then saying that I'm the authority over them. No one is going to listen to me, and no one should be expected to listen to me. I wouldn't attempt any such thing, and so as the captain of my ship, my religious order, I have no authority over lay persons.

I have nothing to do with lay persons, what so ever. I will never have any thing to do with lay persons, unless they realize that I am GOD, and that I am the mother and father of all human beings, and all animals, and all living beings.

No one is going to recognize me as GOD, for a long time, as no one has the karma to recognize and understand that I am GOD.

Lay persons are free to do as they like, and I have no regulations concerning them, in my religious order. My children may have many regulations, for non religious order people, but I don't have any thing to do with that.

Donations For The Sake Of My Ministry

The only thing is, that, as I said before, if a person recognizes and understands that I am GOD, and that I am the Mother and Father of all human beings, all animals, and all living beings, then they are free to donate cookies to me, or clothes, or wearables, socks, and scarfs, or coats, sweaters, or slacks, neckties, and so forth, cakes, or cupcakes, baked items, or financial contributions, or chairs, and furniture, beds, linens, tables, office furniture, phones, phone lines wiring, electrical wiring, plumbing items, housing items, for building up a house, paved drive ways, mason or rock walls, surrounding the property, or a set of dormitories, or a prayer sexaling room, or a prayer ceremonialing room, or a swimming pool, sauna, bath house, toilet facilities, bathing facilities, laundering facilities, a root cellar, a molds and funguses workshop, a brewery workshop, or any workshop for helping to educate others, the land to build these things on, or money, or whatever.

If they recognize and understand that I am GOD, that is perfectly alright, to donate any types of items, or any thing of value, that would assist my ministry to get up and get running.

As yet, no one has recognized me as GOD, and no one understands that I am GOD, and the mother and father of all human beings, all animals, and all living beings, so as yet, I have not heard from one person, not a letter, or a phone call, other than an occasional wise cracker, mischief maker, or a person or person who are worried, and then complain to me, or rather, to my answering machine, most often, as I don't pick up the phone, now, as I had one person calling who was a bad kid of mine, and he was just looking for trouble, and since that, I just ignore all complaints, or wise crackers, or mischief makers,

and so on.

Nollicking Foolish People

Some people do not like me wearing my GOd cap, that is one of those specialty base ball caps, but with 'GOd' written across the front of it, and they might hate me, especially some South American or Central American Hispanic types, who have primitive and backwards religions and filled with local lore and ancient tales of demons, and goblins, and gooney bears, or ghostly ghouls, or other superstitious ideas and notions of things that go 'boo!' in the night, and try to scare or hurt people, as there are plenty of folklorish tales of such things, in primitive cultures, that thrive, even at the current time, nowadays, in large cities, even, and these types of people might want to kill me, and when they knock on my door, with their gun in their pocket, or in their hand, machete or knife behind their back, I just ignore them, and I don't even bother to get up from my work bench, i.e., my bed, to see who is knocking at the door, as I know already, they have nothing to do with my monastic order, and because they have nothing to do with my religious ministry, or with my setting up my religious ministry.

Just last night, some group of people droped by, and banged on my door, with the tip or barrel of a weapon, and it was rather hard sounding, and I just ignored them, and after a few minutes, or so, they went away, and they haven't come back, yet. I don't think they will, and even if they do, I don't think it will amount to any thing, as I may have occaisonal visitors or harrasment calls, now and then, but that's all they are, and I just won't allow my self to be bothered by them as they are unimportant, and my goof ball kids, are just too nutty to figure out that I am GOD, and that they are my kids. Nevertheless, these goof ball kids are here or there, and I get lots of compliments about my hat, and usually, if not always, the person giving me the compliment wishes to steal the hat from me, and then rob me, in any other way, he or she can, and then beat me up, if he or she can.

Well, I can't let these types of things get to me, and I just ignore them, as I walk by them, and I don't reply or return any statements to them, except a polite, 'thank you' if they gave me a compliment about my hat, but that's about all, and I might mutter something, like, and well, so that's just another one of my goof ball kids, or something to that effect.

Nollicking And Nollygaging

Nollicking means idiotic and foolish people who are wasting their time, for accomplishing nothing. It's like, nolly gaging, but nollygaging, is just wasting time, foolishly, and while you are nollygaging, you are looking for some way to make a profit, from your use of your time. Scanderously, you try to extort money from others, or force others to give you money, you do not have any right to.

That's nollygaging, as I can recall, at the moment.

Goof Ball Kids, Their Mischievousness, And Maliciousness

Well, I have all kinds of kids, and many of them are malicious, if you give them a chance, so I just stay away from all of them, as I know most every one of my children, is malicious, from time to time, if given the chance, and I think that applies to all of them, regardless of their age, at some point in their life, they will commit crimes of one kind of another, against others, and not think much about it, except that, they just had to take care of that, as they wouldn't be happy, if they hadn't.

Okay, so every one of my kids, at one time or another, will do goofey or goof ball things, and not think much about it. That's the way it is.

There is nothing to be surprised about, as every one, and I don't care who they are, every one, does things they shouldn't do.

Me, personally, I get angry, and say nasty things, and make myself sound gruff, now and then, and maybe I shouldn't, but I just feel compelled to do that, when I have a righteous conviction that some one deserves my speaking up and telling them off.

Well, you feel sorry about it, afterwards, if you hurt some one's feelings, but then that's the way it goes, and no one is perfect, so it's just. Let's try to live and let live, and live together in peace, and cut out the naughtyness, and stop the mischiefness, if we at all possibly can, and apologise if the opportunity presents itself. That's always the best way to handle things.

Most people, after they kill someone, can't appologise, and young girls and boys, and older girls and boys, think nothing of killing people, or having some one killed, for them, and then of course, there is no way for any one to appologise to the dead person, since that person is in my Epcot Center.

Well, we can't do too much about that, can we, but we can try to be kinder, and not kill as much as we feel we must to be happy.

More Than Ninety Five (95) Percent Of The Homicides In The World, Some Times As High As Ninety Eight (98) Percent, Or Even Higher, Go Unreported, And Are Therefore, Not Investigated

It's too bad that we kill others, and torture others, but that's the way my goof ball kids live in my universe, and despite what people might wish to think, to the contrary, it happens every day, in every city, town, hamlet, county, district, or where ever. My goof ball kids are killing people, right and left, and there are just so many deaths, the police don't hear the ninety five (95) percent of them, or so, as they never learn about it.

The percentage of homicides the police do not hear about, is perhaps just a little higher, but in any case, no one should be surprised, as that is how my goof ball kids get along with one and each other, and they have been getting along with one and each other, that way, for a very long time, already, so it will not stop, any time soon, and that's just the way things are, for now.

The Lesbianists are responisible for just about eighty five percent of those homicides.

Labrynthine Cities Below Us

The Lesbianists living below us, in their cavernous, labryinthine cities, that are below the hard rock layers, well below the oceans, and other bodies of water, far below the continents, go around, and mess with every one, and they play with people, and they think they have the right to amuse themselves by useing the citizens of this planet, any old way they like.

They go around, and set up phoney wars, and they watch the citizens of each country, kill each other, on their commands. The Lesbianists enjoy playing these kinds of games, and they set up civilization after civilization, and they bring it along, and help to develop it, and when they get it to a high enough level, they feel a sense of accomplishment, and then they watch and amuse themselves as they destroy what they built up, and the people who are living, unawares of them.

The Lesbianists think it is funny, that the Lesbianists feed the lies about our universe, and the lies about science, to every one, and the Lesbianists think they have the right to bafoonerize every person who comes into our world, as a tummy baby, who is on his or her way in, and in fifty to eighty or so years, is on his or her way out.

The Valderizing Lesbianists

The Lesbianists do not teach real science, or real geography, or real history, or real mathmatics, or real chemistry, or real anything, and they fool every one with their bogus religions that they either made up or corrupted, and valderized. Valderized means, they vandalized it, and sprayed grafitti all over it.

Well, that's the way the Lesbiansts get their kicks, and they are just a bunch of grown up children, valderizing every thing they can, and disrupting every thing, and every bodies' lives, just for their own amusement, and cruelish fun and games, such as feeding former Lesbianists to my abominant kids, who are need to be fed, and who are smart, and devious, and who destroy humans, and eat them up, and spit them out, and treat them terribly, while the Lesbianists watch on, in amusement, as they see people like Bill Gates, or Steve Irwin, and others, eaten up and then tortured, as I've mentioned about before.

Valderize all they may, and be cruel all they may, we are all now finally finding out about their treacherous and horrid behavior, and

now we are going to put a stop to it, permanently, and that means we will kill every one of them, and send them all to my Epcot Center, as I've explained about before.

Now we know we can cave in their cities, below the leaky hard rock layers, way down below, if we hit certain areas, hard enough, with a nice big hammer, such as one or more of my 'nuclear' bombs, the fracturable rocks kids bombs, with fuels oils, burning at extreme high temperatures, and with percussive shock forces, these, mixed together, will get my fracturable rocks kiddies, making lots of babies, and with a large enough fracturable rocks fuels chlorine, and metals that burn at high temperatures, nearing solar temperatures, we will see some very explosive 'family making' adventures, among my fracturable rocks kiddies, and their radiological relatives and friends.

We know where to hit some of their locations, to drop a few miles of more of continental shelf down onto the tops of their ceilings that will then fracture their ceilings, and cause massive damage, as oceans of water fill up their labrynthine and very well laid out cities, below us.

Who Do We Kill, First?

Mr. George Bush, Jr., Mrs. Barbara Bush, Jr., Mr. George Bush, Sr., Mrs. Barbara Bush, Sr., Mr. Ronald Reagan, Mrs. Nancy Reagan, and lots of their friends, and nearly the whole crew of politicians in Washington DC, are all Lesbianists, and I want you to kill every one of them, and send them to my Epcot Center, and I want you to place the fracturable rocks bombs, in the right locations, and then drop a thick layer of continental shelf, down onto their ceilings, their ceiling that are below the water that is between us and them, and that is below our continental shelfs that we live on.

We can hear the water down below, if we have the right types of listening devices, and if you find the right places to place your fracturable rocks bombs over, then it may be easier to drop your continental shelf, down through the water, below you, and down further onto their ceilings, the hard rock layers below the water, that is below your continent, swirling about.

Now I want you all to study this, and find the right places to drop your continental shelfs, down through the water layers below you, and onto their ceilings, so as to smash their ceilings. I've given you some hints, already, as to where you can place the fracturable rocks bombs, and my kids also have given some people more information on that, and so we have lots of people, who are interested in solving this problem of the Lesbianists toying with you, one life of yours, after the next life of yours. It is time we brought their mischief, and non sense, and cruelty to a halt, and it is time we put on the brakes, and slammed down on the brakes real hard, and at the same time, slam down on the ceilings of the Lesbianists labrynthine cavities, below you, their cities that they have laid out in perfect

symetrical, geometric shapes, like perfectly shaped, honey combed behives, with central cities, placed symetrically around the globe, in a perfect geometric layout, and with spokes or corridors reaching out symetrically, to other central cities, and to satelite cities, that they have well planned out, and have well laid out, perfectly, below you.

Hydrolific Pressures And The Labrynthine Cities Below Us

Because of the hydrolific pressures, they can never keep the ceilings, perfectly dry, and they are always in trouble, trying to fix leaks, here, there, and every where.

Now it won't take too much to bring the whole place down on them, flooding them like rats in a cage, below the water line, as a boat slowly sinks with a rats' cage on a table, with rats in it, slowly into and below the ocean waters.

The ones above, such as George Bush, Jr. the current president of the United States of America, and his wife, and his supposed family and relatives, and all his close Lesbianists' friends, should now all be killed, point blank, with your fracturable rocks bombs. I hope that is perfectly clear, and I hope you all understand what the situation is, and that it is an intolerable situation, and we are not going to allow them to toy with us, any longer, and we are not going to let them amuse themselves, any longer, and we are putting an end to their games, now.

DO YOU UNDERSTAND ME? I HOPE SO! AS A 'NO SIR!' WOULD BE UNACCEPTABLE.

Now that we know where we stand, we have nothing further to argue about, and so let's get to our tasks, as soon as we are ready, and prepared. Okay? Good.

Local Area Prayerful Collection Site

A collection site is where people gather to pray, and to sexal and to purify each other. It is not a site where people ask for offerings, or where people as for any thing else, involving money. It is a sexaling park, and a prayerful sexaling park. That is the meaning of collection site. A collection site is where people collect together, to sexal and purify themselves, and while they are at it, they make sexaling efforts to help to purify others, by shattering and showering out megawatts and tons of radiating, purifying energies.

We have a local area park, at the corner of West Tropicana Ave. and South Decature Blud., a local BLM piece of land, that some people like to camp out in, that I go out to, to bless, and to purify with my religious ceremonies, now and then.

I claimed that area, and all other BLM lands that I could claim under Gurkian Law, and all other land on this planet, that I could also claim under Gurkian Law, such as other parks and forests managed by

other government agencies, or private lands, supposedly owned by rich people, and lands around the world, that I have a right to claim, under Gurkian Law, and all that land, is now mine, under Gurkian Law, and I can use it in any way that I need to use it, regardless of what other people, think.

Aerobic Taichi Practice

I am busy, now and then, purifying that parcel of land, at the corner of West Tropicana Ave. and South Decature Blvd., with my religious ceremonies, that I conduct with my religious prayer hand signaling statements and with my use of my ability of arerobic Taichi, for religious ceremonies, as I seem to have recalled a lot of areobic Taichi, as well as some other forms of Taichi, that I knew, before, in previous lifetimes, but I am only interested in using it for practical purposes of religious hand prayer signaling.

I'm very clumsy when it comes to aerobic Taichi, but any way, I enjoy it, and it is good excercise for me, and the more I practice, the better I get, but it will be zillions of years, before I get any where near good at it. I practice the arerobic Taichi while I make my religious hand prayer signaling statements.

I don't teach Aerobic Taichi. I only use it for my prayer ceremonies, when I am on my feet, and not on my back, mostly, even though, I do use a short version form of it, while lying on my back, or, while I am on my side, I use a very short form of it. Anyway, it is fun to do Aerobic Taichi, and that makes my prayer ceremonies, for me, more fun. When other people learn to prayer signal, they will naturally pick it up, as well, as every one has studied to some extent, Aerobic Taichi, and other forms of the martial arts, and my kids will release the knowledge that is stored in your memory banks, as you need it, once you begin practicing, for women, as a priestess, or for men, as a priest.

It is not like the Taichi you see people doing in China, or Taiwan. It is Taichi, unless they are very good. It is specialized form of Taichi for use while performing hand prayer signaling. It is not used for fighting, but it is the basis for Taichi, and you can train in martial arts, while employed as either a priestess, or as a priest, and it will be useful to you to know, before hand, as it will make practicing your martial arts, that much more interesting.

I'm not hiring any one, now, or just yet, or any time, soon, as far as I know, as my kids do all the interviewing, and I have nothing to say, about who comes knocking at my door, to be interviewed.

Campers, Camping, Sexaling And Purifying The Area, And Useing The Parcel Of Land That I Publicly Claimed For My Setting Up Of My Ministry

Now, on that parcel of land, there may be campers, now and then, who want to camp there, because they want to find out more about my

religion, and so they come out to Las Vegas, now and then, and they camp out there, on that parcel of land, at the corner of West Tropicana Ave. and South Decature Blvd.

Since that land is where I am going to set up my initial ministry, when the time for that comes, I am preparing it, with my religious purification ceremonies, and there doesn't seem to be any troubles, with any one telling me not to go up to my property, that parcel of land, and there is no one trying to tell me that I can not bless my property, that parcel of land.

Now, if other people wish to come to that parcel of land, and wish to sexal on it, and thereby purify that parcel of land, they are more than welcome to come to it, with their camper trailer, or caravan bus, and they can maneuver into the area, and set up a tent, and campsite, but there is no water, or any thing else, so you have to come prepared to rough it, if you wish to come in your camper van, or caravan bus, or in a camper trailer, or with a tent, or with other types of sleeping and living gear.

Straightening And Cleaning Up The Area

You can straigten up the area, and clean it up, and make it nice, for many people to pull into, to join together, and to sexal together, and with your purifying energies from your sexaling together, you are more than welcome to stay there, as long as you like, and as long as time permits, and as long as finances permit.

I have nothing there, except for my now and again, Aerobic Taichi practice and the energies that are imbued into the area, there, from my religious hand prayer signaling ceremonies. There are no structures of any kind, and I am sometimes there, busy purifying the area, with my religious ceremonies, so if you and your friends would wish to come to that area, and also help to purify it with your sexaling energies, than you are more than welcome to come and visit there.

Donating Your Sperm, Sexaling Spittle, Perspiration, Vaginal Juices, Titty Juices, And All Your Sexaling Juices

You men and boys may by all means, donate your sperm juices, sexaling spittle, and other sexaling juices, your perspiration you generate while you are sexaling, to the site, and you women and girls may by all means, donate your vaginal juices, your titty juices, your sexaling spittle, your perspiration you generate while you are sexaling, and all of your sexaling juices to the site, as they all will help to purify the property that I intend to set up my ministry on, as they all contain many, holy, pure, sacred, powerful cleansing energies, and GODLY energies in them, and they will help purify the land, and the environment for ages and aeons to come. All of your eroteming and orgasming energies will go shooting throughout your bodies, and they will find their way throughout your bodies, and out of your bodies and brains, and into the environment, and into your

bodies' sacred and holy spillages, as I've discussed about before. Your bodies' spillages, as well as your perspiration, your pee, and your poop, not to mention all of your other juices that are produced as you sexal, erotem, orgasm, and phlumett, become pure, sacred, holy, powerfully cleansing, and GODLY, while you are sexaling, eroteming, orgasming, and phlumetting. Your pure, sacred, holy, powerfully cleansing, and GODLY energies find their way into all of your bodies' spillages, and so please donate them to the site, in appropriate manners.

Building A Latrine

Please employ some one to dig a latrine, and to fashion benches to sit on so as to be able to dump your poop, and pee your urine, into the latrine trenches. Manage the latrine, with care, and employ healthful, tactical, and sanitary techniques to use it safely. Provide hand rails, to grasp, so that no one will slip off and fall into the latrine. Provide barriers so that no one can accidentally fall into the latrine. Use your common sense when providing 'tactical' safety measures.

You need not fashion an over hang, as there is no rain to speak of, in Nevada. You do not need a supported roof, or enclosure, as they will only become stench ridden, and no one will enjoy useing them. There are to be no enclosure walls, or sides, or backs, so as to enclose the odors of the latrine, and confine them to an air tight area, where they can accumulate, and cause explosions, accidentally. They need only be deposited into a safely dug, latrine, and then allowed to filter down into the soil, and then allowed to vapor up into the atmosphere, freely.

No doors should be used, and no barrier walls should be employed, when fashioning the outside framing of the latrine facility, itself. That means, there are no hiding places in the latrine, where people can hide, and be prevented from entering, or exiting from the latrine. Only hand rails need be supplied, and only barriers that are suitable for keeping people from falling into the latrine, need by provided.

Steps may also be provided, to a raised platform latrine, which is more sanitary to use, than a level to the ground, latrine. There should be no walls, and no blind spots when either ascending up the stairs or when descending down the stairs. Women, girls, men and boys, should all use the same facility, and there is to be no fraternizing. Fraternizing is playfully tearing up at the opposition, or at people who you do not like.

Tearing up at the opposition means, you are trying to over throw the person, and dispose of that person, into the latrine. Over throwing the person means to be using reckless abandonment when dealing with another. Reckless abandonment means to be recklessly risking the life and limb of another.

There will be no frolicking at the latrine site. Frolicking is when little boys, and big boys, and little girls and big girls, play around and provide possible hazzards to others. You will not behave in a hazzardous manner towards any one, at any time, or you will be asked to leave, and to not come back.

There will be no play time allowed for children, as this is a collection site, and that means it is a holy site for holy activities, so leave brats at home, and do not bring any one who drinks alchoholic beverages, or who acts unwholesomely, to the collection site. This is a private site, and a prayerful collection site, and that means, you are coming there, to pray, and to make love, and to sexal, as GOD's children, so as to purify the site. You are not allowed to act randomly and with reckless abandoment. Randomly means, without proper self control and restraint. This is not a gay fashion, show or parade, and we will not tolerate reclusive, or unwillingly unwholesome behavior.

Reclusive means, unwilling to participate for the stated purpose of purifying the area. Reclusive means, caution and carelessness is thrown out the window, and you are acting in an irresponsible manner.

Unwillingly unwholesome means, first, unwillingly means, non cooperative, private, or sordid. Sordid means you are acting in a selfish manner, and you are not acting in a responsible manner for self and for others.

Unwillingly unwholesome means, thusly, that you are acting in a selfish manner, irresponsible manner, uncaring towards others, and unwholesomely.

Unwholesome means, you do not care about the life and limb of others, and you would just as soon shoot a person you argue with, as talk to them for a friendly chat. Many of my kids, are very unwholesome, and will just as soon, talk to a person, as shoot the person. You will not act in any such manner.

Any unsafe or prohibited latrine construction will be ticketed on detection, by me, and you will be asked to rework the facility. That will be on the ticket, and please comply, if you and your friends who built it, will be so kind. If you do not rebuild it, you will be asked, with your friends, to leave the site, as you are acting in an irresponsible manner. You will not be allowed back to the site, without your showing proper repensive behavior. Proper prepensive behavior is an attitude of appology, as well as the acts of appology which means, you will take appropriate steps to see that the work is or has been redone, in the manner as required by safety laws, as stated by my children, under Gurkian Law. Either me, or my children, will leave the ticket, and you will be required to fix what ever it is you need to fix, or you will be asked to not stay and conspiriate at the collection site.

Conspiriate means, to participate freely with caution and care for the sake of others. Conspire is also the same, as conspiriate.

You will be asked to not stay and conspire at the collection site, means, the same thing. It means, you will not be permitted to participate freely with caution and care for the sake of others. That means, you will be asked to leave, and you will not be allowed to come back, if we, my children and I, and other attendents, as well, can at all help it.

Attendents are people who participate in the collection site activities, and they are people who take responsibility to make sure every thing is done, properly, and safely, with the sake and safety of others, in mind.

The Home Depot has many nice and useful janitorial equipments, and so it will not be difficult to build a safe and luxuriously clean, and handy, latrine, that is safe to use, for all people, of all ages.

Luxuriously clean, means, it is kept sanitary.

How do you keep a latrine, sanitary? You keep it clean and sanitary by venting the air out, freely, with no blind spots, either underneath or above, where pockets of air, and vapors can accumulate.

No partitions will be installed that will create a blind spot. A blind spot is an area where light can not penetrate. Therefore, your construction materials, must be perforated wood, or grated steel. You can weld together, if you know how to weld, a very nice, grated steel, latrine, that will be safe to use, by every one, of every age. You will need the correct strength of supportive steel poles, to handle the weights of the persons accessing the latrine, and of the latrine, as well. You will make certain to build it well, and to support it well, with firm foundations, of concrete or steel plates.

Any deviation from safe practices for building latrines, will be torn down, disassembled, and the persons or person responsible will ethier be asked to leave, or will be asked to appologise to the memebers of the collection, sincerely. If the person acts in a responsible manner, and appologizes, sincerely, and appropriately, then the person will be excused, with out further, charges being leveled. Further charges will be leveled by my children, if my children detect further, reckless abandonment on the part of any person, participating and acting in a reclusive or recklessly abandoned manner.

Glue People Begun 'Cleaning' Agents

Cleaning the toilet seats of the latrine, will also help to keep the latrine luxuriously clean, and sanitary. You should clean the toilet seats and parts of the latrine, with common household detergent agents, as at this time, we have no choice but to use the unwholesome, Lesbianists' manufactured, ajax, spic and span, lysol, and other such 'glue people begun' agents. Glue people begun agents means, aerosols, and other unwholesome petrol fueled compacted or pressurized sprays,

or detergents, that help the Lesbianists to begin the process of turning human beings into glue people. Glue people, in this instance, does not refer to glue, but it refers to tar. Tar is an adhesive substance, and their intent was and is to turn every human they can find into tar people.

We have no choice but to use the local distributors selection of cleaning agents, but in time, we will one day, have all that straightened out, after we demolish the Lesbianists' hideouts, under ground, and after we kill them all, or welcome them in, as 'surrenders', with appropriate, remorseful, penentant attitudes.

Removal Of Latrine Wastes And Disposal Of Latrine Wastes

Latrine wastes materials shall be removed, and supplied to local pig farmers, who can then use the materials, for feeding the animals. Pigs and hogs love to eat away at latrine wastages, and no one knows that. Chicken also enjoy eating human wastages, as well as ducks, geese, and other fowl. Horses and burroughs also enjoy human wastages, if it is healthy enough, with large amounts of vegetable mass in the diets of the human beings, whose wastages are carried to the farms for spreading about in the hogs and pigs, barrels. A barrel is a place where wastages are loaded, up into trucks for delivery to a sewage farm, or a place where farmers can use the wastages, that the hogs are finished with, as fertilizers.

Hogs and pigs use a roped off area, for eating wastages, and employees keep track of the unloaded wastages, and the spilled wastages from the hogs, and then the spilled wastages from the hogs, are then moved to a separate area, for pickup by carriers of farmers. Foods grown at farms using hogs and pigs wastages are useful and nourishing to humans, and other animals.

No fees of any kind for loading and for carrying away wastes to hog and or also pig farmers, should be levied by truck drivers, as drivers will earn a tokenous gratitude tip from the hog and or also, pig farmer. An appropriate payment to the driver and deliverer of the human wastes to the hog and or also pig farmer, should be paid by the hog or also pig farmer, unless the farmer is cash strapped. Cash strapped hog and pig farmers may be given money compliments by the people at the collection site.

Money compliments are small awards, or minor payments, out of gratitude to the hog and pig farmer, for his or her useage of the human wastes from the latrines. Money should be collected, regularly, if hog and pig farmers are cash strapped, and then given to the hog and pig farmer, out of gratitude to him or to her, and presented, tokenously, or as a gift payment. How much should be paid, depends on the expenditures of the driver, for his or her services, and for the use of his or her, vehicle, and for its whollyfied maintenance.

Wholly fied means, the regular maintenance that will allow the truck or vehicle to run at tip top conditon or shape, for the life of the vehicle, figuring it proratively.

Proratively means, spaced out, and paid proratively, or over the period, at regularly spaced points in time, over the given span or the useful life of the truck.

Discussions regarding this, and discussions for compensations, should be held at the collection site, and at the delivery site(s) for delivery of human wastes, by all parties, concerned, regarding all of this, and the primary collection site attendants, the persons elected by the attending or participating persons, at the collection site, who show the greatest interest and sense of responsibilities, at the collection site and with regards to the collection site, and with regards to the collection sites' safe, healthy, and wholesome management, must attend the discussions, and must deliver their sound judgements as to who is to be compensated payments for their participation in the removal and distribution of the wastes from the collection site, to the hogs and pig farmers, and as to how much should be dispensed, per each removal and delivery of human wastes.

Participating persons at the collection site, should elect attendants, and the attendants should regularly check on all points for the safe management of the collection site. Participating persons means, persons who are there for sexaling, and for depositing their holy, pure, sacred, powerfully cleansing, and GODLY sexaling juices at the collection site.

Nevada Power, and all other vendors, are not participating persons, and should not be construed as participating persons, regardless of what they might wish to think, and if they have any complaints, I authorise the killing of all persons who disagree, and persist in arguing that they are valid participants, despite their not participating in your holy sexaling, activities, as individuals, and not as company employees. No company employee, or personel of any kind, may participate, except as an individual, lone, and wholeseome, participating, sexaling agent.

A sexaling agent, is a person who is participating at the collection site to assist in the purifying of the parcel of land, on which I will build my ministry, with the assistance of my children, by their participating in sexaling activities, and by their depositing of their sexaling juices upon the grounds of the parcel of land.

How To Disperse Your Juices

Sexaling outdoors will normally require that persons are naked, and juices will naturally find their way to and into the ground. Men, boys, women, and girls, all must be naked, while sexaling outdoors, except for those persons who need to be on the move, such as male attendants, who will need to go around, periodically, checking on the points of interest, to maintain the soundness and integrity of the

collection site, and of all things related to its operation and management.

Clothing

Clothes may be worn, at times while not sexaling, as particapating persons, decide.

Scarves, hats, and minor shawl like garments, Roman, Turkish, or Russian togas, or other comfortable sexaling apparel, for women and girls, to protect the dermal surfaces of the wearer of the scarve, hat, minor shawl, or other apparel, are allowed to be worn, while sexaling. We need every inch of dermal surface, bare and naked, if possible, or at least, accessible, to allow for maximum eroteming sensitivity, touching, massaging, tickling, and so forth, to heighten the erotic levels of excitement, and thrills, eroteming, orgasming, and phlumetting.

Men and boys may wear light weight garments, such as Roman, Turkish, or Russian togas, or other garments that do not interfere with access to sexaling buttholes, dicks, and so forth, for men and boys to be able to maximize their sexaling enjoyments, erotic attachments, their purposeful eroteming enjoyments, orgasming thrills, and pleasures.

Erotic Attachments

Erotic attachments refers to their titties, dicks, buttholes, mouthal holes, tounges, and other touch sensitive, eroticable and orgasmicable body parts.

Purposeful eroteming enjoyments means, their steady minded, determined, and sustained sense of attaining to the highest levels of eroteming enjoyments possible.

Leveling The Area

Some minor leveling of the area, for maximum use of the area, as an automobile and camper trailer, caravan bus, travel trailer, campsite park, will need to be done.

There are many tiny hills, and a few large ones. There is much dirt that can be removed, from the middle of the site, all the way back to the rear edge of the site.

There is a hilltop trailor park, past the edge of the rear of the parcel, and there will need to be built a very durable, and strong retaining wall, to keep that hillside, shored up, and to keep the trailor park from crashing down the hill side, after slide begins, and creep causes the trailor park to fall into the open area, that will be needed to be excavated, all the way to the rear of the park.

The grade or slope of the hill, need not be steep, but can be at a relatively low angle of ascent. An angle of between ten to twenty five, to thirty degrees, in graduations, from front to back, can be

accomplished, with little difficulty, and with no disturbment to the trailor park, or disturbment to the integrity of the trailor park.

We need not seek any permits for construction, as I do not recognize the Lesbianists' governments, on this planet, and if any person shows up who says he or she is a county or city planner, inspector, or whatever, you are to immediately kill the person, and deliver three fivers to the persons' head, as that person is a Lesbianist attempting to interfere in my religious activities.

All activities at the site are to be done, without any interference from any public or other authority, and all costs for all changes and alterations to the site are to be financed by the local construction companies, who are working on the hotels industry, and they will cease immediately their work on all construction, private housing construction, casino construction, and all other towers construction, or work construction, other than the basic infrastructure needed to support the present population of Las Vegas, Nevada.

We are taking over this town and you all will begin to prepare to vacate this town and hand over all of your construction equipment, now, or face your companies and your private persons destruction with my fracturable rocks bombs, begining with the New Orleans Hotel, and all related hotels, and casions, bars, and restaraunts. That means, every gambling establishment is to shut down, stop construction, and vacate this town, now, immediately, post haste, if you wish to live.

You will be destroyed if you refuse to follow orders. We are putting a stop to the non sense of the Lesbianists begining with Las Vegas, Nevada, Henderson, Pahrump, and all parts of Nevada and the Southwest.

You will disband your operations and hand over your companies, such as the water bureau, the power company, the gas utility company, and every other company, including all supermarkets, grocery stores, malls, and so forth, every last business in Nevada, and the south west, to the participants at the collecting site, to take over and then properly manage, until all residents of Las Vegas, remove themselves, to my kids facilities.

Is that understood? You are all resigning and moving into my kids place, underground, surrendering, and moving on for those who are not Lesbianists, but who wish to vacate this area, as this area is in whole, now, a religious grounds.

That means, that I will require the participants at the collection site to take over every thing, and to bring the news reporting stations to their knees, and force them to report the news, that every one is to retire to my kids underground, fortress, and they are all to remove them selves from Las Vegas, now, post haste, immediately, other wise, we will have a fractuable rock bombs throwing contest, to see who we destroy, first.

You must surrender all your holdings, owned property, equipments, and every thing else you call your own, and hand them over to the participants at the collection site.

Is that understood? "YES SIR!" had better be your answer, or you will find yourself on a one way ticket to my Epcot Center, with no return ticket, guaranteed, for however long it takes, to find you tummy mommies and tummy daddies.

I don't think there will be many volunteers, in the near future, as you are all abominant kids of mine, and the only kids people will ever bare, for some time to come, are abominant kids, and animals, and animal humans abominant kids, so I do not think you'll be leaveing my Epcot Center any time soon, if you resist and if you force us to kill you.

Is that understood every body? Good.

The penalty for not complying is death. Do you understand what I am saying? I hope so.

The Party Is Over In Las Vegas, And In The World

The party is now over, in Las Vegas, and at all casinos and gambling establishments, as we know you are all cheating, and we will kill every single last one of you to close you all down.

Who Is Staying And Who Is Leaving, Etc.

You will close down all of your establishments, world wide, and lock the doors on them, and then demolish them, post haste. Is that understood? I hope so. Either you do it, or we will do it. Do you understand that, now? I hope you do, because we are going to demolish every one of your establishments in this town, if you do not demolish them, yourselves. Every last one of them, all houseing, except for those noted in my children's compliance statements, which you are all to recieve, all trailor parks, with some exceptions, all every thing is to be removed, with only the basic infrastrastructure for heating, lighting, water, sewage, medical, hospitals, medical clinics, pharmacies, and so forth, food markets, services industry, HUD, Welfare, SSI, and other operations for the welfare of persons who are here, who can not leave, or who will be staying for some time, and who will be needing the services of those agences, construction companies, lighting companies, electric infrastructure installation and maintenance companies, as well as gasoline supply and distribution vendors, diesel fuels supply and distribution vendors, restaraunts, and telephone. That means, all humans are leaving, except for those person who are to stay on, as indicated in my childrens' compliance statements, and except for those who wish to stay on and participate in spilling their pure, holy, sacred, purifying juices, and those wishing to participate in purifying my area, all of Las Vegas, Nevada, the valley and beyond, in time.

Rules For Hospitals And Clinics, Etc.

There will be new rules for hospitals, and clinics, and my kids will see to it, that the new rules, are followed. There will be other rules, as well, and my kids will see to it, that they are followed, as well, or persons who wantonly disregard them, will end up in prison, underground. My kids have not only a living environment, they have prisons, as well, jail facilities, and many other things. Check with them for a fuller list, of what all they have in the way of facilities, as many are very nice, and there are great possibilities for improving your health, and rejuvenating your bodies, etc.

My kids have a full list of who is to be leaving, who is to be staying, and by when people are to be leaving, and where persons staying, are to be moving to, as we clean up this area.

All of you had better check with my kids, especially, you Lesbianists, but not only them, you religious fanatics, as well, and every one else, of course, or you, especially the Lesbianists and religious fanatics are at risk here, but not too much, the others who are to check in with my kids, risk dying, perhaps, prematurely, and then ending up in my Epcot Center.

My kids also have lists of who the people are who will be recieving all the properties for taking them over, which properties need to be demolished, who will be demolishing things, and how to remove those things that you must remove, and to where you will remove them, and dispose of them, and in what manner you will dispose of them.

You will hand over every thing, and you will all comply, and those who are required to hand over their properties, after complying with removal demands, will hand them over, and then will move out and into my kids place, in accordance with the time schedule that my children have for you to follow. You are required now to check in with my kids, get every thing sorted out, and learn all the details, and then comply.

Those who do not follow these orders risk an early and, fortunate for us, timely meeting with death, and entrance to my Epcot Center for a long stay.

Erecting A Partition Blind On West Tropicana Ave.

The roadway, West Tropicana Ave. runs east to west, and west to east, and it is advisable to erect a pertition blind, so as to not disturb traffic, that comes down the side of the road, the parcel of land sits on, at very fast speeds, with people rubbernecking to see what is going on, as many people will possibly end up flying into the area, with their automobile, truck, gravel carrier, or eighteen wheeler spinnning and turning over, out of control, and then sliding off the roadway and into the collection site.

The traffic is very fact on West Tropicana Ave., and with the interest of the local area residents, who will learn about the collection site, and the activities at the collection site, there will be many hazzards arrising as a result. Some persons may decide to stroll through the

area, to steal purses, or wallets, or cameras, and so forth, as there are many poor, indigent, or hopelessly poor, persons, in the area, who do not have any work, and who can not feed themselves, and they need to steal things, to sell, to earn a living.

Such people should be spoken to, and fed, and then warned not to act in an unrighteous manner, which means, please do not steal things, or damage the property, or any thing on it, and please do not get into fist fights, over insults, and disagreements with participants, about who is GOD, and so forth. There are many impoverished persons from South America, and Central America, who only know their local area witch doctor's teachings on voodoo men and voodoo women, and who know nothing but folklorish stories about gouls and ghosts, and people, or ghostly gouls, i.e., people immitating 'gouls', or mean and rotten people, who go 'boo!', or try to scare and rob people, in the night.

Electricity, Lighting, Etc., To Be Supplied By Nevada Power Free Of Charge, Or Else

The partition blind should be sturdy, tall, and break proof, so that vandals can not break it down, or climb over it. Lights for use at night, with the proper permissions for an electrical hookup from the Power Company, Nevada Power Company, will be granted, and provided by Nevada Power, along with all other neccessary, needed, safety lighting hookups, to illuminate the area, fully, at night, so that it looks just like, or nearly like, daylight, or a well lit soccer areana at night, or a well lit professional baseball field, or football field, at night, and it will be given for free, lest we burn down Nevada Power, and kill all of their Lesbianists employees, and meter men, and all of their tawdry workers, who we do not wish to deal with. That means, we will blow up their buildings, and kill them all, unless they give us the electricity that we require. If we need to kill them all, we will then acquire all of their holdings, and we will operate all of them, ourselves. Fair Warning has been given, and consider that as a done deal, unless you wish to visit my Epcot Center.

Meat Vendors And Hispanics From Central And South America

An air of friendlyness, but caution, should be used. Men and boys are there to protect the women and girls. So, please work in teams, and do not let individuals, who might get kidnapped, and sold off to meat vendors, for a few dollars, or pesos, as it is, in Las Vegas, as the majority of such kidnappings and sales of human beings to meat vendors, the Lesbianists chain stores, such as Colonol Sander's Kentucky Fried Chicken, Burger King, MacDonalds, Jack 'n the Box, Wendy's, In-'n-Out, Fat Burger, Taco Bell, Dell Taco, and all the other, fast foods vendors, is by the locally landed hispanics from Central and South America, who need money, to stay alive.

Erecting A Partition Along South Decature Blud.

South Decature Blvd. also has much traffic on it, and there will be lots of people, rubber necking, to see what is going on, so a high, partition wall, made of lumber, should be erected down the side of South Decature Blvd. to prevent all such incidents of rubber necking, and reckess abandonment, from occuring.

The partition should be about ten to thirty feet high, and should be well constructed. Why so high? We do not want people climbing over it, to sneak into the area, to steal things, and to fight with people, and to cause trouble, and to come looking for young girls, and young boys, and helpless, elderly folks, and uneducated to the whims and ways of the downtrodden, brutal, abominant kids of mine, walking the streets of Las Vegas.

Yes. They are abominant kids of mine, and the proof of that is that their children come out as monkey people, and orangutan people, and chimpanzee people, and if possible, the hospital whisks the baby away from its mother, and disposes of it, in the prep rooms, used for killing incoming, abominant kids of mine.

Drawings On Demolition, Construction, Etc.

My kids have construction drawings for constructing all the facilities needed at the collection site for all the facilities that will be needed. They have electrical drawings for lighting, etc., health, fitness, and wellness facilities drawings, latrine facilities drawings, showers facilities drawings, food and beverage eating and drinking areas drawings, and all other drawings related to all things that will be needed to be constructed, or altered in any way, for our project to proceed, including but not limited to, demolition of the cliffs, leveling of the entire area out to Harmon Ave. and up to Flamingo, and back to Tropicana, as well as what is to be removed and leveled between Jones and Decature. There are a few minor exceptions, such as the building that I am living in. Who will move where, to consolidate staff at this project, and who will be moving out, at this project, and what will be leveled at this project, are all detailed in the program specifications, my children have.

My present quarters, will be my place of residence, as things move along, and in time, in accordance with the schedule for construction, a temporary facility for me will be constructed near the area but between Flamingo and Tropicana, and somewhere between Jones and Decature. Please see them for details.

After the area is purified sufficiently, and after all the areas to be purified, are purified, and my children will decide on when that is accomplished, my children will then activate the technologies, and acquire the resources they need, and then they will build a more permanent settlement arrangement for all people concerned, who are staying on, if they decide to stay on.

The partical dismissive technologies and remissive technologies, for foods, and medicines, and other items that are needed, for continued

survival, and for all other required purposes according to the specifications for the sexaling for a living programs, will all be provided to the participants who wish to stay on, and houseing for them, as well, will also be included. Parks will go up, and so will many other locally needed facilities. Many things will disappear, as my kids will partical dismiss the things and structures they need to remove, as they construct the new area, for all persons staying on in Las Vegas. My kids have a list of all the names of all the persons who may, if they decide to, stay on in Las Vegas, and not all of them, are local people, so you should all check to find out whether you name is on the list or not.

All other persons, who are to be moving on, and all persons who do not wish to stay on, here, will be required to move into my childrens' present facilities, which they will continue to expand as we continue our program on this planet.

We will eventually clear every one out of the area, inside and outside of Las Vegas and the Valley, and surrounding areas, and the world over, except for the persons whose names appear on the list, as houseing can be provided above ground, for participants in the juices spilling and areas purifying operations, by my children, if those persons wish to stay on and participate.

All other people will be required to move into the facilities my children have, and are continuing to upgrade, and expand, in their encapuslated living environement, in which, many people currently live.

Persons in the encapsulated living environment, may also attend the collection site area activities, and future clearing activities, for purifying the areas with their pure, holy, powerfully cleansing, purifying, cleericating [cle-er-i-cating], and GODLY energies filled, sexaling juices.

Cleericating means, the same thing as clearifying. It is just a slightly different but related word from another a variant language of English, and to cleericate basically means the same thing as to clearify.

When we get the areas, cleared enough, and purified enough, my kids will then start building things for the participants. All others will move below ground, and live in the encapsualted living environement, until they have earned enough money, with their friends, as talked about earlier, to purchase a lease on land, and acuire the lease on resources needed, to build a home, etc., for a large group of people, who will be living together, and working together in the sexaling for a living programs, and so forth.

When Will This All Begin?

As soon as people begin to comply, we will begin our efforts to clean up Las Vegas, to begin with, and then, the rest of the world, and

then, the rest of our universe. It will take a long time, as we need to spill our juices, the lay persons, anyway, for some time, to come, as our universe is quite large, and so is the rest of it, that we are going to be recovering.

My Spilling Of My Purifying Sexaling Juices, And My Spilling Of My 'Prayer Time' Purifying Juices

I spill my juices, only for religious ceremonialing activities, during certain relgious ceremonies, and I don't spill my juices, on the properties, as I'm not set up to spill my juices, on the property, now, and will not be set up to spill juices, until I find an excuse for that, and an excuse for performing a religious hand prayer signaling ceremony that will require my spilling of my juices. It's pretty hard to spill juices, when there are no other persons working with me, and I do not work with lay persons, unless they are confirmed by me, and so there will be maybe, some confirmations, but not neccessarily so, as I do not know who is going to wish to be confirmed, and by the way, who ever it is I confirm, must realize that I am the Mother and Father of all human beings, animals, and living beings, and the Creator of my universe. There are not that many people who understand that, except for my kids, my working, unionized kids, and so it will be some time, yet, maybe a few hundred or more years, before some one realizes, 'Hey, he IS the Mother and Father of all human beings, etc., etc., etc.,"

Spilling 'Prayer Time' Spittle Generated While Praying

Until then, I'll use my spittle juices if I need to drop or drizzel any juices, that I generate while I am religious hand prayer signaling, as I don't like or care for the idea of jerking off in public, to spill purifying juices, in public, regardless of the fact, that I am GOD, so it ain't going to happen, any time soon. When I find a authentic 'believer' who realizes and understand that I am GOD, and so forth, I'll begin my public spilling of sexaling juices. I don't mind it in private, but it is not going to happen in public.

Monkey Babies, Jimmy Carter, Oliver North, And The Lesbianists' Conspiratorial Bullshit Stories Of Adam And Eve, And "Jesus Saves"

Most people do not know this, but many births end in tragic loss of the child, because Jerry Falwell, Oliver North, Jimmy Carter, Ronald Reagan, George Bush, Jr. George Bush, Sr., and the rest of them, order and expect all the Lesbianists doctors to kill all babies born to people which do not look human.

Doctors at birthing hospitals also comply, quietly, as it is hospital policy they can not break. If they go against it, they risk losing their job, and possibly losing their life. This is not a joke, and it is the Lesbianistgs policy of having all birthings in hospitals exactly for this reason, for disposing of non human looking babies, at birth, so that their bullshit creation by God, of a 'pair' of people,

Adam and Eve, and that "Jesus Saves all good Christians", can not be contested, by logical proof of non human births to human being couples, or single parent women or girls.

Abominant kids are born every day to my kids, on this planet, and they are all executed, or killed off by the local citizens, by their fright and fear of 'ghouls and ghosts' and 'goblins' in the night that go, 'Boo!'. These idiots, both the abominant South Americans, Central Americana, and all my other abominant kids, North American, Europeans, Russians, Chinese, Japanese, Thai, Philipine, and so on, must ask them selves why they are blessed with babies which are either not human or are abominant humans, or part animal humans.

If they ask them selves these questions, they will find out the only answers are that these people born to them, are my children, and my children are born to them for reasons that have not been disclosed to them, before, by the clergical societies, i.e, the religions of the world, and by the other societies, set up by the Lesbianists, or by societies nurtured along as part of the Lesbianists' 'tragic comedy' of their toying with your lives for their humoring themselves, and for their amusing themselves.

Once we get rid of the Lesbianists, and their ways of doing things, we will begin to see babies that are either not human, or are only part human, in animal bodies, and they will be born to all of you who are tummy mommies, and tummy daddies, if you birth enough children, to find out. How many is enough? About one in forty or fifty by my estimation, but depending on the person, it may be between thirty to eighty, from one person to the next.

Take that to our pastor, and tell him or her, to stick it up his or her ass. It is the truth that animals are born to humans, all the time. Not only that, but abominant kids of mine, usually of the apey kind, but not always, are born to the 'normal' looking humans on our planet, and in our universe.

We need not be afraid of these children, as animals, can be collected and put into zoos, and animal humans can be raised by the parents, or parent, in the case of a single parent.

In time, we will adjust to this reality, and we will raise fine children, abominant animal humans, or human appearing abominant children. That means you are all abominants, and the Lesbianists are laughing at you, and at themselves as well, as they go around and kill and cravenly torture every possible person they can.

We will put an end to their craven ways, and we will make a wonderful universe for all of us to live in, in peace, and serenity, once we get started practicing my religion, and once we begin erasing, sufficiently, our karma and our karmic markups, with your purifying sexaling energies, prayers, and other activities, such as syncopated dance, syncopated excercise, syncopated sexaling, and so forth. You

time it to the metronome at one thirty seventh, for now, and that will be fine. In time, we will get accurate metronomes, and then we will chance the pace, just ever so slightly, to push my kids along, as I explained about, for our wholesome and healthy universe, for all of us to live in, together with each other.

Punishment For People Who Practice Voodoo Religions Is Dismendment, I.E., Death

We will not be killing or executing children any more, at hospitals, or at homes, or in primitive, backwards towns and villages, or rural hideaway villages, where voodoo religions muster the people into peculiar states of mind, where they become entranced, and then begin mindlessly, acting like chickens, and birds, or fowls, or hippos, and so forth. There are too many of these types of so-called 'religions' in this world, and we are out lawing all of them, and punishment for adhering to them, will be a trip to my Epcot Center, as I have my children particle dismiss their bodies, and then dismend them, bit by bit, into their base components, and then have my children whisk them into my Epcot Center.

We will bring every one up to the level of education every one needs to be at, to better understand my universe, and those who persist in abandoning their obligations, will be dismended with out further notice, after they are sent their last warning ticket, from my kids, in accordance with Gurkian Law. That also applies to the Lesbianists, and to every one else, who is unable to get the picture here, and get with the program. There will be no exceptions. And, this is not a joke.

My kids have courses for you to educate your self in, to pull yourself out of the past Lesbianists' way of life and thinking, and into the new and current, reality, that we will be living in, for ever, from now on.

Local Businesses Will Have No Problems At All With The Collection Site And Will Have No Problems At All With The Activities Of The Faithful At The Collection Site

Walgreen's is across the street, on one corner, and Home Depot is on another corner. I don't think Walgreen's will have any problem with you using the site for your camping, for your meeting with others, for your sexaling with others, and for you and your friends' purifying sexaling activities in that park, i.e., the collection site.

Home Depot, I don't think will have any problem with your use of the parcel of land, either, for those purposes.

What To Do If The Police Come?

Now, if the police come, and I'm there or not, I don't know what they'll say, but they have not got any right to say any thing to any one. Is that clear, Mr. Mayor of Las Vegas, and every one else in the

area. I hope it is, as I am not going to stand for your interference or any one else's interference in my religion and in the relgious activities of people who wish to participate in my religion, sexaling to purify my universe. IS THAT UNDERSTOOD, MR. MAYOR AND EVERY BODY ELSE? I HOPE IT IS! AS A 'NO SIR' WOULD BE UNACCEPTABLE!

Now that we have an understanding, I think there will be no problems, and if there are, I will see what I can do about it, by calling my kids up, with my religious hand prayer signaling ceremonies, to see what they can do for you, to help you out, and to break the backs on law enforcement officers, and the Mayor of Las Vegas, and every other person, Lesbianist or not, who tries to interfere with me, or who tries to interfere with the people practicing my religion.

I will not stand for any interference from any one, including Mr. George Bush, Jr., the current president of the United States, or any one else, such as the Mayor of Las Vegas, or the Governor of Nevada, or the Nevada Highway Patrol, or the Nevada Sherrifs Dept. or the Las Vegas Metro Dept. or with any other persons or parties, such as the Las Vegas Gaming Commission, or any other Lesbianists' or Lesbianistic organization set up by the Lesbianists, and that means all you church goers, parochial school teachers, and students, and others, and if any one interferes with any one who comes to my ministry's claimed parcel of land that I am purifying for setting up my ministry, and if any one hassels any one there, than who ever is visiting the collection site, to help to purify it, you have my permission to kill the persons attempting to interfere in any way at all, on sight, with what ever you have to kill them with. Please dispose of their bodies in the nearest trash dumpster.

DO YOU HEAR ME? MR. MAYOR. YOU ARE A DEAD MAN IF YOU EVEN TRY TO SEE WHAT MY RELIGIOUS FAITHFUL ARE DOING, AND SO IS EVERY OTHER PERSON ON EVERY SCHOOL BOARD AND CHURCH OR OTHER LESBIANISTS' COMMITTEE. IS THAT CLEAR, EVERY BODY? GOOD!

You will not interfere with my religion, and with my religious faithful, and they will come to Nevada, and they will come to Las Vegas, and they will start sexaling on that property as they see fit. Does every body understand that? I hope so.

Now. Non responsive persons, who ignore my statements, will find themselves in trash cans, and trash dumpsters, every where in Las Vegas, and any where else, where there is a convenient trash can or trash dumpster. There are lots of them around, and people are throwing dead people into them, every day, across the country and around the world, and they all end up in landfill sites, and so there will be no added charges for our using the statewide Nevada Silver State trash retainers and containers, for however many others who need to be killed, and for my religious faithful to then place them into the trash cans and trash dumpsters.

No charges should be levied by any other Lesbianists' trash collection company, around the world, as they are all owned and operated by the Lesbianists, and we will not support them, in any way, what so ever.

If Mr. Mayor would like to be the first guest inside of one of the Nevada Silver State trash dumpsters, then he will try to interfere, in person, and he will be shot, point blank, in the center of his head.

You will then kill him with three fivers, to make certain he is on his way to my Epcot Center, for his next trip out as a tummy baby. If the Governor of Nevada wishes to interfere, then he does so at the risk of being shot, killed, and made certain he is dead, with three fivers, and then after that, he will be deposited into a local or state trash dumpster, either here, in Nevada, or in California, or Arizona, or where ever it is convenient to dump him into a trash can, trash container, or trash dumpster.

Lesbianists Enjoy Eating People, Who Are Alive, As Well As Eating The Bodies Of Those Who Are Dead

You should let the state's vice mayor of Las Vegas's office know, who was shot, killed, and confirmed dead, after depositing three fivers into his or her head, and then where the body is, and generally when the body was dumped, so that they can get an idea of how decomposed the body is, and whether or not the body is in a land fill site. They can then check on it, and verify that the body will make it to the land fill site, if it isn't already, there, where all the other bodies, are ending up, unless they have already happened to have beeb eaten up by the Mayor, or by the friggen Governor, or by the Sherrif, or by another Lesbianist.

All persons are free to travel to Las Vegas, and they are invited to stay at the parcel of land that I described, and they are invited to make it into a nice camper trailer area for recreational vehicles, or for what ever other types of outdoors camping vehicles, travel trailers, caravan buses, or any other types of camp site temporary stay, housing and living arrangements you would like to use the area for.

Every Game Of Chance, Gambling Machine, Or Slot Machine Is Rigged, In Every Casino Around The World, With Only A Few Exceptions

If you will all sexal, regularly, to the best of your abilities, and help me to purify the area with your sexaling, undisturbed by any one, and clean it up with your purifying energies, you are more than welcomed to come and enjoy the area, and see what fine attractions, will be leaving Las Vegas, in the not so distant future, including the gaming commission, with all their phoney, rigged gaming systems, that the Lesbianists control.

The Lesbianists' Articles Of Participation

The Lesbianists have every game that you can possibly rig, controlled by electronics devices, or by slight of hand, mechanics, who control

the gaming rooms, and gaming halls, so that only Lesbianists win any money, that is worth mentioning about, and so that the Gaming Authorities, and the Mayor's office, and every other Lesbianist organization in Nevada, who has any one in their office, can then go and get the money the Lesbianist won, and get a percentage of it, given back to them, as they have arranged to do that, as that is part of their oath, and part of their sworn promises to do, as that is written out in their articles of participation, their rules for living upsite, not down below, in the labrynthine cities, and every Lesbianist must follow those rules, and when they win the Megabucks, and every Lottery in the world, they must give back money to the Lesbianists, as every game of chance that is run in this world, except for bingo, is rigged. However, even Bingo is rigged, in some ways, by people switching cards that look like winning cards, while players are not looking, and by other naughty tricks.

Every Lottery In The World Is Rigged

Every lottery in the world, performs the drawing out of the balls before a live audience, in most cases, before they actually air the show, and they have illusionary tricks they play, with the technologies they have, and they sucker people out of their money, daily, around the world. Las Vegas is no different, and they sucker every one out of their money, except for the Lesbianists, and they let some people, win now and then, small jackpots, on the gaming machines, and then after a winning streak, they set the machines the person uses, so that the person can not win a dime. They have the technologies for rigging every machine in Nevada, and across the country and around the world, so next time you visit one of their casinos, be sure and detonate one of our bombs, you can make, and destroy that casino. Is that understood? I hope so, as every day, millions of people are being suckered out of their hard earned money, they pay taxes on, through the nose, till they are practically choking, and the Lesbianists take it, and support their folley and games. They also support their folley and games with your revenues, that they make sure you lose, at every casion, and at every gas station, with a convience store, that has gambling machines in it, for you to deposit you money into.

Every lottery in the world is rigged, and so if you spend money on it, if you are not a Lesbianist, you are just throwing your money away.

No Fair Play In Nevada, And No Fair Play In The World

There is no fair play, here in Nevada, or any where else, in the world, and I would like you all to know that, and become aware of that, and then I hope you will tell your friends about it, and then I hope you will destroy every single last one of their casinos, and gaming machines.

We are not going to allow them to continue their frolicking at your expense, and we are going to destroy every last one of the

Lesbianists, as soon as we can.

If they prefer to surrender themselves to my kids, than we can allow them to live. However, if they do not surrender themselves to my kids, then we will kill them all. And there are no 'maybe's' about that.

Sniper Shooting, And Miscellaneous Information

You have my permission to sniper shoot any police officer, park ranger, sherrif, or other person, plain clothesed police officer or detective, with or without a gun, on sight with your scoped rifles, and targeting assistant who will determine range, from your bunkered in the hillside, shooting site.

Any hotel in the area, which might harbor shooters from local police, sherrif, or SWAT team operations groups, you have my permissions, and blessing, or go ahead, and my 'okay, and 'approved for action' sight of appeal.

Sight of appeal means, my blessings, based on your determination as per your good judgement.

One hotel that is clearly the most convenient, and the closest with in shooting range, at close range, is the New Orleans Hotel. Hotels within shooting range, at a distance, are the Palm's Hotel, The Rio Hotel and Casino and its seperate tower wing, and a few others, off in the distance. You'll have to come and look at them from the approximate location of the site after you determine where every thing is, to locate and determine for your self which hotels and towers need to come down, and what you will need to bring them down.

There is a tower off in the distance, a new hotel, that is going up, that I do not know the name of, but is clearly within shooting range, and needs to come down, and people are on it, daily, welding, and you can't miss it, if you look in the north easterly direction from the site.

There is the Stratosphere Hotel and Casino, which also needs to come down, which is further over to the west from the new hotel wing that is going up. There are many scaffoldings in the area, that also need to come down with explosives, fracturables rocks, fuels, chlorine, and high temperature minerals particles ignition, and particles burnings bombs.

There are probably a number of other landmarks, hotels, casinos, bars, restaraunts, trailor parks, trailors, houses, apartments, condominiums, near or off in the distance, that also need to come down, and need to be demolished with my light weight explosives fuels, gunpowders, metals particles, and chlorine plastique explosives bombs.

You will destroy them all, and you will come prepared, or be prepared to acquire all the demolitions needed to destroy them all, as well as to destroy all the local police and sheriff's many Metro offices, SWAT

Teams offices and units, Fire and Rescue Ambulance units, Lesbianists' Hospitals, and other Lesbianists facilities, throughout the Las Vegas Valley, Henderson Nevada, North Las Vegas, Pahrump, Mesquite and the whole Southern Nevada, westward to San Diego, California, northward to Los Angeles, northward to San Francisco, California, northward to Berkely, California to Oregon, and Washington State, and back down to Reno Nevada, Arizona, New Mexico, Albequerque, Houston Texas, Dallas Fort Worth Texas, and all areas where there are tactical SWAT team units, military units, militia units, as all militias are organized and operated by Lesbianists, despite popular beliefs that they are independent of the government, and anti government, as we often see on the "TV for the Brainless", as they are often refered to, i.e., the general public.

You will destroy all law enforcement offices, and personel, and all military and militias. All governments, their offices, and employees, are to be destroyed, and all personel are to be executed, except for those who take it upon themselves to execute the Lesbianists among them.

My kids have a full list of all the places and structures that need to be destroyed, and demolished, and so please see them for that information.

And to repeat, your orders are to kill the president of the United States, George Walker Bush, Jr. and all of his and his wifes' Lesbianists' associates, pretend relatives, and friends.

We are not going to let this stand, another moment, and if they do not surrender to my kids, you are to execute them all. My kids have a list of names, of those, who have not surrendered, as yet. Please see them for and ask them for that list of names of persons who have not as yet, surrendered, and who need to be executed, post haste, immediately, or, ASAP.

United States President George Walker Bush, Jr., is no exception to this, as he has not surrendered, as of yet, and that is confirmed. Neither has any of his colleages, or congressional office holders and diet or congress members, except for Ted Kennedy, and one or so others, and maybe a cabinet member, one or there abouts, but I haven't confirmed that, yet. There are some members of the congress who are not Lesbianists, and you can get their names, on a list from my kids, as well.

Captain Off The Bridge.

Texas's Lesbianists' Latest 'Vaccine' And Texas's Attempts To Destroy Women's And Girls' Vaginal Lining And To Destroy Women's And Girls' Cervical Lining, Causeing Stillbirths To Increase, So As To Prevent The Successful Birthing Of Children - Latest Lesbianists' Vaccine Will Cause Numerous Problems - Execute United States Of America, State Of Texas, Governor Perry And Family - Underground Books Distributor's For Militia Types Folks - Information On Bombs Making And Detonators On The Web - Solar Flares And Flare Igniters - The Lesbianists' Balooney On Minus Charges As Opposed To Positive Charges - The Lesbianists' Maps Of The Brains - Execute The Current President Of The United States Of America, George Walker Bush, Jr. - Lesbianists Who Decide To Sexal In My Religion With Lesbianists And Non-Lesbianists' Persons - Citizens By Proxy - Temporary Full Time Citizens - What To Do About Untimely Pregnancies, Health Issues, Medicines, And Regroverative Formulas - Medical And Housing Benefits, And Other Health And Work Related Benefits - When Can People Begin To Come So As To Be Able To Participate? - Sniper Points, Places Where Snipers Shoot From - Pocket Knives, Construction Tools, And Miscellaneous Daily Life Management Tools And Equipment - Hookups For Travel Camping Vans And Similar Vehicles - Cleaning Up The Area And Throwing Away The Garbage - Schedule For Leveling Of The Ground And Hills In The Area, Removal Of Unsightly And Smelly Garbage - Setting Up New Facilities - Fountains And Showering Lamponeers - Restaraunts, Clubs, Lounges, Eateries, Cafeterias, Bars, Pubs, Bicyle Paths, And So Forth - Dealing With Criminally Minded Persons - Alterations, Modifications, Changes, Clearing Up And Removal Of Garbage In The Areas, And Additions Time Schedules Updated: 12-02-07 Rev.a.00.a 02:30 PST

Texas's Lesbianists' Latest 'Vaccine' And Texas's Attempts To Destroy Women's And Girls Vaginal Lining And To Destroy Cervical Lining, Causeing Stillbirths To Increase, And To Prevent The Successful Birthing Of Children

The latest attempt by the Lesbianists' governments of the world, near by my computer window, on the internet news services, to destroy and toy with the human population of this planet, has been launched in Texas, and is targeted at women and girls, and their ability to have children.

See the article at the end of this post.

The new vaccine, which is mandated by Governor Rick Perry, who signed it into law, and is now obligatory, unless you protest it, and go to

court, and spend years fighting it, as an individual or small group of claimants, will destroy the vaginal cervical collar and the lining that holds every thing in place, and supports the interior of the vagina, thus making it impossible to carry a fetus to term. The vaccine is also targeting the brains fibers throughout the human body, and the fibers of the brains in a woman's or girls' body will slowly rot, and decay as they are eaten up by tiny animals that eat these energies conducing fibers, synapses, relay switches, and other related energical brainal related things and dings thoughout the body.

Latest Lesbianists' Vaccine Will Cause Numerous Problems

It will also speed up the eating away of the enamel of the teeth, and of the bones in the woman's and girl's body, her fingernails, and her skin membranes NS membraneous tissues throughout the body, and on the exterior of a woman's and girls' body, making the women and girls grow older looking at ever more younger ages, and making women and girls susceptable to skin cancer, melanoma, herpes, genital warts, other infestations of animals in the skin, and other skin related membrane destructing colonies of animals, that they use from out of their Bio Chem War encyclopedia of how to destroy human beings, with poisonous and health problems causeing crystals cages animals of all kinds. Especially numerous are the Bio Chem Warfare crystals cages animals of the petroleum industry's based kind.

The vaccine is no different from any other of the Lesbianists vaccines aimed at destroying the health of the people who live on this planet. It is compared to the 'polio' vaccine, in the news article, and that was similarly an attempt at destroying the health of the human being, by making the human being incapable of haveing any sexual orgasming capabilities, by killing off all the sex related animals and bugies in the body, which make sexaling juices, that make eroteming and orgasming possible.

Thus, this latest attempt at destroying the health of the people who live on this planet, locally, in Texas, and that I know of, anyway, is nothing more than the Lesbianists toying with the people who they are here to amuse them selves with by destroying them, little by little, over a long period of time.

Execute United States Of America, State Of Texas, Governor Perry And Family

This will not stand, and you will all destroy the capital of Texas, and Governor Perry's mansion, and the Governor and his wife, and their family, pretend or otherwise with my fracturable rocks and fuels chlorine and explosives, etc., bombs, that you will make in your home's garage, or workshop, safely.

Underground Books Distributor's For Militia Types Folks

Use the delayed timer invention, that is a workable time delay detonator, that I've explained about, especially if you use black

powder gun powder, mixed with axel grease, turpentine, benzine, chlorine, using also some Elmer's glue, prior to mixing with chlorine, and then set it in a warm cupboard, to ferment for a few days, to then turn into a nice plastic explosives mixture for detonating with the string of flash bulbs wired to the alarm clock trick, as described by Ragnar or by one of the other bombs making specialists, in their sub culture literature for militia types folks, who wish to destroy the government.

They find the list of names of all the people who request the literature, by mail, and then they go and watch them, with their surveilance technologies they have, and then they either capture and torture them, and then kill them, or they just make sure they are die, in a fatal car accident, or whatever.

Paladium Press is one of the Lesbianists' book publishers, and there are others, and this one is affiliated with the National Rifle Association, a Lesbianists organization.

This publisher has titles sold to underground books distributors, and you can find a number of underground book distributors on the internet, which carry more titles than Palladium press.

Delta Press, who publishes their books and paraphenalia distribution listings magazine, 'Delta Force' is one of these distributors of interesting underground literature.

http://www.deltaforce.com/catalog/page30dp.html

'Home Made Fireworks', is one web page to look at, if you have the time.

http://www.deltaforce.com/catalog/page28dp.html

'Booby Traps, Explosives and Black Medicine', is another useful page to look at, as well.

http://www.deltaforce.com/catalog/page30dp.html

There are a number of other distributors of underground literature, and some have better selections than does Delta Press.

In any case, with a little research, there are plenty of 'timed detonation devices' drawings, and explanations, for you to view, and learn from, that will help you to construct a timed detonator, that will allow you to safely set off one of your plastiques bombs made with my explosives formulas.

Paladin Press, you can find their books at Amazon Books on the web, another Lesbianists owned corporation, is another publisher of interesting underground literature, that can be useful for you to study and learn from.

Paladin Press can be found at, http://www.paladin-press.com/

Books for supposed 'Professionals' who are anti terrorists professionals, that allow them to detect the different types of bombs people can make, and then use to destroy others, is sort of a tounge in cheek joke of the Lesbianists, for luring in people who wish to find information on bombs and explosives.

There are many useful books published to help beginners understand the basics of bomb making. The idea is to use the information for professionals who wish to understand the craft of making bombs, and detonating devices, and then use that information to build your bombs and your detonating devices.

The flash bulbs wired to an alarm clock with matches and ignitable phosphates glued to a string of flashbulbs, wired properly together, then crushed, so as to expose their flash and heat ignition coils filaments, for your detonating heat energies ignition needs, is one of the basics and you can find it in one or another of the underground books on bombs making and detonation devices making for 'professional' anti terrorist's private investigator or bombs detection professionals types.

This is one of the ways the Lesbianists lure in persons who know nothing about weapons, and then they find out who they are, and then they make friends with them, and toy with them, and introduce them to their Lesbianists' friends, and hang out with them, and pretend they are all friends, then one day, they all attack the person, and torture the individual, and get their kicks, amusing them selves, by ripping the person up, or by hanging, and nailing the person to a wall, with a nail gun using, approximately, three inch nails, and then hammering in longer, seven inch to twelve inch nails, or larger ones, or other similar nonsensical, childish, but fiendish behavior.

The "BRUTAL ART OF RIPPING, POKING & PRESSING VITAL TARGETS"
"by Loren W. Christensen"
http://www.paladin-press.com/detail.aspx?ID=1441

Is a beginners guide to ripping people apart, one arm, or leg, at a time, or with team work, one half of a person can be ripped from the other half, if you hold the right bones in place, and then, using teamwork, rip the person into two or more pieces. This book gives a person a preliminary sense of what he or she can muster, as an individual who attempts to rip at a person, and tear the person apart, one limb at a time, or with friends, how to rip a person up, one piece or more, at a time. Ripping people up is accomplished best, if they are unconcious. If they can not fight back, or resist, it is easy to rip a person apart, if you have the needed strength. Since many people have ancestors who were monkeys, chimps, orangutangs, guerillas, and so forth, with tremendous muscles strength, there are lots of very tiny persons, with phenomenal strength, and they can easily rip a person in two, by them self, if they try.

Books on booby traps for law enforcement personel, are simple descriptions of bombs that they may or may not encounter, and there

may be some useful information in some of them such as,

"BOOBY TRAP IDENTIFICATION AND RESPONSE GUIDE FOR LAW ENFORCEMENT PERSONNEL"
"by Tony L. Jones"
"This manual teaches cops and other law enforcement personnel all they need to know to recognize a booby trap and respond properly. Find out where booby traps are most commonly employed; the 11 physical signs that most often signal a trap; what to do (andnot do) if a trap is suspected or found; how to safely search a building, outdoor site or vehicle; and the one indicator that practically guarantees that a building has been booby-trapped. Shows more than 90 different booby traps in place. For academic study only. 5 1/2 x 8 1/2, softcover, photos, 80 pp."

There are others, which you can also find, that will provide schematics, and drawings of useable ambush related devices, and detonators for them.

"Contingency Cannibalism", sold through Paladin Press, and other 'underground' book distributors, is one of the Lesbianists' favorite books, that help them to track persons who they would like to later, cannibalize, themselves, as a joke on the person.

"CONTINGENCY CANNIBALISM"
"Superhardcore Survivalisms Dirty Little Secret"
"by Shiguro Takada"
"This twisted, tongue-in-cheek look at cannibalism as a last-resort survival option analyzes real-life case studies and historical episodes of cannibalism. Then it examines the hard-core decisions and gruesome details one must know in order to partake in this grisly practice. Recipes included. For entertainment purposes only. 5 1/2 x 8 1/2, softcover, 160 pp."

The Rusksack, "Survival Information Clearinghouse", is just one club of members of mainly Lesbianists, who have fun toying with the people who live on this planet.

http://therucksack.tripod.com/survival.htm

Information On Bombs Making And Detonators On The Web

For information on making detonators, and other bomb related stuff, please see this web page as it costs nothing.

http://www.bombshock.com/archive/Homemade_Bombs/

Solar Flares And Flare Igniters

A solar igniter as talked about in the article on page,

http://www.bombshock.com/file9/crtrmkr.txt-Crater_Makers-932.htm

'Crater Makers', is a solar flare igniter, a device that is used in solar flares, or night time distress signal flares, that ignite the flare, by sending an electric battery current into the flare phosphates holding tube, down a wire, on an ignition circuit, and then igniting the distress signal flare.

You can find solar igniters inside of distress signal flares that are used on boats, for shooting up into the air, with a flare gun for maritime use, that will send the distress signal flare up into the sky, if you have the flare gun pointing in that direction, and then at a certain altitude, a trip switch circuit is activated, due to air pressure, or due to timing from time of departure of the distress signal flare from the flare gun barrel.

You have to exhibit extreme caution, when taking a flare apart, as it can detonate, accidentally, and they are not made in a way so that people can safely take them apart, and people who try to take them apart, are accidentally injured, on a regular basis. Do not use this, if you do not know any thing about demining, as a professional mine deactivating specialist in the military, or with military training. This is best left up to the professionals, and is not meant as something the average house wife, business man or business woman, or chemistry or other studies, school student, should attempt.

You can use a flash bulb, and get the same results, if you glue some gun powder and phosphates to the flash bulb housing, and then crush the glass, and then wire it properly to a common house morning wake me up, alarm clock with a striker bell and a striker that moves back and forth. The circuit is simple, and you can figure it out with little difficulty.

The Lesbianists' Balooney On Minus Charges As Opposed To Positive Charges

Remember the minus sign on a battery is where all the activity of the little energies kids is going on, and the Lesbianists purposefully teach that the positive side is where the current is moving out of, and around towards the negative side of the battery. The Lesbianists teach that the active side of the battery is the plus or positive side, or the side with the plus sign on it, when you look at a common house hold nine volt battery, and that the non-active side is the negative side, or the side of the battery with a minus sign. This is false. The side with the minus sign on it, is the active side, and that is where you do not want to wire any thing to, unless you know what you are doing. The positive side has no activity going on, and is safe to touch, but the other side is not safe to touch, and the testing meters are wired to show you that the reverse is true. They have tampered with the design of testing meters, so as to support their allegation and falseity, that the minus side is where there is no activity, contrary to the truth.

That means, that, the flash bulb igniter system and the flash bulb itself should indicate that one side is the positive side, for the

positive wire to be attached to. You had better check carefully, and make sure there is no mischief here, as you do not want to detonate your igniter, accidentally. Ask a qualified electronics specialist to do all your wiring of your detonators, as he or she is the only person qualified to wire these types of detonators.

The Lesbianists' Maps Of The Brains

It's rather confusing, the way the Lesbianists have reversed things, and have messed around, so as to thwart your attempts to make nice detonators that work every time, unless you have a normal set of brains, which unfortunately, I have not got a pair of, or triple set, or more of. That's sort of a joke. On a magazine, yesterday, I saw how the Lesbianists teach that one part of the brain is for speech, and one area of the brain is for speaking, and one area of the brain is for sight, and one area of the brain is for logical thinking, and one area of the brain is for signing, or one area of the brain is for artistic inventioning, and so forth, but that's a lot of hog wash.

The brain is not partitioned in that way, and they know it, and they are misleading every one, and laughing at all of you while they are doing it, with their 15th to 17th century style drawings, that they have plastered on all the Time magazines, or what ever magazine cover it was on, that I saw in the check out lane, at the super market, yesterday. You have kazillions, and more of parts to your brains, and there are so many, it is unlimited, nearly, and your brains are so complex, and you have got brains in lots of other places in your bodies, other than in your head, and I'm not going to go into that one, now, but the Lesbianists are lying through their teeth, when it comes to this type of pseudo historically backwards, archaic, or cave dwelling human's notions on science, that should insult a first grader, or kindergarden school student, or preschool student.

In any case, ask your local electronics' specialist or house hold electricians' specialist, or handy man repair persons, who work for house hold water heating devices installation companies, or other electrical home appliances sales and installation companies, who also get confused, from time to time, as I've witnessed them, personally, blow up breaker circuits.

Get a qualified, and that's hard to find in so far as I've witnessed them at work, electronics' specialist to wire your detonators, or go take a course with my kids, as they have courses available on wireing such devices.

There is no minus charge, and there is no positive charge, and that is what you should understand. There is a side to the battery where there is lots of activities going on, and that is the minus sign side on the battery. The positive sign side on the battery is where there is little to very little or nearly no activity, but no activity is not the truth, either, as there is activity, you just can not measure it with todays' electronics measuring devices, as they are not

technologically sophisticated enough to be able to detect the activity, though I'm sure there have been intrepid scientists who discovered that both sides of the battery have activity, and then they were shot and killed, after that discovery, by a Lesbianist assasin, or by a hired assasin, assigned or paid to kill the scientist who discovered that there is activity at the 'minus' side of the battery as well as at the 'positive' side.

That means, that you need only concern your self with the 'minus' side, since you will not be able to detect any thing at the positive side, unless you use the reverse wired electronics and electrical energies detection devices that the Lesbianists market through Tandy, or Radio Shack, and at Sears, and so forth.

It gets confusing, a little bit, doesn't it. Anyway, go and take a course at one of my kids classes, after you sign in, and swear in as a jr. member to our new country, which I haven't sworn on to, as yet, or joined - but though I am the boss of, regardless - since my kids do not speak to me, on a daily, or weekly, or other basis, and I just happen to be able to know what they are doing as they tell me what they are doing, through some secret port hole in one of my brains some where, in my toes, or nose, or who knows where, as they telegraph or some how signal in, using semiphore signaling, or probably hand signaling, that my brain then catches, and then passes on to me, their messages that they signal in to me, and the news, as well, about what they are doing, and about what is going on with them, and about what is going on with some other things, as well.

Since I am GOD, I happen to have a right to know this stuff, what they and every body else is doing, on a daily basis, but they haven't told me how my brains catch their information, yet, or the other information that gets there, some where into my one or more of my brains, and I haven't figured it out, yet, myself, either, though I think I know something, a very little something, about how it works.

This does not mean, that my brains are unreliable - except for my memories areas of my brains, in particular - but that I am just waking up to what is going on, here, and I have a few kazillions of years to work out every thing, or some of the basics, any way.

In any case, you have all been snookered by them, with regards to their non sense sciences, and you are being laughed at, and toyed with, daily by them. That happens to be the truth, whether we find it pleasant or not.

Execute The Current President Of The United States Of America, George Walker Bush, Jr.

In any case, the Lesbianists are a twisted group of individuals, who toy with the people who live on this planet. Mrs. Hillary Clinton, Bill Clinton, George Walker Bush, Jr. President of the United States, his wife, Barbara Bush Jr., George Bush, Sr., former president, and

his wife, Barbara Bush, Sr, are all gagsters, or jokesters, who wish to only toy with you, and eat you, or deprive you of your life, and of your rights, in fiendish and horribalistic ways and manners.

They are all to be executed, especially George Walker Bush, Jr., President of the United States of America, currently residing at 1600 Pennsylvania Ave. Washington DC, in what they call the White House. You are to kill them all, and send every last one of them to my Epcot Center, as soon as is convenient for you.

Lesbianists Who Decide To Sexal In My Religion With Lesbianists And Non-Lesbianists' Persons

If any Lesbianists decide to sexal in my religion, with their friends, and their friends may include other Lesbianists who decide to sexal, as well, as well as, other people they know, then they may begin sexaling with their friends in my religion, however, they must have a pentative attitude, and they must say they are sorry, and they must now and then, when they feel they wish to, and feel emotionally and mentally capable of speaking about it, they can talk with their friends who they are sexaling with, and with others who wish to listen as well, and they can denounce the Lesbianists by telling people about the things the Lesbianists do, and did.

If they decide to do this, this is the same as surrendering, and my kids will protect them from other Lesbianists who might want to harm them. They have not sworn in, as a citizen of my and my kids' country, and as citizens of our country that every one is swearing in to as citizens, but it is sort of a promise to swear in, informal gesture that they are committed to, once they begin sexaling with their friends, and with other Lesbianists, who also wish to sexal and in time, denounce the Lesbianists with them.

Citizens By Proxy

By denouncing the Lesbianists organization, and by telling people about what the Lesbianists do and did, they are essentially stating they are sorry for what has happened, and that is a pentative attitude, and with that pentative attitude, they are accepted as citizens, by proxy.

Temporary Full Time Citizens

Citizens by proxy means they are accepted by my kids as pentative persons, who wish to join our country, and who there with, qualify as citizens of our country, in an informal manner. Citizen by proxy means, they give up their old citizen ship, to whatever government they used to belong to, and they are taken in, as temporary full time citizens.

Temporary full time citizen is a term that means they are full time citizens, but on a temporary committal agreement, and that will be made permanent when they have the chance to meet with my children, and

then can swear in, as a permanent full time citizen.

They can then participate at the collection site, in the activities that will be going on, with others, who wish to participate, as they spill their juices, and purify the area with their sexaling juices.

What To Do About Untimely Pregnancies, Health Issues, Medicines, And Regroverative Formulas

My kids will deliver to them, to the men and to the women who surrender and become citizens by proxy, and temporary full time citizens, the needed medications that will help to make their bodies, wholesome and well, and regroverated, as well as the medications that are needed to prevent untimely pregnancies.

Medical And Housing Benefits, And Other Health And Work Related Benefits

My kids will make certain that they will be given the right medications, and my kids will also provide all the same medications for each individual who participates in the collection site activities to purify the area where we will one day set up my ministry with my kids assistance. My kids will also set up other facilities, as well as the ministry facilities. The other facilities will be scattered through out the valley, and they will be the houseing units and other facilities for people to use to become physically fit, well, and well nourished, and healthy, such as gyms, aerobic studios for practicing aerobic dance, and aerobic excercises, as well as sauna and health spa, and swimming, tennis, badminton, cricket, and other sports facilities for baseball, rugby, foot ball, for those who wish to play a friendly game of foot ball, now and then, with the needed bleachers, lighting, and other supportive facilities for allowing persons to attend and watch the games that are going on, not only for foot ball, or for base ball, but also for tennis, soccer, rugby, and all out door sports facilities that will be needed.

When will my kids set up these facilities? They will set them up at the same time or shortly there after, as my kids begin to set up my ministry facilities, and the needed facilities for living and working in the valley area, sexaling for a living.

At that time, the citizens by proxy, and all other persons who have not yet sworn in, but wish to, will have the opportunity to swear in, and then they can enter and use the facilities full time, twenty four hours a day, without any further discussion about it.

All people who participate in the collection site activities, are also citizens by proxy, and as such, will automatically qualify for all medicines, all health supportive medical formulas, and all youthfulness prolonging, or regroverative formulas, that will feed all the amoebes, and other cells, or living beings in your bodies, and that will feed all the living beings in your bodies, that will then allow you to enjoy full regroveration of your body and rejuvenation of

your youthfulness, youthful energies, and of all the other health benefits that accompany a youthful body, such as more energy, a stronger libido, a more healthful body, and so on.

When do people begin this participation in the collection site activities? As soon as they come out here, to Las Vegas, and arrive in their camper trailers, or caravan buses, or other vehicles, or with their camping gear such as tents, and cooking grills, and so forth.

When Can People Begin To Come So As To Be Able To Participate?

How soon can people begin coming to participate at the collection site in the activities that will be on going at the collection site for some time to come?

They can begin coming to participate any time. My kids will watch out for the safety of all the people who come to participate in the collection site activities. My kids will prevent accidents such as current Lesbianists shooting at people at the collection site, from high rise towers, scaffolding, tall cranes, or from hotel and casino properties owned by the Lesbianists, and from other tall condominium and also from tall apartments buildings and also from normal sized, two or three storey, to eight or so stories, apartment buildings, in the area. Of course, my kids will prevent accidents from happening such as shootings, from all possible locations, and not just from those named structures and locations.

Sniper Points, Places Where Snipers Shoot From

There is no need to blow or destroy them with explosives, in Las Vegas, as there will be no way any one can use those hotels, and other structures, as shooting or sniper points, places where snipers shoot from, to harm any one who is participating at the collection site, in the collection site activities.

In time, every thing will be worked out, and all the people who must hand over their companies, or disolve their companies, and sell or get rid of the assets of their companies, all of that will be in compliance with my childrens' instructions with regards to it, as I've stated about it, already, in brief.

Once the facilities are set up by my kids, and people swear in formally, then my kids can begin to pay people their earned income, for the work they did as they sexal for a living, and for their work, as they spill their fluids, to purify the collection site, the collection site area, and the general vicinity.

Pocket Knives, Construction Tools, And Miscellaneous Daily Life Management Tools And Equipment

No one needs to bring weapons to the collection site area, or to Las Vegas, as they will not be needed, and pocket knifes are okay, and construction tools are okay, but they will be for daily use

activities, only. Daily life management tools are forks, knives, spoons, chopsticks, plates, dishes, glasses, coffee cups, can openers, bottle openers, cork pullers, and these types of things, as well as all the other types of kitchen use tools for cooking food, for eating food, for drinking beverages, and for the collection of garbage, and food wastes, and for cleaning up their eating and cooking utensils, such as portable wash basins, and portable gas stoves, or fixed stoves, fixed wash basins, fixed showers in camper trailors, and in caravan buses, and so forth.

Hookups For Travel Camping Vans And Similar Vehicles

We have no hookups at the site, for water supply, electricity, or sewage, as yet, but the instructions that my kids will make available to persons who come in to my kids' underground facilities - the protected and encapsulated living environment - those persons who go in to recieve the instructions, and other information they must recieve on companies and assets, and persons moving on, and on persons staying, and other information needed to successfully carry out the removal of hotels, and the demolition of buildings, etc. which my kids will handle with the technologies they have available to them for their use for these purposes, and for other purposes.

Cleaning Up The Area And Throwing Away The Garbage

My kids will also handle the required steps for clearing up of the litter and garbage in the area, all of Las Vegas, Pahrump, Henderson, Laughlin, Mesquite, North Las Vegas, Arizona, New Mexico, California, Utah, and beyond, above ground and below ground, and for cleaning up the areas, and for removing the underground and above ground garbage, or city buildings and Lesbianists' structures, and all structures that are no longer needed, train tracks, airports, roadways, bridges, parks, hospitals, medical clinics, and so on, all of which will no longer be needed.

Schedule For Leveling Of The Ground And Hills In The Area, Removal Of Unsightly And Smelly Garbage

Initial leveling of the grounds' areas, leveling of the uneven surface areas, and leveling of the sloping areas, and of the tiny hills, and other uneven and unuseful features to the area, such as hills, low cliffs, and removal of unsightly, smelly garbage, will be done by my kids, with the technologies they have available to them, according to the schedule for making these types of changes, and cleaning up of the area, so as to make the area, one hundred percent, useable for collection site activities, for people to then come in and use the area as a collection site.

Setting Up New Facilities

My kids will take care of all of that, and they will take care of all of the work and tasks for setting up a private collection site area - for spilling purifying sexaling juices, to purify the area - in

accordance with my kids' schedule for these works and tasks for setting up a private collection site area, with tall side walls, and barricade walls, to prevent people from rubber necking as they drive by, so as to prevent car, truck, automobile, motorbike, and bicyle accidents. My kids will also set up the latrines, and other needed hygenics facilities, sleeping accomodations, eating facilities, rehydration facilities, co-opted bathing facilities, sports and excercises facilities, and other facilities.

Co-opted facilities means facilities used co-optively by men, boys, women and girls. Co-optively means, in cooperating measures with each other. Cooperating measures means, each of the four groups of people, men, boys, women, and girls, will work together, to keep the facilities sanitary, clean and healthful, neat and tidy, and safe for use, keeping young children from playing on the stairs for the elevated latrines, and keeping young children from getting in the way of asscending and descending users of the co-optively, or cooptively managed facilities.

Fountains And Showering Lamponeers

My kids will also use their high tech teletransportation technologies for removing toddlers from the stairs, and for placing them in a much safer location, such as in a near by sand garden, or play area, with sandy areas, and with toys to play with, and with cold showers, or showering fountains, people can refresh themselves under, and with fresh water to drink.

Lamponeers are showers that shoot up from sprinkler systems embedded in the paved surfaces, or concrete like surfaces, that shower water up and over the area, up and above and over persons who are there, to cool every one off.

Restaraunts, Clubs, Lounges, Eateries, Cafeterias, Bars, Pubs, Bicyle Paths, And So Forth

Bicycle paths, mini bike paths, walking paths, with rest stations, for refreshments and food, will be set up, and restaraunts and other facilities will be set up, nearby and they will be accessable by following these foot paths, bicyle paths, waling paths, and so forth.

All needed facilities for all parties, such as accomodations, living quarters, health clinics, excerize facilties, swimming pools, saunas, spas, and clubs for eating and mingling with persons, either in light weight evening wear and garments, or partially naked, or in the buff, will also be set up by my children for the use by all legitimate collection site participants. Gurkian Laws apply, and no other laws, such as local area laws, will be enforcable. Police and others will be turned away, and the rights of participants at the collection site area, will be protected one hundred percent, as we begin to change over to the new Gurkian Laws we will all be living by, from now on.

Dealing With Criminally Minded Persons

Any violators of the Gurkian Laws, codes, statutes, and so forth, my kids will arrest, and detain, and then place into prison cells, and then sentence them, in accordance with the sentencing requirements under Gurkian Laws, etc., and they may end up doing humiliatory punishments, or community clean up activities. In any case, they will be arrested by my children, who will use their high tech, biometrics and teletransportation technologies, and their other integrated technologies that they have, to swiftly remove the violators of Gurkian Laws, from the collection site and from the collection site area, and vicinity, and that will effectively cancel out their participation, until sentencing has been given, and until penalties have been leaned.

Penalties have been leaned, means, they have undergone sentencing, and the penalties have been enforced upon the violators, i.e., the guilty parties.

Alterations, Modifications, Changes, Clearing Up And Removal Of Garbage In The Areas, And Additions Time Schedules

These modifications, alterations, changes, and additions, etc., will occur over a period of time, as my kids have a schedule for all of these changes, modifications, alterations, clean up, and additions, etc., and they must stick to the schedule, so after you arrive, if you do not see some thing you feel should be there, by then, it is not there because it is not on the priorities facilities and priorities changes, etc., schedules lists.

Captain Off The Bridge.

Texas requires cancer vaccine for girls

By LIZ AUSTIN PETERSON, Associated Press Writer

AUSTIN, Texas - Bypassing the Legislature, Republican Gov. Rick Perry signed an order Friday making Texas the first state to require that schoolgirls get vaccinated against the sexually transmitted virus that causes cervical cancer.
ADVERTISEMENT

By issuing an executive order, Perry apparently sidesteps opposition in the Legislature from conservatives and parents' rights groups who fear such a requirement would condone premarital sex and interfere with the way parents raise their children.

Beginning in September 2008, girls entering the sixth grade - meaning, generally, girls ages 11 and 12 - will have to get Gardasil, Merck & Co.'s new vaccine against strains of the human papillomavirus, or HPV.

Perry, a conservative Christian who opposes abortion and stem-cell research using embryonic cells, counts on the religious right for his political base. But he has said the cervical cancer vaccine is no different from the one that protects children against polio.

"The HPV vaccine provides us with an incredible opportunity to effectively target and prevent cervical cancer," Perry said in announcing the order.

"If there are diseases in our society that are going to cost us large amounts of money, it just makes good economic sense, not to mention the health and well-being of these individuals to have those vaccines available," he said.

Merck is bankrolling efforts to pass state laws across the country mandating Gardasil for girls as young as 11 or 12. It doubled its lobbying budget in Texas and has funneled money through Women in Government, an advocacy group made up of female state legislators around the country.

Perry has several ties to Merck and Women in Government. One of the drug company's three lobbyists in Texas is Mike Toomey, Perry's former chief of staff. His current chief of staff's mother-in-law, Texas Republican state Rep. Dianne White Delisi, is a state director for Women in Government.

Perry also received $6,000 from Merck's political action committee during his re-election campaign.

Texas allows parents to opt out of inoculations by filing an affidavit objecting to the vaccine on religious or philosophical reasons. Even with such provisions, however, conservative groups say such requirements interfere with parents' rights to make medical decisions for their children.

The federal government approved Gardasil in June, and a government advisory panel has recommended that all girls get the shots at 11 and 12, before they are likely to be sexually active.

The New Jersey-based drug company could generate billions in sales if Gardasil - at $360 for the three-shot regimen - were made mandatory across the country. Most insurance companies now cover the vaccine, which has been shown to have no serious side effects.

Merck spokeswoman Janet Skidmore would not say how much the company is spending on lobbyists or how much it has donated to Women in Government. Susan Crosby, the group's president, also declined to specify how much the drug company gave.

A top official from Merck's vaccine division sits on Women in Government's business council, and many of the bills around the

country have been introduced by members of Women in Government.

Morals For A Sane Society - It Is Now Time To Destroy The Lesbianists - Destroying The White House, Balitimore, Maryland, And Virginia, Killing The President Of The United States, Mr. George Walker Bush, Jr., And Sinking The Eastern Coastline Of The United States Into The Atlantic Ocean - Chaos Every Where In My Universe - Bringing An End To The Chaos In My Universe - Surrendering And Repentance - Lesbianists With Non Repenentant Attitudes Who Will Not Surrender - Orders To Kill All Presdential Candidates, Etc. - New Coins Ready And Are The Ever Useful To Us! - Public Nudity And Public Sexaling - What Does The New Moralicity Mean, In Plain Language? Sexaling Is An Absolute 'Good' And An Aboslute 'Right' - Free Action Sexaling Updated: 13-02-07 Rev.a. 00.a PST 23:25

Morals For A Sane Society

To not fuck a person when you can fuck a person is a wicked act.

Not to fuck a man or a woman in the mouthal hole, or in the buttal hole, or to not fuck a woman in the vaginal hole, when you can, and when you are healthy, and when you have the time for it, by refusing, for what ever reason, other than mental illness, or 'gayist' reasons, you are committing a cheap and wicked act, when you refuse to fuck the other person, and use your dick, or your tounge to felate or kiss and tickle, and lick at the ladies' groinal area, and her vaginal cleavage, and vaginal flaps, or labial flaps, or labial tissue, and also her labial throes.

To not suckal a dick or a scrotum or tickle the males' groinal area, with your tounge, or with your fingers, and so forth, when you are able, and ready, and capable, is a cheap and wicked act, whether you are a woman or a man, girl or a boy.

You are given demerit points for not sexaling when you can and are able to sexal, and your time permits it.

To not participate in sexaling when you can participate in sexaling, is a wicked act. To prevent others from sexaling with you, or prevent a person from sexaling with you and your friends, these are both wicked acts.

A kindly and goodly person is a person who sexals all he or she can and who participates in sexaling with people, all he or she can, when ever he or she can to help those people, and one self, to erase the negative karmic markups each person has, and to help to create the wonderful energies that you can create by sexaling, and to change our universe into the nice place we need to change it into for us to live in, prospering with each other, in kindly loving embraces with each other.

If you stand or sit, talking, drinking, eating, with your clothes on, arguing, and discussing football, or baseball, or the local news on TV, or whatever, and you if you are not sexaling, as a result of your actions, when in fact, you could be sexaling, and helping to purify all the people around you, and yourself, as well, you are commiting an evil act, and an immoral act. It is immoral to behave in an uninterested manner, towards sexaling, and towards helping others by sexaling to purify their karmic markups. You are engaging in wicked, unkindly, and evil behavior, by non chalantly staring out the window, at a restaraunt, or in your car, with others around you, thinking about your miscellaneous thoughts, and by your not attempting to purify others, with every ounce of energy you have got, by sexaling with them, in a safe manner.

We do not want you to drive down the road, sexaling, and not paying attention to the traffic, and thereby causing accidents, and there be causeing harm and injury to self and to others, thereby preventing one self and others from their being able to freely mobilate, or move around freely, or ambulate, as they say in modern English, and then freely participate in sexalating activities of fucking, sucking, tounging, massaging the bodies, and the titties, and buttholes of women and girls, and massaging their kissing lips, and their vaginal lips, their facial cheeks, and their butt cheeks, and so forth. You must drive safely, and make it home, to a safe place, where you and your friends can freely sexalate with each other, without others interefereing with you.

A wicked or evil person is one who prevents a person from sexaling, and who destroys or ruins another person, physically, mentally, morally, emotionally, psychologically, or psychically, so that the other person can not participate freely and fully in holy and pure, GODLY sexaling activities.

This type of person who prevents others is a ruinous person, who will invite ruin and disaster to his or her doorsteps, and into his or her life.

There are many ruinous people, who execute others, and who torture, and cause pain, and suffering to others, and who disfigures others. These people who execute others, and who terminate their ability to sexal, prospering with others, making our universe into the kind of nice place we all want to be living in, together with each other, are wicked and evil people.

It Is Now Time To Destroy The Lesbianists

However, when we have a problem of the size and the magnitude of the Lesbianists, that we have, today, in this period of chaos, across my universe, and the Lesbianists' who are toying with humanity, and with all human beings who are not Lesbianists, it is time for us to take action, to prevent them from toying with us, and put a stop to their amusing themselves with their toying with us, any further, and it is now time to destroy them.

"I am Arjuna, a wickedly angry man, and I come to protect those who can not protect themselves. I will kill and thrust my sword and lance through the hearts of men and women who evilly try to prevent people from being prosperously good and bekindly to others."

This is a stanza or sentence from one of my writings, of old. 'Wickedly angry' in this sentence means, outraged, and furious, so much so, every one is scared and afraid of me.

I am 'wickedly angry' and I am here 'to destroy' those who would fuck us up, and ruin our lives, and make our lives miserable, as they toy with us.

My name is GOd, but in my Buddhist scriptures, I am referred to by many names. One of my many names, as I appear to people, in many and various personas, is Arjuna.

I have many sides to my character, as I am GOD, and I am here to protect my children, no matter what the name is people use to refer to me by, and that I am known by, and no matter how it is and no matter who it is among my many children, who I will protect from wicked and ruinous people.

Destroying The White House, Balitimore, Maryland, And Virginia, Killing The President Of The United States, Mr. George Walker Bush, Jr., And Sinking The Eastern Coastline Of The United States Into The Atlantic Ocean

There will not be any further Lesbianists living in Washington DC, or in Baltimore Maryland, or in Northern Virginia, and that vicinity, above ground, and below ground, if some one will be so kind as to place a very large explosives, fuels, chlorine, high heat burning metals fragments, and fracturable rocks bomb, outside the gates to the Washington DC White House, where the number one enemy, Mr. George Walker Bush, Jr., President of the United States, lives, and works, and then detonates that bomb, out side the gates of the White House, where the president lives, currently, and then destroys him, and his

White House, a lair for Lesbianists, with multitudes of torture rooms, i.e, lots of them, below and inside of the White House.

You will destroy and kill the President of the United States, Mr. George Walker Bush, Jr., and Mrs. Barbara Bush, Jr. and every one else who lives at 1600 Pennsylvania Ave. Washington DC.

Why are we going to throw all these people into my Epcot Center. Once in my Epcot Center, they can freely sexal with each other and they can earn merit points.

That will help them straighten out their karma, and it will help them to have a nicer life, when they are born as tummy babies. There are many tummy mommies who will match up with these people, and when they come out as tummy babies, they can start their life, with us, out here in my universe with us, again.

Am I a wicked wrongful person for terminating so many people's lifes? No. Why not? Because that is the only way we can over throw the vastly wicked and evil Lesbianists who practically rule my universe, with their perverse friends, and there are many groups of perverse friends, who we are going to get rid of, and send into my Epcot Center, one after another, as we move ahead, in our efforts to clean up our universe, and in our efforts to stop this nonsense of senseless killings and torturings of people, for amusement, and for game playing.

The Washington White House is one of the homes for these perverse people who game play and toy with all human beings who are not Lesbianists, who live on this planet.

We have many Lesbianists to trash, and to say good bye to, before we can begin to get our world, straightened out, and started up again, with a new culture, with new morals.

We will throw out their old cultures, their Lesbianistic cultures, and we will replace them with our new culture, and our new civilization, that is based on my religion, and on the sanctity of sexaling as a common sense value.

Sexaling is a sacred and holy act. Even if you sexal with a kangaroo, or a chimp, it is still a sacred and holy act.

Why is that? It is because every body is made of something, and that something comes from me, GOD. That something from me, is pure and holy, as I am pure and holy. I designed every person, and every animal, and every living being, with sexaling capabilities that allow that pure and holy GODLYNESS to come out once they begin sexaling.

That GODLYNESS begins to radiate out, as each person begins sexaing, and as each animal begins sexaling, and as each living being begins sexaling, eroteming, orgasming, and phlumetting, and it purifies each and every living being, and washes away the karmic markups every

person, and every animal, and every living being, has in them, and has stored in the molecules that are stacked up in my universe, out side the boundarary walls that hold this universe up, and that keep us in side of the area we are in, and that keep the rest of my universe standing up, stable, making this a safe place to live, at least, safe in so far as nothing comes crashing down on us.

My kids are expert builders, and it is thanks to them, that we have such a nice and safe, and well built universe to live in. It is also thanks to them, that we have these bodies to live in, and to sexal with, since my kids put us together, one molecule at a time, as we need to have our parts put together, along with all the anmials, and living beings, who are inside of us, that my children also assemble for me, and for us.

What is this GODLYNESS? It is a purifying force, that is of me, and is me. It is inside of every one, and inside of every creature, animal, and living being, in my creation.

This is woven into the fabric of your being, and it is of me, and is always a part of me, and is always connected to me. Since I am always pure, and GODLY, you have a possibility of becomeing pure, and holy, like me.

Right now, we are filthy, and grimey, and all gunked up, with sludge, and residues of our karmic heritage. We have done many things that contribute to who we are, and to what we experience, day to day, and if we are not happy with our life, that is because we have the karmic records and markups that dictate that we must be in this miserable and suffering condition, that we are in, today.

There is always sufferring, and unwholesomeness, in our lives, and around us, every day. There are many wicked things that go on, every day. People perpetrate wicked acts, daily, and they go on, unpunished, for a long time, until their karmic markups begin to add up to sufferings coming out, in that person's life.

Sufferings are your payback for your wicked acts, and they help to keep our universe in balance, as I've spoken about, a little, before.

It may seem unwholesome that I ask you to kill my kids, and put them into my Epcot Center, where they can sexal, and where they can get retrained, and where they can be taught to be nice people, after they are retrained, but my asking you to kill my kids, this is merely an expedient, or a means to an end, and it is permissable, given the circumstances, and given the situation, and given that we are at the begining of our new Age of Gurkian Englightenment.

The result we wish to see by killing them, is an end to the activities of the Lesbianists, and and end to the activities of other people like them, in my universe. The Lesbianists are ruining my universe, and ruining the lives of every body in my universe, and though this was the way things were balanced out, prior to now, we are starting out,

with a new method of 'payback' and a new means to balance out the karmic balance book. This is all to be governed by my rules and regulations, that my kids will enforce, in our new, Gurkian Age of Enlightenment, begining about now.

Our killing the Lesbianists, will help to control their ruinous and heinous behavior and activities, and it will help us to get them out of the picture for a while, until we are able to set up our new government, globally, or universal wide, across our universe, in a one universe government, over seeing the activities of all of my kids. It is the only way we have to begin to get our selves straightened out, and onto our new path, that we will follow, for the rest of eternity.

This marks the begining of the Gurkian Age of Engligtenment, and it marks the end of the previous period, or random, or just about nearly random, chaos.

We went through a very long period of decline, untill we got to the period of chaos that we are in, now. This period of chaos, we call, the 'melt down' period.

The 'melt down' period, came after the 'run amuck' period, when my kids began their severely ruinous activities that led to the period of chaos that we are now in.

Chaos Every Where In My Universe

We are going to begin to pull ourselves out of this period of chaos, with the help of my religion, and with our religious activities, and it is going to take us a very long time to pull ourselves out of it, as this 'chaos' is going on every where in my universe.

It will take us a long time to begin to be able to erase our karma enough, based on my religious principals, and the ethics of the Gurkian Age of Englightenment, and our religious activities of sexaling, dancing and excercising, and sexaling in syncopation with the metronome, at one thirty seventh and one fifth, or so, to then some day be able to have erased enough karma, to be rid of, completely, all these horribalistic people, my horribalistic kids, in my universe. When I say, be rid of them, I'm not saying, to trash them, completely. I am saying, we will put a stop to their activities, by changing our karma, and by purifying ourselves with my religion and our religious activities of sexaling, keeping time, in synch with my children, as we sexal, and as we activiate, playing basketball, tennis, or as we swim, or as we pray Nam Myeo Ho Ren Ge Kyeo, and so forth.

Bringing An End To The Chaos In My Universe

We are going to bring an end to the chaos, and to the chaotic behavior, and abberant, ruinous behavior in our universe, as we bring this period of chaos to a close. We will, as we steadily move forward, open the way for the budding and flowering of the Gurkian Age of

Enlightenment, and to the budding and flowering of the new age of friendship and loving care, among all of my children, who participate in my religious, social, economic, and karmic revolution, as we sexal with each other, lovingly, and strive to clearify and erase our karmic markups, sexaling, and synching our activities to one thirty seventh and one fifth on the metronome. Later we will fix our metronomes to keep exact pace in synch with my children, and after we fix and reset the timing scale of the metronome, the timing will be one thirty seventh, exactly, on the metronome.

Our sexaling will produce all types of wonderful, purifying energies, that will revive our universe, and that will revive us, and that will help us to reclaim our universe, and that will help us to live, prosperously, and prosperingly in our universe, together, with each other, and with every one of my children, as we reform the bad and naughty ones, who are wicked and unkind to others, and who prevent people from sexaling, together, with each other.

That means, we are going to kill all the bible thumpers, Pat Robertson, Orwell Roberts, Billy Grahm, Tammy Faye, Jim Faye, and all the other Lesbianists of every religious faction, or group, whether they are Lesbianists who are christians, islamists, judaists, shiites, hindus, buddhists, black moslems i.e., afro american black muslims, or whatever.

We are going to destroy them all, all who would try to prevent us from what we are attempting to accomplish, a global, universal wide, government, run by me, GOD/GOd, as I am the Captain of this ship, and then we are going to begin our new age of Enlightenment, hand in hand with each other, and when they come out of my Epcot Center, again, next time, to be born as tummy babies, to tummy mommies, and to tummy daddies, we will teach them the new rules, ethics, and morals of our new universal wide society, and then we will begin again with them, and raise them in accordance with the new rules, laws, regulations, ethics, and morals of our Gurkian Age of Enlightenment, led by me, GOD/GOd.

Surrendering And Repentance

Those who will surrender, will be allowed to be repentantent, and they will be forgiven for their misgiven, misbegotten, and ill minded ways, once they begin sexaling with the rest of us, and participating in our religious, economic, and social revolution, and once they begin following Gurkian laws, rules, ethics, the codes and norms of behavior, and our righteous, and correct morals, acting and exerting one's efforts for the sake of others, never sparing a moment of energies, wastefully on trivial and trite activities of gossipping, mischiefing, or other harmful, and potentially ruinous, wicked, and evil behavior.

Lesbianists With Non Repenentant Attitudes Who Will Not Surrender

Those who will not surrender, we will send to my Epcot Center, as that is the only way we can get them out of the picture, temporairily, so that we can then get things in order, before they return, once again, as tummy babies, into the lives of tummy mommies, and tummy daddies.

Orders To Kill All Presdential Candidates, Etc.

You are hereby authorized by me, GOD, John Francis Ayres, to kill all United States Presdential candidates, including but not limited to, Barack Obama, Hillary Clinton, and Mitt Romney. They are to be executed on sight. Also, you are ordered to kill all non repentent Lesbianists, such as, Vice President Dick Cheney, Tony Blair, Butros Gauley, Oliver North, Colin Powell, Oliver Poindexter, Casper Willard Weinberger, United States Supreme Court Chief Justice John Roberts, Associate Justices, John Paul Stevens, Anthony Kennedy, David Souter, Clarence Thomas, Ruth Bader Ginsburg, Stephen Breyer, Samuel Alito, Antonin Gregory Scalia, Arnold Swarzneggar, Sylvestor Stallone, Robert Deniro, Gary Busey, Kevin Sorbo, Timothy Dalton, Michael Jackson, Matt Damon, Bruce Willis, Mila Jovovich, Peter Jennings, all members of the United States Congress who are Lesbianists, and all other Lesbianists, whether in politics or not, and in whatever government you find them, around the world. There are many Lesbianists in local and metropolitan police departments, and in SWAT Team units, and in fire departments, and in the National Guard units throughout the United States, and Lesbianists own every news media organization, television corporation, cable television corporation, satelite television corporation, major radio station, transportation corporation, chemicals corporation, petroleum corporation, coal mining corporation, as well as every other major corporation around the world. You are to kill every last one of them, and spare no one. We will then destroy every underground city they are hiding in, and force them to surrender. If not, we will kill them all, and I authorize you to do exactly that, kill every last one of them, all thirteen billion plus Lesbianists, hiding under the surface of our planet, or out walking about, pretending to be an ordinary citizen on this planet. Nothing is further from the truth, and you are authorized to kill each and every one of them, and send them all to my Epcot Center, using what ever means available, including my tactical, powerful, home made radiological explosives bombs, i.e., nuclear explosives. Please study my notes on my web site for further details regarding radiological fracturable rocks, and my notes on how to make an explosive weapon to detonate nuclear materials, you can find along beach shorelines, in sediments deposits, and on old mountains, every where on our planet, if you have a geiger counter.

New Coins Ready And Are The Ever Useful To Us!

http://money.aol.com/news/articles/_a/new-dollar-coins-enter-circulation-this/20070211095409990001?ncid=NWS00010000000001

"Updated:2007-02-11 15:20:31"
"New Dollar Coins Enter Circulation This Week"
"By WILL LESTER"

"AP"
"WASHINGTON (Feb. 11) - Maybe Susan B. Anthony and Sacagawea should not take public rejection personally. It's not easy overcoming people's indifference to dollar coins, even those honoring such historic figures."

See also,

http://news.yahoo.com/s/ap/20070211/ap_on_bi_ge/money_ap_poll

The new coins reportedly have many fracturable rocks in them, as the metals used, were mined from deposits of minerals that contain large amounts of fracturable rocks.

They also have high heats and high temperatures burning minerals in them, that will level up your thermal temperatures to near solar temperatures, if grinded up and mixed in, and allowed to ferment, in sour berry juices, slowly, with tiny amounts of salt, and large amounts of raw sugar.

The high heat temperatures, and the energies produced at these higher heat levels, will reach near solar heats energies temperatures, and that is very important for developing the energies needed to wake up every body, in the fracturable rocks - or 'fissile' materials, in Lesbianists' speak, or Lesbianists' mumbo jumbo language - to get them to begin making children and families.

Please see my notes on 'Radiological' crystals cages salts kiddies, and other related energical animals kiddies, of various, and hard to imagine, types, unless you're a kid and unless you have the mental flexibilities and typical mental gymnastics capabilities of a normal child, unhindered by brainwashed thinking and brainwashed patterns of thought the Lesbianists have caged, and closeted in the dark, our brains with.

Public Nudity And Public Sexaling

Public nudity and public sexaling is now a way of life for all, in our, now, Gurkian Age of Enlightenment. We will begin broadcasting live sexaling events, and other entertaining and informational, educational programming,, as soon as I get my new quarters, a unit to live in, where I can eat more properly, sleep more properly, recieve the medical health aides and regroverative formulas, that I need, and where I can practice my religious ceremonies, with others, daily.

The public broadcasting of various informational programing, educational programing, sexaling entertainment programing, sexical, hygenical i.e., sexaling hygene, and sexical educational programing as well as sexical training programing, as well as my religious ceremonial sexaling activities, and my general, more typical day to day, religious ceremonialing, for now, until I get my health up to a level of youthful vigor, and robust wellness, as I religiously interact with my students, and train them, the disciple priestesses,

and disciple priests, will all help to set the basis of normative, and expected, social behavior, for all people in our universe, to learn about, now in our Gurkian Age of Enlightenment, so that we can all get along, with one primary set of customs and standard of behavior, and with one primary language for communication, as we will all be sexaling with each other - all of my children who are now just begining to get with the program, at least, anyway, will be sexaling with each other - from now on, and for all eternity.

We need this exposure, as well as alternative programing, for laundering up to, and for begining to expose ourselves to, and learn about, the reality of the universe, my universe, that we live in.

Laundering up to, means, exposing ourselves to the mischievous antics of the Lesbianists, to launder their filthy, garbagical, and tormentuous ways, so that all may learn about them.

This will be coming up, in the near future, possibly, as far as I can determine, any way, after we have the spilling of the sexaling fluids campaign under way for purifying the area where I will be setting up my religious ministry, on the parcel of land, on the north west corner of the intersection at West Tropicana Ave. and South Decature Blud., Las Vegas, Nevada, and possibly on confiscated properties to the north, as well as to the west, for now. This is a public service, informational bulletin, on what you are to expect, in the near future. Prepare yourselves, accordingly.

What Does The New Moralicity Mean, In Plain Language?

Our new moralicity means we are going to learn we can and should sexal with every person, and even with animals, when we have a chance or opportunity to sexal with people and animals, and that we can and should sexal with every person we see, so long as we have a mutual reciprocical understanding of the truth to sexaling, that it is a pure, blessed, and holy act, GOD, me, made possible, to purify you of your blemishes. It is the most significant and powerful way to purify you of your blemishes and karma

You can also clearify your blemishes, your karmic markups, by praying Nam Myeo Ho Ren Ge Kyeo, and by your keeping syncopated and in rythm with my children, helping my children to work smoothly, syncopated and in rythm with each other, perfectly fluxed, meshed perfectly with all my other children, working at different life spins, as I've mentioned about, as my kids will reward you by sprinkling faerie dusts, purifying energies, and other types of related, purifying things and dings, all over you, as a reward for your cooperation in keeping my universe, humming, and running, smoothly.

With your syncopated rythms, your syncopated pace of movement, and actions, as you time your motions, and stay in synch with one thirty seventh on the metronome, plus one fith of a mark on the metronome we currently have available to us, here, on our planet, during your

activitiating, sexaling, playing sports, dancing, excercising, and so forth, you will purify your life, and you will purify the lives of those around you, with your actions, as you get rewarded by my children.

Our new moralicity means we can and should sexal with each and every person possible, in free association with each other, no matter what the age of the person, and no matter what the gender of the person, no matter what the tribal background is, no matter what the tribal heritage is, any place no matter where we are, any time no matter what the time of day or the time of night it is, in public spaces or in private living spaces any and all places, no matter who else is around us, as sexaling is a blessed act that my kids reward you for, any time, every time, no matter where you are sexaling, and no matter with who you are sexaling with, or even no matter what type of animal you are sexaling with.

It means there are no bullshit, propagandists' Lesbianists dreamed up taboos, any longer, regarding sexaling, and that sexaling is a blessed act, and not a 'forbidden' act, as the bullshit Lesbianistic Christians, Muslims, and other religious 'pious' bullshit assholes, who would want us to believe that sexaling is forbidden by 'God', which is complete and total bullshit, and a lie, as they base them selfs on their 'holier than thou' pious 'ignorance' of the truth.

So long as you and the person or persons you are with are equally, mutually, and reciprocally interested in purifying your lifes, and interested in clearifying your karmic markups, and interested in helping my children work in synch with each other, and interested in helping to push my children along, with your energies, and efforts, and so long as you can sexal together with one and each other, without damaging either or any of the participants, it is morally correct behavior, and any person or actions to prevent that morally correct behavior must be condemned, and punished.

Some people, especially young participants, do not have butt holes, mouthal holes, or vaginal holes that are large enough to swallow a dick, or mouthal holes that are large enough to swallow a tittie and suckle it fully, without straining.

You need to spend several hours phlooching out the butt hole, or phlooching out the mouthal hole and throat, and phlooching out the vaginal hole, with generous massage over several hours to the muscles and tendons in the neck, mouth, nose, eye ridges, ears, throat, face, chest, tummy, back, arms, hands, fingers, shoulders, titties, thighs, hips, waist, groinal area, labial folds, vaginal lips, facial lips, male genitals, and the entire torso, back and front, the legs and feet, ankles, and toes, as well, and all parts and areas from head to toes and in between, with continued efforts to massage all these places, until the body begins to respond, and until the body responds fully.

The butthole will loosen up, and the throat hole will loosen, and the mouthal hole will widen, and the vaginal cavity and vaginal mouth will widen and expand in size, and the groin in girls will spread apart, allowing for more room for access to the vagina, and for smoother access to the butthole, as the hips loosen up, and begin to spread apart in response to your efforts at massaging the body, to prepare it for sexaling.

No matter how old a girl is, and in the case of a boy, no matter how old the boy is, baby, child, adolescent, or adult, phlooching out the sexaling orifices, is easy, if you spend the needed time on preparatory and thorough massage, sufficiently enough.

That's how I designed your bodies to respond to massage efforts to loosen up the muscles, ligaments, sinews, cartiladges, so as to allow the bones of the body to move and spread apart, freely, and loosenly. Your body is like a rubber band, and if you massage it, well enough, it will begin to respond like a rubber band, and it will loosen up, and spread apart, where it needs to spread apart, so as to allow you to sexal, thoroughly, and continually, for as long as you continue your sexaling activities.

After you finish your sexaling activities, your body will begin to stiffen up, as all the ligaments, sinews, cartiladges, muscles, and fiberous threads throughout your body, begin to tighten up, for returning to daily life, working activities, where you need a hard, and tough body, to survive, as you work in the field, or work in the rice paddies, or work on the farms, to labor for producing crops for feeding you, your families, your children, relatives, tribal village friends and tribal villages neigbors, who are, or who used to be, traditionally, as life used to evolve for us, all related to all of those concerned in the area, or on the planet, for that matter, or in the entire galaxy, or spread out over many galaxies, and even spread out over even larger, and wider areas of my universe in the large, familiies that used to be the norm.

You may need to spend several hours, or even several days, or maybe even longer, a number of weeks, or even a number of months, before the body will begin to respond, and begin to flex, and bend, to help all the ligaments, sinews, cartiladges, tendons, muscles, and all the body parts, and supporting, interwoven parts of your bodies, as I've briefly talked about, before, as well as all the lubing stations, that will eject fluids to assist in the loosening up of your bodies' ligaments, sinews, cartiladges, tendons, muscles, and even the bones, to allow them to be more flexible, including the jaw bones, facial bones, neck bones, spinal bones, leg bones, thigh bones, hips bones, pelvic bones, buttal bones, groinal bones, back bones, and all the bones of the body. Every bone in your body will loosen up, and become more flexible, and pliant, durile, durable and tensilely strong, as you massage all the parts of your body, and the bodies of the people you are sexaling with, very young, young, adolescent, adult, middle aged, elderly, and even the ancient, or the extremely very old.

This is the truth to this matter, and you can find out for your selves, if you try and see how your bodies respond, to daily, rigorous, continued massage, over various lengths or periods of time.

This is part of the ancient and old art of sexaling, as I taught in my religious teachings, in every religion that I taught, and I have taught a lot of religions in my time, to lots of different peoples in my universe, from the begining of our time, here, together, in our universe, after we arrived, which I've talked a little about, before.

Sexaling Is An Absolute 'Good' And An Aboslute 'Right'

Even the veryest oldest and the veryest youngest have a right, duty, and obligation to sexal and produce holy, sacred, sanctifying, i.e., to make sacred, holy, and pure, harmonious, purifying energies.

It is an 'A B S O L U T E' RIGHT as in, a 'right' to free speech.

It is also an 'A B S O L U T E' RIGHT as in, 'this is right, correct, upstanding, laudable, commendable, proven to be always right, correct, true, holy, graceful or GODlYNESS and GOODLYNESS gracefilled, morally right, morally correct, morally absolutely right, and morally absolutely correct', as opposed to, right and wrong, i.e., as in the opposite of wrong, as in, that is wrong, that is incorrect, evil, hateful, sinful, morally inaccurate, morally wrong, morally defunct, undoable as it will not stand, and useless,'.

It is also an 'A B S O L U T E' GOOD and an 'A B S O L U T E' GOODNESS.

Free Action Sexaling

Anything that counters, or runs contrary to this, is an 'A B S O L U T E' WRONG, and an 'A B S O L U T E' EVIL. It is absolutely wrongful to deny or to prohibit or to interfere with, in any way, with any one who wishes to sexal, as THAT PERSON IS CLEANING UP MY UNIVERSE WITH HIS DICK, OR WITH HER VAGINA, BUTT, AND TITTIES, AND WITH HIS PURIFYING ENERGIES, OR WITH HER PURIFYING ENERGIES! DO YOU UNDERSTAND THAT?

Any body who even attempts to impede, to deny, to prevent, or to interfere with, in any way at all, with a person's absolute right to sexal runs counter to Gurkian laws, regulations, codes, ethics, morals, standards, and you will serve jail or prison time, for prohibiting, or interfering, or impeding, or violating in any way, a person's absolute right to free action sexaling, which is, the act of freely chooseing who one wishes to sexal with. DO YOU UNDERSTAND THAT, SOLDIER? GOOD! BECAUSE A "NO SIR!" WOULD BE INAPPROPRITATE AND UNACCEPTABLE!

To learn more on these subjects, swear in, and become a citizen of our country, and begin studying, and working in the many programs my children have for you to study and work in, to score earning points, and to earn a living in our new, Gurkian Age of Enligtenment, where

and now that we work, and we pay as we go.

Those who refuse to work, in time, will be required to work, to pay off their debts and to pay off the fees that are owed for the use of my resources, all the molecules in my universe, and all the resources, energical, or otherwise.

Even though I am GOD, in our new system of working in my Gurkian Age of Enlightenment, even I have to pay for the resources that I use, as I work as chief priest of my religion, spiritual director of my universe, and boss of my universe.

I'm the mother and father, the creator of all humans, animals, and living beings, as I've explained, every thing in my creation, and people will begin to understand that, that I am GOD, as they practice my religion, over the years, and over the aeons, and over the millenias.

The people who refuse to work, will be required to work in prisons, sexaling with animals, to produce sexaling energies that will restore the supplies of energies in our universe, as I've mentioned about, before, as they work and learn their new trade of animal husbandry, and animal wifery, in the animal habitry industry, as I've also mentioned about, in earlier notes.

No matter what the age of the person, every person can participate in our Gurkian Age Of Enlightenment, sexaling, dancing, excercising, and syncopating their movements, in rythm, to assist my kids as my kids, work to keep my universe, strong, durile, flexible, safe, and a nice place for every one to live in.

DO YOU UNDERSTAND THAT? YOU HAD BETTER, AS A "NO SIR!" WOULD BE UNACCEPTABLE, SOLDIER! DO YOU HEAR ME? I HOPE YOU DO! NOW, GET TO WORK AND SEXAL TILL YOU DROP, SOLDIER, AND I'M NOT JOKING!

We will build a nice and comfortable, safe place for every one to live, now, in my universe, and we will follow the Gurkian Age of Enlightenment Rules and Regulations, Codes, Morals, Ethics, and behavioral norms, that you are required to live by, now that we are going to become, one, very big, happy, harmonious, in synch, prospering family.

You will not forget to wash out your butty butt holes, and to flush out your vaginas, and your mouths, and to practice proper and health promoting sexaling and love making hygene, with the medical formulas that my children will be providing to you, and that you will pay for, out of your earnings, and they are very reasonably priced, now that I am making every thing available to every one, at a set, yet, flexible, and low cost for the use of my resources, once you citizenize your selfs, and swear in, as a citizen of our new, global, i.e., universal wide, one universe, family of GOD's, that's me, children.

The costs are flexible, in the sense that you do not have to pay, yet, as you will be learning about the ways to work, and you will be learing and preparing your selfs for a new working life, in my universe, for some time, and so we have no hurry to have you pay for the resources you use. We can collect the fees, and costs for resources, in the future, when you are a big money earner, once you learn your new work requirements, for sexaling for a living, as that is the only job opportunity open to every one, and the only job opportunity, that you have a choice about.

My working children, though they do have many different jobs, they have basically the same set up, or arrangements as you now will have, and so you will be joining my children, and you will be working, i.e., sexaling, excercising, aerobically dancing, and so forth, in synch, and in rythm, for me, just as all of my children are doing, at least, those of my children who are able to work, and who are bright and intelligent enough to work for me, to keep my universe, healthy, safe, solid, durile, strong, wholesome, and a nice place to live in.

That means, I have a lot of burnouts kids, and rampant, vagarous, dangerous children, who are not really very bright, and they do not work for me, yet, but they will, in time, regardless of the fact that they may at the present, be abominants kids, or not.

As I've mentioned, all my up until now, non working children, are abominants. What does that mean? It means, they do not give a darn about killing another person. They kill for selfish reasons, and for fun and games, and so forth, and you are all guilty of that, though you may not remember that you killed for fun and games, and for selfish reasons, in previous lifes, in my universe, but you all have, and you are all abominants, of varying degrees.

So, welcome to the Gurkian Age of Enlightenment, and welcome to my workforce.

Captain Off The Bridge.

Tom K in LA,

Shortwave Listening (SWL) Antennas from the "T2FD" to
the "Windom" to the Inverted "L" Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/12277

Remember that the original design critiera for the
Terminated Tilted Folded Dipole (T2FD / TTFD) was
for both a Transmitting and Receiving Antenna.

* Terminated - To make it poor on any one Frequency
and average across many Frequencies.
* Tilted - To give it variable Wave Length 'Heigth"
above the Ground {Surface} and thus more Broad-Banded
across many Frequencies.
* Folded - Another Broad-Banded aspect over a Single Dipole.
* Dipole - Balance and usable on the Harmonics
of the lowest design {cut} Frequency.

Original designed for its Broad-Banded Transmitting
characteristics and the fact that it also worked about
as well as a Broad-Banded Receiving Antenna.

READ - Why Tilt ? - The Terminated Tilted Folded Dipole
(TTFD / T2FD) Antenna

Very weak here in my afternoons, right on the noise floor. And when the ARO QRM builds they are wiped right out.

Unfortunately I'm usually sleeping for their morning transmission, elsewise I'd give a listen then, but I think the QRM would be even worse then.

Good to know that they are still operating.

But that is an old issue. Certain otential formats or genres of music or
talk are so small on a local basis they can only succeed by combination of
many small pieces, irrespective of age. Local radio has never been able to
serve these groups, which in part explains why 5% or so do not use radio
each week and about 7% or so are very light users historically. These are
the prime satellite and alternate media targets.
>
> And while advertisers haven't targeted 55+ in decades, they were
> buying local media. A single national networked distribution may be viable

> discretionary percentage of income belongs to the upper end demos.

That, however, explain why there is no advertiser interest. The lack of 55+
campaigns is based on return on investment, as older consumers are harder to
convince and need more ad impressions to create impact... often erasing the
profit on the sale. This will not change significantly.
>
> It's hard to believe that someone couldn't monetize that demo.
>

The issue is ROI, not income and buying power.

Don't look at cash flow, look at traditional profits, which are horrible. XM
lost about $700 million through Q3 of last year.

From the turning point, which was the legal mandate to stop simulcasting in
'67, to when FM achieved audience parity was over a decade. The determining
factor was a combination of more alternatives than on AM and better signal
and coverage that most AMs in sprawling US metros.
>

Part of this is that the base signal of most AMs is inadequate for market
coverage, so very few will benefit. A bad analog signal produces a "badder"
HD signal.
>>
>> I looked at Chicago and the not-home to the market signals don't add up

I discard this because the listening for true (not peripheral) out of market signals is insignificant and generally is limited to very short listening spans. There is no real need being satisfied by "DX quality" stations.

And, I suspect, many such diary incidents are records of listening to streams, not the off air signal.

Not really. Proprietary research done by most larger stations is focused on finding out problems and correcting them. Arbitron is just a snapshot, and not used for this.
>>
>> I spend nearly 100% of my time with listeners (I am with a hundred of
>> them this evening in Miami)

> It's one of the things I respect about you, David.

I know quite a few programmers who reject the "we have always done it this way" as well. My last two management hires were non-radio people, who were charged with asking "why" on every level.

>> and, like always, we have to go for broad appeal formats and demos that

Listeners themselves, like any consumer group, don't readily visualize things they don't know. Most great innovations have come from creativity more than from research. The real issue, to me, is whether there are any creative people in radio any more.

That is neither a written nor implied rule. Licensees serve their community,
which is a town, a county or a metro. How they serve is their option.

3511. HD AM in NJ/NY ?

Newsgroup: rec.radio.shortwave
Date: 2007-02-14 14:51:05 UTC
From: Rich <rickattic@comcast.net>
Message-ID: <op.tnqt7f0pelqst1@thedarkcave.innomedia.com>
Source record: 105510

Well, from what I can hear there are only 3 stations left on the air transmitting the IBOC signal on AM in the NY/NJ area. 660, 710 and 770. It would seem to me that it is'nt catching on at all. I have never purchased an AM HD radio because they are so expensive and non-available for the most part and I am glad to have waited. FM may be better for IBOC but I can't tell if they are broadcasting IBOC..it may be a success on FM if radios get cheap and available.

Exactly my point. But consider that if this aggregate group can
be served and there is ANY money in it, then the mainstream can also be
served by these alternate media, and THAT's when alternate media pose a
threat.

Not with the current business model, no. And that's not likely
to change. But, again, with an alternate medium, modelled in a more
creative way, this demo can be monetized more efficiently than local
radio. And if this demo can be made to be profitable with alternate
media, there is no stopping them from stepping into service of the
mainstream audience.

And you may be right. But newer technology erasing the niche would
be doing something closer to correct. With greater survivability. That
poses a greater potential threat.

Maybe I'm not making my self clear, here. I'm not saying satellite
radio is the wave of the future. It may not even be the wave of an hour
from now. But what satellite and other alternative media are doing, is
pointing out that the crumbs left out by RADIO's SOP can be served and
if they can be served, it doesn't matter whether it's satellite,
internet, or Morse Code by Watemelons Launched with Trebouchet's. If
these crumbs can be picked up, served and money can be made, by any
entity, there is nothing to prevent that entity from expanding the niche
into mainstream programming. And when that happens, Radio, as it exists
today will be in big trouble.

>

David, you and I are in agreement on this point. Where we
disagree is whether satellite is terminal. By your books it may be. My
thinking is that it will find a way to survive.

If it doesn't, something else will take its place. Audiences
which haven't been served in decades are now getting a taste of what
it's like to have THEIR choices available. That doesn't go away easily.

>>> Which was roughly 27 years after FM began on 40 MHz.

Yes. Exactly. The focus was on Content and technical
improvement. But there was focus on Content.

Right now, HD promotion isn't hawking content. It's hawking
technobabble.

If HD is to be successful, Radio needs to take a lesson from
the FM revolution: Content over technology.

Listeners don't--well maybe at my house they do--but they don't
in the main turn on radios just to activate circuits and bathe in the
technology. If they did, AM stereo would have been a runaway bestseller.

They turn on their radios for content. Content FIRST.

The technology, if it provides any benefit, will become obvious
from there. But without the content motivation, you're just selling
circuitry.

>> HD is being promoted largely the same way. And on FM only. Virtually

And don't forget the impact of engineers who still think in terms
of AM radio of the 60's. They're not creating high fidelity streams for
the HD. Badder still.

> spans. There is no real need being satisfied by "DX quality" stations.

Dxing numbers may be insignificant in any given market. But,
again, they are real numbers. Granted, they may be not there for
entertainment, or substantive listening. One member here posted logs of
all the stations he would hear in an evening. Many frequencies, but
nothing for more than 2 minutes at a time. Quality listening, I'm sure.
This is also part of the thinking that got Byfort at BBC/WS to kill
shortwave to North America. So, I'm not arguing with you about DXers.
But, there are more than DXers listening to AM radio out of market, as
there are listening to BBC on shortwave. In the case of BBC, millions.
Orphaned by numbers of the same radio model you use to dismiss fringe
listeners.

But peripheral listening IS suffering by HD hash. And those are
real listeners, with real loyalties, orphaned by short sighted
broadcasters who aren't even in their markets.

>
> And, I suspect, many such diary incidents are records of listening to
> streams, not the off air signal.

A good bet, given the amount of HD hash obscuring large slices
of the bands.

>> Radio has been doing what it's been doing based on research for

>> be new isn't worth the effort worrying about.
>
> Not really. Proprietary research done by most larger stations is focused on
> finding out problems and correcting them. Arbitron is just a snapshot, and
> not used for this.

Yes, I've participated in such studies. But even perceptuals I've
been involved in, have provided no surprises. As Collins said, "The
hallmark of good research is that it gives you something you didn't
expect. The hallmark of great research is that it gives you something
you don't like."

Most proprietary research, by these criteria, is expensive, and
poor. Because it offers nothing unexpected.

And I've been in on the focus group sessions that have defined terms and formed questions. Leading to research that couldn't be more circular. The questions were formed to produce easily categorizable answers, often at the expense of real learning.

The very same mentality that kept AM station manglers from seeing the rise of FM on the horizon.

And on this point, we are absolutely in agreement. We've just arrived at it from opposite directions.:)

Innovation, in alternate media is worth watching. Like I said, the real threat will come from someone figuring out how to monetize the orphans not served by Radio. Once that's been achieved, moving in to the mainstream will be effortless, as well as profitable.

When that happens, Radio is in very deep do-do.

It's happening, now. At least in the beginning stages. It's only a matter of time.

Radio needs to start looking at this now. Because if it waits until the threat is imminent, like AMs in 1967, it will already be too late.

Excellent - looks like HD Radio/IBOC on AM is almost dead:

"RW Opinion: Rethinking AM's future"

"Only 175 or so AM stations have even licensed AM-HD. For a number of
reasons, quite a few have tried it and taken it off the air, or so the
anecdotal evidence suggests. (Ibiquity no longer reports in its public
summaries whether a station is on the air.)"

3516. Red Army Faction - Baader-Meinhof Gang German Terrorist Brigitte Mohnhaupt Gets Parole

<http://www.dw-world.de/dw/article/0,2144,2345252,00.html>
Germany to Free Former Leader of Left-Wing Terror Group
Brigitte Mohnhaupt
Brigitte Mohnhaupt
A German court has ruled that a former member of the Red Army Faction (RAF), Brigitte Mohnhaupt will walk free on parole on March 27 after serving 24 years for multiple murders.

After consulting the prosecutors and a psychiatric expert for Mohnhaupt's case, a state court in Stuttgart found "no indications ï¿½ that she could commit future serious offenses." Mohnhaupt will serve the remainder of her sentence on parole.

The case has revived painful memories of the RAF's violent campaign of the 1970s. Also known as the Baader-Meinhof Gang after its founders Andreas Baader and Ulrike Meinhof, The Red Army Faction murdered a string of high-profile German establishment figures from 1977 to 1982 as it attempted to bring down what it considered an oppressive capitalist state.

The group is suspected of killing 34 people between 1972 and 1991. Some 26 RAF members died during that period and another 26 were sentenced to life in prison.

Mohnhaupt, now 57, had risen to the ranks of the RAF's "second-generation" leadership in 1977. She has never explicitly apologized for the bloodshed.

Christian KlarBildunterschrift: Groï¿½ansicht des Bildes mit der Bildunterschrift: The photo of Schleyer, held hostage by the RAF for over a month, became an iconic image of 1970s West Germany

In 1977, Mohnhaupt took part in the abductions and subsequent murders of West Germany's chief federal prosecutor Siegfried Buback, head of the West German employers' federation Hanns-Martin Schleyer and Dresdner Bank chief executive Jï¿½rgen Ponto. Brigitte Mohnhaupt was captured in 1982, convicted of involvement in nine murders and sentenced to five life sentences in 1985.

Mohnhaupt has already made nine excursions from prison, with armed police watching her, to prepare her for a changed world that is connected up by the internet and only dimly remembers communism, which began crumbling in Europe in 1989.

Monday's court decision does not come as a surprise, since prosecutors had previously supported Mohnhaupt's bid for parole at a closed hearing in

Stuttgart on January 22.

Other RAF Members Await Clemency

The former terrorist had petitioned for parole once already on Feb 21, 2006, but was rejected because she had not yet served the minimum required sentence of 24 years, a provision that grew out of the "unusual gravity of the crime." That sentence expires on March 26.

Christian Klar is still awaiting a decision on his plea for clemencyBildunterschrift: Groï¿½ansicht des Bildes mit der Bildunterschrift: Christian Klar is still awaiting a decision on his plea for clemency

Mohnhaupt's release comes at the same time as another petition for clemency filed by convicted Red Army Faction leader Christian Klar. Because Klar, 54, still has two years to serve before qualifying for possible parole, his only chance for an early release is a special pardon from German President Horst Kï¿½hler, who is currently reviewing the case. Former President Johannes Rau already rejected a previous petition for clemency.

Klar, who like Mohnhaupt came from a well-off family and went to university to study philosophy before becoming a terrorist, is reported to have been well behaved in jail. A Berlin theatre has promised him a two-year staff internship if he is released.

Klar has also never renounced his ideas, telling an interviewer in 2001 he still wanted Germany to make a "fresh start" and would never abjure what the RAF had done, "though I do not contemplate reviving the armed struggle."

Both Mohnhaupt and Klar's cases have sparked a furious debate in Germany pitting outraged relatives of the RAF's victims against some politicians who say the killers have done their time and no longer pose a threat to society.

Besides Klar, the only other members of the RAF still in prison are Eva Haule and Birgit Hogefeld. Most of the terrorist organization's original leaders committed suicide in jail during the 1970s.

The group abandoned violence in 1992 and formally disbanded in 1998.

DW staff (ab)

Readers Weigh In On Former Militant's Release
Mohnhaupt (right) will be released on parole, but it's unclear whether Klar (left) will be pardonedMohnhaupt (right) will be released on parole, but it's unclear whether Klar (left) will be pardoned
A German court ruled this week that former Red Army Faction (RAF) member Brigitte Mohnhaupt will walk free on March 27 after serving 24 years for multiple murders. DW-WORLD.DE's readers responded to the decision.

The following comments reflect the views of our readers. Not all reader comments have been published. DW-WORLD.DE reserves the right to edit for length and appropriateness of content.

The pardoning of a murderer, in particular a murderer who has never expressed sorrow, is frightening. There must be consequences for one's crimes and Brigitte Mohnhaupt and her colleagues cannot be an exception regardless of whether or not they pose a threat to society. This has nothing to do with mercy and everything to do with responsibility. A bewildering decision ï¿½ something I thought only our politicians were capable of. - Richard Henry, East Cobb County, Georgia, US (lived in Germany from 1979 to 1988)

Upon Brigitte Mohnhaupt's parole, Germany will become a more dangerous place. While I cannot be sure if Mohnhaupt will commit another crime, thousands of terrorists will be emboldened by the decision to release her. Those who will contemplate committing such crimes in the future can rest assured that if they are caught they will be well cared for and eventually released by the German state. - Martin Peterson, Texas, US

Releasing a person who killed nine people after serving such a short time is a disgrace. She is responsible for her choices, justice needs to be done. Mercy is shown by helping people who are oppressed unfairly, which there is plenty of opportunity to do in the world today. Human dignity is shown by the respect of life, and this can be shown by keeping somebody who took nine lives in prison. - Glenn Snider, US

Prison director Wolfgang Deuschl shows the correctional facility where Mohnhaupt stayed Bildunterschrift: Groï¿½ansicht des Bildes mit der Bildunterschrift: Prison director Wolfgang Deuschl shows the correctional facility where Mohnhaupt stayed

To me that is not an act of justice, but an act of mercy. I am not against mercy, we all need it at times, but I can see how confusing it would be to those who have suffered and still suffer by what she has done. I think acknowledgement of guilt would be a small token to pay for one's freedom. However, this might not be the hour. It might seem forced and that would make a mockery of requesting pardon. I am held back by the fact that, all these years, Brigitte Mohnhaupt never acknowledged her fault and asked for a pardon regardless of whether that would have shortened her time in prison or not. - Elisabeth Heptner, US

Mistake. This will only embolden terrorists worldwide through false charity. Logic has no conscience. What courts believe is humane and kind in this matter is exactly what underpins terrorist support -- they won. No remorse from the Red Army Faction about their actions that killed over 50 people. In for a penny, in for a dime. A group like this is one reason I joined the US Military. I was born in Frankfurt am Main back in 1957 and joined the US Air Force in 1980, right in the middle of RAF terrorism. I felt compelled to some kind of service to help further freedom and democracy versus becoming a cop and helping to create even more of a police state. Yet releasing such monsters back into society is neither charitable or logical. - James Woods

The German government has to show that it is capable of showing mercy to mass murderers? These are people who have lost the right to be part of humanity. What makes you think that after 25 years they have developed respect for human life? Show your compassion to the victims and their relatives. Anything else is stupid. Those in government who think that this is mercy have a perverted

sense of justice. Think of the victims, you fools. - W. Rode

Tony
Nottingham
England

14 February 2007

TO: All People Who Care

I am a private individual posting this message to help Laboratory Animals. I apologize if this message is out of place in this group but I think you need to know this.

A new European Chemical Testing Policy called REACH has now been finalised by the European Union. Under these proposals Chemicals of every kind - from those used in industrial processes to the ingredients of consumer products - will be tested on Millions of animals from mice to fish to dogs, causing untold suffering.

If you believe that REACH should make more use of Alternative Testing to test its Chemicals then please take action now.

If you are a European citizen please contact your local papers and own MEP asking them to promote the development of humane non-animal testing methods under the REACH legislation, which is the best hope we have for sparing animals the misery of a testing laboratory.

A sample letter can be found at the BUAV (British Union for the Abolition of Vivisection) website at www.BUAV.org (Select Campaigns, Chemical Testing, Get Active then Writing to the local press).

For all Non-European members, you can still help. Please tell all your colleagues and friends in the UK and Europe about REACH.

Everyone can help and you can make a difference.

Thank You

See, I told Brian Hill, that his Eaton Shit E1 is just another over-
priced, over-hyped, cheap, Chinese-made Eton - look at the over-priced
$150 E5/G5, when one can basicaaly get the same receiver as the Degen
1103 for $65. And, we all know about the horrendously over-priced,
over-hyped cheap plastic boxed/switches piece-of-shit S350, and S350
look-alikes !

Interest in the NYC area is spectacularly low, despite the catchy
sales slogan:

"It's high fidelity, just like FM--only you have to buy a special
radio. And the program content will be basically the same content you
already hear and don't care for on analog AM. And the signal won't
carry as well, and there'll be drop outs. Don't miss out!"

Lee, thanks for the explanation...although as a pragmatist, the ARRL, for better or worse, IS the only game in town. They are certainly not perfect, but then, who of us are?

As to their "non-profit" status, whatever that means, I am not sure what problem you see with that (if any).

I did some research and, as you say, their IRS returns are on the web. Additionally, their *AUDITED* Annual Report is on the ARRL web site for the world to see. Granted, since Enron, audits aren't all they were cracked up to be, but that is a national issue, nothing unique to the ARRL.

I was referring to what some (in the past) used to imply about
their altruism. :-)

Way back I used to kid some members about the ARRL
website needing extra money for shipping charges of
purchases. The example given was going into an HRO and
being able to buy a League book and NOT pay shipping
charges...and the HRO still made a profit on that sale.
Yet the price on the ARRL website was the same AND
one had to pay extra for shipping charges. :-)

That was quickly transformed by the Zealot Believers
into some dastardly "attack" on the League by myself.
Gotta love the way some act when their ox is gored.

3526. Eton Mini300PE am/fm/sw handheld

Newsgroup: rec.radio.shortwave
Date: 2007-02-14 21:21:58 UTC
From: "ve3..." <ve3iut@hotmail.com>
Message-ID: <1171488118.501541.220370@a75g2000cwd.googlegroups.com>
Source record: 105525

The 300PE is a good choice for someone who wants an am/fm/sw handheld radio. It is about 4 1/2 x 2 1/2 x 1 and has a 2" stub smoothly moulded in the case to protect the pull-up whip. It is a single superhet with a digital display only. It receives seven sw bands using bandspread tuning, am, and fm. It has a clock, alarm, sleep function, and 60 min auto turn-off. It cost $30 and came nicely packaged with a case, ear buds, manual, and two alkaline AA cells. It is also sold under the Grundig name as M300BL.

PERFORMANCE
On shortwave, it was quite sensitive and had a decent bandwidth. For example, I was able to hear Radio Cairo on 9995 khz clearly without interference from WWV at 10000 or WWCR at 9985. It picked up all the stations I normally receive with my larger sets. There was no drift noted.
On am, It was not quite as sensitive as my other sets, especially at the lower end of the band, due to its small ferrite bar but was quite acceptable. It has a very deep and sharp null. There is lots of volume from the 2 1/2 speaker and it is clear for speech. On fm, it was just as sensitive as my other sets, but with automatic stereo, some fringe stations were a bit hissy.
Like any single-stage superhet it had some images: for example, WBCQ at 7415khz came in nicely at 6505 and at night, there were some images above 1400khz in the am band. These images were not bothersome and were not as bad as other sets I have used.

NIT-PICKING
It does not have the 60-meter band which has some good stations. There is no way to turn off the fm stereo to get rid of hiss on fringe stations. The thumbwheel tuning needs a delicate touch and a close watch on the digital readout. There is no backlight so tuning is by ear at night.

CONCLUSION
A very good radio for $30

I agree, Got one last year for travel etc., and was very surprised at what that little radio would pick up. Very good performance for the money and pretty tough too (dropped it out of my tree stand ear buds and all!) and it still works great. I do wish the display had a back light, but then it would have cost $37.00 instead of $30.00!

http://www.nyradiotv.com/digitalradio.htm

WFAN 660 (Infinity, sports, 50 kw)
WOR 710 (Buckley, talk, 50 kw)
WABC 770 (Disney, talk, 50 kw)
WNYC 820 (non-profit, variety)
WADO 1280 (Univision - news in Spanish)

Also, WCBS 880 (50 kw) and WINS 1010 (50 kw but Canadian clear
channel) (both Infinity all news outlets) say so on their web pages
(wcbs880.com and 1010wins.com)

Googling around, I also see that Multiethnic's WPAT (930, Spanish
music, Patterson, NJ) has an HD license which they use from time to
time.

I don't see any indication that the two other 50 kw AM outlets in NYC
(Disney sports WEPN 1050, Canadian clear channel, and Disney kids
WQEW, 1560) are HD.

Haven't had this problem, but it seems that I did hear of an instance
back in late 2005, when the radio was just released, of someone
getting a unit where some of those round buttons below the display
were somewhat recessed and were difficult to press.

If you've only just purchased the unit, I'd suggest that you send it
back to the retailer for an exchange.

It looks like the Eton E1 (minus XM satellite radio capability, it would seem) is to be rebadged as the Grundig G1.

http://www.universal-radio.com/catalog/portable/2001.html

Not available until late 2007.

The selling price on this set could potentially prove more attractive than that of the $500 E1XM: The G1's list price is $500 on Universal's website, as opposed to the $700 list price of the E1 (which Universal and other outlets regularly sell at 499.95).

RadioIntel has some pictures of the G1, taken at CES 2007.

I agree that the tuning is tricky, especially on MW. But I too think
this is a great radio for the price.

One hint that is not obvious. The MW is much more sensitve if you pull
up the antenna, even though you would think that antenna is just for
FM/SW.

WINS is not HD on AM. WINS news is on FM-HD2 of WWFS (formerly WNEW)
at
102.7-2 .

WCBS is HD on AM, but they are having technical problems with their
exciter- for a few weeks already.

Remember that HD on AM is during the daytime only.

I would -hope- that Ibiquity's website would be the most accurate.

This is the URL to the NYC listings:
http://www.ibiquity.com/hd_radio/hdradio_find_a_station/NY/StnMarket/NewYorkNY#stationlist

Yea, great radio - from Amazon:

"An annoying switching system and a too sensitive dial selector
combined with poor indoor reception adds up to a mediocre radio at
best. Battery hatch is very insecure (pops open all the time). Typical
Chinese workmanship. Definitely not your father's Grundig. Recommend
buying a good used one from Ebay."

My March 2007 snail mail Popular Mechanics magazine showed up here this morning.You know what that means,don't you?

A cop car came slowly cruising down my street a few minutes ago,with those extra bright roof top lights turned on.The car stopped at the end of the street for a couple of minutes.Every once in a while there are cop cars parked on this street because this neighborhood turned into a ''democrat neighborhood'' years ago.About a month ago,two cop cars were parked in front of that ''democrat house'' catty corner across the street from me.They were there for over an hour.About this time last year in Feburary,there were three cop cars and a plain white fed govt cop car parked in front of the house next door to me.Because that divorced woman that used to live there,her ex-hubby in Minneapolis had told her,If you want these kids,(two kids) come and get them.She did and he filed kidnapping charges on her.

Ron H,

For FM Stereo Radio reception in an Urban Area the
Tivoli Radios and most of the newer Table Top Radios :
Cambridge, Boston Acoustics, Bose, and Polk Audio
all do OK Out-fo-the-Box. For Suburban and Rural
FM Radio reception an External FM Antenna that is
located out-side and Up-in-the-Air helps. But none of
these Radios has a high quality AM Radio Tuner and
their AM Radio reception is Poor. An external AM/MW
Loop Antenna can work and help them -but- still their
AM Radio reception is only Good {Fair} - IMHO.

A new AM/FM Radio in the $600 price range
is the Polk Audio "I-Sonic" {Sound System}

Polk Audio's I-Sonic

Radio-Mart has an SW8 on ebay with an incredibly misleading description. He states that the serial number (4H12950015) is a late number and that the radio is "one of the last ones produced." Anyone who knows these radios will recognize this to be more correctly one of the EARLIEST of the SW8 series from the first 6 months of production in August of 1994 with no sideband selectable synchronous detection, limited LW frequency range and no whip antenna pre-amp - significant improvements that greatly added to the functionality and value of these rigs. His comment about "peering through the plastic bag" to read this number is laughable, as his photograph shows it sitting unwrapped!

http://tinyurl.com/yuaxla

If you're looking for an SW8, wait for a truly later model offered by an honest seller with a serial that begins with at least 6B.

Can someone tell me why the Sea FM has "Triple J Sea FM" set as its
RDS transmission?

I could be cynical but is this to confuse/mislead GC listeners into
believing that they are listening to Triple J?

Triple J in Brisbane also has the "alternate frequency" option enabled
like 2WS in Sydney has. Since AusWY has explained what the hell "AF"
is, the consequential scan that happens when I select Triple J all
makes sense now.

I've heard some minor players don't use RDS because allocating it
energy lessens the amount that can legally be used for the audio. The
power usage is the same, but the audio is a tiny bit quieter.

RDS decoding is pretty standard for car audio units from the last few
years at least.

As for what freqs a particular radio can receive, it's all down to the
market. If shops thought they could sell everyone a new radio or two
to listen to all the great new stations on the x-band, they would.
I've noticed an increased number of radios that can receive the audio
from the bottom of the TV band in Asian shops recently.

The SW8 never had a whip pre-amp. Drake improved the impedance match of
the whip antenna to make it more sensitive. The Grundig Satellit-800,
which was based on the SW8, does have a whip pre-amp.

What happened to the Red Curtains ??? I see they are now white. In most circles, white represents virginity and purity....much the opposite of our friend Martin.

I once owned a late serial SW-8 but sold it because it ate batteries and the display was fading and becoming intermittent, a common SW-8 problem as I see now others are reporting the same problem.

A better alternative is to buy an E-1 eton, I see Universal radio is offering several, used, in the $350-$399 range.

If AM stations don't do anything to stem the tide of losing listenership it
will soon go the way of shortwave.

Why would anyone spend over a $1000 or $500 or $150 or even $30 on a
shortwave radio and many feet of wire hanging precariously around the garden
only to hope to listen to a handful or two of foreign radio stations
broadcasting primarily propaganda in the English language for about 1 hour a
day at best on constantly changing frequencies and schedules? All the while
hoping 'Ol Sol will bless the listener with the rare event of no static, no
fading and complete aural comprehension?

If you listen to anal-log shortwave you have got to be an idiot.

GOD BLESS IBOC, DRM, etc!

3573. Year of Pig signals serious conflict

Newsgroup: rec.radio.shortwave

Year of Pig signals conflicts before new world order: soothsayers

The world can expect a roller-coaster ride of conflict and unrest, natural disasters and a plunge in global stock markets once the Year of the Pig begins, Chinese soothsayers say.
As the world farewells the Year of the Dog on Sunday, believers in Chinese superstitions have been busy consulting fortune tellers, feng shui geomancers and a wealth of new books for the year's fortunes.

Chinese fortunes are based on a belief that events are dictated by the different balances in the elements that make up the earth -- gold, wood, water, fire and earth.

Feng shui expert Raymond Lo said that according to ancient Chinese belief, the Year of the Pig is symbolised by two elements -- fire sitting on top of water.

"Fire sitting on water is a symbol of conflict and skirmish, and this may bring a relatively less peaceful year with more international conflicts and struggles," he said.

Lo said the last time such an arrangement appeared was in 2002, the year that followed the September 11 terrorist attacks.

"It is anticipated that there will be more international conflicts and disharmony, which will even lead to regional warfare, uprising and unrest, or the overthrow of governments in certain countries," he said.

The elemental arrangement for 2007, with fire standing on top, could represent openness, optimism and warmth, but it can also bring fire disasters and huge explosions, Lo said.

The Chinese calendar moves in 60-year cycles, meaning the world will experience in the new year events similar to those that took place in 1947.

In that turbulent year, the Cold War began in earnest when then US president Truman declared his anti-communist doctrine and the Soviet Union rejected a US plan for atomic weapons control, sparking the nuclear arms race.

That year saw the same elemental arrangement with yin fire dominant in the Year of the Pig.

"So it will not be surprising that there will be more gun battles, murder with guns, bombing attacks in the year 2007," Lo added.

The lunar calendar is based on the cycles of the moon and associates each of the 12 years forming a partial cycle with an animal. The pig is the last in the zodiac sequence that begins with the rat, followed by the ox, tiger,

rabbit, dragon, snake, horse, goat, monkey, rooster and dog.

Fortune-tellers base their predictions on the relationship between the zodiac animals and the characteristics of each animal year.

They also take into account the changing balance over the years in the five spiritual elements that Chinese philosophy believes form the core of the universe -- gold, wood, water, fire and earth.

Feng shui expert Lee Sing-tong predicts serious conflict in the Middle East this coming year.

"Religious wars will turn intense. There will be large-scale warfare or explosions," said Lee, a third-generation feng shui master.

He also expects serious diplomatic conflicts in the East, for instance between China and Japan, and says the problem will be most acute until May 5.

Fortune teller Alion Yeo, who predicted nuclear testing in North Korea last year, said there is a chance that the power of Pyongyang's leader, Kim Jong-il, will weaken.

"This will most likely happen between June and July. I can see their leader is in bad luck during the period. This means something will be changed: someone might replace him or he might fall ill," Yeo said.

"There might be a chance that he would leave his position or hand over his duty to someone else," he added.

The Year of the Pig will largely be a smooth one for the United States, although Yeo predicts an interest rate hike in the third quarter and a big accident between June and July.

"It could be a big fire or an explosion. It would be something that draws the world's attention and causes the stock market to fall," he said, adding however that the market would quickly recover.

Yeo also predicts a strong earthquake, at least 7.0 on the Richter scale, in a Japanese city between March and April. But the number of wounded would be limited by the earthquake resistance of the country's architecture.

Although Yeo anticipates global unrest, he expects a mediator will come in to balance the tense situation between conflicting countries.

"I don't think it will be that bad this year. Although there will be a lot of unrest and disharmony, problems will be solved in the end," he said.

Lo agreed. The pig belongs to the water element and is the birth month of wood. The pig symbolises the germination of plants and when new life is born.

"The pig year can bring a new beginning of international relationships and social orders, this could bring new regimes with new governments in some countries," he said.

And Lee predicts the birth of someone of national importance to China.

He said this person will be born on June 30 between 5.00-6.59 am Hong Kong time (21.00-22.59 GMT) somewhere in the east or south of the country.

"This date of birth is very rare. It only happens once every 60 years. It is very difficult to see such a good fate," he said.

Lee said he did not publish this prediction in his latest feng shui book for fear of inciting mothers to plan their pregnancies to occur at that time.

"I don't want to ruin the natural order. I don't want someone planning their pregnancy artificially. Heaven might not allow it," he said.

"But this child would be a prodigy, very intelligent and talented. This person would have the quality to become China's leader or a prime minister," he added.

The entire Universe is digital - Physicists have yet to discover an analog sub-atomic particle.
The screen you are reading this from is made up of discrete digital pixels - look closer > " . "
Your analog senses can't resolve digital information smaller than 1/60th of a second in duration.

I'm totally confused now. Do some of the buttons work some of the
time, all of the buttons work some of the time or some of the buttons
not work at all.

Since it is new and with a warranty have you contacted Eton customer
services? They have several phone and email links and a fax number.
Since it is so new I would just return it to the authorized dealer you
bought it from for a replacement.

Are you implying that YOU personally owned and compared each and every one of the above mentioned brand of radios head to head?

I can personally recommend the analog version of the Boston Acoustics Recepter using a Terk AM Advantage Loop antenna as an excellent AM (and superb FM) receiver for a table top clock radio. Better than any overhyped CCradio.

But if he wants truely exceptional reception in a table-top radio without subscription fees than IBOC-HD radios are the only way to go.

Sales ploy??? All marketing decisions are ploys to make sales.

> It's great that they're stripping off the XM.- Hide quoted text -
>
> - Show quoted text -

One possibility is that Eton will announce that the E1 is "upgraded"
and sold with XM installed for the north america market and the G1
will be sold as the shortwave radio. The other possibility is Eton
removes some features beyoind the XM plug from the E1 to make a
stripped down G1.

Given their tendency to announce but not deliver it's best to think of
the G1 as vaportronics until a working radio is available for sale.

You, same cheap crap, as the Eaton Shit E1 - made in China, not
Germany, anymore.

Dear Junius,

This is strictly conjecture on my part - I believe the "Etón" name has no cachet whatsoever as a radio brand (as opposed to a company brand) and perhaps they want to see which name sells best. Personally, I should hope for the return of the Grundig name but the quality has to be there or else that name too will lose whatever credibility it possesses. By eliminating XM capability (something I, as well as many others, do not want on such a radio), the manufacturing cost should be less and I hope that the selling price will be less, too. A "street price" of $399.00 would be good IF Etón can manufacture a high-quality set without the problems that have plagued the E1.

We shall see.

Best,

Joe

P.S. On Etón's web site, the price is listed as $500.00, the same as the E1. By the way, has anyone beside me noticed the "typo" in Etóns' ads in POPULAR COMMUNICATIONS and MONITORING TIMES where the price for the Grundig G5 is listed at $50.00 instead of $150.00? If only it were true ...

Forgetting for the moment that we all know of RadioMart's rep, why should a 97.5% positive feedback set off alarms? Seems like a high % to me! I mean, you're always gonna have some people ya just can't please (according to Abe Lincoln), so I would thing that, given that fact, again 97.5% seems good!

If you are a regular eBay user, you know that anything less than 99%
is an issue. In my experience, most folks have 100% positive feedback
or very near to it.

No question about it. That human zero set an appalling example. Though, I think the US media sets a far worse example by giving that trailer park tart any air time at all, much less front page headlines and broadcast specials. Now I'm waiting for the US media to find a way to connect the death of ANS with Al Qaeda. Then the people who control the US media can offer it up to the NeoCon gang as a pretext to invade Iran. I can hear it now.... "We have slam dunk proof that the Iranians posses "WMD" Weapons Of Mammary Destruction."

No, that is not true. Advertising is priced based on delivery of listeners, no matter what the format. It is always a function of a certain dollar amount for each thousand listeners, and pricing is by delivery.

A news talk station with good ratings gets the same rate as an FM with the same ratings in the age group an advertiser is buying.

The issue with news talkers is they often bill among the higer range in a market because they have higher numbers of minutes of spots. While most larger market FMs sell no more than 10 to 12 minutes of commercials, news talk often goes to 18 minutes and has more inventory.

The problem with AM news talk stations is that most have around half the listeners over age 55, where there are nearly no agency ad buys.

In the US, there are 4665 AMs as of last week. Of the ones in rated markets, only a small percentage, maybe 20% at best, are viable (decent signal and full market day and night coverage) and these tend to do well. The rest are either religious, brokered or ethnic.

For example, there is no vable AM in Washington, DC. Phoenix has only 2. So what you can see is that while a market may have well over a dozen viable FMs, the number of AMs is tiny.

No idea why they're developing this habit of dual branding of various
radio models sold in the US market (e.g. also the case with the E5 /
G5).

In Germany, the non-XM-capable E1 is sold under the Lextronix name
(http://www.thiecom.de/shop1/index.html?
target=WeltempfaengerLextronix.html); but that's another story
altogether.

> Germany, anymore.- Hide quoted text -
>
> - Show quoted text -

Made in India, actually. But we've gone through this more than once in
this group. Bharat Electronics Ltd (BEL) puts the E1 together. BEL,
as in the Indian public sector defense firm.

http://www.asdsource.com/source_detail_small/3040/Bharat_Electronics_Limited_-_BEL.htm

http://defensenews.com/index.php?S=06top100

So, buy your E1/G1 and contribute to the profit that BEL turns over to the Gov't of India (and yes, BEL regularly turns over a profit to the GOI).

http://pib.nic.in/release/rel_print_page.asp?relid=21377

But, true, the Eton/Grundig/Lextronix E1/G1 is not made in Germany. Nor is it made in Portugal, as the Grundig Satellits 400, 500, 650, 700 were.

By the way, can anyone in this group tell us which was the last shortwave radio that Grundig mass produced from production facilities in Germany?

This antenna originated as a ship broadband antenna where there are
stays that could be used as an antenna if insulated. The stays on a ship
slope. Generally for reception higher is better so I would nix the
sloping idea.

You can build a simple folded dipole antenna out of TV 300 ohm twin lead
and use a common 300 to 75 ohm BALUN. The TV/FM BALUN transformers are
not all created equal. Some are poor below 15MHz. The BALUN units with
more heft indicate a bigger core that will work well down into the AMBCB
band. The twin lead will not support itself so you could tie-wrap it to
nylon cord or rope. It would be good if the antenna was at least 40 foot
long and longer would be better.

If this works well for you then go to the trouble of building a larger
capture area antenna.

I replaced my EF-SWL with an RF Systems T2FD cropped to 35' and the difference was amazing. Stations which were heard but noisy became enjoyable, and stations which I didn't know were there popped out, not strong but good enough to listen to.

Don't worry about the slope. It helps make the antenna more omnidirectional above all but its certainly not required to get good results.

Hello Joe,

Right you are on the Eton website pricing. It could be that the G1 offers nothing but the Grundig name and the lack of XM...all for the same $500 price!
It's interesting that on Universal's website, the E5 and the G5 are both priced at $149.95, yet the Eton E5 comes with a free Grundig FR200 radio, whereas there's no such bonus with the G5! I suppose either way, you get the Grundig name; it's just a matter of whether you want it on the re-cabinet-ed Degen set or on the wind-up "emergency" radio...

In any case, I personally feel that the "problems that have plagued the E1" are a bit over-hyped. Admittedly, the recall issue was something of a disaster for public perception of this product. But issues with the E1 are by no means in the realm of those that plagued the Satellit 800 (a radio which, incidentally, I find to be one of the most pleasant to listen to shortwave radios of all the sets I've owned).

On the whole, however, the E1 is a stellar performer, particularly when compared with other portable shortwave receivers (for $500, though, one should expect that, right?). The +/- 0.04 or 0.05 kHz drift issue is really the only issue that folks seemed to have regularly noted with this set, from what I've seen. And really this is a pretty minor issue for most listeners. In fact, as I recall, Guy Atkins once posted a message in this group as to how to resolve this frequency offset issue. Also, as I recall, the E1 received some pretty decent praise from Mr. Atkins, who got some pretty impressive results using his E1 on one of his DXpeditions up there in Washington state. Indeed, I find the E1 ideal for these sorts of DXing excursions, where you want something with a fuller range of features than your average portable, but when you don't feel like lugging about a heavy DC power supply to power up a tabletop.

To each his/her own, though. I realize that there are gripes on the price of the E1; and I'd like to see it come down, myself. Admittedly, I certainly didn't pay full retail for mine; I picked it up with one of the Sharper Image's 20% off discounts (and that's a pretty decent discount on a $500 radio, even if you do have to pay SI's outrageous S/H fees!).

As for what the story is on the G1, it's as you said, Joe: we shall see...

All the best,

Junius

We have had this conversation before Mikey with you making the same
accusations. No new material?

Most of the above are ' Talk Radio",

- what is the purpose of having them in HD ?

Now I'm sure your a nut case. Who is this "Mikey" and how long have you
been obsessing about him ??? Does everyone with the name "Michael" trigger
your suspicions ??? I've offered to tell you exactly who I am but you
refuse. I'm no longer considering you to be a simple troll or an agitator
out to get his jollies. Im seriously considering the fact that you may be
both disturbed and dangerous.

Michael

There are a ton of AM stations in the D.C area, which I never listen
to, anyway. I read, that news/talk/sports on the "clears" on AM are
alive-and-well and command higher ad fees than FM. BTW, there is more-
and-more negativity surrounding HD Radio, and it is all but dead on AM
- IBOC shall die, as DAB has in Canada. Analog AM will be around for
many years - too bad ! Consumers are not interested in HD Radio, as
75% of consumers are aware of HD Radio, but interest in HD Radio has
been flat-lined for two years:

http://www.google.com/trends?q=%22hd+radio%22%2C+%22internet+radio%22%2C+xm%2C+sirius%2C+podcast

Sucka !

Have you ever listened to AM (MW) HD? The voices sound MUCH better
than analog!
It's actually pleasant to listen to. But, they are only HD during the
day, so they're almost useless, except on weekends! That's why WINS
AM is on FM-HD2, so that it can be on all day and night.

FM HD doesn't have too much of an audio improvement over analog HD.
The thing with FM HD, is that you can have access to more programs.

Low bit rate audio does not sound "good." I find analog pleasant to
listen too.

And not one is vable. Not one covers the entire metro day and night.

> I read, that news/talk/sports on the "clears" on AM are
>alive-and-well and command higher ad fees than FM.

As I said, this is not true. they get the same ad rates ("fee" is the wrong word) per listener as any other station. And there are only 24 or 25 of those stations (Former 1-A clears) in the whole country, out of nearly 5 thousand AM stations.

>BTW, there is more-
>and-more negativity surrounding HD Radio, and it is all but dead on AM

No, it isn't. Stations in mmajor markets with good signals (about 150 stations in the top 100 markets) either are or will be on with HD. The rest don't matter as they have no audience and don't cover their markets.

>- IBOC shall die, as DAB has in Canada. Analog AM will be around for
>many years - too bad !

Analog AM is dying. Fast. HD may not save it, but there is a chance. Without it, AM is fading and the only really big format news/talk, is starting to move to FM where it attracts attractive listeners for advertisers that it does not do on AM.

> Consumers are not interested in HD Radio, as
>75% of consumers are aware of HD Radio, but interest in HD Radio has

But there is so little AM listening at night that it really does not matter,
business wise.

I pick off Limbaugh from WJR now, a couple hundred miles away, instead of the local outlet, because the HD signal is cleaner audio-wise, and WJR doesn't add the trace of echo chamber that the local affiliate thinks makes them sound good.

However, I need an external AM antenna to do it.

The trouble with HD AM is that the ones using it aren't the ones paying the cost; the adjacent channel stations are. Why the FCC allows that, I can't say. Probably a payoff from IBOC.

Yes, it is amazing that someone whose abilities were focused on
destruction of self and others around her could become such a
celebrity. But of course she is far from the first one. I don't
think that the U.S. Media made her any more than it made the other
ill-behaved bimbos like Paris Hilton. They are made because enough of
us are willing to read trashy magazines like People and National
Enquirer and watch the celebrity TV shows. The cliche of the ill-
behaved stripper who seduces and marries the rich old geezer still
attracts a lot of viewers.

One of the high-brow jewelery/watch companies has actually come out
with a Paris Hilton line, that true to origins is quite tasteless, but
it does have the requisite price tag and brand name.

3641. Antenna Question... 2 meters maybe?

Newsgroup: rec.radio.shortwave
Date: 2007-02-16 13:42:57 UTC
From: rdoc <not@thispoint.net>
Message-ID: <kuGdnambUKB-KUjYnZ2dnUVZ_vqpnZ2d@giganews.com>
Source record: 105640

Hello again,

Background:

I use a scanner as part of my rail photography hobby. I listen, mostly, to 160.800, but not exclusively (I sometimes travel for gatherings of other rail photogs or see what I can catch when I'm in other areas), although this one also seems to be about the middle of the AAR band. I listen in the car and also while hiking to some remote areas for good scenery.

On one car I have a magnetic (good for me) center loaded Hustler that a very reputable car audio shop sold me saying that all the truckers there like it best. It does OK, but I wondered if I could do better.

A guy at work told me that 160.800 is right in the middle of the 2 meter band, but he doesn't have a radio and can't say how he knows this. He's one of those guys who's right about odd tidbits often enough to sometimes check what he says... but so 'full of it' often enough that I *always* check what he says before actually using any of his suggestions, if you know the type.

Questions:

Is he accurate on this one?

What is a good antenna for this purpose? Is there a removable version?

What about one for using on the scanner as a portable clipped to my belt?

Thanks for any suggestions or input on the topic.

The closer to 45 degrees the more omnidirectional the antenna.
Otherwise just broadside it to the major directions of interest.

The broadcast bands are already over-crowed with stations - who needs
more low-bitrate HD channels, that broadcast the same repetitive
programming, if one can even receive the lousy HD channels.

As I said, news/talk/sports on AM is alive-and-well and command higher
ad dollars than FM. You are just one of the naysayers, who shill
IBOC,as the great savior. The FM band is already over-crowded and
there is no big move from AM to FM.

> reputable car audio shop sold me saying that all the truckers there like it
> best. It does OK, but I wondered if I could do better.

If "all the truckers there like it" then it's probably a CB antenna -
designed for 27MHz - and will not be all that effective at railroad
frequencies near 160MHz. [0]

> A guy at work told me that 160.800 is right in the middle of the 2 meter
> band, but he doesn't have a radio and can't say how he knows this. He's one
> of those guys who's right about odd tidbits often enough to sometimes check
> what he says... but so 'full of it' often enough that I *always* check what
> he says before actually using any of his suggestions, if you know the type.

Literally, 2 meters is 150MHz. (the speed of light, divided by the
wavelength - but that's more than you wanted to know<grin>) Usually the
term is used to refer to the 144-148MHz ham radio band. This is close
enough to 160MHz that 2-meter ham antennas will be useful for your
purposes.

> What is a good antenna for this purpose? Is there a removable version?

A lot depends on how large of an antenna you're willing to tolerate. In
general, the bigger the antenna the better, but you probably don't want
to fasten a phased array of 19-element Yagis to your car<grin>.

Two examples (of many!) of antennas you might be interested in:
http://www.diamondantenna.net/m285.html
http://www.cometantenna.com/products.php?CatID=1&famID=4&childID=3
(the SBB-25 - the antenna in the middle of the page - is the one
you'd be interested in)

VHF ham antennas are usually sold in two pieces. You purchase the
antenna itself separately from the mount. The antenna is always
removable from the mount. If you want to be able to remove the mount as
well, you'll have to use a magnetic mount. (which will work just fine)

The mounts available from Diamond (and again, there are plenty of
competitors):
http://www.diamondantenna.net/Product_Catalog/mounts.html
(for the antennas listed above you'd want "UHF" or "SO-239" mounts)

> What about one for using on the scanner as a portable clipped to my belt?

Again, the larger the antenna the better, but again you're going to run
into practicality issues.

Two pages showing portable antennas:
http://www.cometantenna.com/products.php?CatID=1&famID=1&childID=4
http://www.diamondantenna.net/Product_Catalog/HT.html

You only really *need* a single-band 2m antenna for railroad monitoring.
But it looks like you can't get one<grin>. A dual-band will work
fine. You'll need to match the connector (BNC or SMA) to what's on
your scanner - probably BNC but check the specs.

There are antennas sold specifically for use with scanners. Usually
they try to receive *all* the bands that people scan - low-VHF,
high-VHF, UHF, 800MHz. Since you seem to be interested only in 160.800
MHz (which is high-VHF) you'll probably find a single-band antenna more
effective.

Doug Smith W9WI
Pleasant View (Nashville), TN EM66
http://www.w9wi.com

[0] though there have been some problems with truckers operating
illegally in the 2-meter ham band, so it's not impossible this actually
is a 2-meter antenna. Can you post the URL to a picture? Maybe on the
Hustler website?

I just got one and the medallion on the front is missing. Anyone have a spare or know where I can get one or how to make one. The dial cords need to be restrung and there's no diagram in the manual so I'd like to know if anyone has the info in their archives. The cord is quite hard and heavier than anything I've seen before, about 0.080 inch , or 2 mm in diameter pretty close to No. 12 wire. Where would I get some?
tnx

I ran across a web site detailing the restoration of the
Pro-310. I think it was N5QT but I can't get into that site.
According to this site these are particularly difficult
receivers to work on. This fellow has had to have parts made
for it and discusses the dial string problem. If you can get
in touch with him he may have a source for the medallion and
other parts.
I remember seeing and playing with a PRO-310 at Henry
Radio when they were brand new.

>
> --
> Telamon
> Ventura, California

Telamon,

Yes 300 Ohm TV type Twin-Lead will work for a Quik-and-Dirty T2FD.
To simply construction - Instead of a single 450 Ohm Resistor in the
Center of the upper T2FD Antenna Element with the 4:1 Balun in the

Center of the Lower T2FD Antenna Element. Put a 220 Ohm Resistor
at each end of the Twin-Lead.

And Yes Again - You are right that the better quality 300 Ohm to
75 Ohm TV type Matching Transformers {Baluns} can work down
to at least 5 MHz and as you point out these are usually the larger
diameter ones which have a bigger Ferrite Cord, which is the key
performance difference, besides increasing the number of windings.

IIRC - John Doty wrote about using the Binocular Ferrite Cores from
TY type Matching Transformers and -re-winding them with more
windings to get better performance across the Shortwave (HF)
Bands and down into the AM/MW Band. - - - Searching . . .

The "Perfect" Feed-in-Line for Wire Shortwave Listening (SWL)
Antennas

http://www.hard-core-dx.com/nordicdx/antenna/feed/coax2.html

TIP - Re-Construction of a TV Parts Matching Transformer {Balun}
into a Shortwave Listeners (SWL) Matching Transformer {Balun}
http://www.hard-core-dx.com/nordicdx/antenna/feed/coax2.html
-by- John Doty (jpd@space.mit.edu)
* My Antenna and Feed System are built with Television Antenna System
Components and other common hardware. These Parts are inexpensive and
easily obtainable in most places.
* The Matching Transformer {Balun} is built around a Toroid {Ferrite
Core} extracted from a TV 300 Ohm to 75 Ohm "Matching Transformer". If
you're a pack rat like me, you have a few in your basement: you
typically get one with every TV or VCR (or you can buy one). Pop the
plastic case off and snip the wires from the Toroid (it looks either
like a tiny donut, or a pair of tiny donuts stuck together).
* The Matching Transformer {Balun} Windings should be made with thin
Wire: I use #32 Magnet Wire. The Primary is 30 Turns while the
Secondary is 10 Turns.
* For a One-Hole Toroid, count each passage of the Wire down through
the Hole as One Turn. For a Two-Holer, each Turn is a passage of the
Wire down through the Right Hole and up through the Left.

= = = Source - Rec-Radio-Shortwave - NewsGroup
= = = On Feb 16, 5:51 am, David <rick...@knac.com> wrote:
-
- The closer to 45 degrees the more omnidirectional the antenna.
- Otherwise just broadside it to the major directions of interest.
-

David - That is true.

IMHO - The T2FD Antenna needs the 30 Degree "Slope" {Tilt}
for better All-A-Round Shortwave Listening (SWL) Reception
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/12285

Sloping does add a Vertical Dimension to the T2FD Antenna
http://en.wikipedia.org/wiki/Dimension
and at 45 Degrees the Horizontal and Vertical Aspects are
Equal and the Signals should be more Omni-Directional
{All-A-Round} then -if- the T2FD Antenna is simply Rigged
Horizontal [Flat]. =But= 30 Degrees is what is most often
the recommended Sloping Angle for the T2FD Antenna.

"Actually, the idea behind the slope is to make it more
omnidirectional. The ideal slope is something like 30
degrees, but there's no hard-and-fast rule on this.
Set it up as best you can." -by- Eric F. Richards [R.R.S]
http://groups.google.tt/group/rec.radio.shortwave/msg/bb4ab0c2009b662c

Then to Quote Myself in a prior Post :
"Yes 30 Degrees works well for most Sloping Receiving Antennas.
Horizontal (Flat) Wire = 100% Horizontal Dimension Area of Radiation.
Vertcal (Upright) Wire = 100% Vertical Dimension Area of Radiation.
45 Degree Sloping Wire = 50% Horizontal and 50% Vertical
Dimension Area of Radiation.
30 Degree Sloping Wire = 87% Horizontal Dimension and
50% Vertical Dimension Areas of Radiation.
- - - Roughly speaking.
The 30 Degree Sloping Wire Antenna Element to some
degree can be though of as the same space equalent as
an Inverted "L" Antenna which would make up the other
Two Sides of a Triangle created by the Sloping Side.
* 30 Ft Sloper Antenna would take up the same space as
a 15 Ft Vertical by 26 Ft Horizontal Inverted "L" Antenna.
Note - This Inverted "L" would be 41 Ft long (+11 Ft) and
have 37% more Wire-in-the-Air.

* 52 Ft Sloper Antenna would take up the same space as
a 26 Ft Vertical by 45 Ft Horizontal Inverted "L" Antenna
Note - This Inverted "L" would be 71 Ft long (+19 Ft) and
have 37% more Wire-in-the-Air.
- - - For some it simply comes down to the fact that the
Sloping Wire Antenna may be eaiser to Rig then the
Inverted "L" Wire Antenna." -by- RHF
http://groups.google.tt/group/rec.radio.shortwave/msg/4e016d6d5422adb3

"The T2FD Antenna when Mounted at an Angle of 30 Degrees
will provide an Omni-Directional response with Low Noise."

Answering some questions from tomorrow

I hope to finish my slop-er "L" long-wire today and have it running by this afternoon. Today is the Chinese Christmas and tomorrow is New Years so I won't get a lot of DXing done today or tomorrow but I'll sure be glad to have this antenna up and running.

The long leg is going to be north-south and the short leg east-west. I hope to find some coax for the run in.

I have been using the "double Yo-Yo" I got from that radio guy years ago on the north east cost that no one seems to like but we always got alone fine. The antenna worked well and I have enjoyed DXing but I look forward to the long-wire.

I have used the single Yo-YO that came with my YB400 here at the beach on both sides and it has worked great. If you all remember I have used this antenna all over the world and always had great things to say about it.

The next thing I will do is get my scanner working but there is not much to listen to here. Maybe the international flight coming in and that will be about it in English. My wife has listened and said that there are some "lovers" talking on one freg so maybe she can listen the power company is also on the radio. I'll just have to start keeping logs and see what I can find.

You all remember, I am on the other side of the world from the USA and it is tomorrow, 12 hours later then NY city.

More later.

The PRO-310 is a gorgeous receiver. Unfortunately, it has a case built inside a case and is very difficult to work on. On the broadcast band, it is single conversion, which presents a problem for images.

There were two different color models and they were too expensive to manufacture. They are certainly collector's items.

I have sold to radiomart (gottahaveit), and purchased from him without incident. Like all auctions, it is "buyer beware". I, like others have seen other than honest descriptions from him. Look at the pictures, ask direct questions. Pay very close attention to what is said in the description, AND to what is NOT said. This is the best way to protect yourselves on Ebay with anyone. Be very selective about what you buy and pay attention.

Thanks to the knowledgable people here who will step up and correct an error for everyone's benefit.

And what interest is served by a band that becomes unused and irrelevant?
Only a few percent of all listeners under 35 ever listen to AM (in other
words, under 10%) and that figure declines every year.

Anyway, younger listeners have chosen to pretty much ignore AM all day, and
the few remaining ones use the band even less at night. This is a listener
decision, not a station one.

Further, a station may choose what listener group it is going to serve,
including by age, sex, ethnicity, etc. Service does not mean serving all
people alike... just some of them.

As I said, news/talk/sports on AM is alive-and-well and command higher ad dollars than FM. You are just one of the naysayers, who shill IBOC,as the great savior. The FM band is already over-crowded and there is no big move from AM to FM.

News/talkers on AM get "market rates" that are identical for each demograsphic target to FMs. A station with 50,000 AQH listeners on AM will get the same rate as one on FM, not more... as long as you are comparing the same demos.

AM news talk stations do NOT get higher rates for equivalent listenrship than FMs do.

I did not say AM statios were turning in their licences and getting new FM licences. Operators are moving ageing talk formats from AM to FM to improve the younger demo performance...

KTAR AM in Phoenix moved to FM, making the AM all sports after moving the sports format from another, inferior AM whcih will be sold or donated.

WTOP AM in Washington, DC, a 50 kw AM, moved 100% to FM and put an experimental format on the AM in conjunction with a local newswpaper.

KSL in Salt Lake City began simulcasting in 2006 with an FM to improve younger demos... despite KSL being a 1A clear channel.

WNLS in Tallahassee moved the n/t format to FM, leaving sports on the AM.

Clear Channel has started FM news talkers in Pittsburg and New Orleans from scratch. The P'burg one already beats AMer KDKA significantly in 25-54, and the NO one is dramatically impacting WWL, clear channel 870.

Cox has begun simulcasting is Jacksonville and Dayton AM talkers on FM to improved the greying demos and lake of sales growth on the AM band.

And the story is just beginning. News talk can't survive long on AM as the demos are old and unsalable, so more and more will move to FM.

> ....!.......

this is what RF systems wrote me back:

RFI is a BIG problem. You must have a antenna receiving the magnetic
component of radio signals. Most antennas receive the electric part.
It is just that electric part which carries the RFI.

All RF-Systems antennas are Magnetic antennas. The best choice is to
use a closed (dipol) antenna (is also the most expensive
choise.....) The T-2FD will ouperforme the MK-4 longwire, but

if the T-2FD can kill your RFI.....hard to say! The
optimal angle to hang the T-2FD is 30 degree for closeby and DX
traffic. If you cannot hang it in a 30 degree angle it is no problem.

Well, lots of receivers are single conversion on the
broadcast band and do not have image problems. It seems to
me that the PRO-310 did have some problems, something to do
with the gain structure I think. It got fixed but they were
simply too expensive to compete at the time. For about the
same price one could buy a 75A4, which is arguably a better
ham receiver and could buy RX such as the GPR-90 for less
money.
It would be interesting to know the story behind the
PRO-310, it was beautiful, worked well, but just missed the
mark.

I would not use resistors at all. They are not desirable for a folded dipole.

You can more inductance with short lengths of wire with a binocular core. They make excellent transmission line transformers.

Meanwhile, I've spent much of this weekend playing around with Ten-
Tec's humble "black box" receiver, the RX320, available from Universal
for $349.00. It's amazing what you get for the price. The software I'm
currently using with it (RxPlus) gives me my choice from among 34
filter bandwidths, four VFOs, excellent dsp noise reduction, the
ability to decode SSTV, RTTY, PSK and HF-FAX, three AGC speeds,
extremely effective passband tuning, 1 hz tuning resolution...I could
go on and on. Yes, these black boxes chain you to a computer, it's
true. Yes, it unfortunately includes DRM capability if you get the
right software. However, it's *American made* and the bang for the
buck is impressive--a refreshing change of pace from the overpriced
portables people inexplicably obsess over. And I guess one nice thing
about these black boxes is that there's not as much to break or moving
parts to wear out. My only real complaint about this receiver concerns

its lack of synchronous detection, but my sense is that this could have a software solution down the line. I don't know. But even out of the box it's amazing what you get for the money. Eton schmeton.

I have TTFD Twisted Terminated Folded Dipole in my attic in my other
QTH and it is a fine antenna. I couldn't tilt it so RHF suggested
twisting it and it works very nice. If you aren't going to transmit
on it then you probably will want to delete the terminating resistor.
A fine antenna. I have to rig my qth for silent running so you are
better to put out in the back yard. I'm off this morning to look for
a new QTH here in Rochester, NY. 3.5 acres for some nice antennas I
hope.

NEO

3695. New swlog Forum Questions Re Which Forum(s) To Be Used From Now On ?

Newsgroup: rec.radio.shortwave
Date: 2007-02-17 13:59:09 UTC
From: Robert11 <rgsros@notme.com>
Message-ID: <Tc-dnQi1DK21l0rYnZ2dnUVZ_tadnZ2d@comcast.com>
Source record: 105693

Hello:

Regarding brand new swlog forum: http://shortwavelog.com/phpbb/index.php

a. Is this one being run by Bob ?
Is this the "only" one that should be used from now on ?

b. Is the old Yahoo swlog forum no longer to be used ?

c. How about the other swlog_users Yahoo forum that was created; is this no longer to be used ?

Thanks,
B.

3696. Binocular cores available

Newsgroup: rec.radio.shortwave
Date: 2007-02-17 14:07:47 UTC
From: N9NEO <yzordderrex@verizon.net>
Message-ID: <1171721267.032435.230730@v33g2000cwv.googlegroups.com>

I have gotten some large 125mu binocular cores from the dumpster here
at work. If they are a good choice for your balun then I will make a
portion of them available to people here on this board for shipping
cost. The holes are about 1/4" with a LOT of ferrite around it.
Should only need I think 1:3 of small wire for a nice unit.

If somebody who knows more than me would like to make comment on a
good design then please do.

regards,
NEO

"FM Translators for AM Stations?"

"And this might not be the best case. As you may remember, the FCC already has an open proceeding trying to determine the relative value of FM translators versus low power FM stations. That proceeding seeks to determine if low power FM stations should receive a preference over FM translators. That proceeding also put a freeze on the processing of all new FM translator applications - a freeze that was supposed to last 6 months but has now been in place for almost a year and a half. Since the FM translators that would be authorized by the NAB proposal could also preclude LPFM stations, as well as be precluded by the translators still pending from the last FM translator window, the opportunity to file for translators for AM stations may be technically precluded in some areas, and may not be able to occur until the LPFM issues are resolved. And none of that may come quickly."

OK, potty mouth: show me how there is so much listening to AM news talk at night that we could apply the term "popular" to it.

Remember, we need numbers of persons, not share. A 10 share in 7PM-Midnight is less than a 2 share at 7AM in terms of people. A 20 share at 11 PM is less people than a 1 share at 7 AM.

Example: At 7 AM, 2.6 million people are listening to radio in Los Angeles, 19.5% of whom are listening to AM
At 11 PM, of the 500,000 listening to radio, only 2.3% were listening to AM. So not only does AM command a very small percentage of peak hour listening, it even underperforms its own weak overall showing in evening hours.

Then, looking at younger demos, in 12 to 34, 7 AM, AM has only a 5.9 share of radio listening, and at 11 PM it is down to a 2.3% share.

So, AM night listening is dismal 12+, and nearly non-existent at night!

> Government, right?

Right, bud. Maybe you missed what I was getting at there...

Bharat Electronics is a Public Sector Undertaking of the Defence
Production Department of India's Ministry of Defence.

Note (to borrow from Wikipedia): "The public sector is the part of
economic and administrative life that deals with the delivery of goods
and services by and for the government"

Today, there privately traded shares of Bharat Electronics on the
Bombay Sensex; but, to be sure, the GOI is the dominant shareholder in
this enterprise. The GOI holds some 75.9% of BEL shares. So, when I
wrote of BEL turning over a profit to the GOI, I was referring to
dividend payments (refer to the GOI Public Information Bureau released
referenced).

Contracts from India's Ministry of Defense by far constitute the bulk
of Bharat Electronics' sales. Indeed, civilian sales and exports to
foreign gov'ts account for only about 16% of Bharat Electronics'
revenues.

Hey, here in the US, we might have the Tobyhanna Army Depot, with all
of the great work they carry out for CECOM; but the big production
contracts for military communications go to private firms, such as
ITT, Harris, Thales, General Dynamics, etc...

> There's not enough room on FM

Try reading my first paragraph again. I said that operastors are moving the news/talk formats to FM from AM. I did not say they were getting enw licences. Owners of both AMs and FMs in many markets are taking the format (the intellectual property) from the AM and plugging the audio into an FM station (replacing the existing music format).

In other words, they have found that putting the news talk format they had been putting on an AM transmitter onto an FM station the 35-54 listening increases considerably, reversing the downtrend seen on the AM channel. In some cases, the remaining AM frequency, devoid of its format, became nearly valuless (like 1500 in DC) and in other cases a simulcast is being run to offer the fomrat on both bands... FM for younger, more salable demographics, and AM for the traditional listener (like WOKV in Jacksonville is doing).

There is plenty of "room" on FM. All it takes is a lesser performing FM format that can be replaced by an existing, but ageing, AM news talk format and you have instant success and better demographics.

You just missed the point, I think. I am talking about an owner replacing an existing music format on an FM they own with the AM news talk format. No new channels or transmitters or frequencies or antennas or anything are needed. The format is changed by telling the router in the TOC at the station to send the audio to the designated FM instead of the AM (or in addition to that).

There is no licensing or technical change... it is all about content and where it gets placed.

"Hispanic" is a culture. I am culturally Hispanic. I don't understand how
this is such a big deal. Were I to have been lost in the Amazonian forrest
at age 13, and raised by Aucas, I would culturally be an Auca 5 decades
later.

>and ask ourselves what does the above have to do with the fact that
> you're a shill for IBOC?

Actually, I am hopeful (but not optimistic) that AM can be saved as a useful
part of radio's offerings to the public based on improving its quality and
perception. HD is about the only viable answer we have right now...
otherwise, we can write off AM in the next 5 to 10 years, totally.

Interesting set the RX-320. I played around with one once, and I
considered getting one for a time. The bandwidth flexibility is really
a plus. Admittedly, though, I have a preference for all of the knobs
and buttons and other things with which things can go wrong! Were I
looking to get a computer controlled set, I'd definitely go for the
RX-320.
As I'm soon planning to go for the General class ticket, though, I'm
thinking my next plunge will be for the IC-7000 (which, incidentally,
offers a passband width range of 200Hz to 10kHz in 200Hz steps for AM
mode...nice for those who enjoy BCB SWLing!). If Icom were to have
added synchronous detection to this unit, it'd hands down be much more
interesting than almost any of the recent offerings for SWLers in the
HF-receiver market.

The way you seem to prefer is to reduce interference by having stations fall
silent.

Nobody but a few DXers really cares abut adjacent channel reception in the
shadow of a powerful local signal.

Nobody "back home" would remember as I have nearly no family there and left
a decade before the time adult friendships are developed. Who in the would
would know? Of course, on my first daughter's birth certificate, dated
1965, the "father's name" has "Eduardo" as my second given name.

There you go... but I fail to see how it matters what name I have and use.
J. Paul Getty chose to use his second given name as opposed to the first
one... it was his choice, and he used it most of his life. Was he a fake
because he liked one name more than another?

You seem to attach importance to things that are either unimportant or just
matters of personal choice.

Considering that AM is dying (nearly nobody under 35 ever listens) what you
are saying is that you want th eonly potentially viable solution for AM to
be discarded, which will result in a guarantee that AM will die, and soon.
>
>>
>>

Well, I did earn my benefits from the VA, and I did earn my Social Security benefits, and I did earn my pension from my previous place of employment, and I did earn the money that is in the bank paying me interest!

Back over to you, prancer!

And how did I get to where I'm at today? It was all because of a Genuine Hispanic who wasn't supposed to be driving and decided to ignore that stop sign (she was late for her burger flipping job)... guess she couldn't understand English.

There are many millions of people who work in factories at night and who are driving at night,such as truck drivers,Airplane Pilots,boat people,Military people in America and around the World,fed govt snoops/spies/a..holes and many others who listen to talk radio at night.Talk radio is very,very popular with those people,whether it's on AM or FM radio or Shortwave or computers.

For local area radio talk shows I listen to a few certain talk radio shows on www.supertalkms.com (Paul Gallo and Garden Mama and JT and Dave on supertalkms) and www.wjnt.com
For music,I have the best taste in music in the World.On DirecTV,XM 40s on 4,songs from the 30s and 40s.On local area radio, www.miss103.com/main.html www.us963.com/home.php www.wyab.com www.wmpr901.com/index.php
I have to admit,songs/music from the 30s and 40s really,really is my all time favorites,always has been,always will be.

Not likely. You are fabricating to support your biases and bigotry. It would
be even more fun if I could find a Canadian relative of significance, but I
can not seem to find any for you to bash.

7160 is on from Ascension from 0300 GMT to 0600 for West and Central
Africa and then for another hour from the UK.

So it would appear the signal is going all the way around on the long
path to reach Southern California.

http://www.bbc.co.uk/worldservice/schedules/frequencies/wafr.htm

Have you tried 9740 from Singapore to East Asia up until 8 A.M. PST?
(1600 GMT)

This always did well when I was in/near San Francisco.

You might also try the Carribean frequencies from Cayenne and, I
think, Greenville, NC on

http://www.bbc.co.uk/worldservice/schedules/frequencies/caribca.htm

They've cut out the frequencies to Central and South America.

Not very likely. It is most probably coming off the back of the beam, as there is no darkness on the long path to propagate to California.

I own/moderate the SWLOG_USERS Yahoo Group you refer to. I opened it because Bob abruptly brought down the old one and I felt that we swlog users needed to communicate. While it might be good to maintain a forum group that is independent of the software's publisher, I would have not problem in pulling the plug on the SWLOG_USERS Group if there were no longer a useful function for it to play.

FDA widens peanut butter warning. www.drudgereport.com (there isn't anything store bought that is safe to eat anymore.I blame that Directly on fed govt,just look at that geneticuly modified S..t)

I like peanuts,and peanut butter on Nabisco Saltine Crackers.I guess I will buy one of those little nut (peanuts are really beans) grinder thingys at MacRae's departmental store over yonder across Highway 80 from me at Metrocenter Mall www.metromalljackson.com and peanuts (Planters Peanuts) at the food store and start making my own peanut butter.Years and years ago back in the 1970's I grew some peanuts in my back yard.I might just start that action going again too.

About three years ago,I was standing behind an old guy (he must have been at least eigty five years old or older) at the Wal Mart store checkout line.He had a big bag of peanuts still in the shells.He was fussin at the checkout lady about the price of that bag of peanuts.Only in Mississippi!

Hmmmm... interesting. I think he's using 9985 possibly at that time which is a WWCR transmitter, but that doesn't explain 21510. Now I know that ICOM as some strange IF freqs, but...

Ill have to try 9.985 the next time i come a cross this. The signal
was grate here
no fading.
what do you mean by IF ? (intermediate frequency???)

I know a bunch of people around here who don't care anything about computers.Last year my old buddy's wife,her brother bought a new computer and he gave her his old computer,she hasen't got that computer online yet.Years before that,a lady where she works gave her a computer,she never got that computer online either.An elderly guy who lives down the street from me,he was in the Army in World War Two in Europe,he doesn't care anything about computers.My brother in law owns a computer,he only used it for keeping in touch with certain people via emails,his wife (my next oldest sister) doesn't care anything about computers.They have (or soon will have) a site on eBay,but their grown married daughter in Byram (Byram is a suburb city of Jackson) handles the computer stuff.I own a very nice Velocity Micro Promagix tower computer I bought about three and a half years ago,$1,290.00 I only use it once in a while. www.velocitymicroblog.com

It missed the mark in its day but today they're scarce and quite collectible. I recall reading the review back in 56 when I was in high school and have been after one ever since. this is the second one I've ever seen. Kinda like if there was only one dandelion everyone would like to have in their lawn.

Interesting. Here is what you stated back on June 20, 2003 in
alt.politics.immigration:

"My oldest daughter is a dual Ecuadorian and American citizen, as she3 was born
in Ecuador and registered at the US Embassy as being of American parentage."

<http://groups.google.com/group/alt.politics.immigration/browse_thread/thread/25b535c6088a4868/bab6304d9024c3ce?lnk=st&q=david+eduardo+daughter&rnum=7#bab6304d9024c3ce>

I always find it interesting when I must remind a pathological liar of the things they've stated in the past.

I don't recall having any IF problems on HF, VHF yea. i cant think of anything around me that
would create an image that long with out a brake. there was no ID, so maybe it was a pirate
broadcast.

Dual nationals have, or at least, had in 1965, the right to choose citizenship at the age of majority. While a dual national by birth, my daughter chose later not to register as an American, and that right expired nearly 20 years ago.

She also never got a US passport prior to becoming 18... although she could have. Yet, legally, until she made her choice, she was a US citizen.

See'? Nothing is black and white. You are making a big deal out of a technicality.

The only technicality here is that you're a pathological liar. If that "right" expired 20 years ago then why were you, on June 20, 2003, stating that she's a dual citizen... hmmmm?

Glad you found that new crock!

You are nitpicking. In the past context, you were asking about citizenship
by birth, which was dual. It's as simple as that. What a person does later
is up to them.

Don't buy this cheap plastic-boxed Grundig S350 look-alike. Read the
reviews on eham.net - the guy's wide/narrow switch failed the first
day, and his radio was unusable. My $10 Sony ICF-S10MK2 gets the same
stations as my now-returned S350 - all of these, CCRadio, S350, and
Superadio radios are all hype.

> you're always gonna have some people ya just can't please (according to Abe
> Lincoln), so I would thing that, given that fact, again 97.5% seems good!

I look at it this way: a 97.5% feedback rating means that out of 200 customers, five of them are pissed enough to give negative feedback. Granted that you'll get those who can't be pleased no matter what, and those who shouldn't use eBay without a chaperone, but in a market where you pretty much live and die by your reputation, a 97.5 for a high-volume seller is gonna cause a lot of eBayers to wonder how that seller has managed to piss off that many people.

In fairness, I'll look at when the negative feedback was incurred, how the guy has been dealing with the rest of his customers lately, and what any recent negative feedback says... but a 97.5 for anyone with over 100 feedback raises a flag for me.

The first original Pig Stand opened on Washington Ave in Houston,Texas
(not in Houston,Mississippi,but I wish) in 1921.J.G.Kirby figured people
are so lazy they don't even want to get out of their cars to eat.That
was the birthplace of the drive through window,in Houston,Texas.
I bet we have bigger pigs in Mississippi though.Oink Oink Oink.

Read an article where tons of companies were forced to remove any
reference to 'PIG' in china due to their wanting to be nice to their
islamic population, what is there 200 billion people in china and
about 1 million islamic? I don't get it as china is know to be a
assho#@ to most their population, now why are they making nice?

"Well, lots of receivers are single conversion on the
broadcast band and do not have image problems."

Well, that is true, but what I left out was that the if is 50 kHz. It is the only radio to my knowledge that runs 50 kHz ifs with single conversion.

The bandspread tuning is quite unique. There was supposed to be a run of 1,000 - but I bet less than 100 are still around. Maybe the other 900 are still in a warehouse and will show up on the surplus market one of these days - ha.

I have one.

The binocular cores I speak of have two holes that you pass the wires through. They usually have a lof of ferrite material that you wind around so you get a lot of inductance per turn. That is nice for making wideband transformers.

Yes, the binoculars you speak of are very nice. I live across the street from a large apartment complex. If you ever get by this way please bring two pairs of binoculars and we will check out the people in the windows. Dogs are welcome here so no prob. Do you own any Kalideoscopes? They are fun too.

regards,
NEO

I think www.amazing1.com and some other stores sell some laser
light listening devices.I think the way they work (or suppose to work)
is the laser light picks up vibrations from sounds behind the windows
and converts the vibrations into sounds you can hear with head phones
connected to the laser light listening device.I have never tried out one
of those rigs though.Do a search for, Laser Light Listening Devices

I think I have a fancy kalideoscope around here somewhere that I bought
about thirty years ago.I used to play with those gadgets when I was a
kid.

I have some old Mac and Apple (and other brand names of computers) computers here.A couple of weeks ago I told that divorced woman next door to me I will give here two or three of them if she wants them.Same thing with some of my good old lawnmowers too,my old buddy gave them to me,all they need is a good tune up.

Last week,I gave her one of my half a dozen old garden hoses because she didn't have one over there.It's a good way for me to unload some of my junk on somebody.It isn't all junk though.The manual shift transmission in her 1987 GMC small pickup truck crapped out,she said she has a good used transmission on order.(I wonder if I really believe that? I had already told her to check out Wiley Deen's auto junkyard on South McRaven Road,if anybody has it,he probally does,at a good price too) In the meantime,she is using Ashley's late model Chrysler car.

Yeah, same here. Popular.

I lay in bed and tune around to find AM news talk from whererever I can find it.

There are only 24 or 25 of those. There are 4800 AM stations. How about
them?

And I know of one 1A clear that is considering an FM simulcast, and there is
already one doing a simulcast.

In Philadelphia and New Orleans, FM news talkers are beating KDKA and WWL
respectively, showing that n/t, on FM will do much better than on AM.

What I do on my free time is of no concern. And I don't even have a blog.

Perhaps the fact that Univsion Radio was the only radio company given an "A"
by Lehman Bros. based on fall ratings performance may have something to do
with how I get along with them!

BBC (sort of) World Service is
used as late night fill and as hourly newscasts
on many U.S. stations, usually NPR like
and many college stations.
Look around
Locally when a college was on christmas break they
just plugged the entire BBCWS (for NA) into their
entire 8 hour overnight service.
Also RNZI replays WS on its shortwave as fill.

Perhaps we could work something out friend. I'm a fairly decent
asshole, and I need a good used Drake R8B, and you need somebody to
take your wife off yer hands. Does she chat? If I can get her to
leave you would you buy me a Drake R8B? Of course as soon as she
divorces you I will kick her to the curb. I already have a wife and I
don't really need another. I just got a lot of time on my hands, I
need a decent radio, and of course I'm always willing to help others
here on the board.

Kind regards,
NEO

50Khz, I will have to look at the schematics. I knew
there was a low frequency IF involved in order to get sharp
selectivity using conventional components. 50khz _would_ be
likely to have problems with images.

Last year I read an article somewhere (I don't remember where) on the internet about a guy who owns a pig farm near a mosque.I think it's in Texas and those damn muslims over there don't like it at all.The guy and his pig farm were there first.The way U.S.fed govt is sucking up to the muslims (including all things evil) I wouldn't be supprised if they run him off of his pig farm.I love Pigs,Pigs are much,much cleaner that those nasty stinking muslims.

The move has stalled with the FCC. AM news/talk/sports is alive-and-
well. There still are thousands of AM stations and I can always DX to
Canada - no nighttime IBOC in Canada. DAB has failed in Canada, as HD
Radio/IBOC is failing here.

High-Performance PLL Tuning AM/FM/WX Radio
RadioShack Catalog # 120-0150
http://www.radioshack.com/product/index.jsp?productId=2472950&cp
This tabletop radio has AM, FM and weather bands with long-range
performance and high sensitivity. With 25 presets your stations are
only a touch of a button away, and the digital LCD display has a
backlight so you can clearly see stations and other information.
http://www.radioshack.com/product/popup.jsp?productId=2472950
* AM/FM/WX radio with long-range performance and high sensitivity
* 10 AM, 15 FM and 5 WX radio memory presets
* Digital LCD display so you can easily tune to radio stations
* Auxiliary input for additional line-in sources

who knows this could be a re-packaged version
of the mini-cc-radio that never was ~ RHF

3832. Build-Your-Own - Radio Shack Inverted "V" Multi-Band Shortwave Antenna

Newsgroup: rec.radio.shortwave
Date: 2007-02-18 11:28:27 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1171798107.761491.227930@j27g2000cwj.googlegroups.com>
Source record: 105831

OK so there was this eBay Auction for a old {Discontinued}
Radio Shack Inverted "V" Multi-Band Shortwave Antenna
formerly RadioShack Catalog # 20-181
* 65 Feet overall length (32.5 ft each leg)
* Multi-Band trap covers 60,49,41,31,25,21,19,16 and 11 Meters.
* Installation instructions included in package

Please Note - That this eBay Auction is CLOSED [OVER-ENDED]
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=160079232598

But it got me to thinking about Building-My-Own
Inverted "V" Multi-Band Shortwave Antenna

Build-Your-Own - Radio Shack Inverted "V" Multi-Band Shortwave
Antenna
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/12289

PARTS

1 - The center piece of this Antenna was a PL-259 T-Adapter
RadioShack Catalog #: 278-198
http://www.radioshack.com/product/index.jsp?productId=2103320
This UHF M-358 T-Adapter connects Two SO-239 Jacks to One PL-259
Plug.

2 - Standard PL-259 UHF-Type Coaxial Connector (2-Pack)
RadioShack Catalog #: 278-205
http://www.radioshack.com/product/index.jsp?productId=2103402
The Twin Five-Wire Multi-Elements-Antenna-Arms ended in
PL-259 Plugs with all Five Wires Soldered to the Center
Connector of the Plug for one-side and the other-side had
all Five Wires Soldered to the Outer Housing of the Plug.
Effectively wiring them through the T-Adapter as a Dipole.

3 - 100' Five Conductor [Flat] Antenna Rotor Cable
Belden Part # 8463 => http://cgi.ebay.com/_W0QQitemZ330020555066

4 - 50-Ft. RG-58 Coax Cable Assembly for the Feed-in-Line
RadioShack Catalog #: 278-971
http://www.radioshack.com/product/index.jsp?productId=2103483

CONSTRUCTION - Wire Antenna Element Construction :

* First Cut the Rotor Cable in Two Halves 50-Feet Each

* Strip and Tin the Wires at one end of each of the Halves
and Solder them all to one each of the Two PL-259 Plugs
as outlined above.

At the Measured Lengths from the Plugs 'Cut' and Inch of the Wire
from that one Element of the Five Wires in the Rotor Cable.

NOTE - These Wire "Cut" Lengths are for an Inverted "V" set at
30 Degrees off the Horizontal [Flat] -or- 60 Degrees off the Vertical
and are 5% Shorter that a Standard [Flat] Dipole Antenna's Numbers.

* Starting with the Longest Pair of Antenna Elements cut to 45.3
Feet
which would give a Tip-to-Tip Length of 90.6 Feet.
{ Cut for the 60-Meter Band ~ 4400–5100 kHz }

* Next the Second Pair of Antenna Elements cut to 36.6 Feet
which would give a Tip-to-Tip Length of 73.2 Feet.
{ Cut for the 49-Meter Band ~ 5800–6300 kHz }

* Then the Third Pair of Antenna Elements cut to 30.2 Feet
which would give a Tip-to-Tip Length of 60.5 Feet.
{ Cut for the 41-Meter Band ~ 7100–7600 kHz }

* Followed-by the Fourth Pair of Antenna Elements cut to 23.3 Feet
which would give a Tip-to-Tip Length of 46.6 Feet.
{ Cut for the 31-Meter Band ~ 9250–9995 kHz }

* Ending with the Fifth Pair of Antenna Elements cut to 18.7 Feet
which would give a Tip-to-Tip Length of 37.4 Feet.
{ Cut for the 25-Meter Band ~ 11.50–12.16 MHz }

* Coverage 60, 49, 41, 31 and 25 Meter International Shortwave Bands
SW BANDS => http://en.wikipedia.org/wiki/Shortwave_bands
http://en.wikipedia.org/wiki/Shortwave_bands#International_broadcasting_bands

* Take the Un-Soldered-End of each of the Rotor Cables and
Fold-it-Over 4"-6"and secure a Nylon-Poly Rigging Rope to it.

* Assemble the Two PL-259 Plugs to the T-Adapter.

* Attach {Secure} a Nylon-Poly Rigging Rope to the T-Adapter.

* Connect the RG-58 Coax Cable to the T-Adapter.

* Rig the Center at about 45 Feet above the ground and the
Tips at about 20 Feet above the ground.

* Connect the Coax Cable to the Radio/Receiver.

ok so -if- 'v' is for victory . . . then surely the multi-band
inverted 'v' antenna is for good shortwave listening - iane ~ RHF

Yawn...we've been hearing that for years! We're STILL waiting. There
are NO active viruses, trojans and worms for Macs currently in the
wild. "Proof of concept" models don't count.

OSX is superior to Windows for security. Period.

Of the 24 or 25 former 1-A clears, these are n/t/s: 640,
700,720,750,760,770, 810, 820, 830, 840, 870, 890, 1020, 1030, 1040, 1100,
1120, 1160 (FM simulcast), 1180, 1200, 1210.

So you are making your conclusion based on 21 out of 4,800 stations.

If you all bothered to READ the specifics of these radios and analyzed the radios in your mind, you wouldn't need to play rent a radio from your local Radio Shack. Radio Shack is the worst place to buy anything of the sort. READ!!

It's single conversion on the two lower bands below 2.2 Mc, IF is 52Kc
on those single conversion and 1802 Kc with double conversion on the 4
upper covering up to 35.53 Mc. Hey an expensive Q5er!

Army and police desert beleaguered Mugabe

Officers walk out as inflation hits 1,600 per cent - but the president's $2,000,000 birthday party goes ahead

Andrew Meldrum in Johannesburg
Sunday February 18, 2007
The Observer

Widespread desertions from Zimbabwe's army and police are weakening Robert Mugabe's security forces as large strikes loom because of the country's deepening economic collapse.

With inflation now at a global record of 1,600 per cent, The Observer can reveal that soldiers and police officers who cannot feed their families are leaving their posts in large numbers.

Flyers of army officers who have gone missing are posted in the hallways of the King George VI headquarters in Harare and the 1 Commando quarters near the airport, according to journalists.

'There are Awol notices up in the barracks, our reporter saw them,' said Bill Saidi, editor of the Standard newspaper. 'Discontent is very high up to mid-level officers. They do not earn enough to buy basic groceries. They are suffering the hardships all of us suffer now, yet they are the ones Mugabe depends upon to be ruthless in putting down any opposition. It adds up to trouble for Mugabe.'

Unhappiness is also rife among police. More than 10 per cent of officers have resigned and will leave next month, according to a report by Police Commissioner Augustine Chihuri, leaked to the Harare press. Many are joining the flood of the more than two million Zimbabweans estimated to be in South Africa.

Mugabe can ill afford weakening security forces as popular unrest is growing. A strike of doctors and nurses at government hospitals is in its eighth week and threatens to spread to teachers and civil servants. Trade unions are considering calling a nationwide general strike, despite the beatings and torture meted out to labour leaders last September.

Meanwhile, in an interview published yesterday Mugabe accused Britain of refusing dialogue with its former colony [China is your new puppet master, Mugabe!], and said he expects ties to improve after Tony Blair steps down. Harare's official [Government Propaganda] Herald newspaper said the dictator, at odds with Britain since ordering the seizure of white-owned farms in 2000, had asked former Tanzanian President Benjamin Mkapa to try to

broker talks with Britain, but later asked him to step down because the task was 'insurmountable'.

'Blair behaves like a headmaster, old fashioned, who dictates that things must be done his way: "Do it or you... remain an outcast",' Mugabe is quoted as saying. 'But we are hoping that with the departure of Blair, there will be a better situation and they can be talked to.'
[go talk to your new master, Hu Jintao]

Mugabe, ruler of Zimbabwe since its independence in 1980, claimed Britain has been trying to oust him. But the UK says Zimbabwe's long-running political and economic crisis is a result of rights abuses, vote-rigging and skewed policies, which have nothing to do with London.

Zimbabwe is also plagued by widespread power blackouts, often lasting more than eight hours. A breakdown in municipal water treatment is blamed for an outbreak of cholera in Harare's Mabvuku township. Life expectancy has plummeted to 36, the world's lowest, the economy has shrunk by 50 per cent since 2000 and inflation hit its record last week. The International Monetary Fund predicts it will soar to above 4,000 per cent this year.
[Communist China will take good care of you, Mugabe. Build you new Chinese palace.]

Yet Mugabe's supporters - now trying to raise more than £1m to stage lavish celebrations to mark his 83rd birthday on Wednesday - appear unperturbed. The funds and advertisements praising him will come from the same state-owned utilities that are failing to provide clean water, electricity and transport. [Is Kim Jong Il invited?]

'Mugabe is acting as if nothing is amiss and everyone should be happy to celebrate his birthday. He is not picking up the signs of growing unrest,' said Saidi. [Mao Tsedung acted as if nothing was amiss.]

I just took some shots of the beast with I'm guessing 35 years of dust
because I found a page from ham radio magazine, a Robot ad with ham
frequency allocations for Nov 1972. The ad has about the same amount of
dust on it as the radio. The 65 lb beast looks complete and original
except no medallion on the front I need to find one or get one made.
Several pics going up on the binaries.

Hi, I was DX'ing on 1340 AM yesterday morning from my location in NJ, and thru the jumble up popped an announcer saying what I'm 90% positive was "1340 WAGR", then faded right back into the jumble.

First of all this would be some catch, but second of all, this appears on a recent list of silent stations. Is it possible they were doing some sort of test?

Thanks for any help. --Ken

"...the governments in [Poland and the Czech Republic] see the danger and want closer ties with the United States. Last week, Poland's military attache in Moscow suggested the plan to have defenses operational in 2011-12 would be none too soon, since Tehran expects to have long-range missiles by 2010-13."

REWIND: September 11th, 1683, the day when Jan III Sobieski, the King of Poland, arrived at the Gates of Vienna.

...on the evening of September 11th, Jan Sobieski arrived at a hill north of the city, leading a force of 40,000 Poles...

...the King of Poland, in the van with the fearsome Winged Hussars and with 20,000 men behind him, led a cavalry charge down the hill into the right flank of the Ottoman army.
...
The battle was over in three hours. The King drove through the Turkish lines, and, seeing his success, the Vienna garrison sallied forth from the city and hit the Turks from the rear. Demoralized by these attacks and their failure to breach the wall, the Turks fled eastwards in haste, abandoning their tents, weapons, battle standards, provisions, and slaves.

W8ZR has a Pro -310 on his website. No medalion.

He mentions that the cabinet was wrinkle with black with gold trim or grey with silver trim. Somewhere, I think I read that at least came out of the factory in baby blue but maybe that was actually grey that had changed color slightly or viewed under special lighting.

Note on the radio shown at W8ZR, that there is no medalion. It is possible that one of the runs did not have it.

Mine does have a medalion, although it is some distance away right now. It is the black and gold version. I do have the manual with a photo of the medalion that could be used to recreate one. Someone with a bit of time and artistic ability should have no problem getting something that is close enough.

Let me know if you would like me to scan it. The copy will not be particularly good, but should get you in the ball park.

Exactly. I've downloaded a lot of software (shareware) from the web that isn't available for the Mac. I started with an Apple-II in the 80's but I saw the handwriting on the wall by the early 90's. It told me the IBM-PC was going to dominate the market. Too bad Apple was so greedy with their OS and hardware. They could have been where the PC is today. The recent Mac commercials on TV are funny but they insult the intelligence of anyone that knows something about computers. Some of those ads' are as close to lying as you can get without crossing the line. Some critics are calling them 'mean spirited'.

Are you on a vendetta with this subject? Most owners of these radios
don't have any problems with them.

Where is this happening? You expect that to happen in the LA area were
it will affect my listening?

I listen occasionally to the PBS stations but most of my FM listening
time is classical music. The other FM music formats only generate a
psychodynamic response of changing the station as soon as humanly
possible.

I am the great profit. I am now speaking to you from Walterboro, SC.

I have many young "sistahs" with me now. They know what to do.

I predict that on Feb. 23 there will be no more code requirements for ham radio.

Feb. 23 is this coming Friday, ham radio friends.

I predict that Mr. Davies will be able to check into The Great Liberty Net very soon.

The profit has spoken.

Now maybe Mr. Davies can speak to us from On The Domestic Front about his future plans.

Please pass this prediction to all of your ham and shortwave radio friends.

We don't want to miss this historical event of Mr. Davies on The Great Liberty Net.

I am the great profit.

Believe in me and I will give you many false predictions.

DAB has failed in Canada and IBOC will also - few digital radios have
been sold in Canada, as here. Canada has already stated that they will
not put up with nighttime interference. IBOC will fail in Canada and
the US.

AM dying - hardly:

The only things that are dying aer digital radio in Canada and IBOC
AM:

http://americanbandscan.blogspot.com/2006/12/digital-radio-in-canada.html

"RW Opinion: Rethinking AM's future"

"Only 175 or so AM stations have even licensed AM-HD. For a number of
reasons, quite a few have tried it and taken it off the air, or so the
anecdotal evidence suggests. (Ibiquity no longer reports in its public
summaries whether a station is on the air.)"

http://www.rwonline.com/pages/s.0044/t.557.html

Bye bye, AM IBOC !

Dunno about a dragon... but CRI had plenty to say about pigs/boars
yesterday. Doesn't sound like "banning all mention of pigs from Chinese
media".

WTF!

We Rednecks like Pickled Pigs Feet!

(Would make a hell of a lot bigger IMPACT on the ragheads!)

Well perhaps there are things (such as CRI) meant for foreign consumption and
others for local consumption.

Right now there's a *loud* numbers station on 6855, clearly audible under, in fact with nearly the same audio level as, an S9+10 Family Radio. How much power do you think the numbers people are running to come through like that?

Perhaps you can help. I was one of the people who COULDNT get ver 5 to
work and I found out weeks later it was because my XP home install
failed to install WMI (Windows management Infrastructure) files. I ran
the WMI diagnostic and over 60 files are not present.

I found a MESS of them on the install software all in the i386 folder.
Where (or can I) drag and drop them to in what directory?

I fear re-install of the OS because I dont want to lose the hard drive
contents

I have not made any posts to the new group, tho I listen, fearing I
might receive the list's wrath for the recent discord.

Yodar

Thanks

yodar

The papers are full of pigtalk, the radio (CRI) full of pigtalk and all my
Chinese friends are talking pig.

I think the pig is in this year.

I have a prediction too. I predict that Lloyd's audio in the next
show of "On the Domestic Front" will sound just as bad as his last
show.

Quick, get out of the house. They're transmitting from the spare
bedroom upstairs.

Hard to tell what power they are running. The relative signal strength
displayed on your S meter for each station will be determed by power
levels, propogation paths and the three antennas involved.

I think if one is going to worry about aliens (furriners as opposed to
Pastor Peters who's a space alien) running broadcasting facilities one
should think about Fox which is run by News Corporation which is run
by Citizen of Convenience Rupert Murdoch.

He would have never taken out American citizenship had he been able to
run TV stations in the U.S. without it. After all, if you have
Murdoch's money and power, what's the difference between Aussie
citizenship and U.S. citizenship?

By the way, speaking of Murdoch's News Corporation, did you hear about
the editor of a British tabloid who went on vacation in Spain? He
wanted to lie in the Sun.

The list is just stations that are 50 kw.... not the 1-A clears. Some, like KMIK-1580, have neither complete day nor night coverage of the market they are in due to high dial positions and extreme directionality. Quite a few of the Canadians on that list are silent, having moved lock stock and barrel to FM (the CRTC has a policy to encourage nearly all AMs to go to FM and close down).
>
> http://www.northpine.com/broadcast/50kwam.html

A number of these are so directional only the fish can hear them.

Less than 20% of radio listening is to AM, and under age 45, it is less than 12%. Under age 34. it is less than 8%. That is death in comfortable monthly payments. As Americans age, the average age of AM listeners increases each year. Listening by over-55's in rated markets produces no revenue.
>
> The only things that are dying aer digital radio in Canada and IBOC
> AM:

Industry Canada just started an inquiry into HD.

Of course, by the time they issue findings, the AM part may be moot. except for the major metros, Canada has a 10-year-old policy of encouraging AMs to go dark and switch to new FM channels... a significant portion of Canadian AMs have done this already. And this is because Canada no longer believes AM is viable as a mass medium.

Digital radio has failed in Canada, and IBOC will fail there, as it is
failing in the US:

1580 in Tempe has nearly no night coverage of anything populated... a number of the coastal stations, from WAQI to WEEI, shoot right over the central city and out to sea, with very, very limited landmass coverage. Others with incredibly limited land coverage or limited coverage of populated areas include WFLF in FL, KTNN in AZ, KDWN in Nevada, KTNQ in LA, KINF in New Mexico, KTWO in WY, WWZN in MA (it has never been competitive in Boston, even), KMIX and the incredible KBLA in LA that has a pencil-thin beam over Santa Monica and out to the Pacific (you can not even hear it at night 10 miles north or south of the transmitter, and 5 miles to the east it is gone, covered by XEDM1, the clear channel "owner" of 1580.

The breakdown of the 1-A clears several decades ago reduced night protection from "the whole country" to just 750 miles, so all these stations cover far less than they did when most listening was at night (pre-lifting of the TV freeze).

It's a statement of policy. Look it up-. And while you are at it, look at a
1985 listing of Canadian AMs and one today. Way over 100, including things
like Winnipeg's first station, CBW-580, and Calgary's 50 kw CKXL are gone
and the frequency retired. The CBS has eliminated all but a half dozen of
its hundreds of AMs and LPRT transmitters. In the case of 740 in Toronto,
they stated that an AM could no longer adequately cover the highly urbanized

areas of Toronto, and handed in the 50 kw AM on 740...

Prince Edward Island became the first province to have no AM stations at all, sometime last year. They all moved to FM.

It seems to me that Hallicrafters did the same thing with
a couple of their receivers. BTW, I _thought_ there was a
PRO-310 handbook on the web and that I had it. Evidently its
not so. I found some advertising and nothing more.

According to Radio Locator there are many AMs, just in the Ontario
Providence alone, in reach of Maryland:

http://www.radio-locator.com/cgi-bin/finder?state=ON&country=c&count=20&s=N&sr=1&is_lic=Y&
is_cp=Y&is_unl=Y&is_ful=Y&is_lp=Y&scope=all&prev=0

http://www.toronto.hm/radio.html

In addition to these lists, which I have access to many, I'll be dead,
before these US and Canadian AMs go dead, if ever.

http://www.northpine.com/broadcast/50kwam.html

Besides, AM talk/news/sports on the "clears" is alive-and-well, and
command higher ad dollars, than FM radio. Of course, your main focus,
as an IBOC shill, is to be a naysayer of the broadcast bands, so HD
Radio/IBOC can be the great savior. AM radio is not going
anywhere.Your sole purrpose in life, seems to be trying to make others
miserable - Univision must have you locked in an office, because no
one can stand to work with you, so no wonder, you just shill for IBOC
all day and night long. You really are a poor excuse of a man, and
also a high-school dropout.

3926. Starting into Shortwave, wanting to make sure I get a good receiver.

I live in Pennsylvania, USA.

I just recently learned about shortwave. I believe it would be something very good to get into.

I am not 100% sure on what to get in a receiver.

I want a portable kind so I can travel with it.

I found this online:

Kaito 1102 AM/FM Shortwave Radio

Is that a good radio to start out with or is it sucky?

I want to be able to pretty much hear everything and anything but I don't wanna pay $1,000+. Is there a really nice portable that has a fairly reasonable price tag? I seen some for like $350 but I don't wanna spend that much until I know for a fact I am getting a great radio.

And that number is about or less than half the AMs in Canada a decade ago. Canada has stated as official policy that AMs should only be left in large markets where improtant niche markets can be served by AM that the FM band can not accomodate. Examples are standards in Toronto or Chinese services in Vancouver. Otherwise, the remaining AMs will nearly all move to FM over the next few years.
>
> In addition to these lists, which I have access to many, I'll be dead,
> before these US and Canadian AMs go dead, if ever.

I'll send some flowers. Canada has reduced the total number of AMs by more than half in the last decade, and exce�pt for a few major markets and a couple of stations like CBW and CBK, no other AMs should be left in Canada.

South Africa eliminated all AM years ago... and many other nations have fewer AMs today than 25 years ago.... even lesser developed nations like Ecuador.

> Besides, AM talk/news/sports on the "clears" is alive-and-well,

No, it is not. It is in revenue and ratings decline, albeit slow. None of those 50 kw stations billed more last year than in 2005... most were down significantly, per the industry source, BIA, and the millar KAplan market reporting system.

> and
> command higher ad dollars, than FM radio.

Wrong. You do not get it, even when it is explained. Stations price by delivery. 1000 listeners gets the same rate, whether on AM or FM. So a news talk station with the same listenership in a sales demo as a music FM gets the same rate per spot. The problem is that most of the AM news / talk audience is NOT in sales demos, so news talk stations price below most big FMs in major markets.

>Of course, your main focus,
> as an IBOC shill, is to be a naysayer of the broadcast bands, so HD
> Radio/IBOC can be the great savior. AM radio is not going

With or without HD, the band is near death. HD may be a last chance. I even doubt that, but not to try is foolish. Staying the same is lunacy.

>Your sole purrpose in life, seems to be trying to make others
> miserable - Univision must have you locked in an office, because no
> one can stand to work with you, so no wonder, you just shill for IBOC
> all day and night long.

I actually travel 40 to 45 weeks a year to the 17 markets we are in, talking to listeners about what they like and don't like on the radio.

>You really are a poor excuse of a man, and
> also a high-school dropout.
>

I dropped out of High School because I was too busy building my first radio station, HCRM1. That station became survey-proven and revenue proven #1 in Quito, and was the base for a dozen or so more stations I built and owned.

School was pretty boring by comparison. Leaving high school (in the US) was the best thing I could do... when I went back to do college about a decade later, I chose the courses I wanted since a degree was not of any interest to me... and that was truly fun and beneficial.

Your suggestion is, apparently, that dullards drop out of school. I dropped out because it was boring, totally boring. Others drop out because they need to work for family reasons. Still others drop out because the US system sucks: we don't have the British one where at a certain point one decides on a white collar path or a technical field.

So to indict dropouts is to ignore the fact that many have no choice, and others know that a trade is more suited to them than a college career, while others don't need the experience as they are autodidacts.

Dear Sir,

The Kaito KA-1102 is indeed a pretty good radio as evidenced by the many positive owners' comments concerning it. Its price certainly can't be beat when one considers the features offered. However I should like to mention that, according to the 2007 edition of PASSPORT TO WORLD BAND RADIO, Degen's (the actual Chinese manufacturer) quality-control has become "hit or miss" during the past year. This, unfortunately, coincides with many of my experiences with Chinese-made electronic equipment. While some can be very good indeed, many of the products made "to a price" often are of inferior quality. And their "longevity" leaves a great deal to be desired.

May I recommend to you my personal favorite portable? It is the Sony ICF-SW7600GR and it is made (to a very high construction standard) in Japan. This radio is very well designed and is an excellent performer to boot. It can be purchased at J&R Music World <http://www.jr.com/JRProductPage.process?Product=1627439>, at Amazon.com <http://www.amazon.com/Sony-ICF-SW7600GR-Shortwave-Receiver-Reception/dp/B00006IS4X/sr=8-1/qid=1171859278/ref=pd_bbs_sr_1/002-0307019-7784070?ie=UTF8&s=electronics>, and at many radio dealers (Universal Radio, AES, etc.). It's more costly than the Kaito, but I truly believe it is well-worth the difference. I own

five (5) of these radios, purchased over several years; all function exactly the same (which shows great consistency of construction) and it is a radio that, in my opinion, an owner will never "outgrow" no matter how serious an SWL one becomes. It performs exceptionally well on shortwave, on local and distant AM, and on FM. It's easy on batteries (I use NiMH rechargeable ones). You will be able to hear just about anything you would like, remembering, of course, that we are now at the "bottom" of the eleven-year sunspot cycle, so listening becomes more of a challenge. (Conditions should start to greatly improve beginning as early as next year.) However, that does not preclude hearing some very exotic signals with this radio. Lately, I've listened to Egypt, Australia, South Africa, Albania, and many other stations with it. Hams who use single sideband (SSB) transmissions can also be heard easily and their signals are easy to demodulate with this radio. It's even a dual-alarm clock! (I always carry one on vacations or other trips.)

There is far more about which I could write, but I think you "get the picture." I believe you would be very happy with the Sony ICF-SW7600GR. I know I am!

Best of luck,

Joe

Thank You Very Much. SSB pretty much means LSB and USB right? Because
I wanna get all the modes. I think the main ones are AM, LSB/USB
(SSB?) and CW. Does that radio do it all?

Hello Again,

I notice that Google Groups somewhat "truncated" the links I posted.
An easy "fix" is to just copy the part after the blue link, click on
the link, and then paste the copied portion next to the site to which
the (partial) link takes you. Once you do that, the link functions
perfectly. I tried it myself.

Best,

Joe

I don't want to post there.

I said Hue to see if anyone would bite on it, we were at PhuBai in a little
French compound in the middle of a mine field, the 101st guarded us.
I lived in a little white trailer in the MP area where they showed blue
movies on the side on my white trailer.
I was a civilian with a GS rating. I did my think and they did their thing.

Also, my other question is, does anyone know of a site, where I can
buy shortwave receivers with money orders and debit cards? I do not
like nor have any credit cards.

Yes it does "do it all," and very well too! To explain simply, AM signals have a carrier wave and two sidebands, one upper sideband (above the carrier) - USB - and one lower - LSB. By "stripping" out the carrier and one of the sidebands, the signal becomes much more efficient - via SSB, far less power is required to achieve long-distance transmissions than with regular AM. The downside is that demodulating such signals ("tuning them in") is much more difficult (less convenient) than merely tuning in a "straight" AM signal. Audio quality suffers too, at least to some extent. The radio makes the signal listenable by actually generating a carrier within the receiver itself to substitute for the "stripped-away" carrier. The Sony does this very well indeed, far better than any other small portable shortwave receiver currently on the market. Due to the complexity of

tuning, only Hams and a very few broadcasters (most notably the Armed Forces Network) use this mode. But you can surely hear some very interesting things on the Ham bands and you'll almost always find them transmitting in SSB. Below 10000 kHz, most Hams use LSB; above 10000 kHz, they mostly use USB. But this is not a "hard and fast" rule. (AFN uses USB exclusively no matter the frequency on which they're transmitting.) Once you tune in a signal via straight AM - and hear something that sounds like "Donald Duck," you merely switch between USB and LSB and then adjust the clarifier control on the ICF-SW7600GR until the signal comes in clearly. Once you get the hang of it, it's easy.

Please note this carefully - shortwave radio isn't easy, like AM and FM radio. There is a learning curve. No one becomes an instantaneous DX expert. When you get a shortwave radio, the very first thing you should do is to read the instruction book! And then read it again! Keep reading it until you thoroughly understand it and can operate all the facilities (functions) of the radio. Then the REAL learning starts. You have to learn WHERE, WHEN, and HOW to hear those exotic signals you desire. There is no other way than to read (books as well as online sources) and get first-hand practical experience. It takes time and there is no way to compress time. And you're going to make mistakes. (Remember Oscar Wilde's famous quotation: "Experience is the name everyone gives to their mistakes.") Any shortwave radio is a sophisticated piece of electronic gear and, as such, demands effort. That said, in my opinion, any effort put into learning this hobby is well-worth it and the rewards will greatly exceed the effort involved.

Best,

Joe

Remember Don Fox?

One of my earliest memories growing up in Hollidaysburg, Pennsylvania was sitting in a first grade classroom reading: "Look, Jane, look. See Spot run." These concepts-looking and seeing-seemed to "stick," lasting far longer than chemistry or catechism or calculus.

This conservative little community in the shadow of Appalachia offered much to look at and see for an inquisitive boy, the second of six children.

Yet the more I saw, the more I wanted to see, and by the time I graduated from high school the world beyond the village borders beckoned. It beckoned me to a career in broadcasting, and in 1966-'67 it called me to duty in Vietnam where I served as Chief Announcer for the Armed Forces Vietnam Network (AFVN). There I hosted the now-famous (or infamous) "Goooooood Morning, Vietnam" radio show, The Dawnbuster.

During my off hours I continued the habit ingrained by that Weekly Reader. I looked. And what I saw was a proud yet anguished people, maintaining their dignity in the hardscrabble circumstances of war at their doorsteps. I looked-hard-and what I saw led me to photography.

Returning to "the world" led me to a career in broadcast journalism, then to college and degrees in History, and Philosophy, then onto a Master's degree in English. In 2002, I retired from nearly a quarter century of award-winning teaching in an upscale Upstate New York suburban high school.

Retirement afforded me the time and energy to re-fan the embers of my earlier passion, looking and seeing through the lens of a camera. Yet what my camera caught outside myself never quite matched what each scene awakened within me, and so my interest in digital imaging emerged and shifted my focus from photographs to images. A photograph, I came to understand, can capture a body, but an image can reveal a soul.

With all of today's digital imaging tools at my disposal, the challenge is not to ask what I can do to a photo to improve it, but how can I help the photo reveal what lies within and beyond itself. The true task is to release its spirit, and by doing so to confirm to others another elementary truth: that in order to unlock our humanity we must earnestly foster those childlike gifts-to look, and to see.

http://www.wwdxc.de

TIME TO SAY GOODBYE ---
SILENT KEY - WOLFRAM HESS, DL1RXA and DK0DX

Wolfram suffered an apoplectic stroke and died on February 9th, 2007; just before the very last broadcast of Ham radio and SWL hobby program "World DX Meeting" on Deutsche Welle's English service mailbox program on February 25/26, 2007.

He was born in 1940 and in 1954 he became the youngest radio amateur in the GDR (DM3KNN), just 14 years old.

He started his occupational career as hobby program presenter on former GDR external service "Radio Berlin International". After the collapse of the eastern block he was well known as presenter of "DX Aktuell" hobby program on Deutschland Radio Berlin broadcaster [former RIAS Berlin]. And was too, well known as "Sunspot Cycle and HF broadcast condition prediction 'Pope'" in the ham radio scene in Germany and beyond. Listen to some DW World DX Meeting programmes in mp3 or .ra format:

I recommend against the Kaito 1102. I bought one for my wife (she's not into shortwave but likes the pre-sets many shortwaves radios have) and the construction quality is lacking. Specifically, there seems to be something loose in regards to the battery compartment - sometimes, inserting the batteries results in no power, other times (usually with a little jiggling of the spring that holds the battery in place) there is power. The price is cheap, but (as is sometimes the case) you get what you pay for.

I have the Sony ICF-SW7600GR and agree with the other comment by Joe Analson (sp/mem?) that it's worth the extra money.

I understand perfectly. However, that has nothing to do with you being a
pathological liar.

Nice try, boy.

dxAce: Hey, did she [referring to Edweenie's daughter] get kicked out of Ecuador at gunpoint along with you?

David Eduardo: No, she is an Ecuadorian citizen, and currently owns several radio stations there.

dxAce: She's an American citizen as well, right?

David Eduardo: No.

dxAce: When did she change that?

David Eduardo: It's by birth. She has never been a US citizen.

dxAce: Interesting. Here is what you stated back on June 20, 2003 in alt.politics.immigration:

"My oldest daughter is a dual Ecuadorian and American citizen, as she3 was born in Ecuador and registered at the US Embassy as being of American parentage."

<

We've seen him confused now about his own job title, his ethnicity and
now the citizenship of his daughter--assuming that he in fact HAS a
daughter. I can only wonder why this guy is spending his time here, in
this group. He needs a group that's about psychotherapy.

At this advanced stage of his life I somehow doubt that his propensity to lie pathologically can be cured. As far as I can figure his problem began when he was around 10 years old and at this point he is 60, so he's been at it for some time.

Everything he says must be gone over with a fine toothed comb.

You must refrain from making any further predictions.

I am the great profit and I alone am authorized to give false predictions on the newsgroups.

If you wish to be a profit you must come to "the farm" and spend some time "out behind the barn with the sistahs" for your profit training.

And then we will declare you a beginner profit and then we will give you a license to make some baby step false predictions.

If you make any more predictions you will be fined ten thousand dollars in federal court and Mr. Jim Davies will serve as counsel for the prosecution.

I am the great profit.

I have spoken.

I agree. People have the right to pay for and say what they want on
the air, but at the same time, I wonder if the FCC should investigate
if it's really in the public's best interest and good to have dozens
of religious broadcasts on the shortwave bands all at the same time,
for the majority of the day.

I have no idea, how Univision could put up with someone, who spends
24/7 on message boards, or maybe he doesn't even work. His sole
existence in life is to try and make others miserable - this IBOC
shill would love to put an end to SW and AM DX'ers, to the sole gain
of HD Radio/IBOC. To his displeasure, SW and analog AM will be around
for many years, as HD Radio/IBOC is failing on AM, and will just end
up being a niche market for radio-geeks. Here is an interesting on-
going poll by BMW owners, who are interested in buying either Sirius,
or HD Radio:

http://www.bimmerfest.com/forums/showthread.php?t=152874

This shill realizes that for HD Radio/IBOC to succeed, in part, he needs to convince the radio-geeks - you would think by now, with all the hatred towards IBOC, he would have gotten a clue. He spreads the sames lies on radio-info.com.

>
> How would you rank that receiver against the Sony ICF-2010 with its
> superb synchronous detector?

Dear Larry,

The Sony ICF-SW7600GR has a synchronous detection circuit and is the only small portable radio currently on the market (new) to feature it. This circuit is inferior to that of the ICF-2010 as is the radio in general if you are comparing on an absolute basis. However, the '7600 has the advantage of being light and much more easily carried on trips than does the '2010 and its memories (more of them, by the way) cannot be lost as they can on the '2010. Plus, of course, the '2010 has been discontinued and is only available "used" - as you may know, I do not recommend buying "used" (with the notable exception of collectors who desire a particular model). For daily use (especially for one new to the hobby) I believe it is always better to buy "new;" both the manufacturer and the dealer have an interest in you, both hoping that you will buy more of their products. Plus, with "new," you get a one-year warranty (except if you buy from one of the Ebay dealers in China - good luck then in trying to have a defective radio repaired under warranty!).

There are pros and cons regarding both of these radios but, as I said, on an absolute basis, the Sony ICF-2010 is by far the superior radio (and that includes its sync circuit). But then the Etón E1 is (apparently) superior to the '2010, the ICOM IC-R75 is superior (as a radio) and the AOR AR7030 Plus is better than all of them! Where do you stop? The original poster wants portability, very good performance, and a price tag well under $350.00. I firmly believe that, in a new radio, he will find these characteristics to best advantage in the Sony ICF-SW7600GR.

Best,

Joe

I don't know how long it takes you to think through a brief response, but if I sepnd 30 minutes a day on Usenet, that's a lot. Last I checked, most people have 2/3 of the day and all the weekend free to do whatever they want... or about 128 hours of free time a week.

> His sole
> existence in life is to try and make others miserable

... no, only to those who post material that is not factual, such as your mistaken claims that AM news / talk stations get higher rates than FMs or that AM in general is prospering.

>- this IBOC
> shill would love to put an end to SW and AM DX'ers, to the sole gain

This is the first time SW has come into0 the argument. I think SW of its own is dead in most of the world, and is certainly, being skywave based, not an apprpriate medium for HD.

AM DXers are now very few in number, and hardly have any claim to skywave service when improving hte viability of AM at the local level is concerned. Hey, it's a hobby, not an essential service.

> To his displeasure, SW and analog AM will be around
> for many years,

SW stations numbber perhaps half of the level of the 70's...

AM is dying. In Canada, they have reduced the station count by nearly 60%. South Africa has no AMs left, etc. The listenership in the US dis down to a small level, mostly composed of people over 50. Folks under 40 very nearly do not listen at all to AM.

> as HD Radio/IBOC is failing on AM, and will just end
> up being a niche market for radio-geeks.

Actually, the viable metro signals will all be HD. It does not matter what the marginal signals do, as they represent no listenership.

HD was just launched in 2006... and we all believe it to be a multi-year
building process, not a quick fix. It may never fix AM, however, as the band
is nearly dead.

Dear Tom,

There are suckers born every minute, as P.T.said. As long as people continue to send these characters money (as they encourage the belief that, if one sends them money "to allow their message of 'good news' to be sent 'to all the world,'" the senders will "go to heaven"), these people will stay on the air and, in fact, will increase the number and power of their transmissions. It's a VERY profitable industry, making money off the least sophisticated people who are grasping at straws. All religions and religious organizations solicit money; they have no other way of continuing their existence. Your local legitimate groups and organizations fulfill a seemingly basic need in humanity and, therefore, return much to people in exchange for their money. The so-called "religious" broadcasters do not. They may send a contributor some worthless trinkets but mostly, if one contributes, they then ask for more and more and more money. ("Buy this book, buy that book, buy this item, buy that item, and send me more money money money!") This allows them to increase their broadcasts (think about it - it's a pretty pitiful "religion" that needs constant ADVERTISING to keep itself going!) and, not incidentally, to allow these broadcasters to have a VERY nice lifestyle.

What's the answer? Do not listen to these broadcasts and certainly do not send them even one cent! Your posting here, though "small potatoes" in comparison to the might of these organizations, is a very good step. We have to let at least the readers here know of these fraudulent and inherently evil broadcast organizations.

Thank you for your post. Obviously, I agree with you one hundred percent.

Joe

"In-Stat: Digital Radio Set to Take Off"

"In 2006, 73 percent of respondents to an In-Stat U.S. consumer survey
were aware of HD Radio on some level."

http://beradio.com/eyeoniboc/instat-digital-radio-set/

"Sirius, XM, and HD: Consumer interest reality check" (Alexaholic)

"While interest in satellite radio is diminishing, interest in HD
shows no signs of a pulse."

http://www.hear2.com/2007/02/sirius_xm_and_h.html#comments

This just confirms, the lack of interest for HD Radio, on Google
Trends:

http://www.google.com/trends?q=%22hd+radio%22%2C+xm%2C+sirius&ctab=0&geo=all&date=all

Taking off - HD Radio/IBOC has had its wings clipped ! ;-)

Communist Chinese hackers attack 'anything and everything'

From Federal Computer Week:

"At the Naval Network Warfare Command here, U.S. cyber defenders track and investigate hundreds of suspicious events each day. But the predominant threat comes from Chinese hackers, who are constantly waging all-out warfare against Defense Department networks, Netwarcom officials said.

Attacks coming from China, probably with government support, far outstrip other attackers in terms of volume, proficiency and sophistication, said a senior Netwarcom official, who spoke to reporters on background Feb 12. The conflict has reached the level of a campaign-style, force-on-force engagement, he said.

'They will exploit anything and everything,' the senior official said, referring to the Chinese hackers' strategy. And although it is impossible to confirm the involvement of China's government, the attacks are so deliberate, 'it's hard to believe it's not government-driven,' the official said."

3981. Ban Thwarts 'Year of the Pig' Ads in China

Newsgroup: rec.radio.shortwave
Date: 2007-02-19 16:46:25 UTC
From: Guerite <aim@their.heads>
Message-ID: <12tjl1long4to25@corp.supernews.com>

Communist Chinese Kow-Tow to Islamists

NPR interviews scholar Jackie Armijo about the Chinese government's relationship with Muslims in the wake of an order banning images of pigs as the Year of the Pig begins:

As the year of the pig begins in China, the government bans any mention of pigs in TV ads. Is it truly a newfound sensitivity to the nation's Muslims, who make up about two percent of the population? Jackie Armijo, assistant professor at Zayed University in Abu Dhab, discusses the move with Liane Hansen.
...
[Listen Here] http://www.npr.org/templates/story/story.php?storyId=7480083

"Ban Thwarts 'Year of the Pig' Ads in China"

China's preparing for the year of the Pig, an especially auspicious year which begins on Feb. 18. But the run-up has been anything but lucky for pork fans. Pigs have been banned from appearing in any ads on the state-run broadcaster, CCTV, after an order that is now surrounded by confusion.

The order means that ads for consumer treats such as sausage snacks have been yanked from airing. A brand manager for Tenlow snacks says ads for his company's pork snacks deliver positive messages.

"Both adults and children believe pigs are a lucky symbol, which bring fortune and wealth," Tenlow's Wu Ying said. "Their plumpness means prosperity."

This cartoon pig used in Tenlow's ads would hardly seem subversive. But CCTV has ordered major advertising agencies not to use pig images, cartoons or slogans "to avoid conflicts with ethnic minorities." That's a reference to China's 20 million Muslims, about 2 percent of the country's population.

At a popular mosque in Shanghai, there's general approval of the ban. Given the Muslim taboo on pigs, these believers say that seeing pig images on TV would make them feel very uncomfortable.

"China's building a harmonious society," Hassan Bai Runsheng, the mosque's imam, said. "We see a decision like this in the context of creating a harmonious society between Han Chinese and ethnic minority groups."

Even big multinationals are aware of the sensitivities. A Coca-Cola ad features a cute, Babe-like piglet braving mean city streets to get home for the Chinese New Year. But the company shot a second version using pandas to show in Muslim areas.

For those who didn't take such measures, economic losses beckon.

"It is really messing with people's commercial activities," said Paul French, Access Asia's China representative. "It'd be like [in] the second week of December telling people, 'You can run whatever advertising you want, but no images of Father Christmas.'"

French said he's received the edict but, to confuse matters, not everyone's been given the same orders.

"Some people are told 'No live pigs, but you can have animated or cartoon pigs,'" French said. "And some people say 'No pigs whatsoever.'"

To add to the confusion, one agency told NPR that the pig ban had subsequently been relaxed, while others say it's still in place. CCTV refused to grant an interview on the pig ban.

Whatever the situation, the thinking behind the ban is telling.

"The underlying reason goes to the very core of what it is Chinese government views as its patriarchal responsibility to maintain harmony of the entire society," said Tom Doctoroff, China CEO for the JWT advertising agency.

Doctoroff says it can be difficult to predict what might fall foul of the censors.

"We one time had a Pizza Hut ad ... [where] we had this kid standing up on a desk and extolling in fulsome tones the glory of the pizza to attract the other kids," Doctoroff said. "This ad did get censored because the child, the student, the 8-year-old, was viewed as an alternative center of authority."

Other no-nos include using religious figures, for example Buddhist or Taoist monks. And national icons like the Great Wall should be treated with caution. Paul French said edicts - like one issued last year about dragons - should be viewed against the backdrop of China's rising power.

These orders perhaps mirror how the Chinese government would like to see itself: as the protector of minority groups, the guardian of national icons and the ultimate arbiter of harmony. But that role may no longer be possible.

A tune called "the pig song" shows why. It's devoted to describing the pig's dripping snout, its curly tail and its big ears. Posted on the Internet two years ago, it became a surprise hit, it was downloaded a billion times. Even if Beijing had wanted to ban it, modern technology - in the form of the Internet - would have made that impossible.

From the outside, China's government might appear monolithic. But the saga of the pig ban shows how it's struggling with multiculturalism, riddled with insecurity and beholden to commercial pressures, as perhaps never before.

http://www.npr.org/templates/story/story.php?storyId=7480083

50% Audiences Call 2007 Spring Festival Party Boring

Two networks reflect different comments on 2007 CCTV Spring Festival Party.
Sina web survey shows that 50% audiences think the party was boring, while
Xinhua agency [the largest government controlled propaganda agency in the
world] says over 80% audiences think it was interesting. From Eastern
Morning Post, translated by CDT:

The CTTV Spring Festival Party used to arrange audiences making fake claps.
This year there were not only fake claps but also fake hurray, which became
loud noise. For years audiences have complained about fake singing in CTTV
Spring Festival Party. Unfortunately, there were a lot fake singing this
year, too. Spring Festival Party becomes less and less fun, but the
advertisements are more and more expensive. This year CCTV made RMB
500million (USD 62million) from the advertisement. A CEO's face shown on
screen during the party costs RMB three million(USD 370,000).

During China's "CULTural Revolution" the Communist Chinese used to use
muslim mosques as pig sties.
They used to force muslims to eat pork in public. When a muslim walked into
a Chinese restaurant they would tell the muslims that they would not serve
them pork. But when the food was served it had pork in it anyway, and who
knows what else - LOL!

Is it completly worth getting a shortwave radio, if mostly I just travel to New York, NY, Atlantic City, NJ and stay in my area of Johnstown, PA?

I am not saying that the ICF-SW7600GR is not a good radio or anything but it looks like it's not really under $150 new, so if I am going to buy a shortwave radio for that price, I want to make sure that I will be getting a radio that will work for a very long time and that shortwave will be around for a while. I don't want a radio that I paid $150 for that I will not be able to hear much and will probably hardly use.

I believe I read somewhere that it is a consequence of our
faith-based administration. Most countries don't grant
shortwave broadcasting licenses to private organizations.
Most shortwave broadcasters are government controlled
international P.R./propaganda operations.
The Bush administration open up licensing in the shortwave
bands to private organizations in the US. Thus the crowd of
jammering yahoos eminating from this "nation, under God".

Canada's CBC Begins Series on Censorship

Close to 20 different CBC radio programs this week will examine political and other forms of censorship as a prelude to the Global Investigative Journalism Conference in Toronto, May 24-27.

Examples of censorship past and present in politics, science and music will be discussed daily by hosts and guests on programs of the Canadian public broadcaster, particularly what's been going on in Africa, Iran and what happened in the past in Nazi Germany.

I don't know why Religious Freaks are the ones with the most number of SW radio programming. Perhaps the hucksters of other types haven't discovered the magic of SW?

In any case, they've been a fact of life on SW for many decades. Most of the religious broadcasts of old were more respectable. I have pleasant memories of HCJB's programs. Many were well thought out and very interesting, even if I didn't agree with them.

In fact, not long after WRNO made its debut on SW (remember that Rock of the World format?) WYFR happened. And in the scheme of SW broadcasters, WYFR is tame. After that, the real nutcases took to the air, and it's never been the same since.

I wish others would find a way to maintain a business in SW broadcasting. One would think a nationwide science program of some sort would be an easy sell. But nobody's doing it. I guess advertisers don't know it exists because "nobody is there", and nobody does it because advertisers don't think there is a market.

I never went to any Vietnamese movie theaters because the Vietcong liked to bomb them.One night I was sitting in a bar in down town Saigon and we heard a low wooom noise.We went walking and looking.The Vietcong had bombed a Vietnamese movie theater.

Those nasty stinking filthy muslims don't have a photo of me,and they won't get one either.

My old buddy (Ronnie) came over here this morning and gave me a haircut.I ran an extension cord out my bathroom window and I sat in a metal folding chair in my back yard,it looked like it was snowing back there.About twenty years ago I bought a big Sears Roebuck Craftsman metal lathe at a Dunhill (or whatever the name is) auction in Byram,Mississippi.My old buddy and a buddy of his,(Wendell) (also my buddy) will be here tomorrow afternoon at about 4:00 PM to load that metal lathe on his trailer.They went to Texas a couple of months ago and Wendell bought a metal lathe over there.I don't know how to operate a metal lathe,I would probally hurt myself real bad messing around with a big ass metal lathe.

I may be dumb,but I ain't stupid! ~ Goober on the Andy Griffith show.The Three Stooges have been on SPIKE tv since this morning,back to back through 5:30 PM this afternoon.

I have for sale a Dressler ARA 1500 active antenna. It is complete except for the steel hose clamps which can be purchased at a hardware store. This active antenna covers 50-2000 Mhz with a gain of 18db. I have found that it also works very well on 3-30Mhz . I have used this for a few years indoors only and is in like new condition.

WTKG 1230 puts a very strong signal here in the north at night so you
will be way off the beam. I would think your best bet would be Ithaca
WHCV 870 or Louisville WKJK 870.
I also hear WTDY 1670 Madison WI occasionally.
I didn't check out each station but perhaps one of them is streaming
audio and you could get the program clearly.

870 Ithaca gets clobbered by WWL down in New Orleans. Good idea,
I'll see if any other station does strreaming audio.

regards,
NEO

What is it, exactly, that you want to hear on your radio? (You don't
have to travel to other countries to hear them on shortwave.)

>
>I am not saying that the ICF-SW7600GR is not a good radio or anything
>but it looks like it's not really under $150 new,

It should be no more than that. Check out J&R's price. It's a very
good radio.

>so if I am going to
>buy a shortwave radio for that price, I want to make sure that I will
>be getting a radio that will work for a very long time and that
>shortwave will be around for a while. I don't want a radio that I paid
>$150 for that I will not be able to hear much and will probably hardly
>use.
>

Well, look at it this way. The 7600 is a very fine AM (mediumwave) &
FM portable as well as shortwave. So even if, for some weird reason,
every broadcaster left the shortwave bands, you'd still be able to
hear everything on AM and FM.

Coupled with a set of computer speakers, it's a wonderful radio for
the money. Mine is 5+ years old and works perfectly (with the
exception of the thumbwheels losing "traction" and requiring a little
fiddling.)

That's about 20 stations, all of which are declining in sales demos and
billings.

I use AVG, and get their daily updates, Ad-Aware and Spybot. In spite of this, I think my computer was hijacked in last week's attempt to bring down the net. They say that over 1 million computers were coralled for this action. What bothers me are the invisible trojans, keyloggers and other nasties that sneak in through the filters and lurk deep in the hard drive doing their thing without detection.
My bank has recently issued pages of legal fine print that says, in effect, that if someone gets into your account and cleans it out, it's your fault and they are not responsible. Their encryption (they say) is so good that any thefts are due to your error. I had to reverify at PayPal recently and their new procedure is so convoluted that it gives the impression that they are besieged by very, very, very clever scammers who are after money.
So what to do?
Our local guru says that the only thing to do, given the leakage of current anti-virus programs is to install the type of internet protection used by schools and libraries. He mentioned Drive Shield, CornerStone, and CompuGuard. These programs know exactly what you had in your computer when you start a session, and delete anything that came in while you were on line, returning the computer to its original state. In order to add data or programs you have to disable DriveShield, reboot, install changes, enable DriveShield, and reboot, all of which is a great pain.
Has anyone had experience with these programs?

Why should you care? Anyway, one is an auditor trainer for PriceWaterhouse,
another is the head of the Department of Education legal department in PR,
another is stydying in Orlando and the 4th is in advertising and radio in
Quito, Ecuador.

So far, no lie exists. I stated my elder daughter was born a dual national
(she was Ecuadorian at birth is a true statement. She was American at birth
was a true statement) and chose, later, which nation she would carry a
passport from. Seems simple to me.

You totally miss the main point: AM is declining in audience in the US,
having less than 20% of what it had 40 years ago... Most AMs have an
audience significantly based in over-55-year-olds, which agency advertisers
do not want. Revenues are falling, and many successful AMs are looking to
move their formats to FM to survive.

Canada is eliminating all but a few AMs, and at least one province has no
AMs at all any more. South Africa has no AMs. Most of Latin America has
fewer AMs than 25 years ago, with the exception of Mexico which was always
under-radioed due to NARBA.

The share of listening by 12-34 year olds given to AM is less than 8%....
with 92% and over going to FM.

Clark Broadcasting would be interest in knowing what happened to it's
Sonora-licensed FM, KZSQ.

There are dozens of Jackson, Sacramento, Modesto and Stockton market
stations that have viable signals in Sonora, and the market is part of the
Sacramento DMA.

By US law, and even by the information posted by a knowledgeable poster this
morning, she does. She chose, however, not to use it Under the laws of her
country, she is only Ecuadorian; apparently the US system sees it
differently.

Dear Sir,

Yes, it's well-worth buying a shortwave radio. Your $150.00 (or less) will be money well-spent. You do not yet seem to understand the merits of shortwave radio. It doesn't matter where you travel or don't travel. You do not even have to leave your house to hear many, many foreign countries on shortwave. One of the advantages of shortwave broadcasts is that they travel well. In other words, you'll be able to hear the same programs in Atlantic City, NJ as you will in your home state of Pennsylvania. I always take one of my ICF-SW7600GRs with me when we vacation in California and, believe it or not, often I can hear some of the same programs there that I hear in New Jersey (allowing for the time difference, of course). This is not ALWAYS the case; however, it is easy to find many broadcasts to hear by searching the tables on, for example, PrimeTimeShortwave. After you have learned how to listen (remember - I told you that there is a learning curve and that there is absolutely no way to compress the time necessary fto obtain experience) you will easily be able to determine just what you should be able to hear at any given location at any given time.

By the way, I do the overwhelming majority of my listening right from my home as I do not travel often, just once yearly to California.

The Sony ICF-SW7600GR is a revised version of the Sony ICF-SW7600G (hence the "R") which was introduced back in 1994. I own two of this original model and both still function as they did when new. I now own five '7600GRs, the first one having been purchased in 2001, the second and third in 2002, and the fourth and fifth in 2005. All function exactly the same. All always work perfectly. While I have heard of a very few isolated cases of people having some problems (this, of course, can happen with anything), I personally have never experienced even a "hiccup!" I can recommend this radio without reservation. It is

reliable and very long-lasting. When you actually see one and you "heft" it (and examine it), you'll know exactly what I'm talking about!

What if you decide you "hate" shortwave? Well then you still have one of the very best AM and FM portable radios ever designed. Did you know that one of the features of this radio is a true (and superb) stereo line output jack? If you run FM stereo from this radio (via a $10.00 cable sold at Radio Shack) to your audio system, I'll bet this Sony portable outperforms the FM section in your system (unless you have a very high-end one). And its AM section is one of the best ever designed for a portable. Long-distance AM reception is very easy at night as attested to by many owners. Quite a number of owners have actually heard Europe on the standard AM band with this radio (from within the US), though I personally have not. Still, it's easy to hear Canada, Cuba, the Dominican Republic, and numerous distant stations with the radio just using its built-in ferrite rod antenna. You would be able to hear Illinois, Iowa, Indiana, New York, Massachusetts, Florida, and many, many other states, depending on just where in Pennsylvania you live.

Do I sound like a "shill?" Those who know me from this group know that I'm not. I'm just a very satisfied owner of this radio (and, believe me, I'm "picky"). I do not know of a better radio at any price for one just starting out in this hobby. And, as I originally stated, it is a radio that is so good that the owner will never "outgrow" it. I own a couple of very sophisticated (and expensive) shortwave receivers, yet often I just turn on one of my Sonys when I want to just listen to a program.

I believe you will like this radio. I know you will find it worth its cost.

Best,

Joe

There is really no end to the merits of this radio. Yes, it is more costly than some portable shortwave receivers, but you are purchasing a true classic that will never give you "buyers' remorse."

There are only these (former designation) 1-A clears: KFI, WSM, WFAN, WSCR,
WLW, WGN, WSB, WJR, WABC, WBBM, WBAP, WCCO, WHAS, WWL, WCBS, WLS, KDKA, WBZ,
WHO, WTAM, KMOX, KSL, WHAM, WOAI, WPHT. 5 of them are not news talk, and all
but KFI had declininng billings in 2006.
>
> http://www.northpine.com/broadcast/50kwam.html

Many of these are 50 kw, but not major stations. Remember, about 2 kw on 540
covers more than 50 kw on 1580. Some of the ones on the list are true dogs,
like KBLA and the 1580 in Phoenix.
>
> Analog AM will be around for many years , long after HD Radio/IBOC has

HD was mostly developed for FM, where over 1000 stations are on the air. A
significant portion of major AMs in the US are on in HD.

I said that if one o fthe three underperforming FMs in LA does not recover
int he next two books, it will be considered to reinforce KFI. Clear has
already made some major FM news talk moves, ranging from Tallahassee to New
Orleans to Pittsburgh.

DE,

Q # 1. First - Was her Mother also an American ?
- - - Usually -if- noth Parents are Native Born Americans
{Physically Born in the USA} - You Are An "America-by-Birth-Right".
Example - As Lee Harvey Oswald's life illustrates the US Government

generally 'views' Native-Born-Americans as Americans-for-Life.

Q # 2. Or - Was her Mother 'other-than' an American ?
Q # 2a Is she now over the Age of 21 Years ?
IIRC -if- she 'never' exercised the Privilege-of-America-Citizenship
before or upon turning the Age of 21 years - - - She may have 'lost'
that "Privilege" {Option}.

DE - But I do AM News/Talk Radio and KVML carries
the "Local Weather" and in the Winter up here in the
Foothills of the Sierras "Knowing-the-Weather" at all
times is very important.

The 'old' KKBN-FM before it was bought by Clark was
a "Good" 'local' Twain Harte Radio Station. But now is
part of the mix that Clark owns and operates locally.

Cross-posted to: rec.antiques.radio+phono,rec.radio.amateur.boatanchors,rec.radio.shortwave

I have an interview on tape with Frank Lester W4AMJ (then W2AMJ) who was Mr. Hammarlund from 1955 to 1970. When he was hired by Lloyd Hammarlund (son of the founder) he found the Pro-310 did not come close to specs. He and the Engineers spend quite a bit on bring it "close" to apecs.

The reason you don't see many is that the turret costs $85 per unit. That is what there is the box within a box. Hopefully the band switch cable has only fallen off. Otherwise its a nice box outside and a real dud inside. Lloyd put a stop to production after only a few hundred units!

Frank found that none of the Engineers were hams. Since Lloyd cut off the funds Frank went to work to get some of the Engineers to be hams. He went to work on what saved Hammarlund (outside of several commercial ventures) and that was the HC-10/SPC-10 SSB/CW converter. Frank wanted to use crystal or mechanical filters but Lloyd asked for alternatives (they were cheap)which is the principle reason for the 60 kcs IF's found in the HQ-170, HQ-180, and the HC-10. Lloyd kept the old SP-600 series alive by selling the SPC-10 at several times the HC-10 price to the thousands of users.

But never fear, the idea behind the Pro-310 stayed alive in the guise of the HQ-215.

Hope the Pro-310 turns out to be a great piece of History. Frank could never say why the H emblem was missing from most of the units.

>very high-end one). And its AM section is one of the best ever
>designed for a portable.

I think that's a key point that many prospective swl's don't fully
realize. The 7600 -- like many other "expensive" s/w radios -- is
likely to be better on both FM and regular AM than any radio they are
now using. So even if they don't get bitten by the s/w bug, they will
still have a very good "regular" radio. Just look at what people pay
for high-end AM/FM radios: bose, cambridge, etc. $150 for the 7600 is
a bargain, if you use it as a tuner and direct the sound into some
decent speakers.

>Long-distance AM reception is very easy at

>a true classic that will never give you "buyers' remorse."
>

And on that note, there's always the point that the 7600 will retain value even if the purchaser decides s/w isn't for him/her. Just buy the radio and try it for a year. If s/w isn't interesting... and if the AM/FM reception isn't impressive enough to keep it, sell it! I'm betting that in good condition with only one year's mileage on it, it'll still be worth at least 50% of the original price.

Very funny. They simply misprinted my title in a program. When a convention
has 10,000 attendees and about 300 different speakers and panelists, many
errors happen. Nobody int he industry gave it a second thought.

>>
>> As mentioned, it was my baptismal name... given to me by my godparents on

And your point is? You don't like the name? Tough.

> story straight.

It is perfectly straight. She was born a US citizen, under US law. Under
Ecuadorian law, she was not a citizen until age 18 (many Latin American
nations do not consider people citizens until they reach the age of
majority... including Mexico, I believe). At age 18, she got an Ecuadorian
passport, sufficient in ecuador to be considereed ONLY an Ecuadorian
national. US law saw her as a dual national.

>>
>> So far, no lie exists. I stated my elder daughter was born a dual

>
>
> "David Eduardo: ...She has never been a US citizen. "

Correct. She had a right to citizenship, but lived in Ecuador where she did not exercise it. She swore citizenship to Ecuador at age 18; one country considers here only a national, and the other considers her a dual national. In other words, there are two answers to this question, depending on whose laws you folow.

One site I looked at while trying to find out more
>> about this beast stated the medallion was attached
>> originally with double-stick tape! No wonder its missing.

Yes. My medalion has not been reinstalled because I have not repainted it -
but it was double sided tape - and not very good. I almost threw mine out
by mistake because I did not find it in the packing.

Her mother is Ecuadorian. Under US law, she was a dual national at birth. By Ecuadorian law, she was not a citizen of any country until age 18, when she became Ecuadorian. Obviously, each country has different laws or rules. That's what makes this interesting beyond the personal aspect.
>
> Q # 2. Or - Was her Mother 'other-than' an American ?

Ecuadorian.

> Q # 2a Is she now over the Age of 21 Years ?

Read the thread. She was born in the mid-60's.

> IIRC -if- she 'never' exercised the Privilege-of-America-Citizenship
> before or upon turning the Age of 21 years - - - She may have 'lost'
> that "Privilege" {Option}.

Majority in ecuador is 18, not 21. And under local law in the naiton where she lives, getting an Ecuadrian passport required an "acta" certifying she renounced any other citizenship. Since she has not tried to live in the US or become a citizen, I don't know what the outcome would be were she to try to recover her US citizenship of birth.
>
> the law is a complicated thing . . .
> which naturally confuses me ~ RHF

It confuses all of us in this case, as the laws of two nations are not the same.

KFI has over 50% of its listeners in 55+, a demo no significant LA
advertiser buys. And the station is ageing every year, and will start to
decline in billings.

Your point is? There are many 50 kw stations, but only a few are the original 50 kw Class 1-A clears. and not all are news /talk, either. Many of the remaining 50's are either directional, lower power at night or both... many can not even cover their own full local market. A good example is the former WTOP, a 50 kw AM in DC... that needed several AM and FM repeaters to cover the DC market incompletely. They moved to FM last year, and are doing much better now.

Ok, thank you guys/gals for all your help. I believe I am defiantly
going to purchase this radio then. It will make a perfect addition to
my radio collection. Especially with my Uniden BR330T, even though
that's not a shortwave reciever in the true word, it's an awesome
scanner and receives some shortwave.

Now my last question is, what is the trick to shortwave, to figure out what station you got? I hear that stations can change all the time and some stations seem to have the same frequency depending on what area they are in. Also, I kinda understand, but why is it that shortwave can actually go so far yet AM and FM barely go anywhere? I guess shortwave stations just have more power right?

Don't count on it.

E1 is 'XM' ready. That's not to say it's an XM radio. It requires an
XM antenna and the outboard XM tuning module. Both optional extras at
additional cost. The only thing the radio does to produce XM is address
the outboard XM tuning module through the operating system. If the XM
outboard tuning module is not connected, the XM functionality doesn't
show up in the O/S.

Removing XM capability requires little more than removing the
connector for the outboard tuning module.

> {Physically Born in the USA} - You Are An "America-by-Birth-Right".

That's true as long as at least one of the parents has resided in the US at some time in their lives.

When only one parent is a US citizen, then the requirements for passing citizenship to the child vary depending on whether the parents were married at the time of the birth, as well as how much physical presence the US citizen parent had, in the US, prior to the birth. The required amount of physical presence has changed over the years.

It should be noted that IF the requirements for citizenship are met, then the child is automatically a US citizen from birth. It's not an option that they can choose to take if they wish.

> that "Privilege" {Option}.

There is no requirement to exercise US citizenship by the age of 21 in order to keep it. There was, prior to 1978, a requirement for a US citizen born abroad of US parentage to move to the US and live there for at least five years by age 28, in order to preserve their US citizenship. But that law was repealed in 1978. It wouldn't have affected anyone who didn't reach their 28th birthday by then.

It is, in Ecuador. Or, at least, questionable. In the 70's and 80's, upon becoming a citizen at 18, the age of majority, any "dual national" (a concept not then recognized there) had to sign an act by which they renounced any other allegiances. Given that "swearing an oath" to another naiton or "renouncing" U.S. citizenship were even prohibited in the introduction to each US passport at the time, there is weven a grey area in US law (it is still, in modified form, parts 2 and 4 of "Loss of Citizenship" in my 1997 passport).

As mentioned, many Latin American countries consider children to age 18 to be nationals but not citizens. Citizenship is generally conferred at the age of majority, usually 18.

The age of majority in Ecuador is 18, and to become a citizen (which one is not up to 18, no matter who the parents are) one had to renounce all other allegiances, as I said above. Such constitutes both an oath to Ecuador and a renunciation of other citizenships...

While US law may be more tolerant, Ecuadorian law at the time was not. Thus, we have a dichotomy: The US may consider the person a citizen and a dual national , while Ecuador does not. This may be an example of how one nation allows dual nationals and another does not... for the same person!

Please see Mr. Gallagher's very informative posts in regards to US immigration law on dual nationals born abroad of one US parent. I defer to him on the US law part of the discussion, as he obviously knows more than

you or I do.

Wait! Didn't you say in the past that it was given to you by your Mother at your baptism?

At any rate, here is a quote from August 20, 2006 in alt.politics.immigration:

"Funny, because I was baptized in 1947 and "Eduardo" is a name my mother liked from the time she lived in Europe."

I guess your godparents liked it too. Myself, I would have baptized you 'Stupido'.

Correct. My mother selected the name, and the godparents "gave it" at the ceremony... as in "they gave the response" That's the way it is done. The priest asks the godparents, "and what name have you selected..." and the godparents respond. The person who decided on the name can be the parents, or the whole family, I suppose. In my case, it was my mother... who used a

name she liked from when she lived in Europe whjich was, as required, also the name of a saint.
>

You don't understand the baptism ceremony, obviously. When my daughters were baptized, a saint's name was added to the first given name... such as Jennifer Anne Altieri Gleason, and so on. In this case, the parents decided, and the grandparents answered the responsorial question as was the custom.

The fact that the godparents give a response does not mean they made the decision, although they could have been given the honor if the family had wanted.

You make an issue out of the simplest things.

For what ever it is worth XM and Sirius issued the long expected
announcement they will be merging. If this agreement eventually
passes muster at Justice Dept., will the broadcast standards also be
merged? Will one standard win out over the other or will yet a third
one emerge? I don't know, but I would hold off buying into an XM
configured G1 until this is resolved.

Plea for Others Not to Spy for the CCP

"The longer they are involved, the harder [it is] to get back to a normal life," he said. "And I believe there is a line, and if you cross the line-then you'll never have the chance to get back. The CCP [Chinese Communist Party] or an agent may think you are useless. They remove you or even leave you untouched [but] I think [in the end] your conscience will kill you."
...
http://en.epochtimes.com/news/7-2-16/51826.html

At one point on the third day of his interrogation, a man who appeared to be a higher-level PSB official exploded at Wang: "You should know what crimes you've committed! The 'Nine Commentaries on the Communist Party' [an editorial series published by The Epoch Times] attacked the great Chinese Communist Party. It made the leaders of China look bad. Now everyday someone is reading articles on the Web site of the Hong Kong Epoch Times, where you work. Everyday, someone is reading The Epoch Times on the street. The influence is very bad. What do you think should be done? Even execution and dozens of years in prison are [punishments that are] too light [for you]!"

And also of non-commercial FM, we might add.

Here's what I think is the reason. Some branches of Christianity put pressure on their members to do missionary work. Now really doing missionary work is hard; you have to meet people one-on-one and persuade them to listen to your message. So it's a lot easier to just donate money to people who are doing missionary work, and consider that your obligation is met. And the broadcasters have become expert at convincing their donors that the world is full of people who are just dying to hear the Christian message, in English yet, on shortwave radio.

SomeOne Wrote
>>why is it that shortwave
>>can actually go so far yet AM and FM barely go anywhere?

FM is in the VHF band thus is essentially line of sight (like TV Stations)

AM stations have a coverage during the day that is local - a few hundred miles example I am in San Diego and can pick up LA stations 90 miles away. At night one of the atmosphere layers dissipates and AM stations can be heard all across the country. Example on a good night during the winter I can pick up WGN Chicago - 1700 miles

For AM you will need a good antenna and listen at night during the winter months.

All this is explained (no math) at URL:
http://ecjones.org/propag.html

Hardly. Since most of the attendees already knew who the presnters were at
my session, I doubt most even noticed.

> The "misprinted" your article, eh? Funny how lies can cause "typos",
> isn't it?

I have no idea what the reference you make is... we are talking about a
program (also available on the web) for the NAB convention several years ago
which had my title truncated... there was no article.
>>
>> It is perfectly straight. She was born a US citizen, under US law.
>
> You're the one who said she wasn't a citizen.

Under US law, she may be... you can see from the interesting infromation
from Mr. Gallagher that the issue is not balck and white. She was registered
as a US citizen at birth, she chose not to ever get either a US passport or
to pursue the citizenship otherwise. So, 40-some years later, she is
Ecuadorian.
>

Correct. As Mr Gallagher has pointed out, while another goverment may not
consider her a dual national, in many cases the US government does.
>>
>> > "David Eduardo: ...She has never been a US citizen. "

No, actually there are different answers if you are a representative of the
US government or the Ecuadorian one... without even going into what the
individual considers themselves to be.

If any of your co-workers surf the Internet here, I would be pretty
embarrassed, if I were you, posting all this personal information,
then being caught mutiple-times spreading lies. Now, the whole world
knows who you are, and just like HD Radio/IBOC, a complete farce !
This just shows, what a dumbass high-school dropout you are !

As I said, it extracts your wrath. Unfortunately, you are not always
particularly amusing... many of your responses are the same, over and over

A number of my co-workers follow these exchanges with amusement.

In fact, I showed a couple of your posts about AM news talk billing and operations to the managers of two of the 50 kw stations on your list (the one you posted a link for) and they had a grand old time chuckling about how little the general public knows about the actual operation of radio stations. The comment about AM news talkers getting higer rates than FMs got more laughter than a good Leno monologue.

> Now, the whole world
> knows who you are,

I have never hideen my name on Usenet... or even back to the BBS era on the Well.

> and just like HD Radio/IBOC, a complete farce !

There are already over 1000 HD FM's, and there are increasing numbers of receivers. Nobody in the industry ever thought that the project would bear short-term fruit (heck, the development started around 1991) so nobody in the industry, today, thinks that HD is a farce. It is simply one tool in a kit of many things radio has to do to remain viable.

AM, on the other hand, has bigger problems than whether HD will work... the entire band, good stations and bad, is in rapid decline and the remaining listeners are ageing.

> This just shows, what a dumbass high-school dropout you are !
>

As I said, I dropped out to put my own radio station on the air in a large market... a station that became #1 in its first few months on the air. I must not have been too dumb, then.

4088. Communist Chinese Salaries: May as well get used to it.

Newsgroup: rec.radio.shortwave
Date: 2007-02-20 21:51:36 UTC
From: Guerite&#65533; <aim@their.heads>
Message-ID: <12tmr9ththkn109@corp.supernews.com>
Source record: 106087
Cross-posted to: us.politics,rec.radio.shortwave,alt.politics.bush,talk.politics.misc,alt.impeach.bush

New Internet Phenomenon: Showing Salaries Online

More and more Chinese are putting the details of their salaries online. A
Yi, an associate professor at Beijing University, posted a break-down of his
monthly salary on his blog in September of last year.
http://chinadigitaltimes.net/2006/11/600_dollars_an_associate_professors_monthly_salary_a_
yi.php
His post attracted more than 850,000 clicks in the first week, according to
China News.
http://www.ce.cn/xwzx/gnsz/gdxw/200701/28/t20070128_10234180.shtml

A Yi is neither the first nor the last to do this. In fact, people from
government officials to ordinary residents are revealing their salaries on
the Internet, although most of them are doing this anonymously. Chinese
Internet users coined a lively term to describe this phenomenon: showing
salaries (???).

Sohu.com, a popular Chinese portal, created a special page named "a complete
collection of salaries in all sectors and industries (??????????).
http://money.business.sohu.com/s2006/licaigzt/
" According to the website, the most noticed salaries are from five sectors:
education, petroleum and chemical, postal service, civil servants, and bank
employees.

Below is the detail of an ordinary postal service employee's salary
http://club.money.business.sohu.com/businessmain.php?b=licai&c=82&a=3036022
(pre-tax, and without deducting insurance fee and housing provident fund
?????):

[7.75 Yuan = 1 USD]

Monthly salary: 1,200 yuan
Monthly bonus: 900 - 1,000 yuan
Night shift bonus: 10 yuan for one shift
Meal stipend: 5 yuan a day

Click here for more salaries.
http://money.business.sohu.com/s2006/licaigzt/

Since Univision is part of the HD Radio farce, did your co-workers
find this funny:

"Dead Technology Walking"

"Deader than Microsoft's new iPod competitor Zune this holiday gift
buying season will be HD radio. Expensive. It has no rhyme nor reason
to anyone who doesn't own or operate a radio station. It's remarkable
to me that any sane radio executive can believe that HD radio will
give the industry the rebirth it needs to satisfy its prime audience
-- Wall Street investors -- I mean, listeners."

http://insidemusicmedia.blogspot.com/2006/11/dead-technology-walking.html

"In-Stat: Digital Radio Set to Take Off"

"In 2006, 73 percent of respondents to an In-Stat U.S. consumer survey
were aware of HD Radio on some level."

http://beradio.com/eyeoniboc/instat-digital-radio-set/

1) http://www.alexaholic.com/hdradio.com+sirius.com+xmradio.com

2) http://www.google.com/trends?q=%22hd+radio%22%2C+sirius%2C+xm&ctab=0&geo=all&date=all

As far as consumer-interest, HD Radio is "Dead Technology Walking".

Verdict: nobody laughed here in the conference room...Nice try.

Ismar SantaCruz did. He said it would be a dud.

We all know that HD is a long-term project, and we don't expect immediate rewards, even from the HD-2 channels. To say that something that is less than a year old (since the official launch and the Consortium ad campaign's commencement) is a dud so early on is silly. In fact, since HD is an incremental opportunity for radio, not a replacement, the speed at which it develops is not a significant factor.

Why of course! Nobody laughed, because nobody was there.

Get a clue, boy!

LMFAO
